vacation at the national convention at Baltimore.

Dr. A. E. Halstead of Belleville, accompanied by his grand-daughter, is visiting his daughter at Rogers Park this week.

Welland & Risch are booking a large number of orders for roses and carnations for Memorial day.

Chas. W. McKellar and wife are expected home this week from Hot Springs, Ark.

# GOOD STOCK

And Plenty of It

## FOR DECORATION DAY

In all our long experience we have never had our stock in better condition for Memorial Day than this year. The whole of our great plant, comprising over 2,000,000 square feet of glass, is in full crop with the best of **Beauties, Carnations and Roses.** No other firm has the same facilities for growth and shipment. Send your orders to the

## Largest Rose Growers in the World

And be sure of stock for this important date.

Mrs. Geo. Wietor celebrated the eighty-second anniversary of her birth at her home on Devon avenue, Wednesday evening, May 17. She is the mother of N. J. Wietor and Henry Wietor, the well known wholesale men of this city.

Miss M. C. Gunterberg always hap-

pens to have a good supply of American Beauty roses for the holidays. This is again the case for Memorial day, for her growers have assured her a large quantity for this important day.

Vaughan & Sperry will be right on deck for Memorial day as far as peo-

nies are concerned, for they have agreed to handle large quantities of all grades and colors.

The J. B. Deamud Co. is having consigned large shipments of bachelor's buttons, the cornflowers of the Germans and Emperor William's favorite boutonniere.

## High Grade Stock for Decoration Day

Our specials this week are Peonies, Gladioli, Carnations, Valley, Sweet Peas and Roses, in the latter we have all grades, medium, long and short, but are especially strong on the short which are so well adapted to Decoration Day purposes. When placing your order for cut flowers do not forget to include greens, we can also fix you up on these as we have a large supply. We have all other popular stocks, so don't hesitate to order everything you want.

## Our Goods Are Right

So are our prices. But this is not all. We take the same care with the smallest order as well the largest and are prepared to fill either or both. We are filling both—and filling them right—that is why we have such a good shipping trade, and it makes no difference where our stock goes we have no complaints. Its fine quality, the care taken in packing and shipping just at the right time, insures its safe arrival and in the best possible condition. Repeat orders prove this, and while we are anxious to secure new customers, the approval of our old ones is even more appreciated. We give personal attention to all orders. Let us get better acquainted.

## HOERBER BROS.

Wholesale Growers of Cut Flowers,

Telephone Randolph 2758.

Greenhouses DES PLAINES, ILL.  
Store, 162 N. Wabash Avenue CHICAGO

E. E. Pieser of Kennicott Bros. Co. telephoned to 21 hospitals last Friday, May 19, and told them that they could have all the peonies they wanted, free of charge, if they would only send after them. The people at the hospitals evidently thought that Mr. Pieser should go a step further and deliver them, for not a single party called to accept this generous offer. Without a doubt there were many patients in these hospitals who would have been more than pleased to have some flowers in their room, and anyone who is inclined to look after the welfare of the sick would gladly have accepted this offer.

Kroeschell Bros. Co. reports that the new No. 17 greenhouse boiler for the Stielow Greenhouses, Niles Center, is now ready for delivery, and will be installed shortly. This is one of the largest boilers ever contracted for by a greenhouse concern. It has a heating capacity of 72,000 square feet of glass, and will keep that amount of space at rose temperature (60°) in weather 15° below zero.

At John Kruchten's the stock is arriving in good condition and judging from the large quantity of peonies, roses and sweet peas that are received one would say that he will be enabled to fill all orders for Memorial day. Henry Kruchten has been suffering considerably the past week from a severe case of ptomaine poisoning but improved sufficiently to be at the store this week.

The Florists' Club transportation committee has chartered a special car on the Chicago & Milwaukee electric line for June 1, when a joint meeting will be held in Milwaukee with the Florists' Club of that city. The car will leave Evanston at 2:30 p. m., arriving at 6 p. m., returning will leave Milwaukee at 10 p. m. The round trip fare will be \$1.90.

Tim Matchen, the manager at Peter Reinberg's store, found it necessary to take a hand in the shipping department

on May 18, the orders came in so thick and fast. If the business was as good all through the week as it was on that day, he would have no cause to complain.

Frank Kadlec, who has been ill since February 15 last, is now on the road to recovery, after undergoing an operation at the Evanston hospital. Mr. Kadlec returned to his home last Saturday.

Clifford Pruner of E. H. Hunt's cut flower department returned Saturday, May 20, from Sparta, Wis. A limited quantity of chrysanthemum blooms can be seen at this store this week.

John Welland of Sherman avenue, Evanston, reports business conditions fine, with everything moving well. He is making a considerable addition to his home.

Zech & Mann expect to fill a large number of orders for peonies this week as well as all other good seasonal stock.

Frank Johnson, with the A. L. Randall Co., returned from a successful southern business trip on April 19.

## Buffalo.

## JULY WEATHER IN MAY.

Somewhere, some place, where weather records are made and forecasts sent out, there has been a great mistake, and Buffalo has been one of the victims. July and May have met and got fatally twisted. We are in midseason and only partially prepared from the plantman's point of view, and all the roses are opening too fast, carnations will not hold up, and everything is in a "senile" state, even those in the stores who from tender years should be young and active, are all in, down and out. Notwithstanding the conditions, trade has been fair and some business all the time. Mothers' day was better than last year and with a judicious advance notice, as one of our enterprising florists sent out, will, we believe, make it a very popular day for the florist. Tulips locally grown are good, southern peonies while not plentiful have had a good sale. Lilies have been good but the extreme heat softened them and hurt their sale. Lawn vases, veranda boxes and lawns are being more looked after this year it seems than in the past. More people are taking pride in their flower beds and lawns, which goes plainly to show that exhibitions such as was given by the Florists' Club last fall educate the public to the possibilities of lawn decorations and ere long we hope the public will ask for a spring show.

## NOTES.

An automobile trip one day last week was a gorgeous one, for the country was in perfection, all the trees in blossom, the fields looking fine, every lilac in full bloom. Oh, for a week or more away from the city at the present time and we would say in all earnestness life is worth living; no gas odors, or anything else, only nature's gifts, pure air and spring flowers and a plenty of both.

S. A. Anderson planted the front and a part of one side of the Elks' Club with rhododendron and azalea mollis, which at the present time is very attractive, more so than many other things would be where care plays an important part. Bays and boxwood line the entrance and as it is on Delaware avenue, enhances the beauty of the street.

We note that the Florists' Exchange has a new correspondent signed B. E. C. Well, on a short call that is Bec; while we are not positive of the person, we think he is the one that is always ready and willing to answer the beck and call of all the florists. Good luck to you, B. E. C.

Buffalo has had more call for boxwood and bay trees this year than ever before and by many are used on steps in place of the pots of geraniums, which seems an agreeable change. Several have substituted the smaller ones in place of a mixed filling in veranda boxes.

The mother of J. Rowland Cloudsley of the Lenox Flower Shop died last week after an illness of about three months. Five sons and one daughter survive her.

The Florists' Club expects to hold a meeting this week. BISON.

## Philadelphia.

## EXTREMELY HOT WEATHER.

Extreme hot weather for the season is our portion, May 27 breaking the record of the weather bureau for this date. Such weather if continued will send the few remaining migratory ones off in a hurry and wind the season up with a jolt, instead of going out in easy stages. Cut flowers are plenty in all lines, although the quality is rapidly retrograding. Roses and in fact all flowers are getting smaller and showing the effects

of the hot greenhouses. There is no doubt about peonies for the end of the week or for Memorial day, as the early ones are seen in quantity. Sweet peas are plentiful and of excellent quality, the Spencer type being especially fine. The carnations are holding their own and sell at good prices considering the light demand. Outside shrubbery is now in and snowball, deutzia and spirea are being largely used in design and decorative work. The plant bedding men are having a heavy run and it looks as if everything will be cleaned up. The difficulty is to get geraniums in flower, they not having had time to get rooted since Easter and while very promising but few are in flower, which condition interferes with their sale very much.

## NOTES.

Echoes of Mothers' day are still heard and the demand for flowers, white carnations first, and then almost anything when the supply of those most in demand gave out. The outlying districts of the cities and the smaller towns were the greatest centers of activity. In a small town in Pennsylvania a florist's cash register gave a list of over 500 separate sales. In another place after everything had been sold the questions and explanations as to why there was nothing to offer became so aggravating that the place was locked up and the proprietor and his force decamped until the next day. Mr. Radcliffe of Radcliffe & Tanner of Richmond, Va., who happened in town said that the demand cleaned up everything in the shape of a flower. He thought it an excellent idea as people who scarcely ever bought flowers had to have one for Mother's day. He thinks the trade should do all they can to encourage this new flower holiday.

The Robt. Craig Co. say their business this spring is away ahead of that of any previous season. A splendid stock of Begonia Gloire de Lorraine and Glory of Cincinnati; 150,000 plants in 2½-inch pots seems a good many, but Mr. Craig is afraid they will not have enough for the orders. Cyclamen are also seen in quantity. A lot in 6-inch pots with buds are an unusual sight for this time of year.

The trade in this city heard with deep regret of the death of L. G. Blick of Norfolk, which occurred last week. Mr. Blick was a frequent visitor to this city, buying a large portion of his plants and cut flowers in this market. Edward and Mrs. Reid attended the funeral.

Memorial day is looming up and the commission men say they are busy booking orders even at this early date. There need be no fear of high prices as the prospects all point to a full supply.

August Muller and Geo. Anderson have had a splendid lot of pot hydrangeas that have sold well and graced many a decoration. K.

## Pittsburg.

## A DULL MARKET.

The market is probably in the worst condition it has been in for quite a while. Everything is coming in by the wagon load and going out the same way to the dump. Roses of all kinds and grades are everywhere, no one wants them at any price. American Beauties are about as bad, and carnations but little better. Greenhouse grown sweet peas arrived cooked and were dumped as soon as received. Gladioli are in, but like all the rest of the list, are lifeless. All greens, excepting smilax, are plentiful.

## NOTES.

Randolph & McClements are having a show of hardy blooming plants that make quite an attraction. There are hundreds of hardy azaleas in the collection.

The McCallum Co. expect to handle about four times as many peonies this year for Memorial day as they ever have handled before.

The Zieger Co. are so busy with planting contracts that they are kept going daily until midnight.

Koerble of Jeannette was a recent visitor. J.

## Albany, N. Y.

Raymond A. Pearson, state commissioner of agriculture, has received a report of the discovery of the gypsy moth in this state. Egg masses were found on trees near Newburg, Orange county. The commissioner has given instruction to members of his department to destroy all egg masses found. The pest has been long established in Massachusetts and in six years that state has spent \$2,770,000 for its extermination. The appearance of the moth in this state was expected for some time, but not until this year were the first signs discovered. R. D.

## New York Bowling.

Owing to the illness of William Duckham the bowling match between Madison and New York has been postponed. On Saturday, May 27, Tuxedo will bowl New York at Thums' alleys, Broadway and Thirty-first street. The New York Florists' Bowling Club bowls every Friday evening. The scores May 19 were as follows:

## Cincinnati.

## HOT AND DRY WEATHER.

For nearly the past fortnight we have been having weather more appropriate for July and August than May. It has been hot, dry and close. The early part of this week gives promise of rain and cooler weather; but at that the rain is being administered in small homeopathic doses, and is scarcely enough to settle the dust on the roads. The growers who planted out their carnations before the early wet spell that preceded the present dry one, say the stock is growing splendidly. The prospects for a large supply of flowers of all kinds for Memorial day were never better in this market than they are this year. Peonies, judging from reports from the growers, will be offered in very large quantities for this day. Roses are in good crop and this will immediately last through next week. A full and adequate amount of other lines is promised. As a rule prices the past week have been at their lowest point of the season. Considerable stock moves only at buyers' prices, and in spite of the torrid weather the quality is as a general rule good. A large crop of Killarney roses has started the past few days that promises to last throughout the commencement season. All other varieties, too, are in strong supply. Many American Beauties, and good stemmed ones at that, find their way into street fakir's hands. Carnations of all varieties have slipped a trifle lower in price. Many of the colored ones are showing the effects of the continued hot weather. Peonies are offered in larger quantities than at this time in May for several years. Sweet peas compared to other flowers find a better market than any of them. Other offerings include lilies, lily of the valley, iris, gardenias, stocks, double narcissus and snapdragon. The green goods market is amply supplied in all lines.

## NOTES.

Representatives of The Good & Reese Co. of Springfield showed the new fern, Roosevelt, to the growers in the flower market May 24 and at the Haylin Hotel May 21. The plants on exhibition won universal approbation and the salesmen left town with quite a few orders in their books.

Wm. Murphy, in addition to his other lines, has had a very successful season handling bedding stock. This is the first time he has gone into this line as heavily as he did this year, and he was very successful with it.

E. G. Gillet says that if the quantity of American Beauties kept on coming in the way it has for the past week, he will have no trouble in meeting all commencement requirements.

L. H. Kyrk is right in line this year, as in the past, with many novelties in the various spring flowers.

P. J. Olinger's large peony field at New Castle, Ind., has just come in right this year for Memorial day.

C. E. Critchell, again, in past years, is offering large quantities of double narcissus at this time.

Gus Adrian reports an exceptionally busy season with bedding. His large stock is almost cleaned out.

J. M. McCullough's Sons Co. are receiving a heavy cut of Killarney roses from Bloomhurst.

H.

GALESTOWN, TEX.—All records in the shipping of Cape jasmines were broken May 13 when 1,000,000 buds were shipped to northern cities.

MADBURY, N. H.—W. H. Elliott states that between overhauling his farm and greenhouses and fighting forest fires, that are so current in this vicinity, he has a busy time.

The Old Reliable Firm of Godfrey Aschmann is more active than ever. No competitor can harm him. He will look to your interests. Mail him your orders.

## Schizophragma Hydrangeoides The Climbing Hydrangea

It is the first time that we are able to offer such a fine lot of extra heavy, pot-grown plants of this rare hardy climber. Splendid, strong plants, 2 to 3 feet high, in 6 and 7-inch pots, 75c each; \$7.50 per dozen.

## Clematis Montana Grandiflora

A spring-flowering Clematis, the first climbing plant to bloom, frequently opening its flowers during the last week in April and continuing well through May, the flowers remind one of the Anemone Japonica in miniature, being 1 1/2 to 2 inches in diameter and of a pure white. A clean, healthy, vigorous grower, not affected by disease of any kind, and a vine which is destined to become very popular. Strong 2-year-old plants, 35c each; \$3.50 per dozen; \$25.00 per 100.

**HENRY A. DREER, Inc.,** <sup>214</sup> Chestnut St., Philadelphia, Pa.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vanshan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

BEGONIAS seem to be the only spring bulbs or tubers not in demand this season.

W. ATLEE BURPEE and son David will sail for Europe on the S. S. Olympic, June 28.

VISITED CHICAGO: G. C. Eldering, representing W. J. Eldering & Son, Overveen, Haarlem, Holland, returning eastward.

THE fifth annual meeting of the Iowa Seed Dealers' Association will be held at the Chamberlain hotel, Des Moines, Tuesday, June 6.

THE Chicago onion set growers will hold a meeting at the Hotel Sherman June 8. The last meeting occurred March 17, at which some 10 or 12 growers were present.

HJALMER HARTMANN & Co., Copenhagen, Denmark, are warning the trade against a new cabbage which is claimed to be the same as their Copenhagen Market, introduced last year.

THE protest of Henry Nungesser & Co. was sustained by the general appraisers and yellow lupin seeds, classified as seeds not specially provided for, were held free of duty as grass seeds.

E. W. KING, of E. W. King & Co., Coggeshall, Essex, Eng., and Frank Cullen, a seed grower of the same locality, who are making a trip through the United States as far as the seed growing districts of California, reached Chicago May 21 from Philadelphia, where they were the guests of W. Atlee Burpee. They were accompanied by Frank Cuthbertson, son of the senior member of the firm of Dobbie & Co., Edinburgh, Scotland. Mr. Cuthbertson proceeded direct to California, where he will spend some months with C. C. Morse & Co. Messrs. King and Cullen spent two days in the western capital, resuming their journey Monday night, May 22, and expect to return to Europe with W. Atlee Burpee June 28.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale  
Trade Only.

SAN JOSE, CALIF.

HOLLISTER, CALIF.—At the annual meeting of the Pieters-Wheeler Seed Co., held May 13, L. W. Wheeler was elected president.—Visitors: S. F. Leonard, Chicago; E. L. Page, Greene, N. Y.

PRESIDENT PAGE of the American Seed Trade Association visited Chicago May 20, returning from the Pacific coast. He says the seed growers are compelled to use Chinese, Japanese and Hindoo help, the last named being very unsatisfactory.

CHICAGO.—Prices on the board of trade, May 24, for grass seed were noted as follows: White clover, from \$22 to \$30.—The W. W. Barnard Co. has leased the old Examiner building on Madison street, between Fifth avenue and Franklin street, five stories and basement, for a term of years at \$75,000.

WM. REHM, special American representative of L. Daehnfeldt, Odense, Denmark, was in Chicago May 23 in the interest of his firm, and intended going farther west. Mr. Rehm will attend the Marblehead convention next month. Carlos Jensen, manager of this firm's export department, was in Chicago May 22, returning from the coast.

### American Seed Trade Association.

The twenty-ninth annual convention will be held at Marblehead, Mass. June 20-22, 1911. The opening session is called for 10 o'clock a. m.

The Rockmere hotel has been selected for the headquarters and the following rates and accommodations have been offered to the membership: For 75 to 100 persons, the best rooms, with bath or running water at \$5.00 per day each person. For 100 persons in smaller rooms, or large rooms in nearby cottages, \$4.00 per day each person. For 30 persons in small rooms in cottages, \$3.00 per day each person. Rates include all meals and accommodations, and should be secured in advance if possible.

Marblehead is about 16 miles from Boston and it is necessary to transfer from the South Terminal to the North Station, which may be made on the Boston Elevated. Baggage should be checked through to Marblehead. On account of the necessary change in the convention city made since the executive committee met in January, it has been necessary also to change the programme. This is not quite completed, and will follow shortly. The latest crop reports from the prominent growers will be a feature, and there will be reports of much interest from

our state correspondents in regard to legislative action in the various states this past winter.

C. E. KENDEL, Secretary.

### Misbranded Seeds.

United States Department of Agriculture Circular No. 35, issued May 10, 1911, contains records of the year 1910 on misbranded samples of alfalfa, red clover, Kentucky blue grass, orchard grass and red top, together with the names of the seedsmen by whom they were offered for sale, representing something like 100 seed houses from whom these seeds were procured. All seedsmen should write for a copy.

Twelve samples of orchard grass out of 317 obtained were found to be adulterated as compared with 55 adulterated samples found in 1909. Of 371 samples of seed obtained as Kentucky blue grass 16 were found to be wholly or in part Canada blue grass. Of red top seed, 526 samples, 176 were found to contain timothy. The department conceded that these grasses grow together and that the seed growers or farmers must be aware that the seed is mixed.

### M Herb's Novelties for 1911.

In the list of seed novelties disseminated by M. Herb, of Naples, Italy, in 1911 the following interesting new plants are noted:

*Helianthus cucumerifolius purpureus*, a real red sunflower. All the shades from light pink to deepest purple are to be found in these hybrids, the petals vary from straight, flat, to twisted and pointed with various shades of color from purple around the disk to light pink at the points.

*Salvia splendens aurea*, Canary Bird, a yellow salvia of the same growth and habit of *Salvia splendens*.

*Freesia hybrida nova*, a new strain of hybrid freesias of singular colors such as pink, red, lilac, violet, yellow and orange.

*Bellis perennis tubulosa* fl. pl. a double flowering quilled daisy of various colors, white, pink, bright red, blood red and carmine.

*Cheiranthus incanus* fl. pl. Bouquet, a dwarf and compact growing Brompton stock of carmine-rose color.

*Impatiens balsamina* fl. pl. Goliath, three new distinct colors white, scarlet and violet of vigorous growth attaining a height of about four feet.

*Aster chinensis* fl. pl. Unicorn, of pink, crimson and flesh color, with long narrow petals curled in the centre.

*Felicia* (Agathaea) petiolata, a plant with pendulous, slender stems two to three yards long covered with rosy-purple flowers. It thrives well in rockeries.

*Trichostema purpurea*, a plant that forms a fine foliated bush one to two feet high covered with beautiful carmine-pink buds and flowers all the summer and fall.

*Viola tricolor maxima* Fala, new large flowering pansies with undulated petals of rarest colors.

### The State Testing Seed.

L. Davies, the Washington state dairy and food commissioner will institute a campaign against poor and adulterated seeds. Legislative funds having been provided, a testing station will be established, and an expert engaged to do the testing. Samples of seeds will be collected and persons selling seeds not up to standard will be prosecuted.

## Lilium Harrisii

**[1]** HERE are conditions, and they occur not infrequently, under which all lily bulbs fail to make good flowering plants. There may be, probably are more difficulties attending the growing of Lilium Harrisii bulbs than most forcing varieties and yet

those who do them well have found the early blooms very profitable. In many parts of the south where this bulb has been grown over a longer season and without the overforcing sometimes imposed on the plants, Harrisii has given most satisfactory returns. We are contracting subject to crop conditions a select strain of

# SEVEN TOP TURNIP

Originally introduced by us from South Carolina in 1850 and annually grown for over sixty years under the zero winter temperature of Bloomsdale Farms, the **Landreth's strain of Seven Top** has obtained, by this northern culture, a hardiness not approached by southern-grown seed. All inferences would point that way, while thousands of experiments have conclusively proven it beyond a shadow of doubt; consequently one pound of **Landreth's Seven Top** will, in the dead of winter, produce more greens than can be cut from three times the more delicate southern-grown Seven Top.

Write us how much you want, and we will name you a price.

## Market Gardeners

### Vegetable Growers' Association of America.

B. L. Watts, State College, Pa., President;  
H. P. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 503 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Kusienik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

DURING the first three months of this year 141 carloads of tomatoes and green vegetables were exported from the frontier post of Nogales, Mexico, to the United States, says Consul A. V. Dye. The greater part were sent to Chicago with large shipments to Kansas City and St. Louis as well as the Pacific coast.

### Preventing Onion Smut.

The Ohio Experiment Station issues a leaflet on onion smut. This is a disease spread by spores which attack the plant just after germination. These spores are carried from one season to another in the ground. Onion seedlings started under glass or sets grown in clean soil are not affected by the disease. The Ohio Station finds that a solution of one pound of formaldehyde in 25 to 33 gallons of water will prevent the smut. A "drip attachment" is used on the seed drill which drops the solution along the drill as the seed is planted. Several manufacturers make this drip attachment for onion seeders. The Station Bulletin says:

"Homemade attachments may be made from empty syrup cans inverted, using a perforated rubber stopper in the outlet, connected by suitable rubber tubes with a drawn glass tube point at the end of each. This rubber tube will require a pinch cock to shut off the flow, and the point will need to be set so that the solution falls with the seed before the earth covers it over. The profits from smut treatment where any disease exists are very great, and for this reason the Experiment Station recommends it most strongly."

### Spraying Tomatoes.

The tomato is subject to attack by several diseases, the one most prevalent and widely distributed in Illinois is the leaf spot, often called rust. This disease is especially destructive in the southern part of the state, and its presence may be recognized by the appearance of small circular brown spots upon the lower leaves. The infection gradually progresses upward on the plant, the leaves dying in the order of their infection as the season advances. In severe cases the leaves die more rapidly than new foliage is formed and plants produce unmarketable fruit. On account of the prevalence of this disease the Experiment Station of the University of Illinois has experimented to determine the value of spraying as a means of control. In all spraying Bordeaux mixture was used with a barrel hand pump and when tomato worms appeared Paris green was added to the mixture.

The date of the first application varied from May 16 to June 12, the disease having usually appeared before the first application was made. The plants sprayed every two weeks

throughout the season received six applications, those sprayed until the beginning of the shipping season and those sprayed every four weeks throughout the season, three applications, and the plants sprayed until staked two applications. The effect of the spraying was very marked, the progress of the disease being checked in proportion to the amount of spraying. Unsprayed plants lost much of their foliage early and were bare almost to their tips at the close of the shipping season, while the sprayed plants retained their foliage in varying amounts. Although all the plants lost some foliage at the base those sprayed regularly and often retained sufficient foliage to properly mature their fruit, and were still producing blossoms and green fruit at the close of the shipping season.

The effect of the spraying was further shown by the yield of fruit. Early in the season the unsprayed plants often produced more fruit than those which had been sprayed, but the sprayed plants produced much higher total yields for the entire season. As far as extra early tomatoes are concerned there is, on the average, no

### VEGETABLE PLANTS.

**Cabbage**, Wakefield. All Head. Succession and other varieties \$1.00 per 1000; 10,000 and over 85c per 1000.  
**Lettuce**, Grand Rapids. Big Boston. Boston Market and Tennis Ball. \$1.00 per 1000; 10,000 and over 85c per 1000.  
**Celery**, White Plume. \$1.00 per 1000.  
**Beet**, Crosby. Egyptian and Eclipse. \$1.25 per 1000. Cash with order.

R. VINCENT, JR., & SONS CO., White Marsh, Md.

benefit to be derived from spraying, but when total yields are considered the sprayed plants so far outstrip the unsprayed as to completely overcome the slight advantage of the unsprayed plants in reference to early fruit.

The experiments indicate that it is possible to control the leaf spot by spraying and that the control of this disease does not usually increase the yield of extra early fruit, but very materially increases the total yield during the normal shipping season.

## The Nursery Trade

**American Association of Nurserymen**  
W.P. Stark, Louisiana, Mo., President;  
E.S. Welch, Shegandosh, Ia., Vice-Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

VISITED CHICAGO: Jacs Smits, represent-  
ing Jacs Smits & Co., of Naarden,  
Holland.

THE next meeting of the American  
Peony Society will be held at Horticultu-  
ral Hall, Broad street, Philadelphia,  
Wednesday and Thursday, June 14-15,  
1911.

THE Planters' hotel is but two short  
blocks from the headquarters selected  
by the American Association of Nurf-  
erymen for the convention to be held  
June 14-16. The reputation of this old  
and established hostelry is known  
throughout the land.

IN the protests of William Elliott &  
Sons of New York and of J. W. Adams  
& Co. of Springfield, Mass., merchan-  
dise classified as nursery stock was  
held free of duty as evergreen seed-  
lings as claimed by the importers, and  
the protests sustained.

### Arnold Arboretum Bulletins.

The Arnold Arboretum is issuing a  
series of bulletins for the purpose of  
informing persons who may be inter-  
ested to know when the trees and  
shrubs in the arboretum are in bloom.  
During the spring and autumn these  
will probably be issued weekly, and  
from time to time during the remain-  
der of the year when the necessity for  
them exists. They contain descrip-  
tions of many of the rare trees and  
shrubs to be found in this noted ar-  
boretum and copies will be mailed  
without charge to any one interested  
in them and their cultivation who de-  
sire to receive them. The bulletins so  
far issued treat of the magnolias, prun-  
us, malus, pyrus, ribes, loniceras, sy-  
ringas, rhododendrons and many new  
and rare flowering trees and shrubs.

### American Association of Nurserymen.

The annual convention of the Ameri-  
can Association of Nurserymen will  
convene at the Southern hotel, St.  
Louis, Mo., on Wednesday, June 14, at  
9 a. m., the sessions of the first day,  
morning and evening, including the  
president's address and reports of com-  
mittees and the meetings of the Pro-  
tective Associations. On Thursday  
morning the following papers will be  
read: "The Nurserymen and the Entom-  
ologist," by Prof. S. J. Hunter, Law-  
rence, Kans.; "Spring versus Fall  
Planting of Fruit Trees," Dr. J. C.  
Whitten, Columbia, Mo.; "Ethics of Our  
Business," Harlan P. Kelsey, Salem,  
Mass.; "Fraternity Among Nursery-  
men," Chas. T. Smith, Concord, Ga.;  
"Standardization of Grades," W. J. Ma-  
loney, Dansville, N. Y., E. P. Barnardin,  
Parsons, Kans.; "Standardization of  
Prices at Wholesale," T. J. Smith, Cen-  
eva, N. Y.; "Standardization of Prices  
at Retail," Abner Hoopes, West  
Chester, Pa.; "Should Large Buyers  
Not in the Trade, Parks, Cemeteries,  
Public Institutions, etc., Be Given  
Trade Prices?" Thomas B. Meehan,  
Dresher, Pa., William Pitken, Roch-

ester, N. Y. At the session on Friday  
morning, June 16, the following papers  
will be read: "How to Extend Our  
Wholesale Markets," E. S. Welch, She-  
gandosh, Ia.; "How to Extend our Re-  
tail Markets," J. M. Pitken, Newark, N.  
Y., F. H. Stannard, Ottawa, Kans.;  
"Our Mailing Lists—Who Are Entitled  
to Trade Lists," E. W. Kirkpatrick,  
McKinney, Tex., Jim Parker, Tecum-  
seh, Okla.; "Our Mailing Lists—Should  
They Be Classified?" C. J. Malloy,  
Rochester, N. Y., A. J. Robinson, Bed-  
ford, Mass.; "Our Mailing Lists—How  
Best Kept Up-to-Date," C. J. Brown,  
Rochester, N. Y.

The afternoons will be in charge of  
the entertainment committee and in-  
clude a visit to the Missouri Botanical  
Gardens and a trip on the steamer  
Alton on the Mississippi River to Jef-  
ferson barracks.

### Minneapolis Parks.

The twenty-eighth annual report of  
the Board of Park Commissioners of  
Minneapolis, Minn., for the year 1910  
is a beautiful volume of 150 pages  
bound in linen describing the work  
carried on during the year in the  
beautiful system of parks and play-  
grounds of the city, which comprise  
over 3,000 acres. The report of Super-  
intendent Wirth is very complete fully  
covering the work performed and de-  
scriptions of the several beauty spots,  
and clear and concise recommenda-  
tions of the work required in the com-  
ing year. The planting during the  
year required 135,396 bedding plants,  
41,570 trees and shrubs. The volume  
is replete with fine half-tones of the  
parks and playgrounds and descriptive  
maps of the immense amount of work  
done in the large park system.

### Ornamental Crabs.

Standard crab trees planted in a  
double line on the grass form pleasant  
shaded walks in the summer time, and  
in the spring and autumn are alight  
with flower and brightness of their  
fruits. The species vary considerably  
in size and habit, some attaining a  
height of 30 feet or more, and forming  
large heads, while others rarely exceed  
the dimensions of a low bush. Many  
when mature have a tendency to  
droop, and there are two or three that  
are of a true, weeping habit, and  
which have a charming effect when  
growing in an isolated position on a  
lawn. To be seen at their best the  
crabs should be grown in a situation  
where they have the full benefit of the  
sun, for it is only when they receive  
an ample supply of sunshine that their  
fruit colors to perfection. Soils also  
have a considerable effect on the hue  
that the fruit assumes, those heavily  
impregnated with iron generally pro-  
ducing highly-colored fruit, while  
sandstone has a somewhat similar ef-  
fect. On soil of a different nature the  
fruit may be less brilliant in tint in  
spite of continual sunshine and care-  
ful cultivation.

During recent years, says a writer  
in the "Morning Post," several hand-  
some species have found their way  
into this country from China and  
Japan, and from British and American  
nurseries many others have come  
into commerce. Of all of these, how-  
ever, none can rival the newly-intro-  
duced *Pyrus Medwietzkiana*, or *Pyrus*  
*Niedzwetzkiana* as it is sometimes

called, which was imported from the  
Caucasus in 1891, as the rich crimson  
of its flower-clusters, recalled in the  
autumn by the intense color of its  
fruits, make it one of the most distinct  
and beautiful of ornamental crabs.  
Among the many species differing in  
habit, form and attractiveness it is  
not so easy to select those best fitted  
for any given purpose without a long  
and careful personal study of the fam-  
ily, but it may be said that for group-  
ing in woodland glades or in the open  
vistas of the wild garden the forms of  
*Pyrus baccata* and *P. prunifolia* are  
the most valuable, or if smaller speci-  
mens are required, the Chinese flower-  
ing crab, *P. spectabilis*, the Garland  
crab, *P. coronaria*, and Hall's crab, *P.*  
*Malus Halliana*, will prove useful.—  
Journal of Horticulture.

BURNLEY, ENGLAND***Mention the American Florist when writing***A GRAND NEW CARNATION****Bright Spot**Outclasses everything heretofore grown  
in the pink dark class

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000 \$100.00; per 5000 \$400.00, 25 at 100, 250 at 1000 rates. Place your order now to be in on early deliveries.

**Nic. Zweifel, North Milwaukee, Wisconsin***Mention the American Florist when writing***CARNATIONS**

Ready for planting in the field; order at once  
Lawson Enchantress at \$1.50 per 100; Admiration  
and Scarlet Glow at \$2.50 per 100; Alvina,  
Victory and Winona at \$1.75 per 100.

**ALBERT M. HERR, LANCASTER, PA.***Mention the American Florist when writing***Massachusetts Horticultural Society.**

At the May exhibition, May 20, 1911,  
the following premiums were awarded:

Calceolarias—Six varieties, in pots; E. A. Clark, first. Pelargoniums—Six named show or fancy varieties, in not less than eight-inch pots; William Whitman, first; Mrs. J. L. Gardner, second; William Whitman, third. Six named zonal varieties; Mrs. Winthrop Ames, first. Gratuities—Dr. C. C. Weld, six plants Hydrangea hortensis; E. A. Clark, four Calceolarias; Dr. C. G. Weld, vase of Darwin tulips; George Page, display of Iris Florentina and cut lilacs; Blue Hill Nurseries, collection of lilacs; Mrs. J. L. Gardner, display of orchids; George Page, specimen orchid, Oncidium sphaelatum; E. A. Clark, vase of American Beauty roses; Mrs. E. M. Gill, display of annuals and other flowers; E. A. Clark, tomatoes. Silver medal—A. W. Preston, for specimen hydrangea. First-class certificate of merit—Dr. C. G. Weld, for Laelio-Cattleya hybrid, L.-C. Hyceana, X L.-C. Canhamiana rubra. Cultural certificate—Miss Cornelia Warren, superior cultivation of Cattleya citrina. Honorable mention—R. and J. Farquhar & Co., display of many flowering tulips, lilies and other bulbs; also for Lilium myriophyllum. Vote of thanks—Arnold Arboretum, for display of flowering shrubs.

**P. O.: Berlin, N. J. Williamstown Junction, N. J.**

### Milwaukee.

#### STOCK PLENTIFUL.

The extremely warm spell of weather forced the roses and carnations and the stores have been flooded with stock all the week. All the plantsmen are busy with bedding stock and the growers are getting the outside stock set out and preparing for the summer work. Everything points to a good Memorial day trade with plenty of stock.

#### NOTES.

E. Zimmerman and Fred Holton are busy making preparations to entertain the Chicago Florists' Club on June 1, when a joint meeting will be held. The Chicago delegation has chartered a special car on the Chicago & Milwaukee electric line and will leave the Windy City at 2:30 p. m. and are due to arrive here about 6 p. m.

The C. C. Pollworth Co. shipped out a large stock of bedding plants the past week and the orders are still coming in. This firm's new range of greenhouses which are nearly completed will be devoted to the growing of chrysanthemums.

Holton & Hunkel Co. are well supplied with a good grade of stock for Memorial day and all that is needed now is the orders. This hustling firm does an extensive shipping business throughout the northwest.

Roy Currie has been making good use of the swimming tank at the Y. M. C. A. gymnasium lately and finds this a good way to keep cool during the hot weather.

The M. A. McKenney Co. report trade rather quiet at present, but the season as a whole has been a very busy and profitable one.

St. John, N. B.

Mothers' day trade exceeded all anticipations. One of the churches with an energetic and up-to-date pastor had a special service commemorative of the day, of which notice was published in the papers. The local papers printed special matter appropriate to Mothers' day, one publishing the article which appeared in the issue of THE AMERICAN FLORIST of May 4. Carnations, both white and colored, sold in quantity all Saturday night until 9:30 o'clock and all day Sunday until church time at night. The day was so

# Florists' Coal!!

New River, Pocahontas  
and W. Virginia Coals.

Write or Phone for Immediate  
or Summer Deliveries.

## Pinger Coal Co.

Phone Harrison 6823.

Old Colony Bldg., Chicago.

### Notes of the Chicago Coal Trade.

The price of coal will remain at its minimum until September 1, and greenhousemen who have the room and facilities will find it of great advantage to stock up at the present low summer prices and by so doing save from 30 to 35 cents per ton, which would average a clear saving of over \$12.00 per car.

R. C. Whitsett, of the Whitsett Coal & Mining Co., reports very favorably upon his greenhouse business. He has renewed many of last year's contracts for immediate and summer delivery. He expects large gain over last year in the greenhouse trade and has an extensive list of satisfied greenhouse consumers which he will furnish upon request. As a special inducement he is offering his Sunshine Lower Vein, Brazil Block, Pocahontas mine run, etc. at greatly reduced prices for June delivery and contract.

The Black Gem Coal & Coke Co. reports a very busy month for May, and as a consequence of this and the added agency to their jobbing department of the Producers' Coke Co. of Uniontown, Pa., they had to look for more breathing space, entailing a change from their offices on the eighth floor of the Old Colony building to suite 1535 in the same building, which gives them increased floor space and where they now feel at home. They are now ready to ship a very fine grade of greenhouse coal at greatly reduced summer prices.

Pres. Pinger, of The Pinger Coal Company at the Old Colony building, is busy these days making preparation for his coal orders from the greenhouse men, for after his successful season last winter, he is certain that he can compete with any dealer, for he has the goods, the facilities for quick shipments, and is quoting his coals at very reasonable prices, which is a good drawing card for his company, and of great interest to the greenhouse coal consumers.

Pres. Van Dyke, of the Harrisburg-Franklin Coal Co., returned last Saturday from an extended tour of his greenhouse trade. His reports from the middle western states are very favorable and he has been quite successful in renewing many of his greenhouse orders for immediate and fall deliveries with the result that he is all smiles when greenhouse trade is mentioned.

SPRINGFIELD, O.—At a meeting of the Florists' Club held May 8 John M. Good was the essayist of the evening and gave an interesting talk on the classification of roses. The beautifying of the esplanade and the instituting of a rose garden at Snyder Park were discussed at length.

This is the U-Bar the Bar that makes U-Bar Greenhouses the Famous Greenhouses they are.

Compactness was desired—the height of productiveness was required. Attractive it must be. Economical to heat and work were things the gardeners insisted on. The U-Bar plan, design and construction won out because it stood the test of all the requirements. The reason—the main reason—is the U-Bar—the Bar that makes the U-Bar greenhouses the famous greenhouses they are. No other curved eave house has the U-Bar so don't be misled by houses that look like the U-Bar. Send for catalog. It gives another view and a plan of this particular house.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

## Still Another "Time and Money" Pipe Frame Talk.

LET'S see, last week we said if you only had a list right before you, of the important Iron parts in our Pipe Frame House, you could see at once that it differs in many vital points from any other house put up by any other concern: So here's a partial list:

### 1. Guaranteed Wrought Iron Posts

The so-called rolled iron of commerce is not iron, but steel. Steel will not last in the ground. Wrought iron posts that we put in many years ago are still good as ever. So that's why we use only guaranteed wrought iron.

These posts have two angle flanges bolted to the bottom, giving them a solid anchorage in the concrete. They are bolted to the eave plate by the combination post bracket and bar clasp. No cypress nailing piece is used. It is the same post we use in our Sectional Iron Frame House.

### 2. Galvanized Ice-Clearing Eave Plate

The name tells half of its story; the rest is the great strength it gives to the entire house and the reduction in shade.

### 3. Galvanized Sash Bar Clasp

These clasps give a dry wood to iron joint—prevent end rot and stiffen the house at its vital point.

### 4. Pipe Purlins

Each bar is secured to the purlins by special metal binders. The Purlins are made fast to the gables by the Purlin End Bracer, which is bolted through the gable rafter, and holds the pipe purlins by a set screw. So you see, with our way of doing it the purlins with their pipe columns not only hold the roof up, but stiffen and tie the gables together.

### 5. Clamp Column Fittings

These fittings are interchangeable—they are the fittings that make the famous Giant Arch—the arch that is the tower of strength.

### 6. And Others

Then there are the cast iron foot pieces for the columns—the metal vent straps for joining the sash—the wrought iron holdfasts for each pair of bars at the ridge, and so on, through a list of as many more of the smaller iron parts.

Our Handy Hand Book describes every detail of this construction, and everything else for the Complete Greenhouse. Send for it.

### Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

## SUGGESTIONS FOR CUT FLOWER GROWERS

### Asters.

The early asters should be in the field and have obtained a good start by this time, but it is not too late to make a last sowing for fall blooming to come in the last of September when there is generally a shortage of good stock. Seed sown outside in a good seed bed will germinate very quickly at this season and the plants grown from seed thus sown are much less liable to disease than those raised from seed sown under glass. This disease, which is often called the yellows, seems to be acquired in the seed boxes in the houses for we have never had any trouble with seed sown out doors with this disease in the aster plants. It is better if possible, to plant the late asters where they can be protected from the early frosts. The first frosts in the fall are often followed by pleasant warm weather and if they are severe enough to kill the tender plants a scarcity of stock is the result and a late bed of asters that can be protected is very remunerative.

### Cutting Summer Flowers.

Much of the value and keeping quality of flowers grown outside is dependent upon the cutting and care. The flowers should be cut either in the early morning or after the warm hours of the day toward evening, but the morning is far preferable and at that hour before the sun's rays are so hot that the plants have lost that crisp freshness which they have in the early morning, when if all are not picked it is better to wait until evening. They should never be picked during the warm midday hours when the sun is shining hot upon them. And another matter in picking summer flowers is not to leave them out of water too long after picking. Some growers will pick and bunch and throw them on the ground until they have an armful and then carry them in and put them all in water. By so doing the first that are picked are often in a half wilted condition and the stems have become air-sealed and will not absorb water quickly enough to ever

fully come back and will not last any length of time. Where many are picked it is better to have jars or vessels of some kind filled with water in the field and as soon as a bunch is picked and tied if should be placed in the water. Flowers picked and handled in this manner will keep much longer and be much more satisfactory.

### Sweet Peas.

As soon as the sweet peas are eight inches high they will need support of some kind upon which to climb. Brush, wherever obtainable, is the best and cheapest if the grower does not have to go too far to obtain it, but many growers cannot get this for there is not any scrub growth available, and some other means must be employed. Poultry wire is used by many growers, but this is expensive where sweet peas are grown in any quantity, and entails considerable labor both in putting up and taking down. A simple and cheap method is to drive two by four posts about eight feet apart and stretch cotton strings on each side of the row fastening to small nails driven into the posts. The strings should be about six inches apart and can be added as the plants grow. In the fall the strings can be cut and burned with the tops reducing the labor considerably.

### Gladiolus.

To have good straight spikes of gladiolus is absolutely necessary to have them look well and be satisfactory, and the plants must be supported in some manner or the winds will blow them down and the spikes will become crooked. When the bulbs are planted in uneven rows a stake will have to be placed beside the bulb and as the plants grow tied to this, but where the bulbs are planted in straight rows posts can be driven in the ground about every 20 feet and strong wires stretched from the end post and fastened to the intermediary posts, and as the plants grow they can be tied to the wires. The wires should be about ten inches apart, the lower one one foot from the ground.

### Keeping Flowers in Summer.

To successfully keep flowers during the summer months is a troublesome proposition both to the flower grower and the florist, either in the store or at the greenhouse with those having a retail trade. The store is invariably provided with a refrigerator as are also many greenhouses, but it has always seemed to us that ice never was beneficial to flowers that while they looked very well when taken from the ice chest, yet they last but a short time after being exposed to the air. A much better way to keep flowers during the summer months in our experience is to place them in a dark cool cellar, which can be closed tight during the day and opened in the cool hours of the night. The cellar should preferably be on the north side of the building, but if not the windows on the south side should be boarded up and tightly closed. The floor should be cemented and kept wet. In such a cellar the thermometer can be kept at about 40 to 50° temperature and flowers will keep in good condition a long while. If the cellar gets too warm a large block of ice placed on the floor will greatly assist in lowering the temperature. Another important factor in keeping flowers is the manner of handling them in the water. They are very often kept too wet. The flowers grown during the summer months are very soft and succulent. When first picked they should be placed in deep vases full of water, the stems being all even and going well into the water. They should then be placed in a cool, damp place where there are no draughts. After standing a few hours, long enough to absorb water, the whole length of the stem, the water should be poured off and about three inches of fresh water placed in the vase and the flowers stood in this. They will keep very nicely if treated in this manner and the stems will not become soft and rot as quickly as when standing in deep water for a long period. The water should be changed often for it very quickly becomes tainted. Flowers placed in water in this manner and in a dark cool cellar with plenty of moisture, that is thoroughly ventilated at night will keep much better and last much longer after being exposed to the air than those placed in refrigerators. Hardy ferns can be kept in this manner for a long time; these dry up if left out of water and quickly spoil if placed in deep water, but with a little water in the bottom of the vase and placed in cool dark quarters the water being changed each day they will keep for weeks. If the tips get dry and shrivel they can be thrown into a tub of water and will freshen up again.

MUNCIE, IND.—Articles of incorporation have been filed for the Williams & Clark Floral Co., with a capital stock of \$10,000. The directors are Emma Longfellow, R. J. Williams and C. C. Clark.

SYRACUSE, N. Y.—The prize committee of the Syracuse Rose Show, which is to be held at the Y. M. C. A., June 19-20, has arranged for 50 classes, 40 of which are offered for amateurs. An invitation has been extended to the children of the Onondaga Orphans' Home, St. Vincents Orphan Asylum, and the House of Providence to visit the show on the afternoon of the second day.

### Wedding Decorations.

SEE SUPPLEMENT WITH THIS ISSUE.

The month of June has always been the popular selection of brides for the wedding ceremony and the florist is sure to be called upon to decorate for one or more of these occasions during the month. It is also the month of roses and these are always in demand and the popular flower for these ceremonies, but there are always many other flowers that are available for the purpose of decorations that can be advantageously used, such as the many hardy shrubs and herbaceous flowers that bloom so profusely during this month, especially can these be used in the large decorations. The church decorations are generally the more elaborate affairs and require the use of a large amount of both plants and flowers. The backgrounds of churches are seldom the best to make the flowers show to the best advantage and a background of palms and decorative plants or festooning and draping of greens is required. It is therefore necessary that a good line of decorative plants is at the command of the decorator especially during June, for with that favorite green for these occasions, the southern smilax, out of the market, the indoor greens are the only ones available, except for very heavy decorations when the laurel can be employed, and these make a large decoration very expensive. Most churches are finished with dark hard wood, and the walls often of a soft gray, which do not either harmonize

nounced feature of the work. Whatever is chosen it is better to use the flowers with which a large effect can be produced like the lilies or peonies, but some of the cut shrubs are equally adaptable for this purpose, the sprays of philadelphus, often called syringa, are very effective when properly tied on the pew rails. House decorations will require the same careful consideration that is given to receptions and parties, that is the flowers chosen should be in harmony with the walls and decorations in the rooms, and these should be carefully studied that the proper contrasts may be brought out. Ribbons upon the pew rails and in other suitable locations are a necessary adjunct to these decorations but should be selected with care and used with judgment.

### London Theatre Decorations.

The attractions at Drury Lane theatre on Wednesday night, on the occasion of the gala performance given by command of the King in honor of the Kaiser and Kaiserin, were many, and certainly not the least important was the remarkable demonstration of floral art by W. Cutbush and Son, of Highgate and High Barnet. The decorations of the grand entrance, the rotunda, the rotunda gallery, the king's staircase, the retiring rooms, the balcony, and some other parts of the house were entrusted to this well-known firm, and it is not too much to say that in the execution of their commission they surpassed themselves, a feat not easy of accomplishment having regard to the high position they occupy as floral decorators. The general scheme was characterized by

THE KING'S STAIRCASE, DRURY LANE THEATRE, LONDON, ENGLAND  
As Decorated By W. Cutbush & Son, May 17, 1911.—From Gardeners' Magazine.

or contrast with the flowers, especially with the pink shades, and the green background becomes an absolute necessity. The selection of flowers for the pew rails which is a prominent feature in these decorations is made a careful study by the prominent florists, and with the vast amount of material which can be obtained at this season this part of the decoration can be made very handsome and a most pro-

lightness and softness of coloring; but, soft as were the colors of the flowers of the various kinds of plants employed, they were sufficiently bright to produce a rich and tasteful effect. The chief flowers employed by Messrs. Cutbush in carrying out the scheme of decoration were rambling and dwarf roses, the pure white *Lilium Harrisii*, bright pink hydrangeas, white marguerites, and rich red rhododendrons,

and in association with them were graceful palms in variety and bamboos.

The grand hall was richly embellished with rambling roses and hydrangeas, and gave an excellent foretaste of what was to follow. The rotunda was remarkably attractive, the plants being arranged to form a series of four bold groups in which large specimens of finely-flowered rambling roses, white lilies, and white marguerites, relieved by tall feathery palms, such as *Cocos flexuosa* and *Acer negundo variegata*, the white variegation of which produced a delightful contrast as seen under the influence of the electric light, to the pink, rose and red hues of the rambling roses. Ascending to the rotunda gallery there are a dozen or more alcoves, all of which were filled with rambling roses grown in pillar form, and white lilies set in a groundwork of dwarf polyantha roses which were splendidly flowered, and contributed in no small degree to the general effect. Between each alcove was a well-developed specimen some seven feet or eight feet high of the elegant *Cocos flexuosa*. From the cluster of electric lights depending from the roof were festoons formed with Dorothy Perkins roses and trails of smilax, and these caught up and the lower ends secured to the balustrade, produced a distinct and extremely beautiful effect.

Leading from the rotunda gallery is the king's staircase, and this Messrs. Cutbush were successful in embellishing in a manner that, if not beyond praise, was such as to deserve the heartiest commendations. Rambling roses were used trained as specimens, chiefly in pillar form, and also for clothing the balustrades with foliage and flowers. At the base of the roses was a fringe of flowers, chiefly dwarf roses and white lilies. The floral decorations in the large apartment set apart for the King and Queen, the Kaiser and Kaiserin, and their suites were characterized by simplicity; and, while these were remarkably beautiful, the chief effect was produced by the tall, finely furnished kentias, of which there were a dozen or more. In the grand circle brightness was given by festoons of pink roses and smilax and asparagus, and over the stage were bold festoons of laurel.

It may be of interest to add that in carrying out the decorations which we have thus briefly described, W. Cutbush and Son utilized 2,000 pot roses, 1,000 palms, 400 marguerites, 250 hydrangeas, 2,000 ferns of various kinds, and 250 *Lilium Harrisii*. The principal roses were Dorothy Perkins, Electra, a scarlet polyantha of much merit, Hiawatha, Mrs. F. W. Flight, and Crimson Rambler. In addition to the decorations Messrs. Cutbush supplied 105 bouquets of carnations, each consisting of 12 blooms arranged as posies with their stalks in silver handles. With the exception of two, the variety used was the rich pink Winsor, and in these two, which were presented to the Queen and the Empress of Germany, the rich pink Malmalson Princess of Wales was used. The task undertaken by W. Cutbush and Son on Wednesday was a heavy one, and the success achieved was so complete that they may be heartily congratulated on the results of their efforts.—*Gardeners' Magazine*.

### The Armlet Corsage.

Too much stress cannot be laid upon florists recommending this improved style of corsage for all dancing and wedding functions. It is worn on the left arm just above the long elbow glove, where it will keep in much better condition as it is not crushed like the old style corsage with its recent stupendous dimensions. The armlet corsage has become very popular in Paris and London and wherever it has been suggested, and bids fair to be more so for the 1911 June weddings.

A marguerite amulet corsage made with small showers, using the buds just breaking for the showers attached to white gauze ribbon, makes a pretty setting for the bridesmaids. Again, an amulet made of lily of the valley arranged to encircle the upper arm, massing the flowers and tapering toward the elbow, in a sort of a triangle form with the point downward, with small showers attached to white gauze ribbon, is effective. Sweet peas make a good amulet combined with lily of the valley, using the valley for the showers. A choice and dainty selection for the amulet is the little pink moss roses combined with maiden hair ferns. White lilacs, arranged in small clusters, is excellent, but the clusters must be very small and arranged on a wire stem with a few small clusters of the flowers drooping for the shower, if a shower is to be used, but do not use the foliage of the lilac, maiden hair in small bunches will make a much more dainty amulet. Pansies are also a very nice combination with maidenhair.

A. E. KILMER.

### Hints for the \$1,000 Rose Contest.

It is fair to assume that rose-growers all over the United States will desire to compete for the \$1,000 offered by the Panama-California Exposition Co. for a new rose, and also that most of them will be unaware of the peculiar conditions confronting a rose when it strikes the soil of San Diego, writes Alfred D. Robinson in *The Californian Garden*, and a few hints by one who has grown roses extensively in the locality may therefore be useful.

It has to be a dry weather rose, for eight consecutive months in the year are practically rainless. It has also to be able to take a steady sun diet. Experts probably can better work out the requirements from examples: Kaiserin Augusta Victoria is decidedly the best rose grown in habit, quality of first class bloom and continuous blooming season. If it has a fault, it is that it is too full and heavy. The Cochet all do well, but their straggling habit of growth is against them, and they are very apt to be weak in the neck. General McArthur does wonderful things, but it is not so floriferous as the two former. It is the only one so far tried here found to be really satisfactory. Frau Karl Druschki does well but has practically only two crops a year, one in the spring and the other in the fall if dried off in the summer. Clara Watson is prone to mildew and no other as capable of meeting the conditions of the contest as those mentioned. If Kaiserin could radically change its color it would probably win very easily.

NORTHAMPTON, MASS.—F. D. Keyes is preparing to add a greenhouse 28x75 feet to his plant on Fruit street.

## THE PERENNIALS.

### Bulbous Flowers.

The borders are now full of promise of good things to come, narcissus are in full bloom and tulips are showing buds in great variety, these will be a great display in a few days, reminding us that these indispensable flowers of spring are the great feature at this time. The better way in all border planting is to plan for this spring effect, to be followed by the earlier herbaceous plants, and these of themselves will complete the year in the garden. There is only one way to plant bulbs and have them look well with the other occupants, and that is to follow the plan as adopted with the rest of the planting, in masses not too streaky. We have seen borders that when planned looked like breakfast bacon, a streak of lean and another of fat, and this was the appearance all summer, the idea being when one kind went out of bloom, it was not missed, but made up by the other. It did not satisfy at any season and all was changed. If tulips are to be used, the one variety should be by itself to get first of all the effect of color, and again, the season of bloom, for among the various groups there is a wide season, beginning with the early bedders and ending up gloriously with the Darwin section. The first named are useful only for the earliness, and the later the kind to bloom, seemingly the longer they last and the better the quality or texture of flower. It should be borne in mind too that it is not necessary or even wise to lift the bulbs each year after flowering, but let them remain at least three years if they seem to do well. By that time the various groups must be marked when in flower and lifted after the foliage has died down, keeping each kind separate, for there is no greater abomination than a mixture, especially that of the several classes of tulips. When lifted and dried slowly in the shade the better bulbs may be sorted, cleaned and put away for planting later on at the proper time.

The narcissus seem to be specially fitted, when planted in clumps, for the beautifying of margins of shrub plantings, they add interest before other bloom is noticeable, and the various sections of the family are all adapted to this use from the white Poeticus to the giant Emperor and Empress, using the same general plan of masses of one kind, or in small borders a good group of say 10 to 12 bulbs of each will give the same result. The Poeticus will also do well in grass and become naturalized, we have had them live and flower freely in an old orchard for 75 years and this without any care or nourishment, there is little doubt we owe many of the diseases of bulbs to overfeeding with rich manures. The proper time and the best way to lift bulbs is when the leaves are about to die down late in June, the root action is also completed, but with the Poet's Narcissus this is never quite dormant and no matter when one lifts these there are some live roots, but the rule holds good.

Spanish and English iris have come to the front as forced flowers of late in a surprising way, and these are even better when grown in the borders, they are better the second year and should be lifted the third for the bulbs in-

crease rapidly by offsets, and the larger ones are far better than one can import from Holland. The English iris flower is later than the Spanish and are stronger flowers; it is well when planting outdoors to combine the two in some way to get the prolonged season. One has to be careful when buying these to avoid the olive-brown tints as these are not pleasing to many people, but the clear white, blue and yellow seen in the other varieties are most pleasing, especially when we see a vase of one color nicely arranged. These iris seem to do well in our heavy clay soil when it was supposed a sandy well drained loam was essential. There are surprises every year to those who have pre-conceived ideas, and the fortunate one is he that can change, or rearrange his notions so that they may be of use to him later on. This is an essential in horticulture.

It may be with reason said that this talk on bulbs is not in keeping with a series on herbaceous plants, but when we realize how much is due in the way of decorative value each spring to the bulbs, it would be a bare garden without them. The three kinds named are by no means all of value, as much more could be said about the scillas, chionodoxas, puschkinias, snowdrops, erythroniums and others, all of which come and go before the tulips begin. All of these are best naturalized in grass that need not be cut with the lawn mower early in the year. Their foliage matures in summer and this must be allowed to grow or the bulbs soon lose vitality. We have made the mistake in the past of planting these little bulbs too deep to avoid frost. This was a wrong reasoning, for frost does not hurt them and we cannot avoid its action except by too great a covering for the good of the roots. Let them take their chance in the woods or semi-wild garden spots with the trilliums and hepaticas, and they will be harbingers of the pleasure to come year after year.

Nothing is more harmful to bulbs than direct contact with manure newly dug in the ground, and if advantage is taken of the lifting of them to enrich the soil and replant the other occupants, it is well and most necessary to remember that bulbs are often started to decay through the application of natural manures newly applied and not well mixed with the soil. If any vacancies appear after the winter, and are not already filled up, it is still possible to plant annuals either by seed or transplanting. There should be no bare ground at mid-summer; weeds are said to be plants out of place; plants in place is one of the best means to keep weeds out. E. O. ORPET.

#### The English Wild Garden in Spring.

At no time of the year is the wild garden more beautiful or more worthy of attention than during the last few weeks of winter and the early spring months, for throughout that period there is apparently no end to its attractions, as no sooner have we turned from one pleasant feature than another presents itself, only to be supplemented and multiplied many times over by other beautiful effects. The time for planting has gone by; but this is the period to work out schemes for future use, and the would-be

BRIDE'S BOUQUET OF LILY OF THE VALLEY.

planter will be wise to carry his notebook wherever he goes, in order that he may jot down any particularly effective grouping of plants which claims his attention or any new idea which may occur to him. A stroll through the woods of Kent, Hertfordshire, Buckinghamshire or elsewhere is time well spent, for many of these woods are brimful of suggestions, Nature having dealt out showy flowering plants with a lavish hand. The lanes and woods of the south-west counties, again, afford much food for thought, and the visitor returns with visions of fern-clad walls and banks, with hosts of flowering plants intermingled. Such effects as these are the ones which the gardener must try to foster, for it is entirely in his hands as to whether the

wild garden is to be a success or not. The keynote to the whole scheme must be simplicity, and anything of an artificial, formal nature must be avoided.

Turning to our native woods, what more beautiful effect can be imagined than wide stretches of common primroses, relieved here and there by trailing ivy, wood anemones, violets and wood-sorrel, while the more open meadow-land near by is aglow with cowslips? Such effects as these may, with a little care, be introduced into the park or woodland surrounding a residence, while the use of proper exotic plants makes it possible to add considerably to our showy native plants. The value of native plants, however, for this kind of work cannot be over-estimated, and people

BRIDE'S BOUQUET OF ORCHIDS AND LILY OF THE VALLEY.

would often do better to rely on them alone, rather than plant the unsuitable subjects one sometimes meets with.

In grassland many picturesque effects are noticeable in spring from the various narcissi. Here and there the tiny *N. minor* occurs wild, and where this happens it is the forerunner of the other kinds, for its flowers may be found any time after the beginning of February. The double-flowered daffodil is another early-flowering kind, for it is frequently at its best before the end of March. This is effective wherever it is found, whether growing in wild, irregular groups in the open, as solitary clumps in woods, or on the bank of a lake or stream where its nodding flowers are reflected in the water.

April finds the majority of the narcissi in bloom and many acres beau-

tiful with such kinds as Emperor, Empress, Sir Watkin, Incomparabilis, Leedsii, Bari and Poeticus. Unfortunately, a discordant note is sometimes struck by improper planting, and one sees formal-shaped clumps painfully regular in size and distribution. Such planting must at all cost be avoided, and that is one reason why the planter should make special note of areas which have been well planted. It is often difficult to get men to plant tastefully, says a correspondent of The Garden, for while half a dozen men may be given similar instructions and shown exactly what is wanted, one may, perhaps, do his work very much better than the others, for there appears to be a strong tendency to formality, and it is only the man with an artistic tendency who grasps the idea quickly of reproducing a natural

effect. Earlier in the year crocuses gave evidence of their suitability for clothing conspicuous mounds beneath trees with showy flowers. They are better suited than later-flowering plants for places where the grass must be mown early, for their foliage dies down in May.

In shady places anemones make a brave show, for in addition to the common wood anemone (*A. nemorosa*) we have the blue *A. blanda* and *A. apennina*, the many-colored *A. hepatica*, the taller-growing pasque-flower (*A. Pulsatilla*) and several other kinds, all of which provide an attractive display. On moist land the common lady's smock, or cuckoo-flower, commands attention by reason of its delicate white or lilac-tinged flowers, while the marsh marigold (*Caltha palustris*) is glorious with large golden, buttercup-like blossoms. Glancing at shrubby plants, effective results are obtained by massing gorse, both single and double-flowered, on dry banks or other open land, while the Mediterranean heath may well be introduced into the landscape. Where such plantations were made a few years ago, the present season finds them in glorious condition. On the outskirts of woods *Cornus Mas* is very effective, while it is possible to introduce such subjects as *Forsythia suspensa* and *Berberis stenophylla* into certain positions with good results. Towards the end of April the common broom replaces the gorse, its golden blossoms being quite as conspicuous. Shady places may be planted with *Vinca minor* and *V. major*, and occasionally these plants are found in a state of nature associated with the lily of the valley. It is not often that *Daphne Mezereum* is found, either wild or naturalized, but the spurge laurel (*D. Laureola*) is frequently seen in chalky districts. Though its flowers are not showy, they are deliciously fragrant, which makes their presence perceptible from a considerable distance. Space will not allow of attention being directed to more of the many plants of herbaceous or shrubby habit which are conspicuous at the present time; but intending planters should be ever watchful for effects worthy of reproduction.

#### European Dog's-Tooth Violets.

Few flowers of spring are more beautiful than the dog's-tooth violets, or erythroniums; of these the European *E. dens-canis* and its varieties form the subject of this note. The American species and their varieties are rarely beautiful; but the European species is even easier to cultivate, and is so cheap nowadays that it may be planted in quantity. As a plant for the grass it is very beautiful, states a correspondent in The Garden, giving in its season dainty reflexed flowers. Cyclamen-like in their habit, and lifted above the charmingly marbled or spotted leaves which are so characteristic of the dog's-tooth violets as a rule, but which are never more beautifully represented than among the varieties of these European erythroniums. In the grass these have the advantage that they ripen their leaves early, and are thus out of the way before much mowing has to be performed. The flowers are varied in color, some being of purple red, and others pass through various shades

until pure white is reached. They are variable in size, and selected plants and seedlings are sold under name at a price generally but little higher than for mixtures. The latter are, however, very pretty, and quite good enough for naturalising in the wilder parts of the grounds. For wild gardening and for planting in open places in the woods these flowers are very beautiful, and the fact that they thrive in partial shade as well as in sun renders them more valuable. In the border they are also charming, and

60 to 75 days the grass should be dead and the paper removed and placed upon another spot. Any time during the growing season dig up the grass and shake out the underground stems and roots carefully and remove them from the field and burn them, the object being to get all the underground stems and roots. Plant to hoed crops and keep the grass from appearing above ground and the underground parts will be starved out.

When the whole field is pretty well infested, a system of bare fallow may

without loss of crop is obtained and the land is enriched and put in suitable condition, and this can be followed without departing from farm practice. A smother crop of Hungarian wheat of high germinative power and buckwheat sown thickly, the millet yielding a fair crop of hay, smothering the quack, and the buckwheat to be plowed under, and next spring a cultivated crop planted to cultivate both ways thoroughly and often and all quack removed from the hills. This method will succeed in some seasons, but the other methods are preferable.

The quack grass reproduces itself from seeds and by means of underground stems and is a very persistent perennial weed, and unless the method attempted is thorough and carefully carried out until the grass is entirely killed, the grass will come out a winner.

#### The Boskoop Flower Show.

After a speech by the minister of agriculture, the show was opened by Prince Henry. The judges from abroad present were, Roehrs (U. S. A.), Pynaert, Closon, Kuyk, Stegman, Vuylsteke (Belgium), Hanson (Denmark), Ernst, Müller, Brodersen, Dahnhardt, Hammelbacher, Buchner, Stofregen, Siebert, Freudeman, Lambert, Trintelman (Germany), Russell, Culberth, Cutbush, Thompson, Brydon, Cheal, (England), Grummer, Sagulin (Finland), Ramelet, Roger, Bois, Bouillet (France), Searavotti (Italy) and Kirchhecher (Hungary). They attended the dinners given by the Town Council and the Pomological Society, the boat excursion to the harbors of Rotterdam and the lunch given by the Holland-American line on board the Ryndam.

The show was visited by Queen Wilhelmina, the Queen Mother, the Duchess of Albany, the Count of Arnstutten, the four ministers of agriculture, public works, home affairs and colonies, the English legation, the Mexican mission, the Japanese ambassador, etc., altogether 60,000 persons visited the show in 14 days. It was a great success in every respect. Of all plants sent in rhododendrons and azaleas occupied the first place, further lilacs,

RHODODENDRONS PINK PEARL AND WHITE PEARL AT BOSKOOP FLOWER SHOW.

they can be employed advantageously on the rockery, where they show well when above the ground-level, and if about level with the eye all the better, although it hardly seems natural, and the greater elevation rather depreciates the appearance of the leaves. *Erythronium dens-canis* likes a free and open soil of a vegetable nature, and one composed of loam, leaf-soil and a little sand will suit it well. The roots should be procured as early as they can be furnished by the bulb-dealers and nurserymen, and planted immediately with the crowns about one inch or two inches below the surface.

#### Quack Grass Eradication.

Quack grass has secured a firm hold on many Minnesota farms during the past three of four exceptionally wet seasons, and vigorous measures must be used at once to check this pest or it will secure possession of much farm land, states the bulletin issued by the Agricultural Experiment station of the University of Minnesota entitled "Quack Grass Eradication." As the seed matures comparatively early and remains in the head for some time, it becomes especially dangerous in timothy hay meadows and in the grain fields, for the reason that when the hay is fed to live stock and the straw is used for bedding, the seed goes back into the land with the manure rapidly infesting new spots, and the new seed and the underground stems already in the land, make a rapid process of thoroughly establishing this troublesome pest. Where quack grass once secures possession of a field it will take persistent and systematic effort to eradicate it. Several ways have been found that are effective.

When the grass exists in small spots in different parts of the field the following methods are advised. Mow the quack grass and remove it and cover the spots completely with tar paper, lapping the paper and binding the edges and seams with dirt; in from

be followed, by plowing when the grass is in bloom from June 15 to July 15 getting all parts underground, and follow with a disc harrow, keeping the quack grass completely covered root and stem, double disc the land every three or four days for four or five weeks. It is important that every portion of the field should be thoroughly treated the parts around trees and posts being hand-worked; if followed thoroughly this will eradicate the quack grass completely. Summer fallow following clover pasture with three year rotation of grain, clover and cultivated crop. Cultivate often and remove any quack grass that the cultivator does not reach. A five year rotation; pasture to July 15 and bare fallow, corn in hills to be cultivated both ways, grain, clover and timothy, and meadow pasture. By this method the benefit of a season of bare fallow

AZALEAS, RHODODENDRONS AND ROSE GARDEN AT BOSKOOP FLOWER SHOW.

GENERAL VIEW OF THE BOSKOOP FLOWER SHOW, HOLLAND, APRIL 5-20, 1911.

roses, hydrangeas, Japanese maples, viburnums, magnolias, prunus (amygdalus, Persica, cerasus), cytiscus (laburnum, genista), malus, crataegus, glycine, clematis, andromedas, deutzias, kalmias, robinias, staphyleas, spiraeas, weigelas, peonies, lilies, funkias, ampelopsis, buxus, palms, aucubas, skimmias, pseudolarix, dimorphanthus, etc. There was not room for all the plants which were sent. Among the old rhododendron varieties Kate Waterer, Cynthia, Sir John Eroughton, Charley Waterer, John Walker, Chevalier Felix de Sauvage, Helen Waterer, Fashiosum fl. pl. Lee's Dark Purple, C. S. Sargent and Catawbiense grandiflorum drew special attention and among the new ones Pink Pearl, White Pearl and Strategist excelled, as fine calculated Sappho, Mme. Jules Porgues and Mme. van Houtte. Among the several azalea groups there were very remarkable varieties, such as the Azalea mollis Sinensis Anthony Koster, A. mollis J. C. van Tol, A. pontica fl. pl. Aide and Raphael de Smet, A. indica Vervaeana alba and among the other evergreen azaleas: Jodifolia, amoena, macrantha, Yadoyawa, Hinodegyri and Benigyri. Among the Japanese maples Acer palmatum atropurpureum, A. palm, dissectum atropurpureum, A. palm, disse, variegatum and A. Japonicum filicifolium were especially worthy of mention. Lowii, Henryana, striata and heterophylla elegans were especially noticeable among the ampelopsis sorts. The Japanese cherries especially the double-flowered Shirofugen, Hisakawa and Benifugen were very beautiful. The clematis-plants were exhibited in cones with fence-work.

The varieties Standishii and Miss Bute-man made a very good impression. Among the cytiscus-sorts we ought especially to mention Laburnum Vossii, Genista praeron alba and Genista Andreana prostrata, among the deutzias gracilis, Lemoinei hybrida and Villmoriniana, among the magnolia's Soulangeana, Soulangeana nigra and Norbertinana. Further the beautiful blue glycines, the splendid white hydrangeas with so fine leaves, the beautiful dark red Malus floribund atrosanguinea, the thick lilac-bushes with large bunches in small pots, the exceptionally beautiful Prunus triloba, the tree-peonies, Japanese snowball, Daphne cneorum, the double flowered Amygdalus Persica Clara Meyer, etc., drew special attention. Among the dwarf polyanthas, Jessie gave a very favorable impression, while many hybrid teas with one stalk exhibited their flower in great perfection.

Among the novelties there was much which should not pass unnoticed: the azalea mollis and sinensis varieties, T. Koster and Beauty of Boskoop, azalea mollis Betsy van Nes, azalea occidentalis-hybrid, the Rhododendron Direktor Siebert, Mme. B. de Bruin, Aucklandii-hybrids and Everessianum fl. pl. and Prince Camille de Rohan, the clematis varieties Prince Hendrik and Mr. Patyn, the roses Erna Tenhendorf, Louise Walter and Lady Hillingdon, the lilac, Mlle. van Tol. This first Boskoop show was of more than ordinary importance in its kind. It closed April 20.

HARTFORD, CONN.—J. Albert Brodribb has added a Pope-Hartford delivery wagon to his delivery service.

#### Dutch Bulb Growers' Society.

The following awards were made at the recent meetings of the narcissus committee of the Dutch Bulb Growers' Society at Haarlem, Holland:

First-class certificates to Narcissus King George V. (Group N. Englehearti). Flowers finely formed, round, perianth broad of white color, cup flat and large, citron yellow, orange bordered; Narcissus Mrs. Lizzie Krelage, finely formed flowers of good habit, perianth pure white, large white trumpet with fine curved edge, an improved Mme. de Graaff, E. H. Krelage and Son, Haarlem.

Awards of merit to Narcissus Ajax Money-maker. Obtained from seed of N. princeps maximus, may be regarded as an improved P. princeps. P. van der Meer C. Son, Noordwijk; Narcissus Icicle, flowers pure white, drooping trumpet, not curved. C. G. van Tubergen Jr., Haarlem; Narcissus Mrs. Cato Hoag, perianth and trumpet pure white, flowers somewhat drooping, finely curved, rather short trumpet. C. G. van Tubergen, Jr., Haarlem; Narcissus Jacob Maris, an incomparabilis variety with broad white perianth, cup light yellow, orange-yellow bordered. C. G. van Tubergen, Jr., Haarlem; Narcissus Richard Strauss, a bicolor variety with soft yellow trumpet, Johnstons-like and white perianth, somewhat drooping form. C. G. van Tubergen, Jr., Haarlem; Narcissus incomparabilis plenius Queen of Phoenix, flowers milky white, with soft yellow centre. J. Segers, Sisse, Narcissus Poetas Orange-Cup, a cross between N. King Edward VII. X Pol. Narc. Statin General, flowers double

yellow, with orange cup. J. E. Rommel. Limoness.

There were also medals awarded for groups of narcissus.

### Cement Benches.

The use of cement in all branches of greenhouse construction is greatly on the increase and greenhouse proprietors are experimenting with its adaptability in different parts of the structure. The excessive moisture at some periods and the dryness at others is very detrimental to the life of wood and rapid decay causes an ever-increasing expense. One continual outlay to the florist is the constant rebuilding of benches, in fact, the cost of renewing benches has been one of the great factors which has caused florists to endeavor to grow a crop of as good quantity and quality in solid beds as can be grown in benches. The quality can be produced, but generally at the expense of quantity, and the solid bed advocate is always willing to concede that the grower does not have the same control over the plants in beds that he has in benches. Those who have succeeded in constructing serviceable benches of concrete are loud in their praise of this manner of building, and maintain that the growth of the plant is the equal of those in wooden benches, and that the material is practically indestructible. The construction generally is either of benches built permanently in one piece, or by the use of cement machines. And the first cost has greatly exceeded that of building of wood.

On a recent visit to the George Wittbold Co.'s greenhouses at Edgebrook, Ill., we were shown the manner of constructing cement benches in use by Otto Wittbold, the manager of the plant, and was much surprised at the statement, that benches could be built of concrete as cheaply as when built of wood, and he kindly furnished us with details of his construction and the cost. The molds are made the desired shape and are so fitted that they can be locked together. The concrete used in these benches is of the wet or as is sometimes called slush cement, consisting of one part cement to three parts sand or gravel mixed twice dry and once wet, and then poured into the molds to set and reinforced with wire. The sides of the bench are made in an angle piece (Fig. 1), reinforced with poultry wire bent into shape, and wire rods running lengthwise. The length can be either four, five or six feet as desired, and if properly made the longer lengths are strong enough to support the weight. The height of the side is 10 inches and 1 1/4 inches thick, the angle piece upon which the bottoms rest is 4 1/2 inches wide and 1 1/2 inches thick. Figure 2 shows the cross pieces or bottoms, each piece being reinforced with three wire rods. The length is 55 inches, width eight inches, thickness one inch. The posts are molded with one side straight and the other three sides inclined (Fig. 3) so as to give a good strong base upon which to stand and of these dimensions: height, two feet; top, four inches square; base, eight inches square, the top being finished as in figure 4.

To support the middle of the bench a piece is molded two by four inches,—of the shape of ordinary two by four lumber—of the same length as the sides. This piece is also reinforced by wire rods; two in each piece, and is placed on top of the center posts

extending the entire length of the bench, as will be seen in the illustration of the bench put together (Fig. 5). In the construction, the several pieces are cemented together with the exceptions of the bottoms, which are laid upon the angle pieces when placed in position.

The cost of building a bench in this manner has been carefully computed by Mr. Wittbold, who furnishes the following figures:

|                                     |                |
|-------------------------------------|----------------|
| Side pieces, 5 feet long:—          |                |
| Five hours straightening wire.....  | \$1.25         |
| One roll wire netting.....          | 1.00           |
| 240 wires—125 lbs@7.50 per cwt..... | .90            |
| 8 bags cement @ 31c.....            | 2.48           |
| 32 feet gravel.....                 | 1.60           |
| 26 hours labor.....                 | 6.50           |
|                                     | <b>\$13.73</b> |

1. Side Angle Pieces. 2. Bottoms. 3. Posts.  
4. Top of Posts. 5. Construction of Bench.

|                                 |                |
|---------------------------------|----------------|
| Posts—5 feet apart, 90 in all:— |                |
| 9 bags cement.....              | \$2.79         |
| 54 feet gravel.....             | 2.70           |
| 22 hours labor.....             | 5.50           |
|                                 | <b>\$10.99</b> |

|                               |               |
|-------------------------------|---------------|
| Center piece—2x4 inches:—     |               |
| Labor straightening wire..... | .80           |
| 60 wires—135 lbs.....         | 1.01          |
| 2 bags cement.....            | .62           |
| 7 feet gravel.....            | .40           |
| 6 hours labor.....            | 1.50          |
|                               | <b>\$4.33</b> |

|                                  |                |
|----------------------------------|----------------|
| Bottoms:—                        |                |
| 15 hours straightening wire..... | \$3.75         |
| 675 wires—378 lbs.....           | 2.83           |
| 18 bags cement.....              | 5.58           |
| 72 feet gravel.....              | 3.60           |
| 4 days' labor.....               | 10.00          |
|                                  | <b>\$25.76</b> |

|                             |      |
|-----------------------------|------|
| Labor setting up bench..... | 7.50 |
|-----------------------------|------|

Total cost.....**\$62.81**

In figuring the cost teaming is placed at \$5.00 a day and labor at 25 cents an hour. The molds which Mr. Wittbold uses were built expressly for this purpose at a cost of \$45 which, of course, is a first-cost only, for the molds can be used for years and for as many benches as desired without having to be renewed. The cost will vary to a small extent as the prices of both wire

and cement fluctuate, the present price of cement is seven cents a bag less than the price given in the figures furnished by Mr. Wittbold, which would make a difference of \$2.59 in the cost of the 37 bags of cement. The prices quoted are in carlots and the time to buy is in the winter.

As compared with the cost of wooden benches, a bench of the dimensions as above, made of inch boards for sides and bottoms and two by four lumber for posts and stringers, would require from 1,500 to 2,000 feet of lumber. This would be the lightest material that could be possibly used, and the cost of any serviceable material would be at the least \$25.00 per thousand feet. The labor of building such a bench would not be less than \$10, which would make the claim of Mr. Wittbold good, even when built of the cheapest material, and the life of such a bench is not more than two or three years, while with the concrete bench erected the proprietor has a piece of solid construction that will last for years.

### Propagation of Lilies.

Lilies are propagated by scales and bulbets, and although rather a slow process, requiring three or more years to bring the young bulbs to a flowering size, we have the satisfaction of knowing that they are vastly more enduring than the imported bulbs, and that if correctly treated the majority of species will prove of permanent interest and value. Amongst those that produce bulbets in the axils of the leaves are the old tiger lily, and its altogether more refined and handsome varieties, splendens and flore pleno. L. Canadense and the Bermuda lily are also well known species bearing bulbets, which almost invariably appear upon the whole length of stem. Towards the end of the summer they assume a very dark color, and as soon as they separate very readily from the axils of the leaves they should be collected, and stored in sand until the following spring.

Some species and varieties do not produce bulbets, but we have a ready means of increase by detaching a few of the outer and mature scales, and laying them horizontally upon a mixture of sand, cocoanut-fibre and charcoal dust, and then covering them lightly with the same material. In the course of six weeks roots will appear on the basal part, and often on the edges of the scales, and when it is seen that a few have been formed, they should be placed a couple of inches apart in boxes or deep pans filled with a compost consisting of equal parts peat and loam, with a small quantity of leaf-soil and sand added. Their winter quarters will be the greenhouse shelf, and from spring onwards an unheated frame, and this also applies to the first-named. It may be explained that the continental growers obtain huge supplies of bulbets by lacerating the basal part of inferior bulbs. These are partially cut through in various directions, and are then planted in a light and sandy soil. Having experimented in this direction, writes Walter H. Argett in the Gardeners' Magazine, I can testify that it is simply astonishing to see the behavior and efforts of the bulbs to perpetuate their species, each crevice becoming literally a mass of small bulbs. I commend this practice to amateurs

who may wish to propagate lilies, and a single bulb of each species will be sufficient to commence with. In dealing with the bulbets I would advise that they be grown in boxes for a couple of years, as they require far less attention than when placed in small pots, and when they have developed to the size of a billiard ball they should be potted, and it will be found that pots four and a half inches in diameter will be none too large for them.

The more hardy, robust and accommodating species may be planted in the open garden to form permanent colonies; in fact, almost without exception lilies can be successfully grown in this way, and failures that are recorded may invariably be traced to mismanagement, or to imported bulbs having been planted, and it is well known that the most popular lily, namely, *L. auratum*, is of little use after flowering. Under the most careful treatment only a very small percentage bloom the second year, and it seems a great pity that the bulbs should be mutilated and denuded of every vestige of basal root prior to exportation by the Dutch and Japanese growers.

By far the most successful colonies of lilies will be seen in close proximity to, or between, shrubs, such as rhododendrons, etc., and we gather from this that the shrubs throw just the requisite amount of shade on the surface; also that the masses of thread-like roots emanating from the shrubs effectually prevent saturation in winter, a combination of favorable circumstances which has much to do with the eminently satisfactory results obtained under these conditions.

### European Horticulture.

FROM THE FRENCH TRADE PAPERS.

The *Dimorphothecas*.—Of the calceolaria family, but native to central and southern Africa, where they grow in dry or even desert regions, the *dimorphothecas*, have been known to botanists for two centuries, but long lost from culture. In the last few years two varieties have been reintroduced. *D. aurantiaca*, growing about eight inches high, long linear leaves and large daisy-like soft orange-colored flowers, the small orange disk surrounded with a black or deep orange rim, a very attractive plant. The second, *D. Ecklonis*, woody at the base, perennial, blooming the second year, grows about two feet high, stems long, flowers white, disks violet, petals white above, thick-ribbed, purplish violet below, buds violet, branches covered with a white powder, lanceolate, toothed. They are easily multiplied from seed, *aurantiaca* blooming the first season, *Ecklonis* is best treated as a biennial, and wintered in the cold frame. Sun and little moisture are their preference.

*Parisian Dahlias*.—The characteristic of a Parisian dahlia flower is to present on a ground of a light color a darker and rather narrow border, as white with border of rose, scarlet, yellow, pink with crimson border, pale yellow, with canary border, etc.; the flowers are always single, petals broad, carried on stems at least eight to 12 inches long, strong and graceful. Named sorts are grown, called after the principal monuments of Paris and caused a veritable sensation in the autumn exhibitions.

*Aster Cassiarabicus Varieties*.—Sowing and selecting since 1905 seed and progeny of a lilac-rose-flowered *Aster cassiarabicus* (form of *aster amellus*), *Vilmorin-Andrieux* and Co. have obtained a new variety from which the original type has practically disappeared, with colorings of pale rose to bright rose, white to flesh or rosy white, of which several varieties have been named and received the certificate of merit of the National Society of Horticulture.

*Lychnis Grandiflora*.—This brilliant flower, though not new, is being reintroduced to the gardener under various names and forms of *speciosa Haageana*, etc., and deserves a welcome. Growing not over 15 inches high, its brilliant scarlet flowers are very attractive in the border. While it is perennial, it has been accused of disappearing if unprotected in a hard winter. In such case, it is easily treated as an annual and is well worth the trouble.

*Parisian Tulips*.—The May-flowering or single late tulips are increasing constantly in popularity, the Darwins perhaps lead, for their wonderful crimson, pink, lilac and mahogany colorings, but close after them come the tall, graceful single late tulips called *Parisian*, yellow, pink, crimson and white, and white with the feathered border of crimson, which are most effective, both for beds and for cut flowers.

*Gladiolus Hybridization*.—Interesting results are being attained in gladiolus hybridization by using the African variety *primulinus* (primrose-colored) as a parent. Hybrids of varying form and more or less pure yellow shades have resulted from crosses with the yellow *Gandavensis* sorts, *Nanceianus* and *Lemoinei*, those of the *Gandavensis* giving promise of a pure yellow, open-flowered gladiolus with slender graceful stem, a very desirable novelty.

*New Rose Juliet*.—Cross of *Rosa lutea* and a hybrid tea, this rose a vigorous, free-blooming plant; the flowers are exceptionally fragrant, double; remontant; the coloring is a little variable, in dark and rainy weather being a crimson rose, and in dry sunny weather a bright rose, illumined with scarlet, and always the outer side of the petals of a rich golden yellow.

Proposal to Replant the Appian Way.—A rich lover of the civilization of ancient Rome has proposed to the city that if the city will take out the *acaclas* and other plants which now encumber the Appian Way, the "Queen of Roads," he will present to the city a thousand cypress and umbrella pines, that the road may be replanted as it was in the great days of Rome.

*Wood Ashes as Fertilizer for Beans*.—The bean, as we know, is a great consumer of potash and if the soil is given a dressing of ash four or five months before sowing and after cultivating, the crop is appreciably improved. Of course, it cannot be added at the time of sowing, as the strong ash would destroy the germinating quality.

GREENWICH, CONN.—The Bonnie Brae Nurseries in beautifying the J. H. Flagler place moved and planted Kostor's blue spruce trees thirty feet in height and weighing a ton, yet all have undergone the transfer with success thus far.

## OBITUARY.

### Lemuel Ball.

Lemuel Ball died at home in Wissinoming, Philadelphia, Pa., May 24, after a short illness, aged 55 years, his condition not being considered serious even by his physician until about one week previous to his death.

Mr. Ball was for many years well known as a grower of palms, dracaenas and decorative plants. Previous to 1884 he was associated in business with his brother, Charles D. Ball, at Holmesburg, Philadelphia, Pa., but at that date the firm was dissolved. He was, however, too much attached to the florist business to remain long out of it, and purchased property at Wissinoming, erecting the establishment which he has since conducted. He first devoted his energies to the cultivation of roses and cut flowers, but later substituted palms and foliage plants, confining his efforts to these, and the product of his greenhouse was always of the most excellent quality.

Quiet and courteous in his bearing to all and conducting business with the strictest integrity and honesty, he endeared himself to a host of friends, and his genial presence at the conventions of the S. A. F., of which he was one of the older members and a constant attendant, as well as his exhibits of finely grown stock which he invariably showed, will be greatly missed by his large circle of friends and those who have long done business with him. He was also a member of the Florists' Club of Philadelphia and the Pennsylvania Horticultural Society. He is survived by a married daughter, whose husband will continue the business. The funeral was held May 27, the interment being in Cedar Hill cemetery.

### Eggert Nagel.

Eggert Nagel, proprietor of the Nagel Greenhouses, Minneapolis, was almost instantly killed by an electric car in that city Tuesday evening, May 16. Mr. Nagel was on his way to attend a meeting of the decoration committee of the civic celebration and in his efforts to avoid an automobile which was traveling at high speed stepped in front of the car, his body being thrown about 40 feet.

Mr. Nagel was 69 years of age and settled in Minneapolis 40 years ago, and for 16 years was manager of the Mendenhall greenhouses. He then went into business for himself, later taking his son into partnership. He was a prominent member of the Masonic fraternity and social organizations in his home city. He is survived by a son, a daughter and a brother.

### Lloyd G. Blick.

Lloyd G. Blick, the popular florist of Norfolk, Va., died at his Lindenhurst home, May 18, after an illness of several months, aged 43 years.

Mr. Blick had been engaged in the culture and selling of flowers for many years and his horticultural knowledge combined with his sunny disposition and genial nature, which had endeared him to a host of friends, had built up a prosperous business. He was a member of the Society of American Florists, the Elks, Maccabees, Eagles and Royal Arcanum, the Norfolk Board of Trade, the Hampton Roads Yacht Club and a director of the Bank of Norfolk. He is survived by two sisters and a brother.

### George M. Paullin.

George M. Paullin died at his home, 122 Fayette street, Bridgeton, N. J., May 19, aged 68 years. He has been sick for some time, suffering from the effects of a fall sustained last winter.

The annual rose carnival at Portland, Ore., is scheduled for June 5. The roses are reported rather late for this date.

The next meeting of the American Peony Society will be held at Horticultural Hall, Broad street, Philadelphia, Pa., Thursday and Friday, June 8-9, and not June 14-15 as previously advertised.

IMPORTANCES will be high this season on account of the advanced import tax on colored stock (advanced from 25 per cent to 60 per cent) and still higher by reason of the short crop, reported May 11 to be not more than half that of last year.

### Wedding Bells.

H. R. Richards and Miss Theodora Drew, formerly of THE FLORIST staff, were married at Hollywood, Calif., May 23. Mr. Richards is now manager of Wm. Haerle's establishment at Hollywood. Miss Drew is a daughter of O. H. Drew, formerly of Hibernia, N. Y., and now of Olathe, Colo. Long life to them and all the happiness of the angel land in which they dwell, with its laughter, song, sunshine and flowers.

### Society of American Florists.

#### REGISTRATION DEPARTMENT.

Public notice is hereby given that The Conard & Jones Company, of West Grove, Pa., offer for registration the roses described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

#### DESCRIPTIONS.

Ruby Queen.—Queens Scarlet X Wichuraiana. Bright rich ruby red, with clear white center, flowers quite double, three to three and one-half inches across, opening out flat and perfect, color brilliant carmine, base of petals, pure white. The plant is a strong, vigorous climber, with handsome, glossy foliage and entirely hardy.

May Queen.—Mrs. DeGraw X Wichuraiana. Vigorous, erect growing climber well furnished with handsome foliage, bearing great numbers of lovely large roses, fully as beautiful as the finest tea roses. Color, clear coral pink, very bright and handsome. Entirely hardy, an early and abundant bloomer.

Pearl Queen.—Hardy climbing rose crossed with Wichuraiana, other parent unknown. Very regular flowers, double, fragrant. Color, clear pearl white, faintly tinged with deep rose, deepening at the center. A hardy grower and tremendous annual bloomer.

Royal Cluster.—Dawson X Hermosa. Magnificent double white hardy climbing rose. A hardy, vigorous climber and prodigious bloomer, blooms in immense clusters, flowers, full medium size, beautifully formed, delicious, spicy fragrance, color, white, sometimes faintly tinted with blush.

#### TRADE EXHIBITION RULES.

At the Mid-Lent meeting of the executive board the following changes were made in rules governing the trade exhibition:

Rule 3. Exhibition space shall be designated in square feet. The charge for space shall be as follows: Minimum charge, \$10.00; Flat rate, per sq. ft., 25 cents. Exhibition space shall be limited to six feet, six inches above the floor, except for plants, greenhouse structures, or other exhibits which necessarily extend to a greater height. Plant and cut-flower exhibits may be also built up to any height authorized by the superintendent. All exhibits except as above specified which extend above six feet, six inches in height shall be charged 10 per cent additional on the entire space for each six inches of additional height of any part of the exhibit. All signs must be kept within the space limits. Where tables are against the walls, wall space up to six feet, six inches above the floor and of the length of the table will be furnished the exhibitor without extra charge. Wall exhibits projecting above this height will be charged for the additional space, at wall space rates. Signs on the wall or elsewhere shall not extend higher than six feet, six inches above the floor in any exhibit.

Wall space, without floor or table space, or when exceeding in dimensions the amount allowed with the exhibition space, shall be charged as follows: Minimum charge, \$5.00; Flat rate, per sq. ft., 10 cents. Wall exhibits shall not project over one foot from the

wall. Exhibitor's signs must be kept within limits of wall space.

Exhibitors must furnish at their own expense all tables, cloth and other accessories and incidentals. The superintendent will be willing, so far as his other duties will permit, to assist exhibitors in securing tables and other needed articles; but neither the superintendent nor the society will pay for or assume any financial responsibility for the purchase or placing of such articles.

All signs shall be uniform in character and be furnished by the superintendent of exhibition at cost and no other signs to be permitted.

Charges for freight, cartage or expressage will not be paid or guaranteed for exhibitors. Goods shipped, charges collect will be refused unless the owner is on hand to pay the charges.

Rule 5. Add (Garden Requisites) to Section F.

Change number of rule 19 to 21 and add:

Rule 19. While the Society will exercise all due care to safeguard the exhibits, it will not assume any responsibility or liability for any loss or damage to any exhibit.

Rule 20. The executive committee will make such further rules as it may deem necessary for the proper conduct of the exhibition.

Attention should be called to the fact that these rules, and especially the one concerning the signs, will be strictly enforced. No signs will be permitted in the hall other than those of the uniform character which have been adopted by the board. Exhibitors should take note of this and see that their signs are ordered in advance. Copies of the complete rules and plans of the floor space may be secured of the superintendent, Mach Richmond, of Baltimore, Md.

Hotel Belvidere, located on Charles and Chase Sts., has been selected as the hotel headquarters for the society. The President's reception will also be held at this hotel. Applications for rooms should be sent in early so as to secure good accommodations. The hotel is located within a few minutes walk of the Armory where the meetings and exhibition are to be held.

H. B. DORNER, Sec'y.

### Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to render.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

### Personal.

E. Fred Rowe, for many years connected with James Vick's Sons, Rochester, N. Y., has left that house to take a place with the McFarland Publicity Service as chief of its copy department. When Mr. Rowe arrived in Harrisburg to assume his new duties he found a pleasant remembrance from his former employers and associates in the form of a vase of beautiful American Beauty roses bearing the inscription, "Best Wishes of Old Friends and Former Associates at Vick's."

**Meetings Next Week.**

### Chicago.

#### MEMORIAL DAY TRADE.

Under the extremely trying weather conditions, the Memorial day business, even by the most optimistic dealers, can be said to be only satisfactory. This section of the country has during the last two weeks passed through a record-breaking spell of hot weather for the month of May. The temperature has reached 97° in the shade and in the greenhouses is reported to have gone as high as 125°. It was simply impossible under these conditions to grow flowers with any substance whatever, and the roses simply "popped open while you were looking at them," as one grower expressed it. The stock was all very soft and a great trial to all the shippers, for it was not keeping well with them and they had great fears as to the condition in which it would arrive at its destination. Shipments were delayed to the latest possible moment, that the stock would be received in the best possible condition. Carnations would go to sleep between night and morning and peonies that were as tight as it was thought safe to cut them would be wide open the next day, and quantities were so soft that they were a loss to the dealers. There was a vast amount of stock of all kinds, such as it was, but of really first-class stock such as the houses would have liked to supply their customers, there was very little, but everybody did the best that they could under the circumstances, with the probabilities that many disappointments will be incurred and apologies have to be extended. Roses were in great plenty and of all kinds, but of the quality enough has been already said, and the carnations were all extremely soft. Sweet peas also suffered from the extremely hot weather and were poor in color and many were short

stemmed. Peonies were received in immense numbers and while some arrived in very good condition and bid fair to ship well, there were many that were only fit for the waste barrel when they were taken out of the boxes. There were large quantities of shrubbery handled, the lilacs had all passed, but there were spireas, duetziyas and locust and much of this class of stock was to be found. Bulb stock of all kinds was gone, some of the later blooms, which were counted upon for Memorial day, arrived in a half-decayed condition. There were some very fine lilies to be had and some good lily of the valley. Some very nice pond lilies, nymphaea odorata, that looked very nice and cooling were among the choicer selections. Orchids were in good condition and some exquisite blooms of these exotics were to be obtained. The retail stores all did a fine trade and as the weather was considerably cooler on Sunday and Monday were able, by waiting, to get better stock and do a more satisfactory business. Taken as a whole, the business was very disappointing, for it was not possible to obtain and ship the quality of stock which is ordinarily sent out at this season in normal years.

#### NOTES.

Vaughan & Sperry were kept on the jump for four days filling orders for both local and out of town customers. While the junior member of the concern looked after the local trade, the senior member was busy seeing that the out of town customers were getting fresh stock. This firm refused to ship carnations to many of the customers at long distances, being afraid the stock would not arrive in good condition and wired them to that effect. This was appreciated, for one of the large buyers wired back, "You are certainly on the square, substitute peo-

## Notice to the Trade

On account of removal all mail intended for the Northwestern Floral Co. should, on and after June 1, be addressed to the Northwestern Floral Co., Box 14, Gross Point, Ill. The station and express office will remain Wilmette as before.

Yours truly,

**THE NORTHWESTERN FLORAL CO.,**

Box 14, Gross Point, Ill.

nies." The shipping trade at this house, as one of the expressmen said, "was big and kept us on the jump carrying out the packages."

Wm. Feniger, of Toledo, O., was in the city on Sunday, May 28, buying stock for the Memorial day trade. He said that if he had not been in the market and seen the condition of the stock, he would never have believed it could have been of such poor quality.

Mrs. Wm. F. Schofield was removed from the Passavant hospital to her home on North State street Sunday, May 28. She is improving and an early recovery is looked for.

E. F. Winterson says that the cut flower trade for Memorial day was as good as could be expected under the conditions which prevailed the previous week.

"What young-looking man is this?" is the question asked by the friends of J. P. Optiz when he appears minus the moustache which adorned his lip.

Joseph Ziska and daughter, Anna, will leave this week for a month's visit at Oxford Junction, Ia.

The Northwestern Floral Co. will build two more houses in addition to the two now under construction. The A. Dietrich Co. will furnish the material and the Quaker City Machine Works of Richmond, Ind., the ventilators. J. Psenicka, one of the members of this progressive concern, wishes to inform the trade that all mail intended for this firm should be addressed to Gross Point, Ill. All freight and express should be shipped to Wilmette, as before. This firm supplied one of the well known wholesale houses with a large quantity of carnations of good quality for their Memorial day trade.

Zech & Mann supplied their customers with as good a grade of stock as

there was in the market for Memorial day and worked early and late to fill the many orders which they received. Mathias Mann, the junior member of the firm, forgot that there was such a thing as a greenhouse and helped out at the store during the week. The senior member, John Zech, was well satisfied with the amount of business done and said that it was far better than last year.

W. W. Randall returned from a Wisconsin and Iowa business trip in time to help out at the Memorial day rush at the A. L. Randall Co. store.

Mrs. H. H. Wilder, mother of Mrs. J. B. Deamud, and wife of H. H. Wilder, master mechanic of the South Park system, passed away May 25,

aged 71 years. The funeral was held from the family residence Sunday, May 28, the Rev. Mr. Mitchell officiating. Two other daughters, Mrs. J. Little and Miss N. Wilder, survive her.

We erred last week when we mentioned that Clifford Pruner was employed in E. H. Hunt's cut flower department instead of the supply department. He says the supply business is good enough for him and that he never was nor will be a cut flower man.

Gus. Swenson of Elmhurst is shipping an exceptionally fine grade of Early Rose and Festiva Maxima peonies to the E. C. Amling Co. This grower has good reason to be proud of his stock, for it is of unsurpassed quality.

# VAUGHAN & SPERRY

Long Distance Phone  
Central 2751.

**161 N. Wabash Ave., CHICAGO.**

Poehlmann Bros. Co. shipped out a large quantity of stock the past week besides filling many local orders. We have heard many people who have visited their mammoth greenhouse plant speak in glowing terms of the manner in which the growing end of the business was conducted and say little about the manner in which the stock was handled at the store. To form some conception of how much stock is cut and sold one should visit their salesroom a few days before a holiday and they will be surprised at the enormous quantity of stock that is received and the manner of its disposal. The way in which the force took care of the Memorial day trade was a sight to behold and it seemed as if the stock disappeared as fast as it arrived. August Poehlmann was present at the store the past week and proved to be of valuable assistance to the regular force.

N. J. Wieter and John Sinner, two prominent wholesale men, have got the camping fever and can be seen around the market with a map of Wisconsin in one hand and a guide to campers in the other. They expect to leave about June 25, for Trout lake for a two weeks' fishing trip. Both are great baseball fans and have subscribed to the Tribune so they could keep tab on the White Sox and Ping Bodie's wonderful hitting.

Chas. W. McKellar and wife, looking the picture of health returned last week from a month's stay at Hot Springs, Ark. Besides taking the regular course of bath treatments they enjoyed themselves by riding horseback and tramping over the mountains. While in Hot Springs, they received a most enjoyable visit from Paul M. Paley of Vestal & Son, the well known florists of Little Rock, Ark.

E. E. Pleser of Kennicott Bros. Co., says that they sold one-third more

## "The Busiest House in Chicago"

Is prepared to fill your orders at all times  
with a choice grade of **Cut Flowers and  
Greens** of all kinds.

### J. B. DEAMUD CO.

Long Distance Phone  
Central 3155

**160 N. Wabash Ave., CHICAGO**

peonies than they did last year at a price about 30 per cent less. The grower received about 40 per cent of the price which he obtained last year as there was a loss of about 30 per cent in the waste and the prices obtained were at the reduced value quoted above.

Fred Wittbold is now occupying one of the flats in the building which he purchased on Buckingham place last week. Louis Wittbold is showing his neighbors that he believes in beautifying his own home as well as others and two large magnificent bay trees now adorn his premises.

John Kruchten had a big shipping day last Sunday when a large supply of peonies and other stock was shipped out. Mr. Kruchten says that taken as a whole the Memorial day business was very satisfactory and a great deal better than he thought it would be.

U. C. Scollay, of John A. Scollay, New York, and Fred W. Herendeen, general sales manager of the United States Radiator Corporation, Detroit,

Mich., are attending the convention of heating and fitting experts here this week.

Kyle & Foerster say that they couldn't have done a better Memorial day business than they did under the weather condition. The trade evidently appreciates the quality of Klehms' peonies for a large quantity was sold at this house during the week.

L. Hoeckner of the Peter Reinberg force is doing a good business and realizing a tidy sum from the sale of cut flowers at his stand in Riverview park.

Spaghnum moss has been very scarce. Vaughan's Seed Store has been caring for their trade by piece-meal. The Wisconsin moss swarms are reported full of water.

Joe Weise of the J. A. Budlong force is another victim of the poisonous rose thorn, blood poison having set in in the index finger of the right hand.

Phil Schupp of J. A. Budlong's has turned weather prophet and is predicting cooler weather for July and August.

# A Large Crop of Roses

## OF ALL THE BEST VARIETIES

The quality is as fair as the weather conditions will permit, and we can truthfully say that there are no better flowers coming into this or any other market.

**Send Your Orders Direct to the Grower and They Will Be Taken Care of**

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

The wholesale stores were open all day Sunday, doing a rushing business. At the Peter Reinberg store one of the tables was cleaned off and a bountiful repast spread at noon, which the boys heartily enjoyed. The 25 pies furnished by the Case & Martin Pie Co. rapidly disappeared when the hard-worked and hungry boys sat down to the table.

Manager Pyfer of the Chicago Carnation Co. says that their Memorial day trade was very good, much better than last year, although not so satisfactory, for the prices in carnations were too high and the demand unusually heavy. A novelty seen here were some beautiful forced sprays of *Hydrangea aborescens grandiflora alba*.

James B. Wild, the well-known peony grower of Sarcosie, Mo., spent the greater part of the week in the city "watching the funeral," as he termed it. He stated that he shipped 600 cases of peonies into this market, with 10 dozen of flowers in each case. The special car for the joint meeting of the Chicago and Milwaukee Florists' clubs at Milwaukee, June 1, will leave Evanston at 5:30 p. m. via Chicago and Milwaukee electric. Returning, the car leaves Milwaukee at 10 p. m.

Reserve Sunday, July 23, for the Florists' Club picnic at Ehrhardt's grove.

A delegation from the Association of Commerce will visit Boston June 12.

**ROSES, our selection, - \$4.00 per 100**

**WIETOR BROS., 162 N. Wabash Ave., Chicago**

Wm. C. Hepp stole a march on his many friends when he and Miss Julia Terfer were quietly married on Monday, May 15. Mr. Hepp is well known among the trade, having worked in a number of the prominent retail stores in this city. He is at present with Julius Niesen, East Forty-seventh street.

Bassett & Washburn's was as busy as a beehive all the week with the working force filling the many orders which they had on hand. Judging from the many boxes that were shipped out we should say that their business was exceptionally good.

Hoerber Bros. enjoyed a brisk trade all week and were well satisfied with the amount of business done. Harry Mannheim and his assistants were kept on the jump filling both their local and shipping orders.

H. W. Rogers of the Weiland & Risch flower expects to leave soon on a 200-mile motor cycle trip to Pentwater, Mich. He will be accompanied by F. A. Shineer, the ex-champion bicycle rider.

The force at Percy Jones' found it necessary to work until nearly midnight on May 27, getting out the large number of shipping orders which they had to fill.

Visitors: A. York of the Lakeside Floral Co., Houghton, Mich.; Mr. Boelter of Boelter & Quehlke, Appleton, Wis.; H. E. Philpott, Winnipeg, Can.

CHICAGO, ILL.—Articles of incorporation have been filed by the W. E. Lynch Co. to carry on a florist business. The capital stock is \$20,000, and the incorporators are Andrew J. Ryan, Edward J. Prebis, and Irvin Livingston.

HARTFORD, CONN.—The Connecticut Horticultural Society will hold two fall exhibitions, one for dahlias, etc., September 19-20, at Unity Hall, and one for chrysanthemums November 8-9, at Putnam Palanx Hall, both at Hartford. The schedule of premiums will soon be issued, which will cover both exhibitions. Seasonable flowers will be staged and the usual quota of vegetables and fruits will be staged at both exhibitions.

## Los Angeles, Calif.

Business during May has held up fairly well and there has been no particular glut of the best class of stock. Funeral work has been responsible for the use of a great amount of outdoor stock in the cheaper grades, but the receipts of this have been so heavy that large quantities have gone to waste. Foremost among the outdoor stocks are the splendid roses. Ulrich Brunner, Mrs. John Laing, and other remountants have been especially good, while the pretty little Cecil Brunner has also been largely in evidence. Sweet peas have been and are very plentiful and of excellent quality, helping out materially with funeral work. In the early part of the month, Gladiolus Childsii and the old G. Brencleyensis sold well but now the better varieties, such as America, Mrs. Francis King and a number of the gandavensis hybrids have the call. Coreopsis grandiflora is becoming a very popular flower on this market, many retailers using it for a "yellow" window with excellent results. There are numberless other outdoor flowers, such as Shasta daisies, beet sultans, hardy azaleas, gailardias, California and Shirley poppies and various shrubs, all of which tend to lower the price of indoor stock. Carnations are fine and while white has cleaned up fairly well, colored varieties have been a drag on the market. In orchids, Cattleya Mossiae has been the chief standby but some magnificent C. gigas from local sources are now in the price for these being well maintained. Despite the great quantities of greens grown in the neighborhood, Asparagus plumosus and others are still short in supply and several growers are building more lath houses to cope with the local and shipping demand.

## NOTES.

Wm. Haerle, of the El Reah greenhouses, will erect a new greenhouse 15x125 feet, for plants using material from the J. C. Moninger Co., Chicago. He has just received another 10 cases of Cattleya Trianae from Carrillo & Baldwin, Mamaroneck, N. Y., in fine condition and has now one house 15x75 feet entirely devoted to this variety.

In the other orchid houses C. gigas and C. Mossiae are in fine order, there being several spikes bearing six flowers each of both these kinds. Gladiolus, Mrs. Francis King with spikes five feet long are among the offerings here. A bench of the new rose, Mrs. Aaron Ward, is in fine condition as indeed is all the rose stock here.

Albert Knopf has bought out Jack Portenac of the Redondo Floral Co., 245 S. Spring street. The Redondo Floral Co.'s store was one of the first in the city, having been opened by the proprietors of the Redondo Carnation Gardens about 20 years ago to dispose of their surplus stock. Mr. Knopf is an old florist, he having originated the Franklin Park Floral Co., in Columbus, O., and also been in business in Cleveland, Chicago, and other points before coming out here four years ago. He is well acquainted with local conditions, has the good will of all in the trade and will, we venture to predict, make a great success of his new undertaking.

In the hills hereabouts wild flowers are extremely beautiful, the Mariposa lilies (calochorti) being among the prettiest. Romneya Coulteri is seen around the stores, its beautiful pure white flowers and fine foliage making it very attractive. The wild yucca mentioned in THE AMERICAN FLORIST May 20, page 873, is plentiful and there are scores of other beautiful and interesting things to be seen. In the canyons the wild maidenhair, several pellemas and some pretty varieties of scolopendrium delight the fern lover or botanist.

The Los Angeles Flower Market reports a busy time handling the immense quantities of outdoor stock but it has cleaned up fairly well in all lines. Good stocks of carnations, coreopsis, sweet peas, gladioli, including some splendid G. America, can be seen daily and manager Charlie Morton keeps hustling.

The Florists, Fifth street, report excellent business. The store of this enterprising concern is always neatly and well arranged, large vases of Mrs. Francis King gladioli and some fine large specimens of Dorothy Perkins rose making a very beautiful showing.

The Horticultural Society gave a complimentary banquet at the King Edward hotel to H. Plath of San Francisco, May 23. Over 20 of the boys turned out to greet Mr. Plath who was delighted with the reception given him. The tables were finely decorated with American Beauty roses.

Jacob Dietrich is making a large addition to his lath houses at Montebello. Stock at the Dietrich & Turner range is in fine order and this firm will go largely into the culture of adiantum for cutting.

E. R. Meserve is making an addition to his lath houses at Signal Hill. The present addition is about 1 1/4 acres making 3 3/4 acres in all.

J. Smith of Smith & Fellers, Cleveland, O., has purchased a home here in the fashionable Wilshire district.

H. N. Gage reports business at the new stand in the Pantages building as excellent for the season.

Visitor: H. Plath, San Francisco.  
H. R. R.

### Rockford, Ill.

The observance of Memorial day surpassed that of any previous year. Pot plants, roses and carnations sold well, although outside competition caused a cut in prices in some lines. The late frosts last year, which damaged the early planted stock, caused the buyers to be cautious and delayed purchasing their plants for decorative purposes. The offering of inferior stock in 10-cent and other stores is a severe handicap to the high grade stock.

### NOTES.

The barn of R. H. Shumway was partially destroyed by fire at noon May 25, which started in the roof and caused a damage of \$500. The family was at dinner when the fire broke out, but fortunately saved the horses and carriages. There was no insurance.

Former Mayor E. W. Brown, Harry Williams and Fred Carpenter addressed a meeting at Freeport May 24 at the Meeting Club, upon the park commission law as it has worked out in this city.

The Florists' Club, from which so much was expected, is apparently dy-

The severe heat has given business a slight set-back this week, but another fortnight will no doubt find the demand for all kinds of stock far ahead of the supply. Outdoor carnation planting is in full swing, the trouble is to get enough assistance for the various branches of work, laboring men being somewhat scarce at this time of the year.

John Foster, the oldest employee of the Dale Estate, passed away last Monday after a painful illness of four months' duration. John Foster was 65 years of age, and came from Liver-

## Aschmann's Asters

After Decoration Day you have empty benches. Will it pay you to have empty benches? Take a few minutes of your time, think and consider what will pay the best, Chrysanthemums? Oh, no! I know something better. I plant a bench or two with Asters for July and August. I cut them; that will give me time to replant my benches with a fine lot of fall and holiday plants suitable for my fall business. I am going right now to write an order to Godfrey Aschmann, of Philadelphia, for his **Giant Crego Asters**. They are the earliest and best branched Asters in the world. Yes, we have 20,000 of them in four separate colors, white, rose, purple and pink. Strong plants, 2 1/2-in. pots, \$3.00 per 100; \$25.00 per 1000.

## GODFREY ASCHMANN

### Indianapolis.

HOT WEATHER RUINS FLOWERS.

The story we have to tell about the extreme hot weather is without doubt the same that is coming in throughout the whole section of the country. There is hardly a flower that will bear up under glass. The greatest care was necessary to keep the candytuft looking only half proper. Feverfew also showed signs of the unusual heat. The carnations were roasted and almost worthless. The peonies were forced into bloom all the way from a week to ten days before Memorial day. Those that did last did not amount to very much, and had to be sold at a less figure than good flowers would have brought. Quite a bit of iris was used to fill out bouquets for the cemetery. Roses were in great plenty.

### NOTES.

Herman Junge and A. W. Brandt were in Chicago for two days last week and spent their entire time among the growers and commission men. Among the plants visited was that of Poehlmann Bros. The two Hoosiers were given a royal welcome. John Evans of Richmond, Ind., was also in Chicago at the time but it was not the fortune of Junge and Brandt to locate him.

Homor Wiegand, captain of the Northside Florists' Ball Club has issued his first call for practice. He is determined to carry away the baseball honors of this year's baseball game at the annual florists' picnic.

It is quite probable that after Memorial day the florists will get together and close at six o'clock every night except Saturday, and on Sunday noons at one.

Smith & Young Co., are still on the look-out for a suitable room in which to conduct the wholesale business which they will start the first of October. Good rooms are scarce.

A. W. B.

### European Horticulture.

FROM THE BRITISH TRADE PAPERS.

The Stinging Tree of Formosa.—With respect to the Stinging Tree of Formosa, a correspondent of "Nature," writing from the Camp, Central Provinces of India, gives the following interesting information:—"With reference to the letter on the Stinging Tree of Formosa in 'Nature' of March 2, it would be interesting if your correspondent would throw light on the exact mechanism by which the sting in Laportea pterostigma and L. crenulata is produced. L. crenulata is locally abundant in some parts of India. The curious point is that the leaves are often glabrous. Moreover, the stinging effects are apparently sometimes experienced without actual contact with the plant. I was one day walking through the hot, steaming forests near the Tista River, in British Sikkim, with a friend. The laportea

was abundant, and we carefully avoided it. On our way home my friend was seized with the peculiar stinging sensations of the laportea in several parts of his body. These lasted several days, and on the night immediately after being stung became so bad that he was unable to get any rest and became feverish. On another occasion I had to cut a survey line through dense forest with an undergrowth of L. crenulata. The coolies avoided the leaves as much as possible, and cut the stems low. Some of them were stung on the body, but all were attacked in different degrees with sneezing, violent catarrh, and ultimately vertigo. I myself, although at some distance from the actual cutting operations, though I had to walk up the cut line, suffered to a less degree the same way. Yet I have often dashed a leaf across the back of my hand with no ill effects. Sir J. Hooker and others have noted that

the effects are worse at some times of the year than at others. The inflorescence, it should be noted, is covered with hairs, and I have only been able to account for the facts above described by supposing that it is these deciduous hairs of inflorescence which get into the clothes and become inhaled when the tree is shaken.

SPOKANE, WASH.—F. W. Winters at his store on the corner of First avenue and Lincoln street is enjoying a big trade. Mr. Winters is making a specialty of roses this season.

A SATISFACTORY MEMORIAL DAY.

Memorial day is past and every one seems happy. The whole trade seems to think it to be as good a day as they have ever had. There were no high prices but everything sold well, and there was plenty to go around. Roses were none too plentiful, white carnations were scarce but the price did not advance, two years ago white carnations were almost a drug. Lily of the valley from out doors was picked up readily and the quality was extra good. Colored carnations, although plentiful, sold at good prices in the markets. Feverfew was good and the yellow marguerites were of fine quality and there was an abundance of stocks. Everyone had a busy time—grower, wholesaler and retailer. It certainly has done everybody good, although they are tired; it seems a great change from a few weeks ago when the glut was on. It is more pleasant to write news about the market than it has been, and let us hope it will continue. With the Standard Oil question disposed of, the stock market on the upward swing, and a crop of blushing June brides scheduled, the prospects for the trade look rosy; indeed, some of the growers are already talking about automobiles and vacations, which shows prosperity. There were quite a few metal wreaths in the market, but there was little call. Many of us from the old country can remember seeing in the cemeteries these metal wreaths enclosed in a glass globe, warranted to stand all weathers. They always seemed to smack of a blacksmith and paint shop. There was an excuse in those days when flowers were scarce, but here, with flowers plentiful every day in the year there is no excuse for gulling the public with a gaudy painted piece of iron. Saturday we met a man carrying home a wreath of wax roses; he said it looked pretty, but he was somewhat afraid of what his wife would say when he got home. He said the more "he looked at the thing the madder he got." The wax works and museums are the place to keep those things. We have enough imitations and people of good taste will frown upon the attempt to put them on the market when real flowers are to be had at any time. We have had a thunderstorm accompanied by a good rain, which broke the drouth. The outside crops that were sown were either burned up with the heat or eaten by the cutworms. One florist in particular sowed four pounds of sweet peas

Cincinnati.

CONTINUED HOT WEATHER.

The hot spell continues unabated, and relief seems far from being close at hand. Now and then a welcome thunderstorm hovers about, and, failing in its attempt to settle the dust passes on to other regions. All plant life as well as perspiring mortals, is feeling the effects of the blistering rays of the sun. The lawns that were too closely cropped in early spring are burning up. Even the young wood of hedges, such as boxwood, that were well established but in exposed places where they have no sheltering shade whatever, are turning yellow. The outdoor horticultural and agricultural crops are at more or less of a standstill. Many fear to attempt to work them to any extent at all for fear their efforts may prove harmful. The appearance of the trees is the one redeeming feature of the season. They are a mass of green well-formed leaves whose verdure is a thing

Alex Siegel will shortly take a trip to the lakes. W. F.

## New York.

The outing committee of the Florists' Club report that the annual outing will occur on June 28, and will consist of a sail of two or more hours upon the Long Island Sound landing at the grove where refreshments will be served and the sports participated in. The souvenir programme has been dispensed with this year and the expense will be entirely met by the sale of tickets at the following prices, gentlemen's \$4.00, ladies' \$2.50, children's \$1. lady and gentlemen \$6.00. The committee are expecting liberal support and anticipating a good time.

The New York Horticultural Society will hold an exhibition in the Museum building of the New York Botanical Garden, Bronx park, June 10-11. Premiums are offered for peonies, hardy roses, rhododendrons, azaleas, irises, herbaceous plants and orchids.

U. G. Scollay, of John A. Scollay, was in Chicago this week attending convention of heating experts.

## Philadelphia.

## A LARGE PLANT BUSINESS.

The feature of the week past has been the preparations for Memorial day, the plant men being particularly busy, as all sorts of bedding must be completed before May 30. The season is said to have been very good with most of them. The Robert Craig Co. say they have never moved so much spring stock before. W. K. Harris had a splendid stock of pot roses and sold them all. The Colfesh boys had a fine season, as did also Coles, Becker, Carpenter, Zimmer and all the rest. Chrysanthemums are seen taking the place of the spring stock with some and others are filling up with the old Boston fern and its variations. This has been peony week and the crop could not have been better timed for the holiday. They commenced coming in on Monday, the shipments increasing daily until Saturday, when they appeared at their height. Immense quantities were shipped by the commission men in all directions, there being a large out-of-town demand. Their business in the city was about up to that of last season, there being enough doing to keep the regular force busy all day Monday and up to noon Tuesday, when many of the central stores closed. Carnations were fairly plentiful and there was not much advance in price; in fact, figures were much the same as for a week previous with the exception of a few fancy carnations and an advance of a dollar a dozen in fancy American Beauties. One of the commission men said that at Memorial day, or rather before, they received many letters from people who had a few peonies or outdoor shrubbery that they thought they could turn into money and who wanted to know how much it would bring. Such shipments were always discouraged, as in most cases the stock received was not worth the expense charged and it cost more than the commission would amount to to handle and keep track of such small lots.

## NOTES.

The rose grounds or beds of H. A. Dreer at Riverton are now bursting into bloom and should be visited by all lovers of roses who can make it convenient to see them. Here are planted at least one or more of all the newer sorts as well as those tried and true varieties which have proven their right to a place in every collection. Each day a cutting is made and a display of the various kinds with their names attached is to be seen at the store, 714 Chestnut street. Last sea-

son this was much admired and induced many purchases.

It will now be time to look out for the new crop of houses that will spring up in many parts of the city. The large Stephenson house on Old York road is almost ready for the glass and is an imposing structure. It is rumored that large additions are to be made to the houses at "Stone Lodge," H. H. Battles' place, in Delaware county.

The trade was much shocked to hear of the death of Lemuel Ball. He was a good grower, in fact, one of the most expert men of the business with palms, dracenas, and such plants. The business is to be continued by his son-in-law.

## Baltimore.

## DRY AND HOT WEATHER.

The hot spell we are now experiencing has brought havoc with some branches of the trade, and if relief does not make its appearance soon the outside stock will be ruined. Already some of the growers are out of water and have trouble in keeping their inside stock from suffering. The present drought has already exceeded that of last year. Last week there was a steady demand for cut flowers, the retailers being kept busy with funeral work. The growers have started cleaning out their houses and are naturally cutting stock very close. At present there is an abundant supply of lily of the valley, which sells cheaply. Sweet peas are shortening up in supply somewhat but find fairly good demand. Carnations are steady. Roses are in good supply. Callas are still to be had in large quantities and move slowly. Gladioli are fast making their appearance and sell well. Greens are not over-plentiful and find ready sale. The retail market is in full blast, having heavy calls for all kinds of pot plants. Geraniums are the leaders and stock is scarce, especially plants bearing blooms. The pot plant trade is greater this season than in any previous year; it seems as though every one is planting to make the city beautiful. The parks and squares are all nearly planted and credit is due to the city for making such a showing. The growers have been exceedingly busy with suburban planting, the only disadvantage being the obtaining of the necessary labor. From present indications it looks as if all pot plants will be entirely sold out.

## CLUB MEETING.

The regular meeting of the Gardeners' and Florists' Club was held Monday evening, May 22, in the club rooms, St. Paul and Franklin streets, President Robert L. Graham in the chair, with a fairly good attendance.

The meetings are certainly interesting as the time is fast approaching when Baltimore will turn itself loose at the coming S. A. F. convention. It is generally understood that the next meeting night will be known as ladies' night and refreshments will be served. This is one of the starting points to get all acquainted with each other. The following members were elected: W. E. Cook, Peter C. Eldman, M. McDulseah and one proposition received. Interesting reports of convention committees were made which met with approval. The question box furnished some very interesting discussions.

## THE CONVENTION.

The various committees for the coming convention are hustling and the reports received point to success for not only the committees but the whole city is interested and looking forward to the meeting. The Army, where the convention is to be held, is one of the finest in the country, and the entire exhibition will be on one floor.

## CUT FLOWERS

28 Willoughby Street,

BROOKLYN, N. Y.

The finance committee is doing remarkably good work; the entertainment committee is busy on the look-out for the best pleasure resorts; the sports committee are losing no time; the souvenir program committee is hustling for advertisements and the book will no doubt surpass any yet published; the advertising committee have done and are still doing good work advertising the coming convention. Various kinds of literature is being sent out and cards are now placed throughout the city announcing the meeting; the hotel committee have secured one of the swellest hotels, the Belvidere on St. Charles and Chase streets, which is convenient to railroads and steamboats. The trade exhibits will no doubt surpass any yet held as nearly all the space is sold.

## CONVENTION COMMITTEES.

Convention committees of the Gardeners' and Florists' Club are as follows:

Finance—R. Vincent, Jr., chairman; C. L. Seybold, Geo. O. Brown, E. J. Seidewitz, J. Boone, J. Hamilton, Wm. Johnson, Philip B. Welsh, J. L. Townner, Wm. Feast, J. J. Perry and O. Harrison.  
Entertainment—Robt. Halliday, chairman; R. L. Graham, I. H. Moss, N. F. Flitton, J. L. Boone, F. Bauer, Wm. Christie, Wm. Frazier, Geo. Morrison, J. Stubb and Wm. Lebr.  
Reception—R. L. Graham, chairman; G. Morrison, J. Halliday, J. Cook, Jr., G. Talbot, Wm. Johnston, R. Halliday, M. Hamann, J. Glass, C. Wagner, J. Kepingier, J. Rider and J. J. Perry.

Sports—I. H. Moss, chairman; C. L. Seybold, J. S. Boone, J. J. Perry, C. Kieftsch, F. G. Bauer, Henry Lebr, G. Kalb, M. Thou, T. Patterson, T. Stevenson and M. Richmond.  
Souvenir Program—C. L. Seybold, chairman; Philip B. Welsh, R. Vincent, Jr., G. O. Brown, J. L. Townner, C. Wagner, and A. G. Feidler.

Press—G. O. Brown, chairman; N. F. Flitton, H. J. Quick, J. L. Townner, J. J. Perry and T. Welch.

Transportation—John J. Perry, chairman; Chas. Seigworth, Ed. Stevenson, Jas. Glass and Jas. Hamilton.  
Advertising—Philip B. Welsh, chairman; Geo. O. Brown, C. Hess, W. G. Lebr, Gustave Lotz, Jr., G. M. Cook, Wm. Johnson, A. G. Feidler and Geo. Eberle.

Hotel—Fred. Bauer, chairman; H. Klein, H. Fischer, C. L. Seybold, Wm. Christie and Jas. Boone.

Officers—R. L. Graham, president; Wm. Christie, vice-president; N. F. Flitton, secretary; F. G. Burger, treasurer.

Supr. of Trade Exhibition—Mac Richmond.

## NOTES.

Edward Kress, E. North avenue, last week broke one of his ribs while handling plants in one of his greenhouses, but fortunately he is able to attend to his duties.

Feidler, the Hampden florists, are showing a tastefully arranged window for Memorial day, composed of ferns, cut flowers and American flags.

F. G. Burger's Greenmount avenue store is being painted. The beautiful lawn adds greatly to his establishment.

## National Gladiolus Society of England.

The National Gladiolus Society of England has been organized with Sir Francis Burdett, Bart., president; and the following patrons and patronesses: Lady Burdett, The Earl of Listowel, K. P., The Countess of Listowel, The Lady Victoria de Trafford, Mrs. Eurdon-Muller, Sir Percy Van Notten Pole, Bart., Lady Van Notten Pole, The Countess of Ellesmere.

The secretary is K. Atkinson, The Flagstaff Lockshead, Southampton, and the members of the council are: Kelway & Sons, Peter R. Barr, Frank Lilley, Charles Blampied, Maurice Prichard, A. J. Bliss, G. H. Atkinson James Carter & Co., W. C. Bull, and three other members to be elected.

The first meeting of the council was held at the Royal Horticultural Hall (by kind permission of the Royal Horticultural Society) Thursday, March 14. Rules and regulations governing the society, its membership and work were adopted. A handbook will be compiled as soon as possible giving all available information respecting the cultivation, etc., of the gladiolus with a classified list of named varieties, which will be issued annually to members. The society intends to hold at least two shows annually and prizes and medals will be offered for competition, both for amateurs and the trade. At suitable times during the flowering season the council will meet to consider any new varieties that may be submitted by growers, and if in their opinion it merited, they will grant a certificate and include the variety in the list in their next handbook in the classified list, with the name of the grower and date of certificate.

The society has a small piece of ground situated at Lockshead, which has been granted them by the Lockshead Nurseries, Ltd., for use as a trial ground. Should any members desire the society to test the bulbs bought from growers, or to test new seedlings, they will have the right to send up to a hundred bulbs of each variety to the secretary, to be grown on the trial ground on their behalf. A nominal fee of one shilling will be charged by the society. The Society undertakes to grow such bulbs carefully and to report fully to the members on their growth and to inform them of the flowering of such bulbs, sending the cut blossom. These may also be submitted to the council, if the member desires. At the expiration of the season the bulbs will be returned with a full report. Members purchasing new and costly varieties will find the trial ground of great value as there have been many complaints in the past from persons who have purchased an expensive bulb represented to be a new variety, and have found, in the flowering season, that the bulb was of some well known stock. Members sending bulbs for trial are requested to state the firm the bulbs were purchased from, the date of purchase, and the name of the variety. In making purchases of costly bulbs, members are advised to inform the salesman that they intend sending one or two bulbs for trial to the National Gladiolus Society.

ROCHESTER, N. Y.—The Florists' Association has appointed the following as representatives on the Exposition Park board of managers: George D. Hart, Charles H. Vick, F. H. Keller, E. F. Wilson and John Dunbar.

SANTA ROSA, CALIF.—At the twenty-third annual flower carnival held May 5, the flower exhibition was one of the important features. The exhibit of Luther Burbank of amaryllis and other flowers was the most distinctive feature.

The Old Reliable Firm of Godfrey Aschmann is more active than ever. No competitor can harm him. He will look to your interests. Mail him your orders.

Look! He Offers you Bargains in Surplus Stock of

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duran, New York, Second Vice-President; C. E. Kandel, Cleveland, O., Secretary and Treasurer.

Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

HOWARD M. EARL, of W. Atlee Burpee & Co., Philadelphia, Pa., will start shortly on a Pacific Coast trip.

It is reported that the California sweet pea crop is likely to prove no more than half of an average one.

BOUND BROOK, N. J.—Anton C. Zvolanek, the sweet pea specialist, leaves this week for the Pacific coast on his usual crop inspection trip in that section.

IMMORTELLES will be high this season on account of the advanced import tax on colored stock (advanced from 25 per cent to 60 per cent) and still higher by reason of the short crop, reported May 11 to be not more than half that of last year.

CHICAGO.—Prices on the board of trade, May 31, were noted as follows: White clover, from \$22 to \$30.—Vaughan's Seed store is busy closing import and export contracts on the many stocks of plants and bulbs which they must provide four to six months in advance.

ROCHESTER, N. Y.—Chas. H. Vick, of James Vick's Sons, says that for a time in March the business outlook was very discouraging, but in April it began to recover and the improvement continued until the present time, the business of the season now exceeding that of 1910. The aster seed trade with the florists was enormous, exceeding that of all previous years. Sales of grasses, including timothy, clover and alfalfa, were far ahead of any former year.

MILFORD, CONN.—The Everett B. Clark Seed Co. states that the season has been excessively dry and scarcely remember having ever before seen it so dry at this early date. However, the situation has been relieved a little during the past week by some local showers. The crops are not looking so bad as one might expect, judging from the parched condition of the soil. The stand of corn as a rule is very fine and the root crops have made a very fair start.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

SAN JOSE, CALIF.

### Peas and Beans.

May 27.—Peas were quite late in going into the ground in Michigan and Wisconsin as excessive rains kept the farmers off a good many of the fields. The peas are all in the ground now, of course, but seeding is only about completed.

Beans are going out to the growers and the desired acreage is secured and will be planted within the next few days.

### New York Seed Bill.

New York, May 24, 1911.—With further reference to Assemblyman Gregg's New York state pure seed bill, now entitled, "2 Rdg. 925, 2008. Int \$34," I have just been advised that this bill was passed in the assembly May 15 and has gone over to the senate. It is now in the hands of the Senate Agricultural Committee, of which the Hon. James H. O'Brien, Senator, is chairman.

I would recommend the trade throughout the state to file their protests with the Hon. James H. O'Brien, Chairman Senate Agricultural Committee, Albany, N. Y., by first mail.

MARSHALL H. DURYEA, N. Y. Correspdnt. Am. Seed Trade Assn. [The other members of the senate agricultural committee are Messrs. Ferris, Sanner, Long, Roosevelt, Thomas and Bussey.—ED.]

### Connecticut Conditions.

Orange, May 27.—We have had quite a good deal of cloudy weather the past week and very little rain, one or two very light showers, not enough to go into the ground more than an inch or so. We are getting rather used to dry Mays, for this month has been generally dry for several years past. We must have good soaking rains during June to make good seed crops, good potato crops and good hay crops. All local dealers report satisfactory seed trade, the bulk of which, of course, has passed and the few scattering orders that are coming in now are not enough to keep the help busy. I should judge as a general summing up of the year's business, that it will show a slight falling off from the record-breaking 1910.

Turnip seed, under larger acreage than for many years, generally speaking looks A1, and is in full bloom now; on lighter lands the seed now feels the pinch of the drought, which is beginning to be quite severe.

Beets have started out a little disappointing; many bulbs, while appar-

ently sound when set out, have not started, so there are many gaps or missing places in nearly all fields. Those that have started look fairly healthy.

Onion looks just about as usual at this date and plants are good in color and vigorous; but it is rare at this date that onion does not look well, provided the proper quality of bulbs are set out.

Kale seed is in about the ordinary condition at this time and bids fair to give a satisfactory yield.

Corn just coming out, occasionally a piece large enough to cultivate; stand seems pretty good.

Potatoes coming up very slowly on account of so much cold and drought.

W.

### Penalties of the New York Seed Bill.

The proposed New York seed bill imposes upon conviction a penalty of a fine, not exceeding \$100, for the first offense, and for each subsequent offense not exceeding \$200, or imprisonment not exceeding one year, or both, at the discretion of the court, for the violation of the act, which provides that every receptacle, package, sack or bag containing seeds of any cereals in quantities exceeding ten pounds or exceeding one pound of cabbage, turnips, cauliflower, celery and onions shall be marked as follows:

(1) The full name and address of the seller.

(2) The name and kind of the variety thereof of seeds, except in the case of mixtures prepared for special purposes, when they shall be labeled as mixtures, giving the per centum of each kind and variety.

(3) The name of any foreign injurious seeds present of three per centum or over by count and both the name and per centum of the following adulterants present: Yellow trefoil in any variety of clover; yellow trefoil, burr clover, sweet clover or dodder in alfalfa, Canadian bluegrass in Kentucky bluegrass; meadow fescue or rye grass in orchard grass, or orchard grass in meadow fescue.

(4) A guaranty stating the per centum of purity of the contents of the package by count, which shall upon official examination in no case fall to exceed three below the guaranteed per centum.

### Nebraska Seed Crops.

Fremont, May 27.—A good acreage of vine seeds has been contracted and the crops either have been or are now being planted under favorable conditions. If we have sufficient rains and good growing weather the balance of the season there will be good crops of nearly all varieties, unless some unforeseen damage in the form of hail, insect injury, or something of that kind occurs. Most of the varieties of field and sweet corn grown here have been planted under favorable conditions and in good acreage.

Waterloo, May 29.—All seed crops are now in the ground except cucumbers, and they will be planted within the next week. Corn has gone into the ground under most ideal conditions and the result is a more nearly perfect stand than we have had in some years previous. The acreage in sweet corn is slightly larger than a year ago, possibly 20 per cent increase. Flint corns have also been planted a little more freely and are starting out under favorable conditions. On the whole prospects are quite favorable at present on all crops.

## Lilium Harrisii

THERE are conditions, and they occur not infrequently, under which all Lily bulbs fail to make good flowering plants. There may be probably are more difficulties attending the growing of Lilium Harrisii bulbs than most forcing varieties and yet those who do them will have found the early blooms very profitable. In many parts of the south where this bulb has been grown over a longer season and without the overforcing sometimes imposed on the plants, Harrisii has given most satisfactory returns. We are, contracting subject to crop conditions a select strain of Well Grown Bulbs of

| Strong 6-inch pots, 12 to 15 inches high.....                                     | 1 00        | 10 00         |
| Strong 4-inch pots, 6 to 8 inches high.....                                       | 40          | 4 00          |

## Schizophragma Hydrangeoides The Climbing Hydrangea

It is the first time that we are able to offer such a fine lot of extra heavy, pot-grown plants of this rare hardy climber. Splendid, strong plants, 2 to 3 feet high, in 6 and 7-inch pots, 75c each; \$7 50 per dozen.

## Clematis Montana Grandiflora

A spring-flowering Clematis, the first climbing plant to bloom, frequently opening its flowers during the last week in April and continuing well through May, the flowers remind one of the Anemone Japonica in miniature, being 1 1/2 to 2 inches in diameter and of a pure white. A clean, healthy, vigorous grower, not affected by disease of any kind, and a vine which is destined to become very popular. Strong 2-year-old plants, 35c each; \$3 50 per dozen; \$25 00 per 100.

**HENRY A. DREER, Inc.,** <sup>714</sup> Chestnut St., Philadelphia, Pa.

The above prices are intended for the trade only.

### Fraud in Early Potatoes.

Small Peachblow or McClure potatoes are being sold in Colorado as early potatoes, states C. L. Fitch, potato specialist of the Colorado Agricultural College in the news notes published by that institution, dealers claiming they bought them as southern grown Triumphs. The Peachblow is a late variety and an excellent keeper and a large number of small medium-sized tubers of even round shape can be selected. Here the similarity ends. Triumph, the first early potato from the south, skins badly at this time of the year and are of a brownish red color. Peachblow at this season are red or pink veined with white and are tough and rubbery. The former are selling at seven cents a pound, the fraudulent early potatoes at six pounds for a quarter. A sure test is that early potatoes will show no signs of growth for 60 or 90 days, while these fraudulent potatoes show signs of life by the starting of sprouts. True early potatoes will be found without signs of life at the eyes.

### Floating Gardens in Mexico.

THEIR ORIGIN AND DEVELOPMENT.

Remains of gardens that must have been laid out long before Mexico was conquered by the Spaniards still exist there, showing that the half-civilized tribes that dwelt in the southern part of the American continent knew the art of decorating Nature, and converting their wilds into delightful resorts.

The first floating gardens (says the "Philadelphia Record") consisted of masses of earth that became loosened from the main land, and were held together by the roots that lay embedded in them. Then the Aztecs, seeing that it was possible to have floating gardens, made rafts of weeds and rushes, closely fastened together, and upon these a deep layer of rich earth was put. Thus moving islands were formed, sometimes several hundred feet long and 3 ft. or 4 ft. deep, and launched out upon the water. It was upon these floating islands that the Aztecs grew the fruits, flowers, and vegetables that they sold in the markets of the towns along the shore. They would push their gardens right up to the borders of the town, and so float on from one town to another. These strange gardens had their origin in the necessities of the people of a certain locality, who, being shut in by their enemies, were forced to resort to some means to avoid famine. Finding themselves on the border of a lake, they set to work to make floating islands; and on these they planted corn and other vegetables. By means of long poles they moved the floating gardens from one shore to another, and thus supplied the hungry people. In this way the Mexicans were saved from conquest, and so suc-

cessful was the plan of making the floating gardens that they became common, and instead of being used solely to raise food, they were planted with trees and with flowers of the most brilliant colors and delicious perfumes.

These floating islands may still be seen in parts of Mexico. Many of the peasants, living in humble huts of brick or reeds along the shores of Lake Texcoco, have the islands as their only farms, whereon they raise and sell the vegetables grown in Mexico, which need but little cultivation and care. Up to within a hundred years or so ago beautiful floating gardens were still to be seen on this and other Mexican lakes. Sometimes quaint little edifices peeped from among their luxuriant shrubs and flower beds, sometimes the pretty paths were overhung with rich clusters of tropical fruits. Such were the gardens of the wealthy nobles of that time, who took holiday trips on their floating gardens, and might move slowly over the waters, the verdant raft propelled by servants with long, slender poles, and thus travel, reposing amid flower beds and under deep and luxuriant shadows.—Journal of Horticulture.

A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

□ Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5000, \$400.00. 25 at 100, 250 at 1000 rates. Place your order now to be in on early deliveries.

**ALBERT M. HERR, LANCASTER, PA.**

## Peach Pits Cracking

Fine natural peach pits cracking and with fine little green trees perfectly hardened and 7/16 will live and can be budded this summer. They are two weeks ahead of the sprouts. Packed in green moss and will ship perfectly.

Also Asparagus Seed of the Imperial Palmetto and Rhubarb Roots.

**WARREN SHINN,**  
Nurseryman, WOODBURY, N. J.

## The Nursery Trade

**American Association of Nurserymen**  
W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shenandoah, Ia., Vice Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16 1911.

ONTARIO, CALIF.—J. S. Armstrong, the nurseryman, will make an eastern trip about June 15.

W. VAN KLEEF, JR., representing W. Van Kleef & Sons, Boskoop, Holland, sailed for home on the S. S. Lusitania, May 31, reporting business good.

The next meeting of the American Peony Society will be held at Horticultural Hall, Broad street, Philadelphia, Pa., Thursday and Friday, June 8-9, and not June 14-15 as previously advertised.

HUNDREDS of pine trees imported from Germany by the state for the denuded Adirondack lands, have been destroyed by orders of the foresters. They developed a disease which threatened to ruin the forests.

EUROPEAN ELMS.—Prof. Sargent says there are European elms in the neighborhood of Boston at least a century old and still in good health. So far as he has observed, all the European species promise to do well and live to old age in that part of the country.

### American Peony Society.

Owing to the extreme warm weather that has prevailed all over the country, the date of the show of the American Peony Society has been advanced, and it will be held at Horticultural Hall, Philadelphia, June 8-9. The premium for class 14, best six blooms Duchesse de Nemours, is for Calots', or the white type, and not Guerin's pink Duchesse le Nemours.

All exhibits at the coming show of the American Peony Society to be held at Philadelphia, Pa., June 8-9, must be staged by 3 o'clock on the opening day, June 8, and all entries should be sent to the secretary, A. H. Fewkes, Newton Highlands, Mass., entries to be in his hands not later than the morning mail of June 5. All goods for exhibition purposes to be sent the society in care of David Rust, secretary, Pennsylvania Horticultural Society, Broad and Locust streets, Philadelphia, Pa., and all shipments to be prepaid. Exhibition blooms coming collect will not be accepted, as the committee has no funds from which to pay out-of-town charges. The society would also appreciate advice as early as it can be given to the secretary, of approximately how many entries will be made, even if this number is later reduced, in order that the proper accommodation may be ready when the entries come in.

J. H. HUMPHREYS.

### Viburnum Davidii.

This is one of a number of new viburnums which have been introduced from western and central China within the last few years. Like many of the species, however, it has been known from herbarium specimens for a much longer period, for it was col-

lected by Pere A. David in Mupin in April, 1869, and was described by Franchet in "Plante Davidiana," Vol. II, page 69. It is an evergreen, and is said to grow from one foot to two feet in height. The leaves are ovate four inches to six inches long and 1½ inches to 2¼ inches wide. The margins are toothed, and the surface is peculiar by reason of three strong nerves, which form an ellipse with a quarter-inch margin. The flower-buds are set in autumn, and remain dormant all the winter, to open into moderate-sized inflorescences of white flowers during late spring. They are succeeded by small blue, oval fruits, which ripen in autumn. Though rare at present, it ought to form a useful shrub and become popular in the future. It is found at an altitude of 8,400 feet, in consequence there is every reason to believe that it will prove quite as hardy as other species from the same altitude in Western and Central China.

### Nurserymen's Guarantee.

ED. AMERICAN FLORIST:

How much responsibility should be assumed by stating "We guarantee trees to grow?" Would it mean that the guarantee had been fulfilled if the trees had been properly planted, or transplanted, guyed and watered, then put forth growth and started to grow? Afterward on account of not being properly cared for, the trees died, should the guarantee hold as though it read "We guarantee the trees to live?" S. & S.

The question of guaranteeing trees has been a theme for discussion among nurserymen for some time and many articles have been written upon the subject, and on general principles among the prominent nurserymen it is considered wrong to attempt to guarantee that trees will grow, as in almost every case different conditions arise and the seller can seldom control or even suggest, the requirements in the matter of proper planting; and, just as important for the tree welfare, is not able to control the care after planting; and least of all, the weather conditions which have so much to do with good results. In a few odd cases, contract plantings are guaranteed where the nurserymen have supervision of the planting and care for the following year, but this is done on a separate insurance basis, the guarantee being made for a percentage of the cost of the original planting. Large buyers such as parks and cemeteries seldom require any guarantee, for, having men who are able to tell the condition of a tree upon its receipt, if it is unsatisfactory the tree is not accepted. With fruit trees, however, there should be a guarantee that the variety is true to name, and the tree replaced or money refunded. The large and reliable nurseries nearly all have printed upon their sales sheet the guarantee that they take the utmost care to have their stock true to name, and hold themselves in readiness to replace, upon proper proof, all stock that may prove untrue, or refund the amount paid, and in most cases the seller is not liable to any sum greater than the amount originally received.

There are nurseries, however, that make a guarantee that the tree should live, and in some cases have a date limitation, at which they will replace

all stock not then alive, but this is considered by many as one of the greatest evils of the nursery business for the seller must protect himself, though the loss be heavy. When it is considered how many are the contingencies on which the success of the planting the stock depends, such as planting too deep, or too shallow, leaving the stock exposed too long, before planting, improper care after planting, a large price must be charged to insure a profit. On general principles it is fairer to sell first-class stock at a fair profit and let the seller carry his own guarantee. If the stock is purchased with a guarantee to grow, and without date limitation as to living, and the tree then makes proper growth, the guarantee seems to have been fulfilled even should the tree afterward die. W.

## Trade Directory

Of The United States and Canada

Price \$3.00.

American Florist Co., 440 S. Dearborn St., Chicago

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

## What the Users say

## "Fires Twice During Night In Coldest Weather; Kroeschell Boiler Far Better Than Cast Iron Boilers."

With your No. 14 boiler I am heating 27,000 sq. ft. of glass, but have no doubt this boiler would take care of 37,000 sq. ft. We have not had the least bit of trouble to maintain proper temperatures. In very cold weather I fire twice during the night. I had two cast iron boilers before, but yours are far better. Last winter I heated 17,000 sq. ft. of glass with my small boiler, your No. 7 maintaining a temperature of 50° when outside temperature was 6° above zero; (the regular rating of No. 7 boiler without Generator is 15,000 sq. ft. of glass), with the Kroeschell piping system in connection with the Kroeschell Generator. This piping system and Generator are entirely satisfactory. I take pleasure in recommending the system and boilers to anyone.

ANTON J. PAULY, Attica, N. Y.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

### Notes of the Chicago Coal Trade.

With the full realization of the importance of a good grade of steam coal in the successful management of a greenhouse business many growers are giving this matter timely attention and are making inquiries as to the quality of the several grades of coal and the contract prices for immediate and fall deliveries. From all indications some have taken advantage of the present dull coal market and have already placed their orders with the dealers. The Pinger Coal Co., Harrisburg-Franklin Coal Co., Black Gem Coal and Coke Co., and the R. C. Whitsett Coal & Mining Co., are quoting very reasonable prices on steam coals of all grades for both immediate and summer deliveries. Those greenhouse men who prefer Indiana Brazil Block for heating purposes, will find it to their advantage to have their orders booked in June, for block coal will advance fifteen cents per ton July 1—which would make an average of about \$6.00 more per car than the June price. Other grades of steam coal are at their minimum summer prices and will remain so until September 1.

M. A. Rolfe, manager of the Black Gem Coal & Coke Co., states that the greenhouse men have taken advantage of the low prices of the high grade Black Gem block coal of which his company is sole distributor, by sending in orders for this coal last month for June deliveries. This coal is of a very fine grade, being absolutely smokeless, and free from clinkers, and as a special inducement he is offering it at greatly reduced prices for summer deliveries.

R. C. Whitsett, president of the Whitsett Coal & Mining Co., who had a very successful season last year with the greenhouse trade, looks particularly pleased when this trade is mentioned. He expects 1911 to be his banner year with the florists and gardeners for he is offering some very fine grades of coal at greatly reduced sum-

Here is a striking comparison between the size of a wood post and our wrought iron.

And here you see the angle purlin used in our iron frame house in comparison with the old fashioned wood purlin.

## The Good Sense of It

When you buy a greenhouse, constantly keep in mind that strength and durability do not always go together. Take, for instance, a 5-inch wooden post. It is plenty strong to start with, but it doesn't stay strong; while our Guaranteed Wrought Iron Post is less than a third the size, and keeps on being just as strong for years and years. In fact, it has stood an actual test of a quarter century. Wood posts actually cost more, because you have to use twice as many and dig twice the holes. And think of the difference in shade. By the same good sense compare the wood and angle purlin.

The matter simmers down to two things: Our Pipe-Frame house is actually the cheapest house you can afford to buy, and our Sectional Iron Frame is the best investment. Both are constructed on the lines of greatest endurance and greatest lightness—for the money.

Keep in touch with us.

Furnishes the  
Most Nicotine for the Money!

Manufactured by THE KENTUCKY TOBACCO PRODUCT CO., Louisville Ky.

Government Entomologists Office,  
Entebbe, UGANDA, (Central Africa)  
18th April, 1911.

Aphine Manufacturing Co.,  
Madison, N. J., U. S. A.

Gentlemen:—I have to thank you for the Aphine received a few weeks ago. I have tried this insecticide on a new species of Coccid, *Stictococcus dimorphus* Newst., which attacks cacao with very favorable results. This pest is a very difficult insect to keep under control.

Yours faithfully, W. GOWDEY,  
Government Entomologist.  
\$2.50 per gallon; \$1.00 per quart.

## FUNGINE

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material.

It has no equal for destroying mildew on roses and carnation rust.

\$2.00 per gallon; 75c per quart.

Send for name of nearest selling agent. Aphine and Fungine can be used in house or field.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous milk-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

J. G. MASTIN CO.

3124 W. LAKE STREET, CHICAGO, ILL.

## SUGGESTIONS FOR PLANT GROWERS.

### Peonies.

The season for these popular June flowers was very early this year and the extremely warm weather forced the mid-season and late varieties all out together, so that the blooming period was shortened considerably. But the work on these plants is not finished by any means when the blooms are cut, for they must be taken care of to insure a good crop for another year. Where the plants are grown in rows the constant traveling has packed the soil down hard and the ground should be given a good cultivation in order to lighten it up. The weeds should be kept down all summer and not allowed to rob the soil of its richness. If the plants were severely cut in harvesting the bloom, so that there is not much foliage left on the plant, it is well to spread a mulch of strawy manure on the surface. This is often the case with the officinalis varieties which do not make the heavy growth of the later varieties, and as it is natural for the roots of the peonies to have the shade of the heavy foliage of the plants during the summer, the cutting of the stems and foliage of these varieties robs the roots of this, and a mulch that will protect the ground from the hot summer sun, is very beneficial and will also reduce the labor of weeding. Any old blooms left on the plant should be cut and thrown away. Plants that have become broken down by high winds or heavy rains should be tied up in shape.

### Cinerarias.

The sowing of cinerarias is better done in June than later, many post-pone this until July, but during the extremely hot days of that month it is often difficult to obtain good germination, and the seed pans or boxes will have to be watched carefully or they will become dry and the young seedlings burn off. The soil should be well shaded until the young seedlings show themselves, when the shade should be made lighter. As soon as the plants have one or two well defined leaves, they should be potted in small pots and given a nice airy posi-

tion near the glass, which should be shaded, but care should be taken that the young stock does not get drawn. Always bear in mind that the one thing in growing cinerarias to be on the watch for, is the aphids. These insects quickly infest these plants and rapidly suck the life out of them. Constant fumigation will keep them in check, but if not attended to regularly it will be time and money thrown away to attempt their culture. Cineraria hybrids is the variety most grown, and these are obtainable in some elegant strains with large high-colored flowers. The Cineraria stellata is a much larger and more rapid growing plant which is very showy, but is not so well adapted for house culture when in flower.

### Small Ferns.

The fern spores that were sown in late winter should now be in condition to transplant into flats. It will be difficult to separate the plants yet into individual specimens, but little clumps can be lifted with a toothpick and planted in flats about an inch apart. The flats or boxes should not be deep, about an inch and a half of soil is sufficient. The soil should be composed of two parts live loam and one part leaf mold, with a generous sprinkling of sand and sifted through a fine sieve. The flats should be placed in a moist house that is well shaded, and the walks kept well wet down all through the hot weather. If a nice warm moist temperature is maintained, the plants themselves will not require much watering, only light sprinklings, and they will very rapidly root into the new soil and send forth their fronds. If the grower has not grown his own ferns, it is a good time now to place an order for them with the fern specialists, for they can be purchased at very low prices and they are very easily grown on and where there are many fern dishes to be filled in the fall, the difference in cost of the young plants lifted from the flats in mid-summer and those purchased out of small pots in the fall is considerable; plants that will cost three and four dollars a hundred at that time

can now be obtained for one-third of that amount and a thousand or more of this small stock need not take up much space and will be disposed of before the bench room is needed in winter.

#### Primulas.

The young primulas that were sown early should now be in 3-inch pots and be given as cool and airy a location as possible. To get the best growth on these plants, they should never be subjected to great heat for the species are naturally a cool growing plant on the edges of the woodland in their native state. Outside in a frame with a lath covering, is the best place that they can be grown, the pots sunk in the soil even to the rim. In potting these plants they should be placed in the soil deep enough for them to stand firmly; they will not stand deep potting, but many growers do not pot them deep enough, and they frequently get turned over sideways during the watering. They must be watered carefully and preferably with a can with a fine rose. The later sowings will have to be carried on in the houses until they are large enough to be placed outside. They will have to be shaded, but do not shade them heavily enough to cause them to get drawn.

#### Solanums.

These little Christmas plants should not be allowed to stand around in the hot greenhouses badly pot bound and drying up every day, for they will grow hard and it cannot be expected to obtain a good plant under these conditions. They will stand lots of abuse and do fairly well, and that is the reason probably that they are so often neglected during these busy days. But it is much better to plant them out in the field than to carry them along in this condition. They can be easily handled in this manner, lifting them early in the fall. They will need to be kept pinched back into shape—any strong leading shoots should be cut back when they are soft. They can be planted fairly close together and will need frequent cultivation. If there is no suitable outside location where they can be planted out they can be plunged in a frame and potted up as it becomes necessary, but outside treatment of some kind is far preferable to the greenhouse, which is too warm, unless shaded, and they make better growth and bloom more freely in the bright sunlight.

#### Names and Colors of Plants.

##### ED AMERICAN FLORIST:

I desire to know the names and colors of plants especially of geraniums and coleus. Can I purchase a book that will give me the colors and names of plants so that I may know what I will get when placing orders?

A. W.

The color chart which is issued by THE AMERICAN FLORIST at \$1 each will show the colors properly named, and the catalogues of the geranium and coleus specialists describe the several varieties, giving the respective colors of each.

W.

SCRANTON, PA.—Miss Annie Griffiths, formerly with W. H. Davis, has opened a flower store at 129 N. Main avenue.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

#### Wedding Decorations.

So many and varied are the ways of arranging the butterfly design, which has become so popular with florists as an added ornament to their baskets, etc., that a suggestion for the bridal canopy is opportune. The wire frame should have a good sized body with exaggerated and extended wings made of good length and not the stubby, wide design. The body can be made of white roses and the wings of lily of the valley, using pink roses for the markings of the wings; the inside of the frame should have a covering of white satin; the antennae of the butterfly should be wound with white satin ribbon and from these can be suspended tiny streamers of baby ribbon, the ends of which can be arranged in among some tall palms standing at the sides, or little flower girls can hold the extended streamers forming a bower.

The musicians may be placed behind a screen made of maiden hair or other light green through which is arranged

lily of the valley. Back of the musicians place the usual tall palms as a background. A butterfly made like the canopy should adorn one end or the center of the screen, whichever is the most practical, arranged in a flying position, and clusters of electric lights on either ends of screen. As an aisle for the bridal party use palms on either side; the middle ones being taller and tapering sizes to the end of each line. Connect these palms with wide white satin ribbon and to the center of the ribbon suspend and arrange loosely bunches of pink roses and have a string of electric lights beneath the roses. The prie-dieu should be of pink roses.

For the wedding supper table use a pink satin sash ribbon, the widest procurable, in the center attach lily of the valley and extend across the table, tying a loose bunch of valley at the ends, and over the edge of table. In the center place a good sized loving cup made of pink roses and filled gracefully with valley. A touch of pink in the center of the valley on the table is effective.

For the bridesmaids' bouquets use pink sweet peas arranged in colonial style with maiden hair fern, in making,

CLIMBING PINK SEEDLING ROSE AT C. B. NEWBOLD'S, JENKINTOWN, PA.

ROSE GARDEN OF CLEMENT B. NEWBOLD, JENKINTOWN, PA.

use the flat effect instead of the pointed. The ribbon should be of the palest pink—the bow small and the streamers long. White orchids for the bride's bouquet in the same arrangement; attach a white chiffon bow of same design as bridesmaids, but in the center of each ribbon streamer attach a small ring of orange blossoms with showers of the same flower hanging from, and almost covering the wide streamer below, the ring.

#### Flowers for School Exercises.

It is the fashion now in most schools of any size and standing to have the "Flower Prom" at the school closing exercises. A rose bowknot for the graduate may be made by fastening roses on a long wire and then shaping it into a bowknot, to which should be attached long streamers of ribbon of the dominant color and on this sew roses gracefully arranged with fine green as a background. This is particularly effective with the new style of dress now being worn where the high waist line is accentuated. The knot should be attached to the upper part of belt at the left, and should not be larger than ten inches across, or much smaller, depending upon the person wearing it. This can be made of sweet peas with their own foliage and is very graceful and pretty; cornflowers are also good, where class colors are the vogue and wish to be emphasized. A gold basket may be carried by the graduates' attendants in which to place the floral offerings. They in

turn to designate their mission should wear the floral necklace made of the forget-me-nots, lily of the valley, or any other appropriate small flower.

For the undergraduates make a double shoulder corsage, if their class color should happen to be blue and white—use white sweet peas, making the part falling over the left front shoulder larger than that over the back and tie in the center with the class colors; the bow should be a pretty rosette. For the other members of the younger class a floral bandeau for the hair is pretty. This is usually three to five inches in width and is tied with a pretty little bow at back of head dress. This made of lily of the valley on a background of maidenhair is good. In fact small rose buds or sweet peas or any of the smaller flowers can be effectively used.

For the still younger class a loose bunch of peonies with long stems for which tall baskets are arranged on the front platform to conceal the lower woodwork where each little member places her individual bunch—thus showing their artistic taste and lends a pretty conclusion to the "Floral Prom." The armlet corsage is a good substitute for any one desiring a simple little bunch where it will not interfere with the gown or its trimming.

The "Floral Prom" is sometimes headed by the smallest pupil carrying a huge bouquet of American beauty roses. A wide American beauty shade of sash ribbon is usually carried around the neck to help support the heavy

bouquet which is supposed to be embraced with both arms and the loop of sash ribbon is a support for the same. Golf bags made of the class colors and in which long stemmed American beauties are placed are very attractive for the "Prom" and are particularly appropriate for the athletic class.

A suggestion for the graduate where the "Prom" is not the vogue is the long arm bouquet with its loop of satin sash ribbon to throw over the lower arm and carried like a basket effect to which a loose arrangement of marguerites is suspended with small showers of daisies intermingled.

#### Wreaths Made in Germany.

The Archdeacon of Huntingdon, in his visitation charge at Huntingdon, made a special protest against the use of imported wreaths of painted tin or china—wreaths under glass, made in Germany or Belgium, which, he said, were an eyesore in cemeteries, and even some of the country churchyards. He asked church-wardens to use their influence, so that country churchyards, at any rate, might not be made hideous with Continental importations.—London Journal of Horticulture.

MARIETTA, O.—Articles of incorporation were granted the Marietta Floral Co. to J. A. Gallagher and others, capital \$20,000.

HARTSDALE, N. Y.—The first annual flower show will be held in Firemen's hall September 29-30. Liberal premiums will be offered and the competitive classes will be divided into amateur, gardeners and nurserymen.

## THE ROSE.

### Cleaning Out and Planting.

The rose houses should now be put in readiness for planting. One had better start in time to clean out the old stock for very often the repairs require more time to complete than appeared at the start. The houses should receive a thorough cleaning up, and all the painting and repairs to the roof, the heating system, etc., should be done at this time. There is nothing better than hot lime wash to which has been added some sulphur when slackening, and even where concrete is used the lime and sulphur wash is beneficial in many ways. If the houses are cleaned properly, especially a house containing raised benches, there is no waste of the fresh soil which is spilled when refilling the tables. Very often considerable soil filters through the cracks between the bottom boards.

The compost by this time should have been turned several times and it is of the greatest importance that the soil should be broken up finely, and thoroughly mixed before filling the houses. Then it is a great mistake to plant in wet soil; should the soil be too wet for planting it can be carried in and left rough until it becomes dry enough to handle easily and pack firmly instead of having it form a solid mass by firming it when it is soggy. In preparing raised benches to receive the soil we have found straw to be the best medium to use to prevent the soil from running through the drain holes or cracks, and it can be wheeled over without packing or choking up the drainage. There is quite a difference of opinion as regards the drainage of the solid beds—some prefer a layer of crushed stone at the bottom with five inches of soil to plant in; again some growers use tile on both raised benches and solid beds. Clinkers we have found very satisfactory, and where one has a sandy subsoil or a subsoil that drains the beds quickly it is not at all necessary to use drainage of any kind. The opening of the bottom boards is very important where raised benches are used; three-quarters of an inch between six-inch boards is about right. Five inches of soil is about right for most any variety of roses (that is, after firming). We prefer filling the beds a little full and tamping them down to five inches; by walking on the soil it can be made uniformly firm which is not always the case when pressing the soil down by hand.

After filling the benches the rows can be laid off by using a stick a little wider than the beds. By driving a wire nail for each row and a nail for a guide at the outside plank or wall the rows four or five in number can be laid off at one operation, the spacing can be done by marking off the distance on a long stick and then making a mark on the row to plant by, one row in the center of the bed is sufficient for the plant spacing, the other rows can be planted by eye very accurately by taking a little pains. The Killarneys and Richmond do not require more than 15 inches in the rows and four rows to a four-foot table will answer nicely. American Beauty will require a table four feet six inches wide and the plants should be spaced about 18 inches in the row. Be sure

to plant the grafted stocks deep so as to have the splice covered when the soil has been leveled. Own root plants just a little deeper than the soil line in the pots.

Plant firmly and pound the soil down when the plant is set, leaving a saucer-like depression around each plant so they can be watered individually for some time, for a general watering will be disastrous to the weaker plants. Stake the grafted stocks immediately after planting and do not put off staking the own root stocks too long either. Do not level the soil until most of the weed crop has been removed, which generally speaking, will take about a month. Great care must be exercised when watering until all the young stock begins to break away nicely, then one must keep on being careful, for it doesn't pay to let up on the daily care and watchfulness in the rose houses.

Do not forget that good, healthy bench stock of Richmond and Killarney make excellent plants for moving over into solid beds into fresh soil. A little drying off will be necessary so they may be lifted with good clumps. Plant them in rather small lots, pack the soil good and water thoroughly. In this way the plants will receive no noticeable check. Very light pruning will be necessary until the plants become established in their new quarters. They should also be tied at once after planting. E.

### Roses in 1910.

It may sound like a strange prophecy to hear it said that the rose is the coming flower. But when the new in-

brid teas as to be almost forgotten, while Baltimore Belle, Greville, Prairie Queen and other climbers, the great porch and pillar roses of their day, are now scarcely seen except in the oldest gardens. The introduction of the hybrid tea can be said to have revolutionized the rose; beds and borders of this class are now seen in continuous bloom so free as to almost rival the geranium in its mass of color. New varieties of exceptional merit, showing great diversity of form and color, follow one another in rapid succession from the hands of the hybridizers. At the exhibitions of the national rose societies of this and European countries, gold medals are annually awarded to new roses of the hybrid tea class that the judges are unanimous in saying are great advances in this or that particular over existing sorts.

Jacob G. Elsele, of the H. A. Dreen Co., one of the best judges of roses in this country is very enthusiastic over the future of the hybrid tea. All the new sorts as soon as introduced and even before are given a place in their trial grounds at Riverton. The display here during June was a revelation to even before are given a place in the scarcely believe in looking over the recent importations that such form and color existed in roses grown in the open ground. The Lyon, Harry Kirk, Md. Jules Grolez, Viscountess Folkestone, Earl of Warwick, Dean Hole, and others are almost sensational in their breaks of size, color and productiveness. In the rambler class the improvement has been most remarkable. M. H. Walsh of Woods Hole, Mass., has given us sorts that will be

BED OF KILLARNEY ROSES AT C. B. NEWBOLD'S, JENKINTOWN, PA.

introductions of the past 10 years or those that have been tried out in that short time are examined it will be seen that the improvement has been most wonderful and that this beautiful flower is entering upon a new era. The old standard sorts that were the pride of the garden in the ever blooming class, such as Hermosa, Sanguinea, Malmesbury, Pink and White Daily and others, are so completely eclipsed by the hy-

brid teas as to be almost forgotten. A. Manda's seedlings are especially valuable and he has pointed the way to even greater triumphs. Dr. Van Fleet, if he did nothing but raise American Pillar, this wonderful single pink climber which is in a class by itself, will deserve a niche in our hall of fame.

The accompanying illustrations are of the rose gardens on the estate of

JAPANESE SINGLE ROSE GROWING AT C. B. NEWBOLD'S, JENKINTOWN, PA.

Clement B. Newbold, Esq., at Jenkintown, Pa., where the plants are brought to great perfection. Hybrid teas occupy the central ground beds while ramblers are seen over arches and trellises and here and there a standard adorns the top of the terraces. A large plant of American Pillar, covering a trellis 20x20 feet, was just past its best. It is an exceptionally strong grower and very profuse bloomer and when in full flower a most gorgeous sight. A number of single Japanese varieties of their own importation were seen very full of flowers. Mr. Newbold, who is president of the Pennsylvania Horticultural Society, is very fond of plants and flowers and the exhibits of the society are always graced by numerous entries of the best stock from his conservatories. ROBERT KIFT.

#### Trying Out New Roses.

The last decade has seen a most phenomenal improvement in new roses, especially in the climbing and rambler classes. It is within the memory of most growers of the present day when the Crimson Rambler and Wichuraiana were introduced and but a few years since the dwarf ramblers were first shown, and it has been a great and steady advancement with new varieties being added every year to the already large number that possess so much merit. The intimate knowledge of the characteristics of these novelties which can only be obtained by planting and testing is of paramount importance to the florist or nurseryman who sells or grows roses in any quantity. In the hybrid teas and other classes a similar

advancement is continually going on, and it should be the aim of the progressive grower and dealer to supply his customers with the best roses in cultivation and to acquire a knowledge of what is suitable for the purposes required. We are living in an age of progress and it is impossible to stand still, for this means that those who are progressive are passing us by, which will ultimately lead to our elimination in the onward movement. The time has passed, S. W. Crowell, of Roseacres, Tenn., is reported to have told his fellow nurserymen at a recent convention, when with only an assortment of cheap, indifferent varieties a dealer can present his wares to an over-indulgent buying public and hope to reap the full benefits therefrom and still retain the confidence of the buyer, who now demands the best that grows, which requires skill, proper selection of varieties, scientific fertilization, careful cultivation, storing and shipping—in other words the best obtainable product.

This is the day of good roses and the wise dealer will take notice and profit thereby. As an illustration a customer was cited who must have regarded that a rose was just a rose, no matter what the name, and the list of roses with which he hoped to attract the customers and beautify their gardens consisted of Prairie Queen, George the Fourth, Seven Sisters and others of the older types. He ordered a few hundred plants of Mme. Planter for a certain planting and it was suggested to him the use of Frau Karl Druschki, but he promptly stated that he knew

what he wanted. Included in the order which was sent him were ten plants each of Capt. Hayward, Frau Karl Druschki and other newer varieties, with the request that he plant the same in his own grounds and watch the results, and the next summer was a revelation to him. He was smart enough to discern the writing on the wall and is now doing a profitable business and supplying his customers with newer and up-to-date varieties that will enhance the beauty of their grounds and prove "a thing of beauty and a joy forever."

It is necessary that the grower should become thoroughly acquainted with the newer varieties and a trial ground of his own should be established, while it is only occasionally that a great improvement like a Killarney or a Frau Karl Druschki is found, yet the only way by which comparison with the older commercial varieties can be made is to grow them side by side under actually the same conditions. The expense of such trials is merely nominal, and no rose grower or dealer should at the present day ever offer a rose for dissemination until it has proved worthy. This is quite necessary, for the reason that the buyer is often wary and does not care to make investments when there is a possibility that a new rose will fail to make good. We must pay for our experience, and if in a trial of 50 or even 100 varieties, one good rose be found, the investment will be profitable and the knowledge incalculable, for with the added interest to the work, and if, after planting, the new rose proves to be distinct and

adapted to one's needs material advantage has been gained. If, on the other hand, the investment does not prove profitable in dollars and cents, we have gained in knowledge and helped in the support of the raisers and disseminators of new roses who are endeavoring to make an advance over existing types.

#### Roses of Distinctive Coloring.

A small number of roses are so peculiarly colored as to deserve a few remarks. Of recent years this has become more noticeable, writes a correspondent in the Gardener's Magazine. Not all of these are new, however, for one of them is the Austrian Copper, with a color I fail to find in any other flower, much less in roses. Grand indeed, is this oldest of roses, in its bright and glowing copper, shaded with clear terra-cotta. If it were only perpetual, and not so fleeting for the short time it is with us, it would be of immense value. Leading from this class of Austrian and Persian briars we find Soleil d'Or, in 1900, obtained from crossing Persian briar Harrisoni with Antoine Ducher. Here we have a color varying from deep orange-yellow to reddish-gold, shaded with nasturtium-red, and quite distinct from any other rose. A couple of years later we had Gottfried Keller, another remarkably shaded rose, varying from clear apricot to orange and yellow, with veins of deep rosy-orange at the base of its petals. The crosses from seedlings of Soleil d'Or are giving us some of the most unique color of all, Lyon Rose being now well known, with its coral or shrimp-pink, suffused with deep orange-yellow. Arthur R. Goodwin varies from coppery-red to salmon-pink. But one of the most unique shaded of all is Rayon d'Or, a rose there is considerable discussion about just now, because of its very indifferent behaviour up to the present. This is as yellow as the marsh marigold, with a streak of orange and red in the bud stage.

In Irish Elegance we have a single rose that is almost indescribable in its shadings, of bronzy-orange and apricot. Jacques Vincent is another difficult to describe. Its main shades are coral-red and yellow, with a rosy-salmon centre; a very hardy and beautiful variety this. Juliet is a cross between Soleil d'Or and Captain Hayward, and a charming combination of the glorious shades of these grand roses has resulted. Hugo Roller must not be omitted; rich rosy-crimson on the outer petals, with a lemon-yellow centre. The aptly-named Beaute Inconstante has coppery-red, carmine, and yellow flowers, with seldom two shaded alike. Many peculiarities are found in the striped roses, such as York and Lancaster, Merrie England, Pride of Reigate, and Rainbow. In Grand Duc A. de Luxemburg and Mrs. E. G. Hill we have deep coral rosy-reds on the reverse of the petals that give the flowers a peculiar appearance.

DEEP RIVER, CONN.—D. F. Doane is planning to erect a greenhouse and engage in the florist business.

HARRISBURG, PA.—The florists of the Philadelphia & Reading railway have about finished planting the grounds at the several stations of the line. About 200,000 plants are used which are raised at the greenhouses at Wayne Junction.

#### The Conard & Jones Co., West Grove, Pa.

The Conard & Jones Co., whose nurseries are at West Grove, Pa., are specialists in cannas and roses. Among the meritorious climbing or rambler roses that were introduced by this firm are American Pillar, the finest rose in its class; Philadelphia Rambler, a great improvement over Crimson Rambler, which is one of its parents; Ruby Queen, a rose of most exquisite color; May Queen and a number of other varieties that have not been given the prominence they deserve, for, as seen growing here in the nursery rows, they make a gorgeous display. All these are the products of that noted hybridizer, Dr. Van Fleet. Although introduced several years ago American Pillar is not as well known as it should be, as it is unquestionably one of the greatest climbing roses ever introduced. Had it been forced, for an Easter plant like Crimson Rambler it would have met an even greater reception than this popular favorite. It is most striking in appearance with its large strong clusters of single flowers, each flower over two to two and one-half inches in diameter, of a brilliant carmine pink with a white blotch in the center and a great circle of yellow powdered stamens. The foliage is large and glossy making a fine background for the flowers. This is the home of the canna where under the master hand of Antoine Wintzer have originated so many choice varieties, many of them being almost in a class by themselves. Prominent among the new ones are New York, Louisiana, Wyoming, Wm. Sanders, Jupiter and Pennsylvania. There are seedlings as yet under number of which great things are expected. K.

BUSHNELL, ILL.—E. D. Lauterbach reports that the Memorial day trade was a "hummer," the best they ever had.

SPRINGFIELD, MASS.—Mark Aitken is building a new greenhouse on the river road 40x160 feet to be used for growing violets. The Lord & Burnham Co. of New York have the contract.

#### Rose Culture.

Read by W. J. Kelmed at the Joint Meeting of the Chicago and Milwaukee Florists' Clubs at Milwaukee, June 1, 1911.

In treating plants in general, especially roses, I have studied plant life on a similar rule to animal life and have come to the conclusion which may sound wrong on first thought, but on close examination I think you will find it not far wrong.

We have been told that plants require so much nitrogen, so much potassium and so much phosphorus, and by giving them that much, with enough water to dissolve it, we will get the desired results, but do we? Now take animal life. Does an animal or human being absorb all it takes in? Evidently not, for if it did there would be no manure, or if there was it would be of no use for feeding plants. We are told to drink three pints of water per day. Does the body absorb it? No. The most of it is taken to remove impurities out of the system. I believe the same is true with plants. The nearer we come to giving plants the exact amount of food and water they require, the poorer is the result. Therefore, I believe that plants should be fed and watered as liberally as animals, believing that the surplus will be employed in purifying the system of the plant, as it purifies the system of the animal. Some plants require more and some less. I believe the rose is one that requires more.

This, of course, does not mean that the feeding and watering cannot be overdone. On the contrary a plant can as easily be overfed as an animal, or easier, and here is where a good many mistakes are made. No man would think of taking in enough food at one time to last a week. Therefore, no one should try and give a rose, growing in a greenhouse giving four to six crops a year, enough food to last during that time, or a quarter of that time. This is where we find Killarney roses and roses of that class the most sensitive. These roses are gross feeders; at the same time they are the easiest overfed. They like lots of water, but they are the first to suffer from sour or stagnant soil, and there

HEDGE OF ROSE SEEDLINGS AT THE CONARD & JONES CO.'S, WEST GROVE, PA.

is nothing that will put soil more quickly or more surely in such a condition than giving it too much water, for that is the one way of closing up all the pores in the soil and cause it to hold every particle of impurity that the plant throws off. I firmly believe that a rose or any other plant throws off impurities, the same as an animal, and while these impurities may be useful to some other plant, they are the death of the plant that throws them off. Therefore, I believe, as I have said before, that a plant should be fed and watered just as liberally as an animal, expecting it to take out of the soil only that part of the nourishment that it requires.

#### PLANTING.

In growing roses I find that those which are planted in the benches in early spring before the hot weather starts in, irrespective of their size at the time they are planted, will make a much stronger and larger growth than plants planted during the heat of the summer, and I believe in planting young plants. There is more gained by throwing out old plants in spring, when they are about through doing their best, and replanting with young stock than to wait until the spring has glutted the market and the hot weather is making it almost unprofitable to grow them any longer.

#### SOIL.

There has been some discussion lately regarding soil from bottom lands for roses, as if this was a new idea, but some of the most successful rose growers have been using such soil for years, either piling it up in the fall or spreading it out on high ground and allowing the frost to work through it during the winter, then mixing it with manure and fertilizer in the spring before taking it off the field. But whether it is soil from high or low ground, the main thing is that it is virgin soil, or at least soil that has never been used for roses before, and has laid in grass at least three or four years before using.

#### DISEASES.

One of the greatest, if not the greatest enemy of rose growers is mildew and also one of the hardest to fight. About the only way to conquer it is to practically keep firing the year around and to keep sulphur on the pipes. Of course, houses built on high and sandy soil have little trouble in this direction, as compared to those built on low and marshy places, where there is heavy dew during the summer. But as long as the plants are kept in good growing condition and have sufficient nourishment, there is never great danger from mildew.

#### THRIPS.

I want to mention in conclusion a subject very dear to not only rose growers, but all florists just now—dear not in their hearts, but very dear to their pocketbooks—and that is thrips. We are told by some the only way to kill them is to smoke until we are blue in the face and the plants black. Others say to burn red pepper and many others to spray with nicotine solutions, but for myself I have found one remedy, and only one. That is Paris green and brown sugar. If that does not kill them, it is simply because the plants were not sprayed evenly enough and the thrips could not reach the sugar, for they will go for it if they can get to it. Entomologists

SPRAY OF ROSE AMERICAN PILLAR—CONARD & JONES CO., WEST GROVE, PA.

tell us that thrips are sucking insects and therefore poison has no effect on them, but when we look at a fine crop of American Beauties all chewed to pieces we feel tempted to differ with them, for the insect must certainly attack the tissues of the flower to create such an effect.

fine, better results are obtained when the soil is left a little coarse and open, also do not plant when the soil is on the dry side, but wet it down a little and wait until it is in fit condition for planting.

The depth of soil in the benches is sometimes a stumbling block for many of us, and the general supposition is that six inches of soil is necessary and seven or eight is better but experience has taught us that the opposite is the case, and some of our best blooms have been produced in less than five inches of soil. We recall some Miss May Seddon, Nellie Pockett and Mrs. Wm. Duckham that were grown in soil that appeared as hard as a rock, needing water once every day and sometimes more, and only about four inches in depth, these conditions gave us the best results with these varieties and it has been our aim to use less than six inches of soil since then. We are pleased when our soil conditions are solid enough for the water to pass quickly through it, and when wet it is not spongy, and if dry hard enough so that it is difficult to press one's finger into it. The principal cause of trouble from planting in deep soil comes at the time the blooms are developing, which is a period when it is difficult for the soil to dry out readily which is a very important item, because wet sodden soil at the roots is bound to cause the petals to rot.

A large number of growers throughout the country follow the method of growing their exhibition stock entirely in pots, potting them along from the cuttings until they are fit for 8-inch

## CHRYSANTHEMUMS

### Exhibition Blooms and Plants.

The grower of chrysanthemums for exhibition will find plenty to do among his plants at the present time, whether they are being grown for exhibiting as cut blooms or as specimen plants. The cut flower stock should be got into their permanent quarters as quickly as possible. They require a long season of growth to produce wood of sufficient strength for developing blooms to measure up to the present day exhibition standard. If the plants are to be grown in benches the planting should be finished up at once.

The matter of soil is the one most vital question at this time and the very best live soil procurable will not be any too good. Old worn out greenhouse soil in which some other crop has been grown should not be used, it being a big handicap for a grower to try to grow exhibition stock in old soil. The best soil to use is a porous loam with a texture of clay running through it, add well rotted manure to this in proportion of one part in four and a liberal dressing of fine florists' bone, do not make the compost over

pots which is the size in which they are to bloom. If this is the method of culture followed they should be potted into their final pots without any further delay, give plenty of drainage and pot firmly. Such plants as are already in their final pots and with a month or more of growth before them can be pushed a little by being given a light top dressing of Clay's fertilizer or some of the other commercial fertilizers with which the grower may be familiar, these manures are highly concentrated and should be used with caution, a dessert spoonful shaken over the surface of the soil and scratched in is ample for 8-inch pots, at one application, then follow along with another in about three weeks. One very important feature with this class of stock as with all chrysanthemums, no matter what the method of culture may be, and that is to stake them up as soon as they are ready, to insure straight rigid stems.

The large specimen plants are now growing rapidly and they should receive attention as regards topping back the shoots, also stake out the branches that need it to prevent their getting broken. Those that are not in their final pots should receive attention at once, give plenty of drainage and pot firmly, being particularly careful directly after potting not to give an over-abundance of water until the roots have again control of the soil. The standards should also receive the same treatment as regards potting. They will also need sufficient supports to guard against their stems being broken. The work of keeping down the black and green aphids should be followed up closely right along by frequent sprayings or fumigations.

C. W. JOHNSON.

### Chrysanthemums for December.

ED. AMERICAN FLORIST:

We would like to plant a house of Chadwick chrysanthemums to bloom the third week in December. When should they be planted? When should they be stopped? When should the bud be taken? F. B.

Columbia, B. C.

To be successful with the Chadwick chrysanthemum for the third week in December a special course of culture will have to be followed. In British Columbia, the Puget Sound district and Oregon many of the varieties which are classed in the middle west as mid-season or Thanksgiving varieties can be timed to be at their best for the Christmas holidays. The method of culture is to put the cuttings in the propagating bed in June, pot up as soon as rooted, and plant out on the benches early in August, they will still be very small stock but they quickly take on a rapid growth. Not any stopping back is necessary and they should be allowed continuous growth until the time for taking the buds which generally appear about the middle of October. Not all of the standard commercial varieties of the eastern states adapt themselves to this treatment, many of them coming blind in the bud and the time of taking the buds has to be timed entirely different; late propagating, late planting, grow along uninterruptedly, and take the first bud that appears will give the best results in the far western country. I recall an experience with the variety Mrs. Jerome Jones early propa-

gated stock, they commenced to show buds around the first of August and, thinking this entirely too early they were rubbed out and allowed to go on for another bud, the growth they made after this was out of all proportion and finally after budding up and blooming they did not amount to very much. Another batch of the same variety grown from late propagated stock and the buds taken the latter part of September or early in October were very successful. It is necessary to figure on the long continued cool weather in that part of the country which allows for steady bud development.

C. W. JOHNSON.

### Highland Park, Rochester, N. Y.

The conservatory which is to be constructed at Highland Park, Rochester, is intended to be the finishing touch to that beautiful, and in many respects unique, public garden. In all essential respects Highland Park is already ideal. Its favorable location, overlooking as it does an immense stretch of the Genesee Valley on the south and the attractive farming region on the east, and the rapidly growing city lying at its feet on the north, gives it a commanding position. From no other point of view can the sky line of the city be viewed so advantageously. By day the tall buildings stand out clearly against the northern sky, with glimpses of Lake Ontario in the distance. By night this same outline is revealed by a blaze of electric lights, from Cobbs Hill reservoir on the east to a point miles to the westward.

Highland Park is easily accessible from all parts of the city, as it has entrances through Reservoir avenue

whichever way the eye is turned. The elevations are not so high nor the depressions so deep that traversing its undulations becomes wearisome; but there is constant and charming variety. The park embraces altogether fifty-four acres, but it is so laid out that visitors can traverse the entire grounds without fatigue and with ever-sustained interest.

The collections of coniferous trees, rhododendrons, lilacs, azaleas, pæonies, and the rare magnolias are unsurpassed in any park anywhere. Indeed, the collection of magnolias is unequaled and is one of the most complete known. These great exclusive and rare collections are all embraced in the fifty-four acres of the park. Highland Park for rare beauty is not equalled anywhere, writes William C. Barry in the Technical Educator. The pinetum, just now beginning to develop its beauty, is destined to be an exceedingly attractive feature of the park; and it will grow more and more beautiful as the years pass. In it can be found almost every known variety of evergreen, many of which have been brought from far distant lands, and they are constant objects of study. Taken as a whole, we have in Highland Park a great educating force. It is frequently compared to a great picture gallery, with choice bits of coloring. And here the parallel fails; for the views in Highland Park change from day to day, and almost from hour to hour. From early spring until the fall frosts kill vegetation, there is a continuous change and the colors are kaleidoscopic.

On the extreme summit of Highland Park is the Children's Pavilion, donated forever to the park, and dedicated

ROSE MANDA'S GARDENIA AT THE CONARD & JONES CO.'S, WEST GROVE, PA.

from South avenue, from Mount Vernon avenue through the delightful drive along the pinetum, from Goodman street with its easy road through the evergreens to the pavilion, and from Highland avenue directly into the floral gardens. Unlike most city parks Highland Park is undulating, affording an almost infinite variety of views,

to the children of Rochester. In the summer evenings this pavilion is brilliantly illuminated and stands as a beacon in the western range of the Pinnacle Hills of which Highland Park forms a portion. At stated intervals during the summer choice band concerts are given in the pavilion and thousands upon thousands of delighted

LAMBERTON MEMORIAL CONSERVATORY, HIGHLAND PARK, ROCHESTER, N. Y.

listeners gather at its base, and often the crowd overflows and fills the sloping sides of the dome of the park.

Highland Park is peculiarly interesting to expert visitors, owing to its large number of rare trees, shrubs and plants. As has been said, many of these trees and shrubs have been brought from the uttermost ends of the earth, and many have been propagated in profusion. Much has been said regarding Rochester as the coming "City Beautiful," and it has been well said. But a city which possesses the beautiful parks which adorn Rochester, and throws open to the public such a garden as Highland Park, has already laid broad the foundations of a city of unsurpassing beauty.

It has been realized for several years that a public conservatory has been needed to make Highland Park complete. Its greenhouses and plant houses, while especially designed for specific park purposes, have nevertheless been opened to visitors when possible, and have invariably been thronged during the hours when they could be open. But the lack of a conservatory which should belong exclusively to the people, open to them at all times and particularly in the long winter months, and which the people could properly call their own, has been felt by the members of the Highland Park Committee of the Park Board. From time to time appropriations for this purpose have been sought, but other demands of Rochester's great park system have obtruded, and the building of the public conservatory was not accomplished. It was not until the late Miss Mary A. Starbuck bequeathed the sum of \$20,000 to be devoted to a magnificent public conservatory, to be a memorial to Hon. A. E. Lambertton, President of the Rochester Park Board, that such a boon for visitors to Highland Park became possible. The fund was placed in the hands of President Lambertton, and became at once available for use by the Highland Park Committee on the death of the generous donor. From the illustration of the new building which we herewith publish it will be seen that the Lambertton Memorial Conservatory will be worthy of the name.

The slightly location at the entrance to the park, at the intersection of South and Reservoir avenues has been selected and the conservatory will be ready for the reception of the public September 1, next.

In the summer season, perhaps, the need of a large and commodious plant house for the instruction and pleasure of visitors is not so manifest, as there is so much to attract the visitor out-of-doors. But a great plant house in the winter is a joyful possession. Usually it is only the more wealthy who can enjoy the winter conservatories, but it is intended that the pleasure shall be brought within the reach of all at Highland Park. For this reason a location close to the street railway has been selected, thus making the conservatory easily accessible from all parts of the city, even in the most inclement weather. Here all will be welcome, as all are welcome in these balmy early summer days and evenings to the grassy slopes, the evergreen wooded hills and the lovely floral nooks of Highland Park, which in summer is only less than Paradise. In order that the conservatory shall fulfill its real mission of giving pleasure and comfort as well as instruction, it will be equipped with comforts and will be made as homelike as possible.

Throughout the winter months the conservatory will be filled with the choicest flowering trees, shrubs and plants, and it will be sufficiently large to accommodate even the large number of daily visitors who will bask in the warmth of its semi-tropic atmosphere. It is the intention of Superintendents Laney and Dunbar to maintain the conservatory at the highest standard and to provide during the winter months a continuous and varying display of plants in flower, and a sequence not unlike that of the summer outdoor exhibit will be followed. In a very definite way, as has been said, the Lambertton Memorial Conservatory will take the place of a private conservatory, and its beauties can be enjoyed by each individual as if it were his or her own. It cannot be said too frequently or too emphatically, that the Lambertton Memorial Conservatory is a people's conserva-

tory, they will own it and will enjoy it with the same freedom and joyous feeling of possession that they carry with them on their summer visits to Highland Park and the other beautiful parks of Rochester. The tribute to President Lambertton is eminently fitting, for he has ever been a loyal friend to the parks of the people. Towering memorial shafts of marble and granite could never so greatly benefit the people as will this constant source of pleasure and instruction, which will add to the sum of human enjoyment for long years which are to come. I am delighted that the loving tribute to President Lambertton has taken on the form of such a valuable addition to our lovely Highland Park gardens and in this expression of heartfelt gratification I know I will be joined by the tens of thousands who have learned to love and appreciate the beauties of Highland Park.

#### Dandelions Doing Great Damage.

According to experts the plague of dandelions has done about \$100,000 damage to lawns in New Jersey within the last fortnight. Some natural enemy of the dandelion that has kept it down in other years has been prevented this year from completing its work. Just what this enemy is no one seems to know. Science, however, has provided an artificial enemy, a solution of sulphate of iron in water.

## OBITUARY.

### Charles Armitage.

Charles Armitage, president of the well known firm of greenhouse builders, Hitchings & Co., died suddenly at his home, 11 Irving street, Montclair, N. J., May 22 from heart disease, aged 65 years. Mr. Armitage was born at Matteawan, N. Y., and lived in New York city for many years, taking up his residence in Montclair fourteen years ago, where he was a member of many social organizations. He is survived by a widow, one son and four daughters.

RENEW subscriptions promptly so that no copies of the papers may be missed.

The next meeting of the American Peony Society will be held at Horticultural Hall, Broad street, Philadelphia, Wednesday and Thursday, June 8-9, 1911.

The United States government is supervising the importation of goods from abroad with a view to prevent the entry of foreign goods bearing brands copying or imitating the marks or brands of domestic manufacturers.

## Personal.

President Asmus of the Society of American Florists will attend the banquet to be held at Peckmann's hotel, 4295 Olive street, St. Louis, by the St. Louis Florists' Club on its twenty-fifth anniversary, June 28.

Patrick O'Mara, of Peter Henderson & Co., New York, will spend the summer in Europe, sailing at the close of his firm's spring business.

## Civic Improvements and Florists.

There is one feature which is making rapid strides in the cities and larger towns of this country in which the florist should take a more active part, and that is the beautifying of the city. In Springfield, O., the florists, through the medium of the Florists' Club, have undertaken the planting and care of the Esplanade and the institution of a rose garden in Snyder park, and have other plans for the beautifying of the city under consideration. This work, for which the florist by the nature of his business, is especially fitted, is worthy of emulation by all in the business and is sure to be appreciated by the public. In many localities improvement societies are formed for the purpose of beautifying the streets and grounds, and with these the florist should be in touch, assisting to the best of his ability, and above all do what he can to make his own place an attractive spot. He has the necessary goods and should be among the first to extend this grand work and it will redound to his credit.

## National Sweet Pea Society of America.

The following additional prizes have been added to the schedule for the exhibition to be held in Philadelphia at the end of this month. The prize list now amounts to nearly \$600.00 in cash and cups.

### RETAILER'S SECTION.

Class 36.—Table decoration of sweet peas; first prize \$15.00, second prize \$10.00.

Class 37.—Basket of sweet peas; first prize \$10.00, second prize \$5.00.

Class 38.—Bride's bouquet of sweet peas; first prize \$10.00, second prize \$5.00.

Class 39.—The Stump & Walter Co.'s prize for the best three vases of Aurora Spencer, Countess Spencer, and King Edward Spencer; first prize \$5.00, second prize \$3.00, third prize \$2.00.

Class 40.—The John Lewis Child's prize for the best vase of mixed sweet peas, not more than 100 sprays (amateurs only); first prize \$5.00; second prize \$3.00; third prize \$2.00.

Class 41.—The Aphine Mfg. Co.'s prize for the best six vases, 50 blooms each, sweet peas, open to florists only; first prize \$10.00.

Class 42.—The Sutton & Sons' prize (Reading, Eng.), cup, value \$25.00, for the best table of sweet peas to be arranged on a space four by three feet and not to exceed three feet in height (amateurs and gardeners only).

Class 43.—Watkins & Simpson's prize for the best six vases Spencer or Unwin sweet peas; first prize \$10.00.

HARRY A. BUNYARD, Sec'y.

## Cornell Bulletin on Sweet Peas.

The first report of the co-operative work between the National Sweet Pea Society and the Horticultural Department of Cornell University is being published as a bulletin of the Cornell Experiment Station. It is just off the press and may be secured by all residents of New York State interested in sweet pea culture, and by non-residents who are members of the National Sweet Pea Society. The secretary of this society is Harry A. Bunyard, care of Arthur T. Boddington, 342 West Fourteenth street, New York.

This first bulletin contains mainly

the results of fall and spring planting tests in addition to a very thorough study of the forcing or winter-flowering type of sweet peas. The Department of Horticulture has been studying these types under glass for the past two seasons, and this bulletin contains the results of this study. The bulletin has been prepared by Professor John Craig and A. C. Beal of the Department of Horticulture.

## Employes Sharing in Profits.

### REWARDING FAITHFUL DEPARTMENT HEADS

John G. Shedd, president of Marshall Field & Co., the concern operating Chicago's big general store, in announcing some changes among the heads of departments, says: "We have been perfecting a plan looking toward the initial step in a co-operative principle of ownership of stock by a large number of individuals employed in the management of this business.

"Marshall Field & Co. have always, either by the bonus plan or percentage division of profits, to a certain extent, operated on a co-operative plan as to profits, but have long recognized the desirability of broadening the scope of that principle and have finally concluded on what we deem a scientific plan of profit-sharing and stock-holding, which, when carried to its finality, will make this institution in its broader sense a co-operative one.

"Some of the larger organizations of the country have adopted methods of distribution to those who were able to buy stock, but we have endeavored to do something different from this; and feeling that the time is ripe for the introduction of some plan which will make in a greater degree for increased efficiency in our organization, we have coupled a stock-holding plan with a profit-sharing plan, thereby making it possible for some of those in the management who might not have the money wherewith to pay, to buy stock and pay for the same out of the profit-sharing.

"We have extended the profit-sharing and stock-holding privilege to as many of our department managers as we can arrange for at this time, and while our plan is by no means carried to its final conclusion, it contemplates the recognition of a considerable number of our department heads and those of our managerial staff who have been connected with the business for many years and whose efforts have contributed to the building up of the business."

## Sowbugs.

From time to time we notice inquiries about how to get rid of sowbugs and the remedy always given is some kind of poison. Now, a few years ago we were simply being eaten up with sowbugs, for every one killed with poison ten would come to the funeral, till we did not know what to do to save our plants. We just happened to try Slugs-Shot, which simply exterminated them and by always keeping it on hand we have kept them down ever since. It is a cheap preparation, a five pound bag will go over a hundred-foot house. We just sift it on tables and under the tables. It will surely kill them, large and small. Be sure and go over the house carefully and sift on all available space. Be sure and use it in the evening when the foliage is dry.

D. M. TIPTON.

## Meetings Next Week.

Baltimore, Md., June 12, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Chicago, June 14.—Gardeners, and Florists' Union No. 10615, 10 and 12 Clark street.

## BASSETT & WASHBURN,

**Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.**

### Chicago.

#### BUSINESS VERY LIGHT.

The conditions that usually prevail after one of the great floral days is very manifest in the market this week, trade being exceptionally dull at all the stores, with large quantities of stock of all kinds arriving throughout the day, with the ultimate result that much stock is going to waste. The inside stock is still showing the effects of the extreme hot weather of the two preceding weeks and much of it is very soft, having but little substance and consequently not lasting well, and unless immediately shipped can hardly be guaranteed to carry long distances. The trade during the week is generally reported as light, some dealers expressing it in even worse terms, and declare that it is the worst first week in June ever experienced in the history of the business, as the local trade is extremely flat, the retailers doing very little and buying very light. The only saving feature being the shipping trade which is holding up very well in some quarters. The complaints from the soft stock that had to be shipped at Memorial day are still being received and the necessary explanations forwarded. Generally speaking, however, the stock has improved and is in about the condition that it is usually found at this season of the year. Roses are being received in large quantities, the American Beauty growers are cutting very heavily and the counters of the large dealers in this rose are filled every morning with extra long-stemmed stock and large quantities of the short- or grades. The foliage and stem are all that could be asked for but the flowers are not in many cases of the highest quality, yet under the conditions that have prevailed are very good. Killarney is still of good quality and is in bountiful supply, but My

Maryland is of better quality and will soon replace the great favorite for summer use. Kaiserins are good and the best white rose, yet some White Killarneys are very fine. Carnations and sweet peas both still show the hard time they have passed through. The stock of both of these flowers is very soft and the sweet peas are approaching their end and are almost all short-stemmed, the only really long-stemmed ones being those that are cut with their foliage. Peonies are in great plenty and the blooms are much better than those that were on the market the week previous. Gladioli are fine, really the best flowers there are on the market. Orchids are good and plentiful enough to fill all orders and the same can be said of lily of the valley. Pond lilies can be seen in the retailers' windows and add a refreshing look on the warm, hot days. The warm weather, the poor stock and light business gives the pessimist a good chance to enlarge upon all his complaints.

#### NOTES.

With but few exceptions the cars in the automobile floral parade were decorated with artificial flowers, and some very startling effects were produced. The prize for the best car decorated with natural flowers was awarded to Mrs. Coey, whose auto was very nicely decorated with dark pink peonies, being literally covered with flowers. A. Lange, the enterprising florist on E. Madison street, had a very prettily decorated delivery wagon using peonies, hydrangeas and other shrubs.

The American Beauty roses that Poehlmann Bros. Co. is cutting from their young stock are of exceptionally fine quality, with good color, foliage and with stems three feet long. The other stock is also of good quality, especially the Killarney, My Maryland and Richmond roses.

## U S Budlong's E Blue Ribbon Valley.

Bassett & Washburn have had a very busy week and filled a large number of shipping orders for June weddings and school closings. The American Beauties that this firm is cutting are of good quality and the kind that stand shipment.

The new passenger terminal station of the Northwestern railroad, located on Madison street, between Canal and Clinton streets, was opened to the public Sunday, June 4, all its passenger trains now arriving and leaving from this depot.

The Ernst Weinhaber Co. has acquired from George L. Healy the property on Elm street, 225 feet east of State street, north frontage 50x173 feet, consideration not given out.

Schiller's office and workrooms are already too small for this firm's rapidly increasing business and Manager Asmus is now planning changes and additions.

Tim Matchen, the hustling manager at the Peter Reinberg store, has turned gardener and is now devoting his spare moments to planting his garden.

Manager Pyfer of the Chicago Carnation Co. filled an order for 25,000 carnations for a Buffalo florist on Friday, June 2.

E. H. Hunt's traveling representative, F. A. Longren, left Monday, June 5, for an extended business trip. August Lange says his May business was far ahead of that of last year.

#### Chicago and Milwaukee Florists Meet.

The joint meeting of the Chicago and Milwaukee Florists' Clubs, held at Milwaukee, June 2, was a most interesting one and was largely attended by members of both clubs. The Chicago delegation, 41 strong, made the trip in a special car via the Chicago and Milwaukee electric line, leaving Evanston at 6:00 p. m. and reaching Milwaukee at 8:00 p. m. Upon their arrival the visitors were met by the Milwaukee florists and escorted to the Hotel Blatz where President Hunkel of the Milwaukee Florists' Club promptly called the meeting to order. Upon motion of Wm. E. Dallwig the meeting was turned over to President Philpott of the visiting club who responded to an address of welcome by C. C. Pollworth. W. J. Keimel then read his paper on "Roses," and it was freely discussed by the many growers present. The fall flower shows were also discussed and it was the general opinion of those present that the managers of the different shows should get together and arrange the dates so that they would not conflict. This, it was said, would give the grower an opportunity to make the necessary arrangements to exhibit his stock at all the shows if he so desired. When President Hunkel heard that it was undecided whether Chicago would hold a fall show, on behalf of the Florists' Club he invited the visitors to attend

rie, Wm. Currie and Nic. Zweifel of Milwaukee and H. E. Philpott, A. C. Kohlbrand, W. J. Keimel, P. J. Foley and Allie Zech of Chicago were the speakers of the evening contributing greatly to the making of the meeting enjoyable as well as instructive. After the meeting the participants were ushered into a dining hall where a bountiful lunch awaited them. Ample justice having been done to the good things served, President Philpott of the visiting club thanked the Milwaukee trade for the invitation to the meeting and the kind reception extended, concluding by asking the Milwaukee florists to bring a large delegation to Chicago, where the next joint meeting will be held, either in September or October.

## Milwaukee.

### GOOD DEMAND.

The demand for good roses and carnations has been very brisk all the week and the stock cleaned up at an early hour. Peonies are arriving in good condition and in quantities large enough to meet the demands. The Memorial day trade was very satisfactory although the stock suffered considerably from the warm weather of the previous week. The growers are now busy planting and making repairs to their greenhouses.

### NOTES.

Holton & Hunkel Co. are cutting an exceptionally fine grade of American Beauty roses and lily of the valley. The latter is of the first quality with large bells and splendid foliage. The three new houses which this firm recently erected will be devoted to the growing of Killarney roses.

James J. Quirk, a representative of the Eagle Lime Products Co., who manufacture a good soil tonic, is calling on the growers this week. He is meeting with much success and has already sold several carloads of what he says is the best soil tonic there is in existence.

The C. C. Pollworth Co. is cutting a good grade of Richmond and Killarney roses and a splendid grade of carnations, which are of exceptionally good quality, considering the weather that we have had the past week.

Currie Bros.' force has been working overtime to fill the many funeral or-

ders which they have received. The Memorial day business was exceptionally good and much better than last year.

G. H. Hunkel reports the seed business as rather quiet but says that the season on the whole has been a very satisfactory one, 30 per cent better than last year.

McKenna & Co. report trade brisk with plenty of funeral and wedding work. They have experienced a little trouble in securing good stock to fill their orders.

Miss E. M. Vollmar, of the Loveland Floral Co., filled a number of orders for two weddings last week which helped trade considerably.

James Chalona is again in charge of the store formerly conducted by C. L. Sherer, the change having been made June 1.

Nobos & Co. are enjoying a splendid transient as well as a good city trade at their store on Grand avenue.

J. Arnold is planning on building a new residence on the premises that adjoin his greenhouses.

The Walter M. Maas Co. filled a large number of out of town orders on Memorial day.

A. F. Kellner left June 2 for Appleton to arrange a large decoration.

James Fox & Son are kept very busy with funeral and wedding work.

Mueller & Schroeder are cutting some very good carnations.

## Albany, N. Y.

At the June meeting of the Albany Florists' Club an invitation was extended by Frederick Goldring to hold the July meeting at his place, Font Grove, Slingerland, on the evening of Thursday, June 6. The club for three years has held the meeting for this month at Mr. Goldring's and the invitation was at once accepted. Besides arranging for the next meeting the members had some interesting discussions on pertinent subjects. Charles Sanders mentioned the trouble caused by cut worms in beds out of doors. It was brought out by Mr. Goldring that melon growers in this section have a great deal of trouble with these worms and from their experience it is believed that the only remedy is to catch and to kill them. Experience with dandelions in lawns also afforded

## U S Budlong's E Blue Ribbon Valley.

an interesting topic. A discussion of an article in a trade paper suggesting that elimination of the weed is possible by cutting the plant off below the crown brought out the fact that the thing has been tried extensively in Washington park in this city with no success. Mr. Sanders had specimens of plants to show that even when cut off far below the crown dandelions still throw up shoots. In the park, too, it has been found that the plant will flower deep in the grass below the reach of either a lawn mower or a scythe and after being fertilized will throw up almost at once its long seed bearing stalk loaded with downy messengers of propagation, an astonishing example of plant adaptation to environment. The club decided to hold another clam bake this year at Henkes Brothers' grove, Newtonville, toward the end of August. President F. A. Danker left the arrangements in charge of a committee composed of Lewis Schaefer, Frederick Henkes, and Patrick Hyde. William Newport, H. Woodland, and R. D. Griffin were named a committee on sports. A letter was read from Patrick and Mrs. Hyde thanking the members for the gift of a handsome Morris chair received as a wedding present.

Reports of the presence of the brown tail moth, which has proved so destructive in Massachusetts, have been received from Jamaica, Long Island, by Raymond A. Pearson, state commissioner of agriculture. The first moth was found in the collection of butterflies made by a boy in Queens county and an investigation later by inspectors from the state department of agriculture resulted in finding adult brown tail moths under an electric light in Jamaica. A careful inspection of farms and gardens in the vicinity is being made. R. D.

# OUT OF TOWN FLORISTS

Who appreciate High Grade Stock will find it to their interest to write us for prices before placing their orders elsewhere.

## We are in Full Crop for June

with an exceptionally fine grade of Killarney, White Killarney, Richmond, Bride and Bridesmaid Roses and can supply you (in addition to the above flowers) with a choice grade of Beauties, Peonies, Carnations and Gladiolus. We have these in large quantities

## AND CAN FILL ALL ORDERS

promptly at a moment's notice. If you have not already placed an order with us, do so immediately and see what good care we take of our customers, by supplying them with first class stock. Stock that will stand shipment and arrive in good condition.

### Terre Haute, Ind.

The bedding trade is now practically over, only a few odd jobs left. The parks, which were planted about May 10, are a blaze of beauty. All public planting this year was divided up among the local florists. Cowan Bros. & Co. planted Collett park, Fred Wunker the City park, Fourteenth street; Harry Richmond, Thompson park; Henry Graham, the planting at the State Normal and also for the Vandalia Railroad Co. The bedding stock never was better and everyone is sold out. Memorial day trade was unusually good this year, but the quality of the stock was very poor owing to the extreme hot weather which prevailed in this section the last two weeks; the drought also had an effect on the size of the flowers. Peonies promised to be just right for May 30, but orders which had been placed for that date had to be cancelled on May 28, stating they had all passed. One firm, who has three acres, lost about 10,000 blooms, another grower lost about 1,000, and some flowers that had been ordered outside came in such poor condition that they were returned to the parties who sent them, for they were worthless. Outdoor roses are almost a thing of the past and the ramblers are just coming into bloom, about four weeks ahead of other years. There has not been any rain to speak of for the past month, and everything is suffering for lack of water. The strawberry crop was entirely lost and unless there is rain very soon the corn crop will be seriously injured, if not a total failure.

### NOTES.

Fred Heinel has issued a call for a meeting of the Florists' Club. By-laws will be adopted at the meeting. We also hear of plans for a picnic some time in July.

#### THE DROUGHT BROKEN.

At last we have had rain, and the drought, which was becoming a serious matter not only with the florists but also with the farmers, has been broken. Water was getting very scarce and stock was consequently suffering considerably, and the flowers were of inferior quality. Memorial day was very generally observed, and the demand for plants and flowers was large. There was, however, an over-supply of cut flowers, and business with the Market street men was disappointing, stock sold well the early part of the day, but by evening it was a case of selling at any price and missing no sales. Peonies sold well, especially the pink varieties, but there was a large quantity offered, making a glut on the market, and some sold as low as two cents each. The farmers were much to blame for this; they invariably overstock the market at this time, but usually maintain good prices. Roses are in good supply but not of average quality. It is difficult to procure first-class carnations, yet they are a glut on the market, the quality is so poor that the street boys are selling at any price they can obtain, and in many cases peonies are substituted for them. Callas are shortening up, but there is little demand. Sweet peas are in great supply but move slowly and at low prices. The quantity of greens is about adequate to meet the demand. Bedding plants are about sold out, but there is still a fair demand. Ferns have had a good sale this season.

#### NOTES.

A. G. Fiedler & Co., South Baltimore's leading florists, did an exceptionally fine business Memorial day. The sale of plants and flowers and the orders for funeral designs kept the large force very busy.

Andrew Anderson is not only an American Beauty rose grower; one house devoted to tomatoes is a sight to behold, and he has picked bushels of the vegetables from the plants this season.

H. J. Quick of Weadeg Cliff is erecting two new greenhouses 25x100 feet, and will install a 50-h. p. steam boiler. Mr. Quick is one of the largest growers of geraniums in the state.

Isaac H. Moss has his place at Govanstown in splendid condition; the place never looked better, and his rose houses are looking very fine.

Conrad Hess of Waverly had a good sale of fancy ferns in the Lexington Market June 3, keeping him busy all day.

A number of growers are short of chrysanthemum plants and are making inquiries for stock.

Frederick Reitz is cutting Harrisii lilies, but there is little demand for them.

## Loretta or Huckleberry, \$1.50 per case

A fine substitute for Southern Wild Smilax. Extensively used for June decorations. Order direct from our Southern Branch.

HENRY M. ROBINSON & CO.,

McWilliams, Ala.

F. C. Bauer has quite a surplus stock of pot plants still on hand.

J. L. T.

### Montreal.

#### THE SPRING RUSH.

The bedding season is in full swing and everybody is rushed, busy is no name for it. The amount of work connected with the sale and handling of the plants cuts the profit to very small figures at the prevailing prices, the cost of everything connected with their culture has steadily increased but the same old prices of long ago still prevail and are often lowered by some nervous competitors. The demand this year has been very good, especially for large plants and vines for window-boxes and rustic stands. Geraniums sold well if they were good but it is hard to dispose of poor stock. Vegetable plants were in large demand and brought good prices. The season has been very dry and unusually hot, but lately there has been some relief. Very little could be planted and those who attempted it had to replant much. This has been one of the worst seasons for the nurserymen, the spring was so short that it might be called no spring at all. The ground could not be worked until the middle of May and then the hot weather came on and within a week we were in the middle of summer. There was not more than two weeks for planting at the most, before trees and shrubs were rushed into foliage. The winter has been very severe, shrubs and perennials and even large trees have been partially or totally killed, newly planted perennials planted last fall suffered badly.

#### NOTES.

P. McKenna & Son are erecting a large greenhouse 60x200 feet for general pot plants and chrysanthemums in benches. Their new auto-delivery car is the first in this city for carrying floral products.

S. S. Bain is making his new store the best equipped in the city. He has a large assortment of bedding plants which he could handle much more profitably could he obtain experienced help.

Hall & Robinson have been rushed with the many orders received.

EXTREMELY HOT WEATHER.

The torrid weather continues, outside stock is nearly burnt up and inside stock has suffered greatly. Roses arrive in a very soft condition and open quickly, and carnations are wilted when the boxes are opened. The conditions of the market at Memorial day were greatly influenced by the weather, the prices being lower and the quality inferior. A fine lot of candidum lilies is seen in the market and some extra fine tuberoses.

### NOTES.

The Missouri Botanical Gardens were beautiful June 1, the bright flower beds were a sight worth going to see and the air was fragrant with sweet bay. More than 7,000 persons visited the gardens that day and many were doubtless prevented from going by the excessive heat of the day.

Vincent Gorly of Grimm & Gorly desires to express through the trade press his thanks to the Florist Hall Association for the prompt settlement of claims which were caused by the recent hailstorm.

The twenty-second annual banquet of gardeners, florists and nurserymen, provided for in the will of the late Henry Shaw, will be given at the Southern Hotel Thursday, June 15, at 7 p. m.

Ostertag Bros. have had additional refrigerators installed in the rear of the store. Henry is a hustler, ably assisted by Will Sanders, an old timer, but up to date.

Robert J. Windler reports trade as good notwithstanding the hot weather. He always has a fine grade of cut flowers.

The W. C. Smith Wholesale Floral Co. is now receiving some of the best ferns seen in this market.

The M. M. Ayres Floral Co. arranged several sprays of orchids for a funeral last week.

Planting out is nearly finished and a shortage in some varieties of bedding stock is reported.

All the wholesale houses close at 5 o'clock during the week and at noon on Saturdays.

The convention of the American Association of Nurserymen will keep all hands busy.

W. F.

### Wichita, Kans

"Decoration Day," as it is popularly styled in this section of the country, held its own in the record for good business. While exact figures have not yet been available, it is a safe guess that the volume of business done will show an encouraging increase over that of last year. There was, generally speaking, ample supplies of cut flowers, although a shortage of good carnations developed early Monday, and of course blooming geraniums were closely cleaned up with calls for more, which had to be satisfied by turning the customer's attention to other stock. Weather conditions were almost per-

fect and very early Monday morning the question confronting the florist was, "How much can we do," rather than "how much demand will we have?" Prices were about the same as previous years, but there was possibly a slightly lessened demand for made-up design work. As on previous occasions, most of the florists worked practically all of their force till midnight of May 29, while the Boss and a few "favored ones" put in practically the entire night in getting stock in shape and packing orders for next morning's delivery. The early maturing of the Cape jasmine crop in Texas promised a shortage in that important item for this season. This was, however, successfully averted by putting carefully selected stock in local cold storage, an experiment which was quite satisfactory. The supply of peonies was largely handled the same way. Peonies that were locally stored and brought to the florist's shop as needed, allowing time to open, gave better satisfaction than cold storage stock which had to stand a 12 to 24-

BUSINESS GOOD.

It has been a generally accepted fact that after a holiday there is a slump in trade, but ever since Memorial day, trade in all lines has been good, and it is expected that the call for inside flowers this summer will be better than ever, partly on account of the hot weather we have had, and also the great drought. Sweet peas, we are told, are almost gone, and what are coming in are small and show signs of the struggle they have had. One large grower has already thrown his sweet peas all out. We used to have inside sweet peas until July, then the flowers from those planted outside came in, but as things look now, there is no telling if there will be any, and by the way asters are being eaten by the cut worms they will be a scarce article. There is a fortune for the person to come forward with a remedy that will kill this "cuss," and all his healthy family. In the old country, we used gas lime to kill wire worms, and if it could be got here I think it would make short work of the cut worm. There is no patent on this and the prescription is free. Peonies are coming in and they are very good.

NOTES.

Welch Bros. report the greatest Memorial day trade they ever had. They received permission from the Public Commissioner to do business, Sunday, May 28. Puritan Boston forbids any such business, but it was stated in the permit that this case was considered a necessity. The American Express Co. placed a team at their disposal for three days.

N. F. McCarthy & Co. had the greatest trade on roses at Memorial day they ever had. They report bedding stock selling better in the auction rooms than ever before. Their second importation of bay trees has just arrived and they are certainly a fine lot. A third lot is on the way direct from Belgium.

William Nicholson, of Framingham, has a novelty just now which sells at sight. It is the Roc-y Mountain columbine. They have tried it for some years, but they have met with their greatest success the present season. The retailers pick it up very quickly.

H. M. Robinson & Co. say it was the best Memorial day they have had and far exceeded their expectations. Loretta, a substitute for southern smilax, they have in quantity just now.

BUSINESS GOOD.

The month of May has been a very busy and prosperous one, Mothers' day this year helping the amount of total sales considerably, and Memorial day business was very good, stock of all kinds was plentiful and prices moderately low. The local crop of peonies helped materially, as the stock was far above any stock shipped to this market, which was proved conclusively by duplicate orders. Gladioli and Easter lilies were a big factor in Memorial or spirea, were conspicuous by their absence. Carnations and roses were plentiful and cleaned up well, although carnations are small for this time of the year. Sweet peas are not over-plentiful and good stock is hard to get. There has been a scramble to obtain smilax all the month, and what stock comes in is short and thin. Orchids find a good sale and lily of the valley is sold in large quantities. American Beauty roses are holding up nicely. Water lilies are beginning to arrive. Lilac had a short season. Greens of all kinds are quite plentiful with good demand and long adiantum is having a fine call. Roses for funeral work are plentiful.

TRADE AND WEATHER GOOD.

The weather man is at last showing us some consideration. Since the evening of Decoration day he has managed to give us quite a few thunderstorms and some rain. The rain on last Tuesday evening, the first for a long time, was of a substantial kind that makes you think the whole heavens were coming down at once. Since then he has remembered us handsomely with a few showers and even at this writing promises more before tomorrow morning. The nights, too, are now such that they are comfortable for both men and flowers. The supply of flowers is as a whole adequate for all requests. Now and then something runs short but this lasts for perhaps only throughout the day. There will be a heavy drain upon the market the latter part of this week when the local high schools have their joint commencement exercises and the Conservatory of Music and College of Music confer their diplomas. Many recitals of students of the numerous musical and dramatic schools take their quota of blooms. In roses the bright feature is the Taft. Its larger buds, keeping qualities and good stem make it eagerly sought by the buyers. It far outstrips anything in the market in summer roses. The Killarney, too, are good and find ready sales. The supply of red is running short, but after this week it will hardly find much favor with the buyers, for then the largest part of the commencement work will be over. Ivory is holding up nicely during the hot weather, while Brides and Bridesmaid clearly show the effects of the heat. The carnation market is good considering the large amount of stock coming in. Clean-ups are next to impossible except at the very lowest prices. All colored sorts plainly show the effect of the hot weather. Lily of the valley has been none too plentiful. Lilies are more than adequate for demands, while callas are about at an end for the season. Some very fine gladioli come into town regularly. Sweet peas drag somewhat when compared to the way in which they have moved during the past several weeks. Sweet williams have found some favor with those wanting very cheap flowers. Peonies, feverfew and candy-tuft are also offered. The green goods market is ample. Southern ferns are getting longer and better and more available for use. A few eastern ferns have appeared in the market.

### NOTES.

Revenge is believed to have been the motive of the burglary of the wholesale florist's establishment of Peter J. Olinger & Co., 120 East Third street, but Olinger declares he has no idea who is the marauder or what his fancied grievance. The burglar stole little of value, but wantonly destroyed more than \$50 worth of flow-

ers. A man was seen lurking in the vicinity of the store early Saturday evening and is believed to have been the vandal. The burglary was discovered Monday when the florist's shop was opened.

Frank Farney, representing M. Rice & Co., Philadelphia, was here the early part of last week as jovial and busy as ever.

The Cincinnati Florists' Society will hold its regular monthly meeting on Monday, June 12.

### Davenport, Ia.

Never in the history of the local trade was there such a rush for bedding stock as occurred the last two weeks in May,—last year's experience in having everything frozen the middle of the month made buyers more cautious and in consequence the florists were rushed to death when the plant trade opened. More stock was sold this year than ever before, with prices about the same as in former years. A few of the smaller growers tried to give plants away, selling geraniums and other stock below the wholesale prices. Why they do this when the higher price is easily obtained is more than we ever had with enough stock to meet the demand. Peonies were in their glory, and sold well, the stock being extra fine this year.

We are receiving a fine line of

Roses were in bloom in the gardens as were also sweet peas and other outdoor flowers, this being the first year we have ever seen roses in bloom on and before Memorial day. Every plant in bloom, and nearly everything in the way of cut flowers, was sold out clean; the day was pleasant and everybody was able to get out to the cemetery, so taken all in all, this has been a banner spring business.

## WARM WEATHER AFFECTS STOCK.

The June weddings of the past week lived up to business considerably, there being several of these important affairs at which the decorations were quite elaborate. Peonies were largely used as were American Beauty roses. The peony market was largely overstocked while the Beauties cleaned up fairly well every day at good prices. There was a large outside demand for Beauties, one order of over 1,000 making quite a dent in the stock. Lily of the valley was in good demand as it always is in the wedding season. Sweet peas were not up to the mark either in supply or quality, the dry weather being responsible for the troubles here. Luckily copious rains have fallen the past few days and all outside stock should now improve. Carnations are fast showing the effects of the heat and are much smaller. The Kaiserin rose is now queen of the whites, the White Killarney being off color, quite single, and opening out quickly. Double white petunias are now to be had in quantity and are much in demand for funeral work. Snapdragon is feeling the effects of the heat and will not last much longer, it being pretty well cut out. Much of this stock that has come to the market the past month has been very poorly handled. Surely the growers do not give this stock the care they should. The trouble is either with the staking or later with being left too long in the shipping box, when it turns up at the ends making it crooked and consequently unsaleable. We believe, broadly speaking, that ten per cent or even more of the stock that comes to market is not saleable from causes, such as being cut too soon or not soon enough, from not being given an hour or two longer in water, from being crowded into too small boxes, or careless picking that allows the contents to fall to one end and get bruised, etc. All of these errors could be avoided by a little care and foresight.

## CLUB MEETING.

There was a fair attendance at the June meeting of the Florists' Club held Tuesday evening, June 6. The special feature was the paper of Mrs. S. I. Smith of Seacane, Delaware Co., on "Violets and Carnations." This proved very interesting, pertaining not so much to the culture of the flowers named as to the history of her achievement in establishing a profitable business from a very small beginning. It is believed to be the first paper prepared by a lady member of a florists' club in this country and will no doubt be received with interest by the many women now engaged in the business. At the July meeting Paul Heebner will read a paper, the subject of which will be "Railroad Gardening." Bowling nights for those wanting to keep the convention team are Monday and Thursday evenings in June.

## NOTES.

The interest in the rose display at Dreer's increases as the season advances and the grounds are crowded each day by enthusiastic lovers of the rose or those who become converted by the overpowering loveliness of the beautiful display. Roses about the lawns of the private dwellings are highly prized by the owners but there is not room to try out but a few of the many beautiful varieties now considered standard sorts and which list is rapidly increasing. In every public park in this country there should be a rose garden, grounds set apart and arranged so that when planted there would not only be sufficient room for the proper display and growth of the roses, but so that the great crowds that would come to enjoy the display would have ample space to view them from on foot or in vehicles and also provide seats and plenty of them for the spectators who would desire to rest in the beautiful places and enjoy it to the full. When such a seasoned grower and dealer as Jacob C. Elsiele goes almost daffy in his enthusiasm over the collection to be seen at Riverton what would the effect be on the average rose lover of an elaborate display such as could be placed and kept in our principal parks and for a comparatively small sum, in fact, infinitesimal for the pleasure it would give.

K.

## Buffalo.

## BETTER WEATHER.

We have at last got the weather on the right track and conditions are more favorable. The weather preceding Memorial day was simply terrific, consequently flowers that are always to be depended upon were gone, and those that are staple, especially carnations, were so small it was a shame to offer them for sale. Harrisii lilies were the only flower that withstood the heat and they were used in everything. Wreaths of magnolia, boxwood, and galax were very much in demand this year and as the weather was so unfavorable they were very acceptable. Peonies very gracefully kept back until the day after Memorial day, and have been a great help ever since. Roses, sweet peas and other flowers have been poor, but are showing improvement now. It is many years since the patience of the greenhouse man has been so sorely tried as this year. The unusually warm weather in May led many to believe that they had neglected their ordering of veranda boxes, etc., and all wanted them at once. Those that were last are the ones that are the best pleased, for the early planting was very hard on all boxes, baskets and cemetery vases. The demand for saw work of every description is larger than last year, box trees, bay trees, vases, veranda boxes and bed planting has been good. The only thing to look forward to is that the greenhouse man will be through earlier than usual.

## NOTES.

Again, and so suddenly, it has taken us a week to collect ourselves and write about it, the florists have had another wedding, not an employee, but in the front ranks. The quiet of Kasting's was rudely disturbed last month when the announcement that Miss Rachel M. Rebstock had joined the matrimonial colony and forsaken those who had looked upon her as the one woman to run a successful business without a man to boss it, but he came at last. He was no layman but a man with a prefix; it is now Mrs. Captain Johnson. We extend our heartiest congratulations to the newly-wedded and wish them every joy that can come to them.

S. A. Anderson had three men in Olean last week taking care of the

floral arrangements for the funeral of a prominent man who was killed in an automobile accident in that city. Flowers were sent from several places and all arrangements were in Mr. Anderson's care.

Phonetic spelling was urged by President Roosevelt during his administration without success, but a recent recruit in the flower business has tried it and spells mignonette this way: min-yon-net, and he was very serious about it, even willing to argue the question.

Notices have again been sent out and the Buffalo Florists' Club may have a meeting under the newly-elected officers. There is plenty of time yet, nine more months to call one if they should miss again.

Visitors: C. B. Knickman of McHutchinson & Co., New York; S. L. Green of H. Bayersdorfer & Co., Philadelphia, Pa.

BISON.

## Pittsburg.

## MARKET OVERSTOCKED.

The beginning of June finds the market overcrowded with almost everything, and while lots of stock is dumped, yet business is good for this time of the year. Naturally, commitments and weddings are responsible for the greater part of it. American Beauties are in strong demand and clean up daily. Red roses would sell well if they did not fly open so soon. Good pink roses have healthy calls as well as fine Kaisersins. Outdoor peas are still scarce. Miniature gladioli sell well, and the large varieties clean up on sight.

## NOTES.

Wm. Potter of The McCallum Co. is resting up after the Memorial day rush by spending a week on Lake Erie.

Mrs. E. A. Williams is cutting a very fine lot of Spanish iris.

J.

## Yonkers Horticultural Society.

The regular meeting was held in Wiggins Hall, Yonkers, N. Y., June 2. The executive committee made a most satisfactory report with regard to the coming show, the prize money being already assured. H. Nichols, superintendent for H. Trevor, exhibited a fine collection of sweet peas, and received a cultural commendation. A similar award was made to L. Milliot for some fine glloxinias. The next meeting, July 7, will be of a social character and T. Mahony, W. Macdonald and J. Hoffman were appointed a committee to make the necessary arrangements.

## European Horticulture.

FROM THE FRENCH TRADE PAPERS.

The Japanese Radish or Daikon.—This new vegetable, shown recently in France, is of wonderful productiveness, and is freely used in Japan, both for human consumption and for feeding stock; eight varieties were tested, the best being Mia-Ohige, the longest variety, sometimes reaching five feet in length. The flavor is reminiscent of the turnip, without its watery quality, and still is quite characteristic; it is nourishing and should be a good diabetic food, as it contains no sugar. Seed should be sown at the end of July, on light, deep, clay-like soil, heavily manured with cow manure; germinating in four or five days, the plants make a rapid growth and are ready for use in two and a half to three months. The flavor of the raw Daikon is that of the black radish, but it loses the piquant flavor in cooking. All the Daikons are eaten with meat, and it is predicted that when known they will become popular.

*Primula Cockburniana*.—Discovered in Western China, in 1890, by E. H. Wilson and introduced by James Veitch & Son. Native of moist prairies of high altitude, this new *primula* is a perennial; leaves are almost smooth, oval oblong, rounded at the tip, narrow at the base, finely toothed, and lightly powdered on the under side; flower stalks stiff, bare, 10 to 12 inches high, in clusters, and each bearing three to five whorls of five to eight small flowers of a very handsome fiery orange red. It is not to be recommended as a variety for ordinary open air culture, although it is apparently hardy; it seems to be a little difficult in the matter of location and soil; if, however, as seems likely, hybridizations between related species of *primulas* are possible, what may we not expect in the way of color and freedom of bloom from the descendants of this variety?

Krelage & Son's Jubilee.—In the month of April the firm of Krelage & Son, of Haarlem, celebrated their centennial. An exhibition of diplomas, certificates of merit and medals showed the continual success of this noted firm, and a veritable library of publications illustrated their contributions to the science of horticulture. Twelve of their gardeners have passed forty years in the service of this firm, which at present specializes in bulbous plants. At the Jubilee, a large painting of a field of Darwin Tulips was presented to Ernest Krelage, the present head of the firm, and many pleasant speeches were made.

*Begonia Aurore*.—A new *begonia* of V. Lemoine, *Pis. filis*, issue of the same cross which produced *P. Pattrie*, of a color resembling that of the ordinary tuberous *begonia*, leaves rounded, dark green, somewhat leathery; the inflorescence very compact, crowning the plant, consisting of numerous crowded flowers, attaining a diameter of two inches, the male flowers having four, sometimes five or six very round petals; the female flowers are few. The color is a light salmon, blooms in December, January, and recommences in March, April.

New *Cydonia Maulei* var. *Sargenti*.—This new quince, a close relation of the Japan quince, introduced by V. Lemoine et Fils, is of dwarf growth, stiff wood, and is distinguished by its vermilion red flowers, disposed along the branches. The *Cydonia* Maulei varieties are rare in our gardens, but are the most brilliantly colored flowers, if not the first, of the spring; are charming and lasting for decoration, and the shrubs are easy of culture.

Early Stocks, Bouquet or Abundance.—The superb race of early large flowering winter stocks has a worthy addition in this new and distinct

### Second Consignment.

6,000 just received per Steamer Marquette from Antwerpen, Belgium. More coming, by next steamer.

**Warning**—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our speciality, the *Araucarias*.

**Araucaria Excelsa**, **Robusta**, **compacta**, **Glaucia**, and **Palmis**, etc. Florists everywhere know us as leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the *Araucaria*, more in favor than ever, from Atlantic and Pacific Ocean to every florist our *Araucarias* is interesting, there know no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants, in **Spring 1910** importation, lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere this plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes.

**Araucaria Excelsa**, raised from top cuttings 6-7 inch pots, 4 to 5 years old, 5, 6 and 7 tiers 25, 28, 35, 40 in. in height. \$1.00 \$1.25, \$1.50, \$2.00 to \$2.50 each

**Araucaria compacta**, **Glaucia** and **Robusta** **Excelsa**, 6-7 in. pots, fine bushy plants. .... \$1.25 \$1.50, \$2.00 each

**Araucaria Excelsa**, new importation, out of 5 ½, and 6-in. pots, 2 to 3 years old, 3, 4 and 5 tiers. 10, 12, 14, 16, 18, 20 inches high. 40c, 50c, 75c, and \$1.00 each

**Robusta compacta** **Excelsa** **Glaucia**, 5½ and 6-in. pots. .... \$1.00 to \$1.25 each

**Kentia Belmoreana**, 4 year old, 30 to 35 inches high, \$1.50.

**Kentia Forsteriana**, 4 year old, 30 to 35 inches high, \$1.50

**Kentia Forsteriana**, 4 year old, 24 to 26 inches high, 75c to \$1.00

**Kentia Belmoreana**, 4 year old, 26 to 28 inches high, \$1.00 to \$1.25

**Kentia Belmoreana**, 4 year old, combination or made up of 3 plants, 26 to 28 inches high, \$1.00, \$1.25 and 50c

**Kentia Belmoreana**, combination or made up of 3 plants, 3 year old 24 to 26 inches high, 75c to \$1.00

**Cocos Weddelliana Palms**, made up of 3 plants, 4 to 5 in. pots. 30c, 40c and 50c; large 2½ in. \$1.00 per 100

**Asparagus Pumosus Nanus**, 2½-in., \$3.00 per 100 \$2.50 per 100

**Asparagus Sprengeri**, 4-in., 10c; 2½-in., strong, \$5.00 per 100.

### Ferns.

**Scottii**, very large selected specimen plants, 8-in. pots, \$1.50; 7-in. pots, 75c to \$1.00.

**Whitmani** and **Scholzii**, 7-in. pots \$1.00, **Glattasii**, 5 ½-in. pots 20c, 35c, 40c, 4-in. pot plants 20c to 25c.

Large 3-in. Boston, **Whitmani**, **Scottii** and **Scholzii**, 15c to 20c.

**Dracena Braulti**, 6-in. pots, suitable for vases, 35c to 40c.

**Crimson Rambler Rose Bushes**, 6-in. pots, 30, 35 and 40 in. high, 50c, 75c to \$1.00.

**Nasturtiums**, assorted, 3-in. pots \$5.00 per 100, **Cosmos**, 3 plants in a 2½ in. pot, \$3.00 per 100.

**Torenia Fournieri**, 2½-in. pots, \$3.00 per 100. Large African Marigold, 3-in., 5c.

**California Giant Petunia**, 3-in., \$5.00 per 100.

### In Small Plants

we have the following in 2½-in. pots, at \$2.50 per 100:

**Verbenas**, assorted colors. **Phlox Drummondii**, dwarf and grandiflora. French dwarf **Tagetes** (the queen of the Mari-golds).

**Colerus**, **Verschaeflii**, **Golden Bedder**, **Queen Victoria** (fancy colors, 4c).

**Petunias**, **Inimitable Dwarf**, **Sweet Alyssum**, **Carpet of Snow** or **Little Gem**, **Tradescantia**, two colors.

**Trumbullii**, **Black Eyed Susan**, **Lobelia**, **Crystal Palace**, blue, dwarf and trailing.

**Cornflowers** (assorted). **Centaurea Gymnocarpa** (Dusty Miller). **Pyrethrum Aureum** (Golden Feather), \$3.00 per 100.

**Kentilworth Ivy**, 2½-in., 3c. **Acalypha**, 2½ in., \$3.00 per 100.

**Asters**, 4 separate colors, 2½-in., 3c; **Giant Crego**, best aster, adapted for benches, to cut or for pots, 4 separate colors, purple, rose, pink and white, \$3.00 per 100; \$2.50 per 100.

Don't forget that we are the growers and shippers of **Ipomoea Noctiflora**, the pure white **Moonevine**, with flowers as big as a saucer very fragrant and the earliest **Moonevine** in existence.

For which we have a world wide reputation for the past twenty-five years, grows 30 feet and over, one season; over 25,000 are shipped every spring all over America south, north, west and east.

Mexico and Cuba, 2½-in. pots, \$5.00 per 100; 3-in., \$8.00 per 100; 4-in., \$12.00 per 100.

25 at 100 rates. Cash with order, please. All plants must travel at purchaser's risk.

# GODFREY ASCHMANN,

Wholesale Grower and Importer of Potted Plants.

1012 W. Ontario St., PHILADELPHIA, PA.

variety which, instead of branching in pyramidal form, takes a bushy form and becomes a fine bedding plant. This effect is produced by the central flower stalk dividing into a cluster of 12 to 15 branching stalks, each of which produces 15 to 20 stems of large lilac rose flowers, much resembling the variety *Alexandra*.

**Hybrid Freesias**.—Among the new hybrid freesias which have been so much admired at recent French and English shows are *F. Chapmani*, a light orange yellow with very bright orange red blotches on the throat, and *F. refracta alba* improved, with flowers of a very pure white with the yellow throat blotches very small.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duray, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

CHICAGO.—Prices on the board of trade, June 7, were noted as follows: White clover, from \$22 to \$30.—Vaughan's Seed Store reports their plantings of young gladiolus bulbs as making a remarkably good growth for this early date.

RECENT California seed crop reports indicate poor growth and probable short crop of sweet peas, but it is too early to give very definite, reliable information. Refresh and lettuce promise a crop somewhat under the average. Onion looks better and if the weather does not turn too hot a good yield can be expected.

VISITED CHICAGO: Howard M. Earl, of W. Atlee Burpee & Co., Philadelphia, Pa., and party spent June 5 in the city, en route to California, leaving in the evening; Ant. C. Zvolanek, on his way to the Pacific coast and his annual sweet pea inspection tour in that section. Mr. Zvolanek is taking up lilies and freesias and he is confident of showing results in seedling lilies in two years. A large pink seedling is the most promising of the freesias.

BEGINNING July 5 and continuing during the months of July and August, the facilities of the Seed Laboratory of the Bureau of Plant Industry, U. S. Department of Agriculture, Washington, D. C., will be available, as far as space permits, to anyone wishing to become familiar with the practical methods of seed testing. There will be an opportunity to observe the laboratory methods of testing for germination and mechanical purity, including the recognition of crop seeds and the common weed seeds.

### Iowa Seed Law Satisfactory.

Des Moines, June 6.—No marked changes in the Iowa seed law will be recommended by the Iowa State Seed Dealers' Association, according to action taken today at an executive session of the eleventh annual state convention. The report of H. A. Johns of Sioux City, chairman of the legislative committee, was on the whole favorable to the present statutes. A feature of the open programme this afternoon was a lecture by Professor L. H. Pammel of Ames, state botanist, and the author of the present law. He defended the few points in the code which the dealers criticised.—Chicago Inter-Ocean.

### Seed Warranty.

AN ENGLISH DECISION.

It will probably be within the recollection of our readers that the case of Wallis v. Haines, which was before the court of appeal in June last, was sent up to the house of lords; the judgment of the lords' bench was given on May 5.

This interesting case arose out of the sale of sainfoin seed. Mr. Wallis, a dealer in agricultural seeds, bought common sainfoin from the defendant's firm, Haines & Co., which he resold to divers customers of his who were farmers; the crop when grown turned out to be Giant sainfoin, which was not of nearly so much value as common sainfoin. The farmers applied to Wallis for compensation, which he at once paid them, and he in turn asked the growers, Haines & Co., to recoup him for his losses. They declined saying that their invoice stated that no warranty was given for purity, fertility or quality. The case was referred to Mr. Acland, K. C., who gave his award, subject to a point of law, which in turn was left to Justice Bray. He declared in favor of Wallis. The court of appeal, by two to one, reversed this judgment, and the house of lords now restore it. There was no imputation of fraud in the transaction, but the error of sending out the wrong seed arose from the fact that the seeds of common and Giant sainfoin are not distinguishable by either eyesight or touch, and it seems probable from the evidence that the original grower (a farmer) who sold the seed to Haines & Co., was not aware of the difference between the two races of sainfoin.

Lord Justice Fletcher-Moulton (one of the appeal judges), gave his reasons at length for differing from his learned brothers, which, briefly stated, were that as the buyer could not determine, without growing the seed and seeing the plants resulting, whether the seed was true or not, he was compelled to accept it, and that this fact overrode the disclaimer behind which the growers sought to shelter themselves from any consequences of mistake on their own premises. The house of lords seems to have taken the same view. The lesson to be learned seems to be that great care must be exercised in labeling the various stocks, for we presume that the Green Top common turnip were sold by mistake for Swede or say cabbage for cauliflower, damages for loss of crop would ensue. Most large seed firms are fully aware of all this and take the necessary precautions to prevent mistakes. It is the retailer who, by the carelessness of an assistant, is liable to be let in for damages out of all proportion to the seed sold. Two shillings' worth of turnip seed will sow an acre, but the loss of crop between 10 or 20 acres of what should have been late Swedes, but turned out to be early common turnips, might run to 10 pounds per acre.

It might, therefore, be wise for the retailer to adopt a system of labeling his sacks both inside and out with a distinctive color as well as the name, say, for instance, a purple label for Swede seed, a green one for Green Top, a yellow one for Scotch Yellow, etc., so that sacks might be recognized at a glance. Of course, a system could easily be devised by which any seed could be known by the color label as well as by the written one, and this would we think, give an additional security from mistakes which may now at times prove very costly matters.—Horticultural Advertiser, May 24, 1911.

[Assuming that the comments of the Editor of the Horticultural Advertiser in his closing paragraph of the above are correct, and that the decision in question by the house of lords establishes such a rule of law, we have this condition: A seedsman may sell to a market gardener one dollar's worth of Early Jersey Wakefield cabbage seed and the latter may set with plants grown therefrom a 5-acre field and failing to secure a crop, claim \$500 damages. The seedsman can not possibly have witnesses to controvert the claim or press the case. The gardener's statements should then be accepted or intentionally substituted or used other seed than that supplied. The seedsman can make no imputation of fraud because the planter has all knowledge and the only knowledge of what has happened to the seed after it left the seedsman's counter. We cannot believe the working out of the natural conclusions possible from the decision in question can be good law or based on equity. We believe that if the market gardener buyer intends to hold the seedsman seller responsible as a guarantor of the seed (and practically of the crop itself) and require him to waive or ignore the seedsman's usual long established non-warranty condition, then the buyer should be required to so state when he purchases the seed. If the seedsman seller be given the opportunity to decline the sale or retain and set aside a packet of the identical seed sealed and initialed by the buyer as a preventive of fraud in the transaction.—ED. AMERICAN FLORIST.]

E. M. PARMELEE's report on the pea situation seems rather gloomy.

ISAAC BUNTING, the well known lily specialist of Colchester, Eng., is in Chicago this week enroute to Japan via Vancouver.

SOME items on the interesting programme prepared for the forthcoming convention of seedsman at Marblehead are unavoidably held over until next week.

ROCKFORD, ILL.—John R. and Leonard R. Condon, well known among the seedmen and florists of this section, have opened an office at 413 West State street, for the purpose of carrying on a brokerage, jobbing and importing business in seeds, plants and bulbs. They have a goodly acreage at their command, a long experience in the business and large acquaintance with the trade. They have both seen long service in the employ of H. W. Buckbee, John for twenty and Leonard for sixteen years, and are trained in every detail for the proper conduct of the business. They leave their former employer with his best wishes and their ambitions are to build a lucrative business of their own.

## Lilium Harrisii

THERE are conditions, and they occur not infrequently, under which all lily  
bulbs fail to make good flowering plants. There may be, probably are more  
difficulties attending the growing of Lilium Harrisii bulbs than most forcing  
varieties and yet those who do them well have found the early blooms very profit-  
able. In many parts of the south where this bulb has been grown over a longer  
season and without the overforcing sometimes imposed on the plants, Harrisii has  
given most satisfactory returns. We are contracting subject to crop conditions  
a select strain of Well Grown Bulbs of

## Market Gardeners

### Vegetable Growers' Association of America.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

NEW YORK.—Commissioner Walsh of the bureau of weights and measures, burned 3,000 short measure bushel baskets May 31, which he had seized from Long Island farmers.

### The Asparagus Miner.

An insect that has caused much trouble, and in some cases is as destructive as the asparagus beetle, is the asparagus miner upon which the United States Department of Agriculture has recently issued Circular No. 135. The larva of the fly mines beneath the epidermis of the stalk, near the base and below the surface of the ground and they are frequently so abundant that the stalk has the effect of being girdled so that the injured stalks can readily be pulled from the ground. The infected stalks can generally be detected by their roughed appearance. In its injurious occurrences it seems to be limited to the eastern United States but it has also been found in asparagus beds in California. The remedies so far found are in the spring to permit a few asparagus plants to grow as a trap crop to lure the fly from the main crop for the deposition of her eggs, and after this has been accomplished pull the infected plants and burn them. The second generation can be destroyed in a like manner by pulling old infested stalks as soon as attack becomes manifest and promptly burning them also.

### Tomato Wilt.

A disease of the tomato that is sometimes confused with leaf spot is properly known as fusarium wilt and this is not in the least affected by the applications of spraying materials to the plants is fully proven in the experiments carried on at the experiment station of the University of Illinois. This wilt has caused the loss of many a promising crop, and the first indication that the plants are affected is by the sudden wilting of entire branches or even the entire plant. Within a few days the wilted portions become brown and dead, examination of the wilted stems reveal a discolored, brownish appearance of the wooded portion. The plants may die before any fruit has matured or after any part of the crop has been gathered. The first season that the wilt will appear in a field, usually only a few plants are affected, but if the field is used for tomatoes the next year the attack is likely to be very severe, for the disease is carried over in the soil and the length of time the disease will remain in badly infected soil is not known. It is, therefore, important to practice rotation of crops so that the soil will not become badly infected. Care should also be taken in securing soil for the beds in which the plants are grown. Fresh soil should be put in the beds each year,

and it should be secured from a part of the farm which has never grown tomatoes nor received the wash from tomato fields. It is also important to avoid inoculating a new field by means of soil carried from an infected field on tools or the feet of men or farm animals.

### Louisville.

Business conditions the past week were very good, stock in all lines moving fairly well, fully up to expectations, and the supply was almost adequate. Roses sell well and are in good supply, but the quality is rapidly falling off. The demand for carnations has fallen off immensely owing to the poor quality, caused by the extremely hot weather. Sweet peas are plentiful and have had a great demand, but the quality is deteriorating very rapidly. Lily of the valley can be seen in small quantities and the quality and demand are fair. There are plenty of spring flowers such as iris, coropsis, hydrangeas, gladioli, Magnolia grandiflora, and various other sorts which find a fair demand, and they are of good quality. Green goods are in good supply.

The Kentucky Society of Florists will hold its outing next month. S.

### European Horticulture.

Primula Winteri.—So few of the varied species of the Primula family which have come to us, and of late so abundantly, have the true Primrose habit of florescence that there is special pleasure in welcoming Primula Winteri for that very reason. No doubt when the novelty of seeing it has somewhat worn off, it will be regarded as an ordinary, though charming, species that offers good ground for the hybridist to operate upon. But whatever may be done in that respect, I trust no effort will be made to create out of it varieties that have the ordinary erect stems such as distinguish the majority of species. Being a primrose, let it remain a primrose; and if crossed at all, let it be solely by using

### New Jersey Grown Tomato Plants

Here is the center of the tomato-growing district of the United States. Our plants cannot be beaten. Varieties: Improved Stone. Matchless, Cumberland Red, Success, Red Rock, Living stone's Beauty and others. \$1.50 per 1000.

### VEGETABLE PLANTS.

Cabbage, Wakefield. All Head, Succession and other varieties \$1.00 per 1000; 10,000 and over 85c per 1000.

Lettuce, Grand Rapids, Big Boston, Boston Market and Tennis Ball. \$1.00 per 1000; 10,000 and over 85c per 1000.

Beet, Crosby, Egyptian and Eclipse. \$1.25 per 1000. Cash with order.

R. VINCENT, JR., & SONS CO., White Marsh, Md.

pollen from some of our true garden primroses, in the hope that whatever may arise from such cross, the true primrose habit, which is so specific and so charming, will be fully retained. Also, it is hoped that no effort will be made to destroy the species' distinctive coating of farina, which renders it a fit companion in a leafy sense with the old dusty miller of auricula gardens, but which is now seldom met with, at least in the south.

A Disease of the Lilac.—An epidemic which recently declared itself in lilac has been traced by Mr. Massee (Kew Bulletin, No. 2, 1911), to a fungus, Helminthosporium syringae. The leaves are first attacked, brownish stains running down the leaves at some distance from the midrib. Later the leaf becomes brown and dry, and often more or less cracked and torn.

A Remedy for Bee Stings.—Frank H. Perrycoste, writing in "Nature" recommends belladonna plaster as a remedy for bee stings. He finds that, if applied at once, the plaster produces its remedial effects very quickly, though where the sting is severe, or the person stung is very susceptible, the swelling and irritation are not prevented altogether.

## The Nursery Trade

**American Association of Nurserymen**  
W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Sheboygan, Ia., Vice-President;  
J. H. Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

VISITED CHICAGO: Jas. B. Wild, Sarcxie, Mo.

THE Southern Hotel has been chosen as headquarters for the thirty-sixth annual convention of the American Association of Nurserymen at St. Louis, June 14-16.

SARCXIE, Mo.—Gilbert H. Wild has taken over the peony business of his father, Jas. B. Wild, at the above address. He has marketed 1,000 crates of cut peony blooms this season, averaging nine dozen to the crate, and shipments are made as far east as New York.

GENEVA, N. Y.—John Jorden, engaged during his early life for many years in the nursery business, died May 29, aged 73 years. He retired from active business fifteen years ago and has held many civic positions in this period, being president of the board of charities at his death.

SECRETARY HALL, of the American Association of Nurserymen, advises us that the entertainment committee has found difficulty in declining the many offers tendered, and that the features selected by this committee are all that could be desired by the most fastidious.

A SIMPLE and effective way to destroy the eggs of the elm-leaf beetle and other injurious insects is reported as having been adopted with success by a Connecticut woman. A mat or blanket of soft hay or grass cuttings about a foot wide and in a thick mass is spread at the base of the tree. This is done in June when the beetles come down to deposit their eggs and allowed to remain until into July, when the mass is carefully lifted and burned.

THE Canadian customs memorandum dated April 24, 1911, declares all nursery stock from Europe, Japan, and the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut subject to inspection. Greenhouse plants and roses (accompanied by a certificate), herbaceous perennials, herbaceous bedding plants, bulbs and tubers, and cottonwood grown in the Dakotas or Minnesota are admitted at any time without inspection.

### Arnold Arboretum Bulletins.

The bulletins issued May 24 and May 31 by the Arnold Arboretum contain notes and descriptions of the magnolias, crabs, viburnums, loniceras, diervillas, maples, hawthorns (crataegus), deutzias and spiraeas. Especial attention is called to the adaptability of vaccinium corymbosum, the high-bush blueberry, as a beautiful shrub in the arboretum. The habit is good, the flowers and fruit are beautiful and no other plant has a more splendid autumn color.

### Nursery Pests Come High.

While the farmer has been protected by having high duties placed on things that he buys, the makers of our custom laws have quite overlooked the opportunity to protect him in an humbler but more profitable way. One result of our custom laws, says Mr. Marlatt, of the Department of Agriculture, in the National Geographic Magazine, is that the United States has become a sort of dumping ground for infested nursery stock. Austria-Hungary, France, Germany, Holland, Switzerland and Turkey have absolutely prohibited the entry of nursery stock from this country.

But we have imported, duty free, a choice assortment of pests, including the Hessian fly, the codling moth, the gypsy moth, the brown-tail moth, the cotton-boll weevil, the San Jose scale and others which have caused incalculable loss to the farmers and orchardists of this country. The Hessian fly, in a single year, destroyed wheat that would have been worth a hundred million dollars at harvest. Twenty-five million dollars is the estimated annual loss from the cotton-boll weevil. The loss to orchardists from the codling moth and San Jose scale is fully as great and the New England states are spending more than a million dollars a year in efforts to exterminate gypsy and brown-tail moths. These imported pests would have been excluded, says Mr. Marlatt, if there had been a properly enforced quarantine inspection law in the past.

### Hybrid Rugosa Rose.

Rugosas are such a hardy and accommodating class of roses, needing scarcely any attention when once planted, and making one of the best hedges or fences of roses, that they really should be more grown where there is space available, advises a correspondent in the Gardeners' Magazine. The old pink and white singles are well known, and so is the seedling from the last-named, the beautiful Blanc Double de Coubert, one of the purest white roses we have, with not a suspicion of pink about the blossoms.

There are several very good hybrids now, the chief of which is undoubtedly Conrad F. Meyer, a rose obtained by a double cross. This is a very vigorous grower, admirably adapted for pillars and large solitary bushes. The foliage, like all the rugosas, is seldom affected with diseases such as mildew and red rust, so that the plant always has a clean appearance. Conrad F. Meyer is also one of the sweetest scented roses, very large, exquisitely formed when young, and a clear silvery-rose in color. Nova Zembla is a very pale bluish-white sport from this, and differs only in color. Rose a parfum de l'Hay has some sap of General Jacqueminot among it, and much of its exquisite perfume. This is also a late bloomer, and purplish-crimson in color. One of the best and most distinct is Atropurpurea, a single-flowered variety that has very taking deep maroon-colored buds, opening into deep crimson and purple-crimson flowers that are greatly improved by the showy stamens. The flowers, as in the case of those of the original singles, are followed by showy hips of intensely deep crimson color.

Madame Georges Bruant is one of the first roses to open its flowers with me, does not cease all through the summer, and is in bloom when frosts arrive. This is a cross with the old tea Sombreuil, and the flowers are white, a little more than semi-double, and very round in the bud stage.

### Perovskia Atriplicifolia.

This interesting sub-shrubby plant has within the last few years made some considerable headway in gardens, and it may be met with as a group in the herbaceous border or the shrubbery, for it is fitted for both positions, a correspondent of The Garden writes. Growing from two feet to three feet high, it forms an upright plant with greyish stems and leaves. The latter are from one inch to two inches long and up to three-quarters of an inch wide, each having a saw-like margin. The flowers are borne during August and September in large inflorescences, which form the upper half of the shoots matured during the current year. They are blue in color and much like those of the lavender in shape. The plants ought to be cut well back in spring in order to secure good strong shoots for the flowering-time in autumn. Like many other plants which belong to the order Labiate, this one is attended with a decided perfume. Cuttings of young shoots inserted in sandy soil in July may be expected to form roots in a few weeks' time, while in two years from the time the cuttings are inserted strong flowering plants may be obtained. The species is found wild in the Himalayas, and may be grown in ordinary garden soil.

Those interested in *Anemones*, *Pompons* and *Singles* will be quoted upon application.

This bulletin will be changed each week to comply with stock on hand. Rooted cuttings will be furnished at 50c per 100, \$5.00 per 1000, less than prices quoted above.

**Elmer D. Smith & Co., Adrian, Mich.**

FULTON, N. Y.—George Dumas has completed a new greenhouse 20 x 110 feet and will install a new and much larger boiler.

NEW YORK.—A double decked flower garden will occupy all the sunny portions of the municipal ferry boat Middletown, summer hospital for child consumptives, as it plies the East river this season.

PORTLAND, IND.—W. Frank & Sons are building three houses 300 feet long in which the new Advance ventilating machines with the new "twistless" arm are being installed and proving successful in every detail.

## Aschmann's Asters

After Decoration Day you have empty benches. Will it pay you to have empty benches? Take a few minutes of your time, think and consider what will pay the best. Chrysanthemums? Oh, no! I know something better. I plant a bench or two with Asters for July and August. I cut then; that will give me time to replant my benches with a fine lot of fall and holiday plants suitable for my fall business. I am going right now to write an order to Godfrey Aschmann, of Philadelphia, for his **Giant Crego Asters**. They are the earliest and best branched Asters in the world. Yes, we have 20,000 of them in four separate colors, white, rose, purple and pink. Strong plants, 2½-in. pots, \$3.00 per 100; \$25.00 per 1000.

**AMERICAN FLORIST CO.,**

440 S. Dearborn St. CHICAGO.

**Circulation in  
Buyers' Brains**

Is the kind enjoyed by the American Florist. Its actual paid circulation we believe, is the largest in its class. The contents are of real present value and are preserved for future reference. Advertisers who realize this establish permanent business with the best trade in the United States and Canada.

**If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It**

## Some Common Sense, Sense on Greenhouse Buying

YOU go to the Florists' Conventions to find out what the other fellow is doing.

You read the florists' papers for the same reason. In other words, you want to make sure that your methods are the surest and best methods. You seek the benefit of many men's minds.

You have caught the progressive spirit of the age and are suspicious of the "one man propositions." "Right you are!"

By the same token, isn't it equally to your advantage when you come to buy a greenhouse, your heating, and so on, to buy them from a firm made up of, say, half a hundred experts?

It stands to reason that construction experts know more about construction than heating men, and that heating men have their hands full without butting into the construction. Both, to our notion, require highly experienced engineers—not just men who have picked up the greenhouse business.

We sell you a greenhouse. It seems easy to you when our salesmen or one of our ads. has it all nicely condensed. But do you realize what a lot of condensing and planning are required by our experts behind the scenes, to bring about these seemingly simple results?

After you have placed an order, the details of construction, heating, ventilating, etc., are again carefully gone over. You get the benefit (at no extra cost to you) of many men's knowledge, based on over half a century of greenhouse building.

As a further advantage to you, is the fact of our having two factories—one at Irvington, N. Y., the other at Des Plaines, Ill.—shipment can be made from which ever will save you the most freight.

Besides all this, our number of employees (now over 400) has steadily increased with the business, so that you get the same personal, careful attention that our customers did when our office was under the stairs in the wood-working mill, and when to "get out a job" the mill was closed and all hands went out and helped erect it.

To get down to the truth of matters, we are big enough to sell you a hundred-pound keg of putty—and nothing else with that order—or a greenhouse of the largest sort that is safe and economical.

A good many of our really big customers started by ordering a tub of our Stay Put Putty.

Order what you like—but get started!

Not "just putty," but a special Greenhouse Putty—the putty that stays put.

[Sold 2½ tons to one man last week. You might start with a 100-lb. keg as a try out.]

**Lord and Burnham Co.** Irvington, N. Y., and Des Plaines, Ill. New York St. James Building. Boston Tremont Building. Philadelphia Heed Building. Chicago Rookery Building

### Notes of the Chicago Coal Trade.

Close study of the coal market fails to show any new features of interest to our greenhouse coal consumers, except in the change of temper among the smokeless and Hocking coal dealers, who are reported to have come to an agreement upon smokeless and Hocking coal prices. But from general indications there seems to have been another disagreement for we find that smokeless coal is being bought at from 75 to 90 cents a ton at the mines. These purchase prices, compared with the circular prices of \$1 mine run, show the renewal of warfare among the smokeless and Hocking dealers and if greenhousemen consider their own interests they will take advantage of this condition and make early purchases.

W. F. Dunk, president of the Northern States Coal & Mining Co., at the Fisher building, who has catered to the greenhouse trade for many years with great success, reports that the company's greenhouse orders for 1911 show an increase of more than 55 per cent over 1910, and takes great pleasure in thanking the greenhousemen, through our columns, for their kind patronage and says that he is still on the market with some very fine grades

**IMMEDIATE OR SUMMER DELIVERIES.**

of greenhouse coal for immediate or summer shipments at greatly reduced prices.

President Pinger, of the Pinger Coal Co., reports very favorably upon this year's greenhouse business and upon the satisfied greenhouse customers of his in the past, who are rallying around him with orders for immediate and summer delivery. He reports that he has a very fine grade of New River, Pocahontas and West Virginia coals, which he can ship at greatly reduced prices in the month of June, as prices are expected to advance in July.

R. C. Whitsett, of the Whitsett Coal and Mining Co., is all smiles these days for many of the greenhousemen have taken advantage of his high grade block coal offers and are sending in their orders fast for this coal before July 1, when block coal is expected to advance 15 cents per ton. He also has some very fine grades of Pocahontas and smokeless coals.

Manager M. A. Rolfe, of the Black Gem Coal and Coke Co., for the benefit

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repair.

Ask your Dealer about our Extension Hose, E tension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

Denver.

The Denver Wholesale Florists' Co. has brought suit against William C. Walters, a member and holder of 1,000 shares of stock in the company. The company was organized in June, 1909, by Walters, Emil Glauber, J. B. Benson, L. C. Waterbury, Frank Hall, Ben Boldt and F. C. Maler. The organization was perfected to act as a clearing house for the cut flower products of the greenhouses of the various incorporators, it being agreed that none of the organizers were to open stores or otherwise sell flowers at retail or to others than the firm. Contrary to this agreement Walters last April opened a store and started selling at retail. Ernest Morris is trustee for the stock of the company of which 1,000 shares was owned by each of the organizers. The court is asked to order him to turn Walters' stock into the treasury of the company as liquidated damages for Walters' alleged failure to live up to his agreement with the other members.

PHILADELPHIA, Pa. — The annual Main Line flower show was held at Haverford May 27 and was a great success and largely attended. Silver cups and other premiums were awarded for roses, perennials and flowering shrubs.

### Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements should be carefully pre-  
served, as they mean much to the retail florists  
in dealing with their customers, illustrating as  
they do the various kinds of work that the  
everyday florist is called upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## SUGGESTIONS FOR PLANT GROWERS.

### Canterbury Bells.

There is always a demand in the  
spring for something different than the  
flowers which the buyers have seen all  
through the winter and many growers  
have a call for some of the forced per-  
ennials. Canterbury bells are grown  
for this purpose and if well grown find  
a ready sale. Seeds sown now and  
grown on in pots, being shifted into  
larger sizes as may be required, will  
bloom next spring and help furnish the  
grower with a variety of stock. They  
should be grown cool during the early  
winter, a violet house or one of a sim-  
ilar temperature being about right, and  
then brought into a warmer house with  
a temperature of 50° in late winter  
where they will produce fine blooms  
for early spring. By bringing a few  
at a time into the warmer house a  
succession of bloom may be had.

### Ardisia Crenulata.

The seeds of ardisia may be sown at  
any time during spring and as it will  
take until another year to grow plants  
that will fruit it is not material at  
which particular time they are sown.  
The seeds are a little slow in germinat-  
ing and it is better to sow them in the  
manner of sowing cyclamen, about half  
an inch apart. In early summer they  
should be potted in 2½-inch pots and  
are better grown in a frame than in the  
greenhouse. In the fall when brought  
into the houses they should be again  
potted in three or four inch pots and  
grown in a temperature of 50°. The  
plants are of a woody nature and grow  
slowly and should not be potted into  
too large pots, for it is far better to  
allow the roots to fill the pots before  
shifting. The following spring they will  
bloom, and should then be potted in  
6-inch pots and given a cool location  
in the houses. After the fruit has  
formed and grown to good size the  
plants should be given a good sunny  
position that they may take on a bright  
color by Christmas. If the plants are  
grown too warm the foliage will be  
thin and lack the substance and lustre  
which makes them so much admired in  
the cooler grown plants, and the  
warmer grown stock gets chilled very  
easily, when the berries will drop off.

The only insect which infects this plant  
is the brown scale, which, if not de-  
stroyed, will cover the plant stem com-  
pletely. These should be carefully re-  
moved and continually guarded against.  
If there are any old plants that have  
dropped their lower leaves the top of  
these can be rooted in a similar manner  
to rooting rubbers, that is, by cutting  
into the stem and mossing the cut after  
the roots have appeared in the moss,  
the top cut off below the moss and  
potted.

### Dracaena Indivisa.

The seedlings of *Dracaena indivisa*  
should now be taken from the flats  
and potted in small pots and placed in  
a good moist location that they may  
make a good growth before the fall.  
A palm or fern house or one with  
similar temperature is the best for the  
small stock. The 4-inch stock that was  
not disposed of during the spring sales  
can be either plunged outside or plant-  
ed in a frame, where they will not de-  
mand the close attention necessary in  
the greenhouse. If planted out they  
should be potted up early, at least by  
September 1, when the roots are ac-  
tive and will quickly obtain a foothold  
in the new soil. They should be heav-  
ily shaded for a few days after potting  
or some loss of the plants may result.  
Any old plants that have outgrown  
their usefulness may be propagated,  
the stems cut up into small pieces and  
laid in a propagating bed with bottom  
heat where the eyes will open and  
young plants quickly form.

### Gloxinias.

The gloxinias that were started in  
late winter should now be beginning to  
flower. After the flower buds have set  
they can be placed in a little shadier  
location and the danger of burning the  
foliage be obviated to a great degree.  
The plants should be spaced far enough  
apart that they do not touch and a  
proper circulation of air procured  
around the plant. If the flowers are to  
be used in floral work they should be  
cut as soon as fully open and placed  
in water away from draughts and they  
will keep very well; these flowers are  
very fragile and should be handled  
carefully. If there are any particu-

Early beautiful flowers that it is desired to propagate, the leaves can be rooted in the propagating bench by placing the base of the leaf in the sand to the depth of about an inch. The seedlings should be potted along for later blooming.

#### Cleaning Up.

The bedding season is over, the year's work is practically finished, the young stock for another year in preparation, and now is the time to clean house. Don't leave a lot of worthless stock scattered around the houses that takes a man's time to water, but what it is desired to save block all up together where it can be watered in a short time and above all things throw out anything that has passed its usefulness. How often have we seen plants that would never have been of any value left standing in the greenhouses until fall planting; neglected, yet taking more or less room, to be thrown out at last, and the houses never thoroughly made ready for the coming crop. Get the plants that need care and attention all together and clean up the other houses. If the stock is grown in benches these will need repairing, and if badly decayed take them down and rebuild. Those that have cement benches are fortunate for they will only need repairs. Throw out all the old soil and clean up under the benches and in all the corners, and any old rotting boards or pieces of crotches throw them out, and thus get rid of the vermin that invariably infests greenhouses. After the benches are cleaned out, give them a good thick coat of whitewash in which sulphur was mixed when the lime was slacking. The advantage of this is too little appreciated by many growers, it costs but little and the prevention from fungus will often amount to a great deal. After the whitewash has dried throw a few ashes or a mulch of some kind on the wooden benches to protect them from the hot rays of the sun. Give the inside of the house a good coat of white paint; this should be done at least every other year, for the difference in the amount of light in a clean white house and a dirty one during the dark short days is material, and the increased quality and quantity of stock will more than repay for the expense and labor. Any repairs that the heating system needs should be done at once and the boilers cleaned up ready for fall. Too often the boiler is never thoroughly cleaned out after the last firing and ashes and clinkers left lying around in a moist condition, rusting the boilers. The steam boilers should either be emptied or filled, for if the water is left standing on the water line rust will form inside just above and rapidly eat into the iron. These are all necessary details to be looked after at the earliest possible moment.

SCRANTON, PA.—The Scranton Floral Supply Co. have made arrangements to erect a new brick building, four stories high, thirty feet wide and one hundred feet deep, to meet the requirements of their increasing business.

BEVERLY, N. J.—John A. Cook, a florist of this place and a naval war veteran, has received a letter from the War Department, expressing appreciation for his planting flowers on the graves in the National Cemetery, which he has gratuitously done for several years.

## THE RETAIL TRADE

Conducted by Robt. Kilt, Philadelphia, Pa.

#### Coronation Design.

The coronation design which we illustrate was arranged by the designer of the Dale estate, Brampton, Ont., for a window display. It was five feet in height and was composed of immortelles, the colors being worked in correctly in the different features of the design. In the center is the Royal shield which was white, crossed with bars of red with a sash of royal blue extending across the upper part. Upon this were the initials G. R. On the right of the shield is the Royal Standard, with the coat of arms. The four sections two of red, one of blue and one, yellow; the lions on the red ground being made in yellow and the lion rampant on the yellow ground in red, the harp was yellow on a blue ground. On the left is the Union Jack, a blue ground crossed horizontally, perpendicularly and diagonally with a wide red strip with a narrower white stripe on each side. The staffs supporting the flags were of white. Surmounting the shield was an imposing crown, the

circle of the base was white bearing crosses of red and fleurs-de-lis of white, the arches were of blue, the inner portion representing the cap being crimson. The globe on top of the crown was white crossed with red, on top of which was the Maltese cross of red. The design was a most elaborate and beautiful piece of work of this character and was greatly appreciated by those who saw it.

W. G. P.

#### Plant Baskets and Boxes.

SEE SUPPLEMENT WITH THIS ISSUE.

The use of plants in baskets and boxes both for indoor and outside ornamentation has increased rapidly within the past few years; flower lovers have quickly seen that a beautiful effect can be procured for a small outlay both on the porch or window ledges and also in the houses. The possibilities of the outside box are well known to all gardeners and by proper selection of plants that will harmonize and grow in the chosen locations a satisfied customer is invariably the result. But boxes of plants for inside decoration have never been given the attention which they should by the majority of florists. With the exception of Christmas and Easter,

CORONATION DESIGN.

Arranged by The Dale Estate, Brampton, Ont.

the dealer rarely mentions the plant box as a house decoration, yet a beautiful arrangement can be placed in a hall or living room in a suitable location at a moderate expense that will be "a thing of beauty and a joy forever." The wealthy patrons in some cities have boxes of flowering plants in the windows of their residences that are changed weekly. This is, of course, expensive and far beyond what the ordinary householder can afford, but handsome boxes can be procured at the present day and planted to decorative stock, leaving room, if it is desired, for the insertion of an occasional blooming plant throughout the year, which will make a change in the appearance of the box, and add to its attractiveness. This can be done at no great outlay and if the dealer will present this to his customers in proper shape it will no doubt result in quite a remunerative feature. There are always plants that last well in the dwellings and such a box can be filled at a moderate price and some of those plants that keep in good condition for a fair length of time can be inserted and when passed replenished with another and not make it expensive. This is what many customers desire and a little thought will provide them with what they are looking for. The accompanying illustration is of a terra cotta box filled with blooming plants and makes a beautiful ornament in the window of a dwelling.

#### Children's Day.

This is one of the happiest of the June events and becoming universally popular like Mothers' day and of special interest. The basket is made so as to hold a number of small bouquets from which the little ones distribute their tributes. But as each child craves for individuality other arrangements can be made. A wide sash ribbon long enough to extend from one shoulder to the other, falling to the waist line, on which may be suspended bunches of harmonious colored flowers tied with baby ribbons, by which the small offerings are fastened to the wider ribbon until they are distributed. Boutonnieres may be attached to the ribbon with a small wire which in turn serves to hold the flower or boutonniere in the buttonhole without crushing the arrangement, especially when a single rosebud with its foliage is used.

A fishing basket filled with small potted ferns is good. These can be arranged with a white satin bow around the pot on which the words "Children's Day" are inscribed in gold letters. Bunches of white daisies tied with like ribbon are inexpensive, showy and always pretty. Carnations can also be used in this way. More elaborate designs can be made with little gold and silver baskets, or the small round Japanese baskets. These can be filled with marguerites or other small flowers, a white bow, arranged on either side with a loop to carry over the arm or over a small cane or anything suitable of this nature upon which to carry as many as possible at one time when distributing. On this ribbon also should be the inscription "Children's Day."

A. E. KLUNDER.

MANCHESTER, MASS.—Alex Magnuson is to move his greenhouses to Norwood avenue, where he has purchased a large tract of land.

#### Hail.

Paper read by John G. Esler, Secretary of the Florists' Hail Association, before the New York Florists' Club, June 12, 1911.

What General Sherman said of war applies as well to hail. A few weeks ago I visited St. Louis and saw some of the disaster caused by the storm which occurred April 13. A breakage of over 37,000 square feet of glass, nearly all double thick, out of 50,000 square feet in one range, will give you some idea of what hail can do when it gets busy. This storm was three miles wide by forty miles long and broke seventy-five per cent of the glass in the fifty or more greenhouses in its path and the Florists' Hail Association paid nearly all of the loss without a quiver.

As to the formation of hail nearly every scientist has a theory all his own, but in my estimation they have about as much evidence to convince the man from Missouri as the various gentlemen who describe the golden streets of the New Jerusalem, that their guess is correct. It would tire you to enumerate the freaks of hail storms, but suffice it to say that the storm that does the most damage is the one that has wind enough to carry the stones so that they hit the glass at right angles. Various devices of protection have been tried but nearly all have proved either too costly or too cumbersome to be practical and hail insurance still remains the best and easiest way for the person who owns a glass house to recoup himself for damage by hail. Therefore it will not be irrelevant to say a word or two about the mutual benefit conferred by The Florists' Hail Association of America.

It is nearly twenty-five years ago since the Society of American Florists christened The Florists' Hail Association and placed the infant upon its doorstep, with the admonition to go forth into the world and be a good Samaritan, but on no account to come back and trouble its dad. On June 1, 1887, the state of New Jersey adopted the orphan, and for twenty-four years it has gathered experience, and this fact has been developed, that a majority of the owners of glass are very much more interested in hail insurance after than before a hail storm. Since the day of its incorporation this association has never paid a dollar for attorneys' fees, notwithstanding the fact that up to date over \$213,000 has been disbursed to its members for glass broken by hail. Likewise it has never paid a single cent for office rent, fuel or light, for its officials. And here comes our loudest whoop; not a dime has been paid to an agent for commissions. We sell our insurance direct. We employ no agents. We do business only in the state of New Jersey, and are not amenable to any other state. He who wishes to come or rather send to New Jersey for hail insurance can procure the same without any rakeoff to anyone. Reformers take notice, and when you plan to eliminate the middleman, think of The Florists' Hail Association as one organization that has wiped that individual off the slate.

By prompt payment of losses and straightforward dealing the Florists' Hail Association has won an enviable place in the insurance world, and with its 1,600 members, insuring over 35,000,000 square feet of glass and a reserve fund of over \$25,000 for a backbone, it can afford to sit quietly by and wait until a hail storm drives the un-

insured into its fold. In conclusion, allow me to advise. Don't shingle your hot house with single thick glass, and "be sure to lock the door before the horse is stolen."

#### Growing Carnation Plants Two Years.

ED. AMERICAN FLORIST:

Can you inform me how to grow carnation plants the second year? Should they be lifted and planted outside or can they be left in the same bed in the greenhouse?

Oklahoma.

G. W.

Carnation plants can be grown the second year by either method mentioned in the inquiry, but, if being personally located in Oklahoma and wishing to try carnation plants the second year, we would follow the plan of lifting them and planting outside, bringing them in again the same as first year plants. There is a big lot of work entailed in carrying over carnations the second season. Before planting out in the field, the plants should be cut back quite close, all the shoots that have lengthened out to bloom should be trimmed back. The surest way to have the plants start into growth quickly, after being planted in the field, is to pot them up into 4-inch pots and hold in the greenhouse until the roots show through the soil. This you will see means curtailing of the spring cut, to give the plants a chance to get established before being planted out. After being planted in the field, it will be necessary to nurse them a little by watering, if the weather is dry, and watching that they are well covered and protected from the sun and hot winds. When the time comes for lifting to plant into the houses again, it will be found that considerable cleaning off of old leaves will have to be attended to, also these two year old plants being naturally very much harder and woody than the first season plants, extra caution will have to be exercised to encourage them to make new roots. If the plants are left on the benches and carried over the second season, they should be trimmed back and all the decayed leaves cleaned out of them the latter part of June, keep the soil a little on the dry side for about ten days, syringing the plants frequently to keep the wood plump and in good condition, then remove the top soil (being careful not to damage the roots), then replenish with fresh live soil. It is important when starting up the plants again not to be too free with the water, so as to give the roots a chance to get hold of the new soil properly. After the plants are again in control of the soil the after treatment is the same as with the new stock.

C. W. JOHNSON.

WARREN, O.—E. C. Waterman has opened a greenhouse at 418 South Main street, corner of Fulton.

BOONE, IA.—Thousands of panes of glass were broken during a hail storm which passed over this place May 20. At the greenhouses of L. Locher, 5,000 lights of glass were broken.

WASHINGTON, D. C.—Samuel H. Lucas has entered suit against the Baltimore and Ohio railroad to collect damages amounting to \$7,255 for loss to his greenhouses by fire caused by sparks from a passing locomotive.

## AMERICAN PEONY SOCIETY

Annual Meeting and Exhibition, Philadelphia, Pa., June, 8-9.

### The Exhibition.

The eighth annual exhibition of the American Peony Society was held at Horticultural Hall, Philadelphia, on Thursday and Friday, June 8-9. The display was held in conjunction with the peony exhibition of the Pennsylvania Horticultural Society and the combined exhibits were very full and complete.

Owing to the warm weather during May the flowers came forward much before their usual season and the date of the exhibition although made one week earlier than that first selected, is now acknowledged to have been at least a week too late. The blooms of the local growers were nearly all cut, or at least the best varieties were past, so much so in fact, that none of them entered for prizes, the displays of Thos. Meehan & Sons and the Andorra Nurseries being labeled not for competition. On account of the "late" date on which the show was held the growers were at a disadvantage. Many of them embraced the opportunity offered by cold storage facilities and the collection of E. A. Reeves of Cleveland, O., which was very large, had all been kept in cold storage so as to insure their condition for the display. They looked fine the first day but did not stand the heat of the second. Quite a number of the others also had recourse to the cold storage rooms or they say their entries would have been very sparse indeed. J. H. Humphreys of Germantown proposed a plan of having exhibitions under the auspices of the society to be held in connection with the horticultural societies of New York, Philadelphia, Boston, Chicago and other large cities at the time when the peony is in the height of its season at these various centers.

The display was arranged in the lower and upper foyer of the hall and made a very attractive exhibition. Over 8,000 blooms were staged. The principal exhibitors were E. A. Reeves, Cleveland, O.; B. H. Farr, Reading, Pa.; George H. Peterson, Fair Lawn, N. J.; S. G. Harris, Tarrytown, N. Y.; Cottage Gardens Co., Queens, N. Y.; Thos. Meehan & Sons and Andorra Nurseries, of Philadelphia.

The entries of the Cottage Gardens were much admired, they received first for the largest collection of named varieties, first for best 50 crimson, also second for vase of fifty pink. E. A. Reeves staged some beautiful peonies and won second for 50 white, first for 50 pink, second for 50 crimson and first for best 25 pink. Bertrand H. Farr won second for largest collection of named varieties white; S. G. Harris won second for 50 salmon pink and first for best twelve pink varieties, six flowers each. A feature of the show was a contest for prizes offered by the Thos. Meehan & Sons, for the best painting of peonies. There were a number of entries in this class and they attracted as much attention as the natural flowers. First prize was won by E. C. Burt, second by Helen K. McCarthy,

with honorable mention to Florence W. Miller and Elizabeth Schwarz, all of Philadelphia.

### The Awards.

Largest and best collection of named varieties, one flower of each—Cottage Gardens Co., Queens, N. Y., first; Bertrand H. Farr, Reading, Pa., second.

Best fifty blooms, one variety, named, white—Geo. H. Peterson, Fair Lawn, N. J., first; E. A. Reeves, Cleveland, O., second.

Best fifty blooms, one variety named, dark pink or rose—E. A. Reeves, first; Cottage Gardens Co., second.

Best fifty blooms, one variety, named, flesh or salmon pink—S. G. Harris, Tarrytown, N. Y., second.

Best fifty blooms, one variety, named, crimson—Cottage Gardens Co., first; E. A. Reeves, second.

Best collection of not less than twelve varieties, named, one of each variety—F. B. Van Vorst, second.

Best vase of twenty-five pink, of one variety—E. A. Reeves, first.

Best twelve pink varieties, six blooms each—S. G. Harris, first.

### The Annual Meeting.

At the opening meeting of the Society held on Thursday, June 8, President Bertrand H. Farr of Reading, made an interesting address and the report of the nomenclature committee was received, which showed great advance in this important work of the society. The committee believes that the good work that has been done has greatly facilitated the work of the peony growers and that after next year's comparisons have been completed the varieties will all have been so correctly named that they can be handled and catalogued in an intelligent manner. The election of officers resulted in but one change, A. P. Saunders of Clinton, N. J., succeeding A. H. Fewkes of Newton Highlands, Mass., as secretary. The officers are Bertrand H. Farr, Reading, Pa., president; C. J. Maloy, Rochester, N. Y., vice-president; J. H. Humphreys, Germantown, Pa., treas-

urer and A. P. Saunders, Clinton, N. J., secretary. The next annual meeting and exhibition of the society will convene in Ithaca, N. Y., at a date to be named some time in June, 1912, depending upon the season. Cleveland was also chosen as the place of meeting in 1912. K.

### President Farr's Address.

The passing of another year marks the ninth in the history of the American Peony Society and it is gratifying to see again so many faces that have become familiar from having met them as regular attendants of so many former meetings. This loyalty of the older members, the steady increase in membership of the society and the interest taken in the present exhibit are encouraging evidence of the continued popularity of the peony and of the enthusiasm which still animates the members of its society. Though but a handful in numbers you are to be congratulated on the success which has so far attended your efforts, for the solution of the problem of the peony nomenclature is such a vast and difficult undertaking that it would not have been surprising had the work ended in failure. That such is not the case is due to the perseverance and determination of the members of the society aided by the efficient support given by the authorities of Cornell University and the generous contribution of plants from the most prominent growers in this country and in Europe. Small as our membership is, it is doubtful if any similar society has ever conceived, carried out and concluded an operation of this kind on anything like as complete and comprehensive a scale as the peony test at Cornell.

For the information of those who have not kept fully in touch with the work at Ithaca I will state that there have been two bulletins published in addition to the preliminary check list and a third is now ready for the printer covering the work accomplished to date. The first bulletin prepared by Dr. J. Elliott Coit contains a history of the peony, notes on cultivation, etc., and the preliminary work of nomenclature with a description of some fifty varieties. The second bulletin known as No. 278, covers the work of the special committee in 1909, when the principal work of identifying the vast col-

A BED OF PEONIES.

B. H. Farr, President.

A. H. Fewkes, Retiring Secretary.

Chas. J. Maloy, Vice-President.

## OFFICERS OF THE AMERICAN PEONY SOCIETY.

lection in the Cornell plots consisting of 1,933 lots under approximately 1,000 names, was seriously begun. Descriptions in detail were taken of 235 varieties besides revising the descriptions of the 50 varieties of the previous bulletin which were taken before the plants were mature and it was found necessary to alter the descriptions in many cases after seeing the mature plants, making altogether 285 varieties of which descriptions were published up to 1910. In the year 1910, 285 additional varieties were identified and described together with 55 synonyms; also a list of 100 best varieties for cut-flower purposes and 100 best varieties for landscape effects were added, all this to be comprised in the next bulletin soon to be printed, making altogether about 570 varieties that have been described in every detail of foliage, habit of growth, fragrance, value commercially and accurate records taken of the colors as compared with the color chart of the French Chrysanthemum Society which has been adopted as the official color chart of the American Peony Society.

A large number of names appearing in the Cornell plot cannot be traced to any authentic origin and are without doubt, in most instances, old varieties re-named. A still larger number were recognized as synonyms of well-known varieties, such kinds as *Edulis Superba*, *Whitley*, *Fragrans*, etc., appearing under as many as 25 to 30 different names each. After eliminating all of these synonyms there are probably not more than four or five hundred distinct varieties in the Cornell plot excluding Mr. Hollis' collection of upwards of 100 seedlings which have been named, and a collection of seedlings under number from Goos & Koeneemann. It will be seen at once therefore how thoroughly this committee has covered this field with the upwards of 600 varieties that have been described, more varieties in fact than are actually to be found at Cornell. This is accounted for from the fact that many well-known, authentic varieties were not included in the Cornell planting and the committee has supplemented its work at Cornell

Peony Rubra Superba.

by visits to other large collections where these additional varieties could be found. Among the places visited by the committee in 1910 were the peony fields at Wyomissing, Andorra, Cottage Gardens, Geo. E. Hollis, T. C. Thurlow's Sons and E. J. Shaylor. The few varieties still unidentified at Cornell are mostly inferior sorts or those of such obscure origin that identification is practically impossible.

The first collection at Cornell having therefore served its purpose, steps should be taken to bring this portion of the test to a close and to dispose of the plants which according to the original agreement belong to the society excepting three of each kind which are to belong to the University for a permanent planting of established varieties. This has already been accomplished for a new planting of three of all varieties described in the original plot have been planted in a new section and represent the completed work, and at the same time the

share of the peonies which are to belong to Cornell. In addition to the original planting there is another later one consisting of a series of collections from a number of growers of their best varieties, for the purpose of determining by comparison the varieties best adapted for commercial use and for landscape work, and of compiling a list of 100 of the best varieties for these purposes. According to agreement these plants are to be eventually returned to their original owners. They have reached full development and from them the committee has prepared a tentative list of 100 varieties to be submitted to the society for discussion and approval.

Under the circumstances it would seem as if Ithaca would be the logical place for the society to hold its next business meeting, as by that time the new lots will have reached perfection and members may then have an opportunity of seeing and judging the completed work of the committee. Whether it would be advisable to hold a competitive exhibition there at the same time or to depend for an exhibit on the flowers from the Cornell plots, is a matter to be considered. A suggestion has been made that it might be well to exhibit in several places next year selecting points east, west, north and south so that all members might have an opportunity to exhibit at a point easily accessible and within their latitude. Our experience in Philadelphia this year shows the futility of attempting to arrange a date to accommodate a latitude different from that in which the exhibit is to be held, emphasizing the fact that the show should be held as far as possible to give the best accommodation to the local competitors upon which the exhibit must depend for its best display. The unforeseen and unprecedented weather conditions are largely at fault this year, but the local growers that the season for our local growers is so nearly over, that it is difficult for them to show any but their latest varieties. That we are able to have so good a display is due to the energy and enthusiasm of exhibitors from a distance to whom we are greatly in-

debted for their contribution to the success of this exhibition.

Regarding the future work of the society much remains to be accomplished. There are still many varieties that are well-known and in commerce especially among the later introductions that it is desirable to add to our official list. The committee is still engaged in this work which must be done by individual effort in the various collections. This work is comparatively easy being merely to have the opportunity of seeing and describing these remaining varieties which being of later origin are not difficult to identify, and we are assisted in the remaining part of the work by the long list of varieties we now have which serve as a key for comparison and make the remaining work comparatively easy. The next great work which the society in my opinion should bend its efforts toward is the publishing of a peony manual which should be the final revision of all the work heretofore accomplished and which should stand as the official manual or catalog of the American Peony Society. The publishing of this work should, in my opinion, be done by the society and when completed can be made a valuable work that will find a ready sale, which will eventually repay the cost of publication. The cost of such work will be considerable and should not be undertaken until the present work has withstood the test of criticism and all corrections made that are possible, and until the finances of the society are in a condition to carry out the project.

It was with some such thought in mind that a number of the members in going over the matter, volunteered to make contributions toward the premium list this year which would save to some extent the depletion of the treasury of the society that has necessarily followed each year the offering of a long premium list by the society and which had to be made up from the small income derived from the annual dues of its few members. When this matter was mentioned to others a very generous response was made and the society has reason to feel grateful to those who have so generously assisted in raising the premium fund this year as by so doing they have helped in a great way toward the fulfillment of the ultimate end in view.

#### Secretary Fewkes' Report.

The present membership of the society is sixty-two, not including five honorary members.

Once more we are called upon to record the death of a charter member, George Hollis, of South Weymouth, Mass. He had been in feeble health during the past year, his death occurring in April. He was a quiet, genial gentleman, a great lover of flowers, and had for many years made a specialty of the peony, raising many seedlings, a number of which, when better known, will rank among the most choice varieties. One of his latest productions was the variety Loveliness and it is all its name implies. In his death the society loses a member whose interest in the peony was not due to mercenary or entirely to commercial motives, but rather to a true love for the flower and a wish to make its beauties more widely appreciated.

It is gratifying to note the increased interest that is being taken by the amateurs in our society, as is indicated

by their applications for membership, and it behooves the commercial element among our members to take cognizance of this fact, for it is largely upon the amateur that the dealer in peonies must depend in future for his best trade. This is one of the factors which should be taken into consideration in the framing of the future policy of the society. The utmost encouragement possible should be extended to the man who grows the peony from a pure love for the flower and admiration of its many varieties; the man who makes them his hobby, as distinguished from the man who grows them because some particular variety in quantity makes a big mass of color in some particular spot in his garden.

The exhibition last June, in connection with the Boston meeting, was a very creditable one, considering the peculiarities of the season. There were several large and fine displays by growers about Boston, but all the competition for the prizes was by growers out of the state.

#### Pennsylvania Horticultural Society.

In connection with the exhibition of the American Peony Society there was a very fine exhibition of roses. Henry A. Dreer made an excellent display of cut roses from the firm's rosarium at Riverton, N. J. There were over 150 vases, many of them being new and on view for the first time. They were the center of attraction. Miss Gertrude Ely won first prize for 12 hybrid tea roses. W. W. Frazier, Sr., won first for three vases of six hybrid perpetuals.

W. W. Harrison, of Glenside, also made a display of outdoor roses not for competition. Hoopes Bro. & Thomas Co., of West Chester, staged a collection of their Wichuraiana crosses, many of which are very meritorious. Following are the awards:

Roses-hybrid tea, best vase of twelve blooms of any variety. Miss Gertrude Ely, first.

Roses-hybrid perpetual, best three vases of six blooms each of any varieties. W. W. Frazier, Sr., first.

W. W. Harrison, Glenside, Pa., exhibited a collection of roses. Not for competition.

Thomas Meehan & Sons prizes for painting of peonies. Elizabeth Chase Burt, 4823 Hazel avenue, W. Phila., first; Helen K. McCarthy, 1716 Chestnut street, second; Florence M. Miller, 1340 Diamond street and Elizabeth Schwarz, 3337 N. Seventeenth street, honorable mention.

#### Lights and Shadows of Auction Business.

Paper read by Robert MacNiff before the New York Florists' Club, June 12, 1911.

The auction business is as old as the world. Adam bid one of his ribs for the first lady ever known to be on the market, and as there was no opposition, he got her at his own offer. Now, there must be two offers to make a sale legitimate. If anyone else had been at the first garden auction, he and old Adam would be bidding yet. Imagine such a valuable flower as Eve, being advertised for sale next Tuesday or Friday! Madison Square Garden wouldn't hold the crowd of florists. The devil, in the

A VASE OF PEONIES.

form of a snake, made a bid of some apple trees for Eve, but she was knocked down before he caught the eye of the auctioneer. So the horticultural auction business, you perceive, has the merit of antiquity.

My subject, however, deals with modern plant and flower auctions, and these are full of "lights" and "shadows." The "lights" include the light prices obtained, the limitless field that is developing, the return of humanity to the farm, and the consequent needs of the suburbanite; the joy of being instrumental in fostering a love for the beautiful; the consciousness of sending out our monuments in every direction, knowing that the tree and plants we sell, will grow and blossom, and cheer with their perfume and beauty, unborn thousands, after we are safely planted under the daisies. Then, there is the joy of standing "in the lime light," mesmerizing by voice, and persuasive smile, the multitude; soaking the fresh guys or the wealthy widows with something we see they want, no matter what the cost. These are "real lights" that help to lighten our burdens, and to dissipate the gloom, in our otherwise "shadowy" occupation. There is the light of knowledge we acquire every week; knowledge of plant life; of new varieties; of insects and insecticides, of the frailties of humanity; all most interesting to the enquiring mind. Then, there is the "velvet" in our business: 17½ per cent. on every dollar's worth we sell, whether the grower receives the cost of production or not.

Only three or four hours' work a day, and only two days' work a week, the strengthening of our vocal chords, fitting us later on for ministerial work. When the great profits of the auction business, inevitably draw too many enterprising opponents into the field! Is it any wonder we grow fat, and our bank accounts increase, and we ride in autos, and life is one sweet song?

But there are two sides to everything and everybody. Listen to the shadows, and then rejoice that you are now in the place Providence intended you should fill; and cease to envy the men who are wasting their energies and nerves, and talents in your behalf.

The path of the auctioneer is not strewn with roses. More likely dead rose bushes with their thorns pierce his weary feet. His season is limited. If he makes any money he must crowd into weeks the labor that should be spread over months of ordinary toil. He must win and hold his growers against falsehoods and unreasonableness and misrepresentation—he must be ready to give minutest details of every transaction; he must create confidence in foreign exporters whom he has never seen, and he must be financially strong enough to meet promptly every demand of his shippers. All these clouds must have silver linings, or shadowy indeed is the outlook otherwise. He must have a deep knowledge of human nature, a memory, so keen that he never forgets a face or name; and tact and patience that preserve a smiling countenance, when his heart is bursting with cross words and justifiable indignation.

All these shadows must be seen and blown away before success is even possible. The auctioneer must keep his temper; and in a word becomes "all things to all men," if he would win them. His mind must be clear; his physical strength unimpaired, his con-

PEONIES AT HIGHLAND PARK, ROCHESTER, N. Y.

stitution of iron. He must avoid artificial stimulants, never descend to offensive repartee, always give the retort courteous no matter how his dignity may be imposed upon. Now, you know some of the shadows that hover over the auction business; and there are many others. There is the late season; with spring lingering long in the lap of winter, the long drought, the late or early Easters, the mis-sent shipments, the express overcharges, the unwatered plants, the careless handling by railroad ignoramuses. Then come the long office hours, the burning of midnight oil, the innumerable details; the unavoidable mistakes, the impatient shippers, the slow collections, the betrayal of confidences, the carelessness of employes—well! Now you have both sides of the burning subject. Aren't you glad you are not a horticultural auctioneer?

WALTHAM, MASS.—Understanding that Peirce Bros. proposed to apply for an injunction to restrain aeroplanes from flying over their greenhouses while participating in an aviation meet to be held near their property, the management of the meet offered to furnish bonds for \$5,000 to protect the property from falling aeroplanes, which was accepted by the owners of the greenhouses.

#### Advertising.

Paper read by L. W. C. Tuttle before the New York Florists' Club, June 12, 1911.

Your good committee man, Shaw, is to blame for this! Honest Injun, cross-my-heart, I am guiltless. Take it out of him, and jolly me along; for advertising men are a thin skinned, sensitive lot. Their business makes them so. They have to tell the truth. That is, if they want to stay in business.

Three years ago a boiler man blew into our office, and said he had some money to spend, telling the good, dear public that his boiler was the best on earth—a world beater—a nine-day wonder, and all that sort of bombast. After a couple of hours' talk we told him we would take his account under one condition; and that was, that he send, at his own expense, one of his wonder boilers to my home in the country, and install it. Then I would give it a month test of every conceivable kind. If the boiler panned out as he claimed, we would frame up the advertisements accordingly. If it didn't, we would tell exactly what it would do—and no more. Did he stand for it? He certainly did not. Why? Because he knew his boiler would not stand up to his extravagant claims. And he knew we knew it. Still he thought his exaggerations on paper would sell his boiler. He thought

that was what one was licensed to do in an advertisement. He went to another agency and placed the business with them. For two years they have been running "hot air" advertisements of the most virulent type. Yesterday that same man walked into the office and said his company is now ready to do business with us, based on our original proposal. The "hot air" hadn't paid. This incident illustrates in a nutshell the advertising situation of today. Exaggerations must go. The truth, only, pays.

Last week I was standing on the corner of Twenty-eighth street, talking to one of your prosperous commission men, when one of the "has beans" passed along. I remarked, "Brown isn't the man he used to be, is he?" To which our friend replied, "No, and he never was." Advertising—real advertising—never was anything but telling the truth. It never was a mystic something, into the hopper of which we could pour a few plugged dollars, and get a bag of golden coins at the other end. It never was a gamble. It never was one of the necessary evils that the publishers' fiends incarnate schemed up to harass business men and entrap their hard-earned coin. But it is the biggest, strongest factor in business today. Next to money—it is the most essential. Science records things; but advertising makes things live.

Elbert Hubbard in one of his recent preachments on the red blood in advertising says: "The reputation that endures, or the institution that lasts, is the one that is properly advertised. But of all ambassadors of advertising and bosses of press bureauism none equals Moses, who lived fifteen centuries before Christ. Moses wrote the first five books of the Bible, and this account includes a record of the author's romantic birth and of his serene and dignified death. Moses is the central figure in the whole write-up. Egyptian history makes not a single mention of Moses or of the Exodus, and no record is found of the flight from Egypt save what Moses wrote. At best it was only a few hundred people who hiked, but the account makes the whole thing seem colossal and magnificent. And best of all, the high standard set has been an inspiration to millions to live up to. What turned the trick? I'll tell you—the writings of Moses, and nothing else. So able, convincing, direct and inclusive were the claims of Moses that the world, absolutely, was won by them. In the Mosaic code was enough of the saving salt of common sense to keep it alive. So it lived and keeps on living. All literature is advertising. And all genuine advertising is literature." And Hubbard ought to know, for he doubtless does more successful advertising, both personal and otherwise, than any one man in the country.

The peculiar thing about advertising is that pretty much everyone thinks he knows just how it ought to be done. If you and I were to start in the business of growing roses, the first thing we would do would be to get a good foreman—a man who thoroughly understood roses and how to grow them. If we want an automobile we don't go to a blacksmith. But if we want to do some advertising, than that's different—we can do that ourselves. That's easy! Or, we ask some friend who is free with his pen, to get up something snappy.

What happens? In the first place, the man who owns a business is generally so near his business that he can't see it. He has lost the sense of how the other fellow—the fellow he wants to land—looks at his proposition from the outside. So he starts off his wonderful advertisement with the usual extravagant claims, and says: "My rose is the only rose for you to grow this season. It has 49 petals to every bloom, against 423-16 of its nearest competitor. Get in line. First come, first served. Don't delay! Send your order today! If they are good enough for James Birnie, they are good enough for you. Greatest money maker of the season. Order now!" Now, every word of that advertisement is true. But what selling power has it? What actual reasons has he given why you should let loose your good money for his blooming old rose? Suppose he had

Peony Festiva Maxima.

told a frank story, just like he would if talking directly to a customer; suppose he had said: "Last season it was plain to be seen that the public had grown tired of pink roses, and wanted yellows. That's why I am so happy—I have a yellow that's going to be a winner—and it's a Killarney, too. It's an unusually free bloomer—has long stems and a deep, rich green foliage. It's silken sheened petals glow like gold. It's buds are big, solid, dependable ones that ship splendidly and stay half open for a surprisingly long time. Remember that last point—it's a thing your commission man is always howling for. I am going to sell 150,000 of my stock of 250,000 cuttings. How many do you want? Better step lively—you know that a new Killarney always goes like wild-fire." Such an advertisement actually tells something about the rose—its qualities—its superior points—it has some selling power. In your opinion, which advertisement gets the business.

On the other hand, your friend with the easy pen writes the advertisement and feels that it is of first importance to make it funny. He says: "That is the thing that attracts the public." So you stand for a joke of the vintage of 1812, and then lug in by

the nape of your neck, your little business story. The result?

The funny story seldom is funny—in advertising. Everybody knows you get red in the face to bring it in—and the advertisement instead of being a good, serious, earnest business appeal to men in business houses is more apt to be smiled at over the cheese sandwich and beer. Hit a business man at his business in a business way. That's the way. Shaw has just wig-wagged to me that the ice is a little thin, and that there is a rumor afloat that ripe eggs and a various assortment of vegetables are likely to be my fate. But even in the face of it all, I am going to risk utter annihilation and say one more thing.

When you buy space of your good friends, Faxon, Shaw, Stewart and Butterfield, for heaven's sake, don't fill it as full as you can with text. If your space is small, better tell one thing—and tell it well, and leave plenty of white space around the text. The white space sets it off. Makes it look interesting. For example, three or four roses in a vase is a beautiful sight—each rose presents its individuality—its grace. A vase crowded full is just a vase of roses—one grand, big bunch. A mass that neither attracts nor impresses.

Some day advertising will be reduced to an exact science. With a certain given expenditure it will be safe to figure on certain results. When that day comes we will know what advertising really is. Authorities differ now. Which reminds me of my somewhat irreverent, but precocious little niece who was one day sitting by the window drawing, and drawing on sheet after sheet of paper; when finally her grandmother somewhat impatiently said: "Why, Tuddie, what are you doing?" Tuddie slowly replied: "Making a picture of God." Grandmother, very much shocked, said: "Why, that's very, very naughty—no one makes pictures of God—no one knows how God looks." A long pause and more scratching of pencil. Finally Tuddie replied, "Well, they'll know how he looks when I get this done."

### Gardenias Dropping Leaves.

ED. AMERICAN FLORIST:

The gardenias were potted and placed in a house where the temperature drops to 50° in the morning and the leaves commenced to drop. What was the cause? How should they be treated? How should the old plants be treated after flowering?

The gardenias when first potted should be placed in warm, close quarters and liberally sprinkled. If there is no fire heat a mild hot bed can be constructed. After the plants have started growth they should be given full sunlight and an abundance of water and frequent syringing. It is not advisable to keep old plants, much better flowers and a greater quantity can be obtained from young plants grown rapidly by liberal treatment each year.

W.

ST. PAUL, MINN.—The annual summer meeting of the Minnesota State Horticultural Society was held at the State Experiment Station, St. Anthony Park, June 15. An exhibition of roses, peonies and other flowers and fruits was held in connection with the meeting.

## FLORISTS' PALMS.

### Potting and Culture of Palms.

The growing of palms in readiness for the autumn and winter trade requires an early start in the spring in order to have the stock potted up and in condition to move on rapidly as the warm weather encourages growth. This means that repotting should be pushed along just as soon as the plants show signs of active growth, which in most cases will be by April 1, and in favorable seasons is occasionally noted earlier than the above date. And in order to do such work in a proper manner, preparation must be made beforehand by having a sufficient soil supply under cover in the potting shed, for it is not good practice to bring in cold and wet soil from an outdoor supply, and to use it at once for potting tender plants.

Sifted soil is unnecessary, except for small pots, it being much the better plan to simply crush the lumps when mixing the soil, rather than to sift out all the small lumps and fibre, the latter process removing much of the best material for plant-growing from the soil. Some drainage material is required in all pots from the four-inch size upward, but smaller pots than the size mentioned seldom need crocking, unless it may be in the case of some light rooting and tender species. A single piece of crock properly placed in the bottom of a pot with the hollow side down is of more use in keeping the drainage open than a number of small pieces thrown in at random, and with this in view it has been the practice of the writer for many years to use only one large crock in the bottom of all pots from the four-inch to the eight-inch size, and to add a few smaller crocks or cinders when shifting to larger sizes than those already mentioned. And in repotting, the old drainage should of course be removed from the bottom of the ball to allow the plant to be set deep enough in the new pot for a good covering of earth. We have sometimes referred to the practice of washing out the roots of palms and have frequently found it of benefit to them, providing that the washing was done carefully, so as to avoid bruising the roots, and that the plants were repotted promptly so that the roots did not suffer from too long an exposure to the air. It is also much easier to make up bushy specimens of arecas or kentias when the roots have been washed out, but it should also be remembered that such plants need careful potting in order to get the soil well distributed among the roots, and also thorough ramming to insure a firm ball. And such plants will also require a thorough watering, or rather several waterings, to moisten the new soil to the bottom.

A rather close atmosphere, with moderate shading and frequent spraying of the foliage will also be helpful in starting a new growth of both roots and foliage. This method of shaking out or washing out palms and then making them up into bushy specimens provides a means of using up some imperfect stock that may have been injured in decorative work during the winter, and when carefully carried out will produce some plants of decided value and utility for future decorations. And attention is again called to this operation at this time because

WEeping STANDARD ROSE AT C. B. NEWBOLD'S, JENKINTOWN, PA.

it is not only near the close of the decorating season, but also that it is best that such radical treatment be not given until warm weather, when high temperature and plenty of moisture will help greatly in recovering the plants. I have tested this method on arecas, kentias, seaforthias, caryotas, cocos and even latanias, though a made-up latania seems rather an abnormal plant, being rather too bunched for beauty, and in all cases the washing-out process worked satisfactorily, providing the plants were given proper care afterward.

Moderate shading has been referred to, and this is a necessity during the heat of summer, not only to keep the foliage of the palms in color, but also from the fact that there are few greenhouses glazed with perfect glass, and one imperfect pane of glass may burn a streak all across a bench of plants. It is true that most palms will endure full sunshine when their roots are kept moist, but it is also true that most customers will select a palm with heavy, dark green foliage in preference to one with the lighter leaves that have been grown in the sun.

In the effort to produce results in a

short period, special fertilizers, or feeding in addition to the manure that has been incorporated in the potting soil is frequently resorted to, and in this connection it may be stated that liquid from cow manure, soot and dried blood in solution, are among the useful materials for such a purpose, but too strong or too frequent applications should be avoided, for each of these fertilizers is rich in nitrogen, and too much nitrogen will produce tender and brittle foliage. Another thing to be avoided is feeding too soon, that is, feeding before a plant has made a strong root growth, else an attack of indigestion may result, from which it will take much time to recover the plant.

W. H. TAPLIN.

RICHMOND, IND.—The Quaker City Machine Co. has filed suit against the Advance Co. for alleged infringement of patent.

ST. PAUL, MINN.—O. J. Olson, of Holm & Olson, is away on a fishing trip and E. W. Reid, manager of this firm's landscape department, is attending the nurserymen's convention at St. Louis.

### South American Floriculture.

Paper read by James McHutchison before the New York Florists' Club, May 8, 1911.

The title "South American Floriculture" is a misnomer. There is not much floriculture in countries where orchids hang from every large tree in the forest, every small garden contains a hot-house assortment of plants and the most magnificent palms and flowering plants line the streets of the entire cities. You get enough of floriculture during the week. Tonight you can forget you are florists and come with me through a few South American countries.

The trip I took was a 10 weeks' cruise in the Hamburg-American line steamer *Blucher*. There were 214 of us in the party—mostly widows and bachelors—and they had about every convenience on board except a matrimonial agency. January 21, the day we left New York, was an unhappy mixture of fog, rain and cold. Three days later overcoats were discarded, light clothes brought out and we were looking over the rail at the flying fishes. Six days after leaving New York we were in Barbadoes, called sometimes "Little England," in the British West Indies. We had been passing the Caribbean Islands the whole day previously, though it was too dark to see Martinique, where Mt. Pelee destroyed the city of St. Pierre and did so much damage a few years ago. Barbadoes is beautiful. Ninety per cent of the people are black. It is the most densely populated place on earth—200,000 inhabitants in an area of 166 square miles. We drove through avenues lined with coconut palms and mahogany trees, with the flaming hibiscus, blue plumago and bougainvillea brightening up the roadside gardens. The principal products are sugar cane, cotton, tobacco and so forth.

We crossed the equator on January 31 with appropriate ceremonies. The ship's crew were dressed up in fanciful costumes and the men passengers and crew who had not crossed the line before were lathered with a whitewash brush, shaved with a two-foot razor, imaginary teeth were pulled and salt water pills given to them; they were then smothered with toilet powder, and thrown over backwards into a five-foot salt water tank, finally escaping through a canvas tube with a two-inch stream of water on the rear to facilitate their passage.

Pernambuco is an ordinary Brazilian city with a population of 200,000. It exports sugar principally. It has a busy harbor inside the coral reef that lines the Brazilian coast for hundreds of miles. February 2 we were at Santos, a port with vast shipping activities. Brazil furnishes about 80 per cent of the world's coffee supply and most of this is shipped from Santos by German and English firms. It used to be the most unhealthy city imaginable. Across the river from Santos on the flats at one time lay over 100 good ships, their crews dead and no other sailors would run the risk of taking them out. This place was called "the graveyard." Men died there of fevers like flies. Now all is changed. The graveyard has been destroyed, the fevers have gone, and the city is now as healthy as the other Brazilian cities. From Santos we went to San Pauli. How many North Americans ever heard of San Pauli? Yet it is the

cradle of Brazilian independence and the most modern city in Brazil, with a population of 400,000, with broad, tree-lined avenues, monumental public buildings and handsome residences. Their open trolley cars were made from St. Louis models. The avenues are in most instances silky with coffee trees, the Australian silky oak and the beautiful Jacaranda *Mimosefolia*, which grows with us in southern California. The Municipal Opera House there is a beautiful building—built and owned by the city. It cost about \$8,000,000 (United States value) and is, I think, finer than the famous Paris Opera House. I ought not to pass here without mentioning the San Pauli railroad, which covers the sixty miles between Santos and San Pauli, climbing 3,600 feet up the face of the mountains. I never saw a railroad like it. It is mostly tunnels and viaducts and there isn't a square foot that is not waterproofed and that is something when you consider that the average rainfall is 11 feet per year and 10 inches of water has fallen in 24 hours. The railroad was built and is owned by the British, and English rolling stock is used. Its profits are over 40% a year but Brazilian laws prevent more than 7% being paid in dividends, so all surplus goes into unnecessarily fine stations and improvements. We reached Montevideo, the capital of Uruguay, in the teeth of a pampas storm, but that soon went down and we visited Villa Delores, a large private zoo, and drove through the many beautiful parks and boulevards largely planted with eucalyptus and other Australian trees. We were there two days and there was not a single revolution recorded during that time, though one cropped up a few days later.

Now we enter the Straits of Magellan, and after staying a day at Punta Arenas, the southernmost town in the world, we continue through the straits, going out of our course to get into the Sounds, the glaciers and fjords rivaling those of Norway and Alaska. In one place where we anchored, five glaciers were within two miles of us and coming down to the waters edge, the blue ice glistening in the sun. The channel is about 400 miles long, very narrow and dangerous in places for we saw many wrecks on the banks. The mountains on either side often lined with snow, but we have to keep hustling to get up the west coast as far as Valparaiso. This is a cosmopolitan city and the principal seaport of Chile. Its population increased 100 per cent within the last two years while New York gained only 48 per cent. There are still some evidences of the earthquake that visited them a few years ago. Chile is called the shoe-string republic, because it has a coast line of 2,400 miles and an average width of only 150 miles. Santiago is its capital city. Like all South American cities, it is made as a fit place to live in. Too bad our cities are not built on the same principle. In Santiago and Valparaiso the street car conductors are mostly women. Santiago is built on a plain surrounded by mountains, right in the center of the city is a rocky mountain called Santa Lucia, it has been landscaped and beautified with statues and hanging gardens, from the top at sunset, we get a fine view of the pinnacled snow clad peaks of the Andes with the sun shining on them after the city is in dark-

ness. It has not rained in Chile for two years, though the Aconcagua Valley beats anything for productiveness I ever saw, not even excepting the Compagna in Italy.

The famous Trans-Andean Railroad is a marvel of constructive engineering. It runs from Valparaiso, Chile, to Buenos Aires and we crossed it from end to end. Its mountain scenery is grand and we pass at the feet of Mt. Aconcagua, 23,200 feet, which makes it the highest mountain in the Western hemisphere. Still I do not think that the scenery from the train is any finer than in many parts of Switzerland or over the Canadian Rockies on the Canadian Pacific Railway. By going under the central peaks of the Andes in the tunnel, we pass under the boundary line between Chile and the Argentine. You will remember that a few years ago these two countries were on the verge of war, but a settlement was reached by King Edward's arbitration. The two countries then built a monumental statue of Christ, "The Christ of the Andes," and placed it in the pass, right on the boundary line amid the everlasting snows and on the tablet is this beautiful inscription—"Sooner shall these mountains crumble into dust than the people of Argentine and Chile break the peace which they have sworn to maintain at the feet of Christ the Redeemer," and let me tell you, gentlemen, that those two nations will never fight while that statue stands there. It takes from daylight to dark to cross the Andes from Los Andes to Mendoza upon a narrow gauge railway, then all night and all the next day we cross the pampas of the Argentine as level as a billiard table and not a hill in sight for 600 miles and very few trees, but there are cattle, horses, sheep and ostriches on both sides of the track and thousands of scarlet flamingoes in the water. I never saw so many cattle before. In one place the track runs along for 175 miles without a curve. What a contrast after crossing the Andes.

Buenos Aires, meaning "Good Airs," is a modern city of 1,400,000 people. In beautiful parks, boulevards and plazas it surpasses either Paris or Berlin. The climate is warm and pleasant and in the afternoons the business men drive through the beautiful gardens and boulevards in Spanish style, for the language and life of the people are Spanish. It would take me an hour to tell you much about this fine city. Its avenues, plazas and boulevards are not duplicated in the United States. Their capital building is finer than ours in Washington. Their custom house is finer than our New York one. We went through the famous newspaper office *La Prensa*. In the parks they have whole avenues lined with 40 foot palms. I saw specimens of Phoenix *Canariensis* as high and broad as a five-story building and furnished to the ground. Everything has the appearance of newness in their bright sunshine, even their famous *Avenue Mayo* is only four years old lined with buildings of uniform height and architecture. Their four miles of splendid docks have been reclaimed from the Rio de la Plata and are always filled with numbers of large steamers flying the flag of every maritime nation—except the stars and stripes.

On March 11 we arose at 6 A. M. to see the entrance of Rio de Janeiro Harbor. Huge granite rocks, one of

them called the sugarloaf, guard the entrance on either side like sentinels, the city lining the various bays on the left. The entrance is so narrow that its discoverer called it the "River of January" but it widens out to a very large bay, dotted with beautiful islands. Nature seems to have exhausted its resources in making this harbor and the Brazilians have followed suit by making their capital city worthy of its harbor. There are avenues lined with four rows of royal palms 80 feet high and the five miles of gardens and boulevards along the half moon shaped Botafogo Bay cost them 40 million American dollars and every dollar counts. From Corcovada, a 2,300 foot rock with a perpendicular drop of 1,500 feet, you look right down upon this city of 900,000 people spreading itself out among the valleys and slopes of the mountains. All ships anchor in the bay for these artistic people want their water front for gardens and pleasure. We read in our papers here about six months ago of the naval mutiny at Rio. Well it was the real thing. Most of naval buildings are on Cobras Island and they are still standing, riddled with shell holes. The men who mutinied on the warships bombarded these buildings, then surrendered and the men in the barracks, not knowing it, then revolted and the new dreadnoughts trained their 12-inch guns on the island and nearly blew it off the map. It impressed us as showing what these people thought of their city that neither the mutineers or the government fired a shot at the city itself. The battleships lie there still but the breachlocks of the guns have been removed, they are only half manned and while these dreadnoughts, the San Pauli and Minas Ceraes, are about the largest and most modern afloat, they could not even answer our salute. The Botanical Gardens of Rio are famed the world over and rightly, so, too. I spent nearly a whole day there. One avenue of royal palms dividing the gardens is half a mile long. There are avenues 20 feet wide so embowered with bamboos that not sufficient light gets into them to take a photograph. Other avenues are lined with *Areca lutescens* and all kinds of tropical plants for there are over 800 varieties there. What beautiful places these South Americans have in which to spend their afternoons or Sundays with their children. Most of the consulates are at Petropolis, about 40 miles up in the mountains from Rio. The U. S. Consulate there is almost as good a building as the Portuguese, which is more than can be said of some places.

We staid only a short time at Bahia. There is an upper and lower city. It is the diamond market of Brazil but we want to push on to Para 105 miles up one of the tributaries of the mighty Amazon. Para is the principal port for rubber and other products of the vast country watered by the Amazon and its tributaries. Here we see tropical vegetation in all its luxuriance. I dug up gorgeous colored caladiums, growing between the trolley tracks. Bananas grow wild everywhere. Anything will grow there. In Para I saw trees seven to eight feet high growing out of a church spire. A house with a thatched roof collects dried leaves and in a few months there are trees growing on the roof. In the Botanical Gardens in Para we saw the

trees which produce the rubber of commerce. It is not a *Ficus elastica*, but has a small narrow leaf like eucalyptus and it's certainly a money-maker for Brazil. You have heard of the floating islands of the Amazon. A snag gets stuck in the river, it dams back leaves and branches, then seeds germinate and trees grow on it and when a freshet comes down the river out goes the island. In the rainy season the Amazon sometimes rises 40 to 60 feet and floods the country for thousands of miles. It is truly a mighty river and a peculiar one, as it doesn't confine itself to one stream. No one can truly say they have seen the Amazon but only a part of it, for you have to go 1,000 miles up to get into one stream and by then you have passed where many of its largest tributaries enter. The Amazon is really a series of lakes and swamps connected by rivers. Its mouths where it enters the ocean are 150 miles wide. Steamers of 6,000 tons go up 1,000 miles to Manoes and 2,000 ton steamers can go 2,000 miles. Altogether in the Amazon and its tributaries there are over 40,000 miles of navigable waters.

We stopped at Trinidad long enough to see the Botanical Gardens there and to visit the Lake of Pitch 40 miles away. This is the seventh wonder of the world. It comes out of the lake just as you see it in barrels and though it is exported in large quantities, the lake never grows less. Sometimes pieces of wood come up with the pitch and it is a curious fact that the wood does not grow on the island and in no place nearer than the main land of South America. There is a coolie village near Port of Spain where the East Indians live just as they do in India and Ceylon. There are 10,000 of them. We dropped in at St. Thomas in the Danish West Indies and took a stroll through cocoonut groves and looked over the castles of the old time pirates who made St. Thomas their rendezvous in the old days. We passed Porto Rico and five days later came up New York harbor in a fog so thick that the city was barely visible coming up the river. We felt like millionaires in Brazil. Their language is Portuguese and they use Portuguese money of reis and mil-reis. A million reis amounts to about \$260 in our money. Trolley fares or a post card costs 400 reis and 1,000 reis is an ordinary tip for a waiter. All through South America they have a pleasant way of naming their streets and parks after some historical event. It is just as if Broadway were called Fourth of July street.

All of the South American cities are fine places to live in. They are made beautiful. A city like Buenos Aires or Rio for instance, has more acreage in parks and gardens than five cities of the same size in the United States and they are fine parks too, not open squares of grass dead half the year. They plant good trees and fine palms—not the common varieties, but varieties like *Cycas circinalis*, *Phœnicophorium* *Sechellarium*, *Licuala grandis* and *Phoenix rupicola* in magnificent specimens and they keep them in fine shape too, so that a drive or walk through these parks is a refreshing diversion after a day's work. We always think of Brazil as having a very hot climate. True the average is high, but it never gets really hot. The maximum temperature of Para, only 15 miles south of the equator, is only 75

degrees. We get it hotter than that right in New York City sometimes, and they get it in Buenos Aires too. On the entire trip we were never bothered with mosquitoes and there are so few flies that even in the hottest cities meat is hung outside without protection. The cities down there are nearly all progressive and up to date. Even in the smaller cities they have fine trolley cars and electric light systems and the streets are well lighted. In Rio they have mosaic sidewalks and in Buenos Aires they have five times more policemen per 1,000 population than we have.

The growth and prosperity of the South American republics has been amazing within the past two or three decades. Englishmen and Germans of intelligence and business or mechanical ability control the commercial shipping and engineering enterprises of South America. North America is represented only in a few isolated places. Every railroad in the Argentine with one exception was financed and built by Englishmen, and are now officered by them. The public water works of Buenos Aires were built and are run by Englishmen. In the year 1900 Englishmen took 250 million of dollars in dividends out of the Argentine alone. The docks of Santos and at Rio, also the wonderful trans-Andean Railroad which runs across the continent from Buenos Aires to Valparaiso, more than 800 miles over and through the Andes are owned in England. The engines and rolling stock on the Chilean railroads and most of their trolley systems were installed by the Germans. Even their soldiers all wear German uniforms. There are over 40,000 English residents in the Argentine and only 400 Americans. The banks, docks and railroads are controlled by the English or Germans and we as a nation are hardly known there and why should we be? They see large 10,000 and 12,000 ton British, German and Italian steamers entering their ports but never an American one. Why, the American consul at Santos told me that last year 393 large steamers left their port laden with Brazilian products but a steamer flying the American flag has not been in there in 10 years. No wonder that the United States has had little share in the thriving prosperity of the wealthy regions of the equator. So long as the banking laws of the United States forbid any branch or succursal of American banks in South America, and so long as we have no ships of our own and prevent foreign ships from trading from one American port to another en route to South America, the Monroe doctrine will appear a farce to South American republics, and their trade will go to European houses who know how to handle it.

#### Chauncy Wetherby.

On Monday, June 5, Chauncy Wetherby, a chemist of Baltimore, well known to the trade as a manufacturer of lemon oil, died in St. Joseph's hospital from burns received following an explosion in his laboratory at 604 East Truxton street. Mr. Wetherby had a large circle of friends and business acquaintance in the florists' trade. The funeral services were held from his late residence, 2223 Charles street, Wednesday, June 7.

WARREN, O.—Mrs. Ella M. Adgate, aged 83 years, wife of John Adgate, was found dead in a pond near her home yesterday. She had been ill for some time with a nervous affection.

ROCHFORD, the well known English grower, has 60,000 Crimson Rambler roses for the coronation.

THE next meeting of the Society for Horticultural Science will be held in Washington, D. C., December 29, 1911, in connection with the meeting of the American Association for the Advancement of Science.

## Stamford Flower Show.

The prize list of the Westchester and Fairfield Horticultural Society for its first annual exhibition to be held at Stamford, Conn., November 3-4, is issued. The exhibits are divided into eighty classes with liberal premiums for chrysanthemums, roses, carnations, foliage and blooming plants, fruit and vegetables, many of which are offered by individuals and commercial firms. A copy may be had by addressing J. B. McArdle, secretary, Greenwich, Conn.

## National Sweet Pea Society.

Owing to the slow development of the growth of sweet peas this season, the National Sweet Pea Society has decided to advance the date to June 29-30. Schedules are being mailed to members of the society, and others can obtain the same upon application to David Rust, Horticultural Hall, Philadelphia, Pa., or the secretary, Harry A. Bunyard, 342 West Fourteenth street, New York.

## Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

## Spraying With Arsenicals.

The grower at the present time has many insects to combat in the culture of the different species of plants and flowers, for beside those that invariably infest greenhouses, it seems that almost every species cultivated is attacked by some insect peculiarly its own. Fumigation and trapping have been for years the remedies employed for destroying these pests, but of late years the spraying with poisons has been advocated and practiced by many growers. Is it safe? Those who have carefully read the trade papers the last year must have noticed that almost every week would appear an announcement that some dealer was suffering from blood poisoning caused by the prick of a rose thorn. This blood poisoning was occasionally contracted years ago and was then thought to be caused by the low physical condition of the party afflicted, but there is no doubt that with the use of arsenicals as a spray the malady has become much more frequent. In sections of the country where spraying with poisons is done on trees, legislatures have passed arbitrary laws requiring that notices shall be posted in order that persons may be warned and animals protected from being poisoned. Flowers go into the houses where children, who are especially fond of them, often place them in their mouths, and if they are sprayed with poisons it seems like taking great risks. If it should happen that any person should be killed or made sick, and the cause directly blamed to flowers upon which poisons had been sprayed, the public press would quickly proclaim it to the world in greatly exaggerated form and irreparable injury would be done the business, and troublesome legislation would probably result. All insects that breathe can be killed by the use of hydrocyanic acid gas, which can now be used with safety, and others can be captured, or destroyed by fumigating with other products or by spraying with non-poisonous formulas. It certainly seems that spraying with arsenical poisons is dangerous and unnecessary and again we ask, is this safe?

## The Determination of Humus.

The Nebraska Agricultural Experiment Station in Bulletin 115 on "The Determination of Humus" explains in a very thorough manner the different methods with which they have experimented and compared in determining the amount of humus in soils and issues tables containing the comparisons, the results which have been obtained at the station by the different methods, and concluding with the following summary:

"The Hilgard, Huston-McBride, Cameron-Breazeale, and Mooers-Hampton methods for the determination of humus were compared, using arid, semi-arid and humid soils.

"The Hilgard method, as used by its author, was found to give entirely reliable and satisfactory results. In the case of soils rich in humus and those of fine texture the method is at times tedious.

"The Huston-McBride or 'official' method gives results which are entirely unreliable and which, in the case of moist soils, are far too high. The errors incidental to the method are of such a nature that it seems impossible to apply to the results any satisfactory correction formula.

"The humus extract obtained by the Huston-McBride method, after being passed through a properly prepared porcelain filter, gives results which are concordant with those obtained by the Hilgard method.

"The Mooers-Hampton modification of the Huston-McBride method gives results entirely concordant with those of the Hilgard method. For some soils it is preferable to the latter, requiring much less time.

"Ammonia solutions of different strengths were not found to have the same solvent power for humus. The differences for strengths between two and eight per cent were slight but where solutions of from 16 to 28 per cent were used considerably more humus was dissolved.

"The amount of so-called 'humus ash' found in the case of a soil sample varies from method to method and bears no relation to the strength of the ammonia used. There is little or no agreement between duplicate determinations of the 'humus ash.' Many times as much ash is obtained by the Huston-McBride method as by the other methods. It is probable that the greater portion of the 'humus ash' obtained by any of the methods is not an essential part of the humus.

"In reporting the humus the per cent of 'humus ash' should always be reported as it serves as an indication of the reliability of the humus determination."

This is a technical bulletin and is issued in a limited edition and is not sent out in the regular mailing list, but may be had on application to the station.

## Personal.

The friends of William F. Kasting of Buffalo, assisted by the assemblyman, are urging his appointment by Governor Dix as Commissioner of Agriculture to succeed Commissioner Pearson, whose term of office expires. Commissioner Kasting sounds good and the state will be assured of a fine officer. We wish him success in his candidacy.

**Meetings Next Week.**

### Chicago.

#### A DULL MARKET.

The continual hot spells followed by cooler weather keeps the market in a very unsettled condition for on the excessively hot days there is hardly any business transacted and the buying is consequently very light. During the last week the city experienced the warmest June day ever recorded by the weather bureau, the thermometer registering 98° in the shade. A general dullness seems to pervade all the branches of the trade except the bedding line and that is nearing its end. One of the dealers remarked that the business was more like July than June. The falling off in the demand has caused some growers to start planting their roses, for they feel that it is far better to get the young stock well established, than to grow the old plants on and throw the cut away. Roses are in great plenty with a surplus of all kinds. American Beauty is in great cut and some of blooms are of fine quality especially those that are being cut off of the young stock which was planted early. Killarney is beginning to show the summer weather and in many cases are light in color and they open very quickly. Richmond also opens out very rapidly and in order to have them close have to be cut very small. My Maryland is in nice condition, showing what a fine summer rose this variety is and Kaiserin is now the white. Carnations are approaching the end of the season and many of the blooms show it. There are still some blooms of good quality, but the majority are small and lack substance and sell at very low prices. There are lots of peonies and some of the stock is superb and they are to be seen in quantities in the retail stores and make a beautiful showing. Orchids are again plentiful and

the larger stores are featuring them in their window displays. Lily of the valley is very fine and in a little oversupply which is no doubt caused by the business apathy. The early summer flowers are now adding a great variety to the supply. Delphiniums and bachelors' buttons make the blue, coreopsis and gaillardias the yellow, and gladioli, which are fine, in both light and dark shades give the decorator an excellent opportunity to carry out his color schemes. Gladioli are particularly good. America, Augusta Shakespeare and Mrs. Francis King are all to be obtained in splendid shape and at moderate prices. Excellent blooms can be seen, quoted at 75 cents to \$1.00 per dozen, with a few extra quality at higher figures. Sweet peas are in better shape than they have been for the last two or three weeks, there being some very fine Spencers to be had. Pond lilies are now received in larger quantities and are featured in the show windows. Taken all in all, there is no shortage of anything and an oversupply of almost everything and an exceedingly dull market.

#### NOTES.

The George Wittbold Co. has passed through one of the busiest seasons in their existence and a look through the houses at 735 Buckingham place will give the visitor an idea of the amount of business which this firm transacts. The large amount of decorative stock is constantly on the move and they are amply provided with vans and teams to successfully carry on this branch of the business in a thoroughly up-to-date manner.

The S. Wilks Mfg. Co., 3503 Shields avenue, has issued a catalogue on greenhouse heating, which describes the manner of piping to obtain the best results and contains tables by which the amount of radiation required in a

greenhouse can be accurately computed. The firm will gladly furnish a copy to any reader upon application.

C. M. Dickinson says that E. H. Hunt's business the past year has been very good and entirely satisfactory. A look in the cut-flower department found plenty of stock with an exceptionally fine grade of "Butterfly" sweet peas and peonies. The ferns that this house is receiving are very large and of good keeping quality.

The Chicago Flower Growers' Association held several meetings the past week but as yet no definite arrangements have been made in regard to when and where they will open their store. The stock is all subscribed and 50 per cent has already been paid.

Bassett & Washburn are cutting some fancy Perle des Jardins roses, the plants being now in full crop, and also a large quantity of indoor "Butterfly" sweet peas with large flowers on long straight stems.

Wietor Bros. are cutting large quantities of carnations and roses. In the latter Mrs. Jardine is showing up exceptionally fine and is meeting with much favor among their many customers.

The operation that Frank Ayres underwent last week was so successful that he was able to return to his duties at the Chas. W. McKellar store on Monday, June 12.

The John C. Moninger Co. recently made a shipment of material for two greenhouses 21x150 feet to Curt. Moll, a grower in Berlin, Germany.

August Lange is planning a vacation trip to the Pacific coast, starting about July 7, with Mrs. Lange and Master Lange.

Harry Manheim says that Hoerber Bros. are having a good call for My Maryland and Mrs. Jardine roses.

Ernst Wienhoeber is serving on the grand jury.

Lawrence M. Mathes of the Weiland & Risch force, accompanied by George Knight, Jr., left Monday, June 12, for a two weeks' outing at Torch Lake, Mich. As soon as he returns, H. W. Rogers of the same force will start on a motor-cycle trip to Pentwater. Mr. Rogers will spend a few weeks in the Michigan town visiting his father-in-law, who has been the light-keeper at that port for the past 40 years.

Vaughan & Sperry's chief offerings this week are a fancy grade of peonies, catleysas and gladioli. This firm received word from a customer in Texas that their shipments of peonies are arriving in good condition; this is probably due to the excellent quality of the flowers and the careful manner in which they are packed.

Foehlmann Bros. Co.'s lily of the valley is of superb quality with large bells on long straight stems. Their orchids are also of good quality which goes to show that they are producing these exotics in just as successful a manner as they do roses and carnations.

E. E. Pleser of Kennicott Bros. Co., feeling much better in health, was seen at the store this week. He is suffering from a weak heart and the advice given him by Doctor Elliott is: "Don't stop eating, working or smoking, but do as little of all as possible."

W. N. Rudd cleaned up 25,000 4-inch geraniums in his Memorial day business at 15 cents each, \$15 per \$100, mostly Alphonse Ricard, Beute Poitvine, Le Cid, etc. The plants were well grown, however, in C. W. Johnson's usual style, and well worth the price.

The Chicago Carnation Co.'s employees have organized a baseball team and challenge any club in and around the city. Any club that wishes to cross bats with the world beaters should address their communications to Peter Olsem, Joliet, Ill.

The Mrs. Marshall Field roses that Peter Reinberg is cutting are of the first quality, the color, foliage and substance being exceptionally fine. This firm has been having a good call for American Beauty roses the past week.

John Kruchten's growers are supplying him with a fancy grade of sweet peas, Pink Killarney and Bride roses. It is expected that regular shipments of gardenias will commence to arrive the latter part of this month.

John Welsh, the well known florist of Ravenswood, is making a few minor repairs to his greenhouses. He has enjoyed a very busy season, especially in the sale of pot plants of which he is entirely cleaned out.

Dwight L. Harris, general manager of the Pulverized Manure Co., informs us that they have just filled a 250-ton order, the largest yet received. The manure was used in the construction of a golf course.

Zech & Mann's growers deserve much credit for the splendid grade of carnations that they are shipping to this house, for the flowers are excep-

tionally good for this season of the year.

J. A. Budlong is cutting some fine Kaiserin roses and Mrs. Francis King, Augusta and America gladioli. Joe Weise and Fred Price of this force spent last Sunday at Camp Lake, Wis.

O. Johnson of the Batavia Greenhouse Co. says that they are going to enlarge their plant, the new addition to be three carnation houses 27x275 feet each.

O. P. Bassett and wife arrived Wednesday, June 14, from Pasadena, Calif., and will spend the summer at Hinsdale.

George and Mrs. Fisher, the newly weds, are now making their home at 5007 Forrestville avenue.

Ed. Goldstein, of Vaughan's Seed Store, leaves for Wisconsin this week on a vacation.

Sam Pearce is supplying the local wholesale trade with an extra fancy grade of lilies.

Kyle & Foerster are receiving some peonies and gladioli that are of excellent quality.

# Large Crop of Beauties

**and Roses all of the Best Varieties**

The quality is as fair as the weather conditions will permit, and we can truthfully say that there are no better flowers coming into this or any other market.

**Send Your Orders Direct to the Grower and They Will Be Taken Care of**

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

Alfred Dietsch of the well known firm of A. Dietsch Co., manufacturers of greenhouse material, returned recently from Oklahoma feeling much improved in health. He spent considerable time in Mexico until the outbreak of the rebellion when he moved to much safer quarters in Oklahoma. Carl Ickes the industrious manager of this concern has found it necessary to install additional machinery to manufacture enough material to fill the orders that are constantly received.

George C. Wieland informs us that extensive improvements will be made in the M. Wieland store in Evanston. The store will be enlarged and the conservatory extended in the rear. The proprietor has purchased the property adjoining the store and expects to occupy it in the near future. The force was kept exceedingly busy the past week filling the many commencement orders which were received.

In the change of the street numbers of the city that went into effect last April, the A. L. Randall Co. was by mistake stated to be located at No. 70 E. Randolph street instead of No. 66, which is the correct number of the building which the firm occupies.

The peonies that the J. B. Deamud Co. is offering are of extra fine quality and are eagerly sought for by the best trade. The gladioli and pond lilies that are being received are also of good quality.

## VAUGHAN & SPERRY

Long Distance Phone  
Central 2751.

**161 N. Wabash Ave., CHICAGO.**

Mrs. Margaret Thorpe Flint, daughter of the late John Thorpe, will on July 1, be united in marriage to E. W. Evans, captain of truck No. 8 of the Chicago fire department. The best wishes are extended by her many friends in the trade.

J. A. Sikuta is enjoying a good transient trade at his new store which was recently opened at 190 North State street. His special sales and occasional funeral work keep him busy.

Visitors: H. Fisher, Kalamazoo, Mich.; N. Bommersbach, Decatur, Ill.; E. W. Reid, St. Paul, Minn., enroute to the nurserymen's convention at St. Louis.

### Lake Geneva Flower Show.

The annual peony and spring flower show was held by the Lake Geneva Gardeners' and Foremen's Association at Guild hall. A very nice and interesting exhibit was put up by the local members of the association, as

well as by some outside commercial firms, chief of which were the displays of the Vaughan Seed Store, of Western Springs, Ill., and the Phoenix Nursery Co., of Delavan, Wis. The latter had an excellent variety of seedlings under number, besides the older standard varieties that were much admired.

The display made by Vaughan's Seed Store consisted of 24 choice named varieties of white, light and dark pink, red and crimson sorts making a beautiful display. The local display, of course was the largest, the different classes being well represented. A. J. Smith, gardener to J. J. Mitchell, was awarded first prize for best collection, which included the following varieties: Alex Dumas, Jeanne D'Arc, Louis Van Houttei, Felix Crousse, Mme. Crousse, Eugene Verdier, Festive Maxima and others of equal worth, and in class 12 for singles was the only exhibitor. These were simply grand and should be grown more largely for the commercial florist and decorator could not desire a grander flower for

table work, and if cut when in bud will not be injured by rain or wind. All visitors were greatly taken with the striking beauty of the singles, especially the Killarney pink shades.

The extreme heat and the heavy wind and rain storms made it difficult for the exhibitors to procure flowers of like form and color which made it hard for the judges, but to their credit it must be said that they worked diligently and fair. Robt. Sampson, gardener to E. F. Swift, was given the credit for having the one most perfect and beautiful peony flower in the hall. The name had been lost, the flower resembling Felix Crousse, but was much larger and fuller. Roses were poorly represented, only about eight of the old standard varieties being shown, the color was good but the stems too short.

Other awards were as follows: Best collection, A. Johnson, second; Six blooms of six varieties, A. Johnson, first, Six blooms of three varieties, F. Kuehne, first; W. Tiplady,

Johnson,

St. Louis.

**APPROACHING THE END OF THE SEASON.**  
The excessive warm weather has continued throughout the week and the stock arrives in poor condition, and if anything is growing worse, there being little or no vitality to it. School closings and weddings have made some call for flowers, but these will be all through by June 15 and the summer dullness will commence. The members of the trade are already preparing for vacations.

### NOTES.

The Florists' Club met June 6, with President Cannon in the chair, and 35 members present. The committee on anniversary reported everything in readiness. Officers of the Society of American Florists had been invited and their presence was expected. The annual picnic to be held in July was referred to the trustees to make the necessary arrangements. F. H. Weber urged the members to attend the convention of the S. A. F. at Baltimore and hoped that there would be a large delegation go from this city and join the society. One application for membership to the club was received.

The Retail Association at its meeting June 5, instructed the secretary to write to each member of the house of delegates urging that crepe-pulling be made a misdemeanor.

Mrs. Anna Joedick, for the last four years with the Kelley Floral Co., has retired to live in the new house which she and her husband have built at Shrewsbury Park.

On the recommendation of City Forester Koenig, H. M. Doubtrara has been appointed assistant city forester and Rudolph T. Windt inspector of the forestry division.

THE TAFT ROSE A FEATURE.

Last week was a fairly good one for business locally, especially towards the close. Most everything that had any real quality at all sold, and sold quickly, but as could be expected lots of culis that were not half bad, scarcely moved at all. Mixed with work for weddings and commencements was quite a considerable amount for funerals. Now the largest part of the seasonal work is about over and unless extremely large orders appear for those just departing this rocky, mortal way, the retailers will have a sufficient opportunity to sit down and charge considerable on their books to profit, we hope, while the growers will have ample time to prepare for the demand of the next season. The prices while fair considering everything were not such as would make anyone fear that there was an unreasonable monopoly on foot in the trade to squeeze the ultimate consumer and thus derive excessive profits. Quite a considerable amount of stock, especially in red, was purchased out of town, particularly on Thursday and Friday. The one stellar feature of the week has been the Taft rose. It shone way above everything else in its line in quality. Instead of popping open suddenly as the other roses are doing it took its own sweet time and the storemen found it better a couple of days afterward than on the day they purchased it. The bloom has the substance, and both it and the leaves are perfectly clean, while the stems stand erect. The My Maryland, too, are very good but are not received in over large quantities. Killarney also looked fairly good, but the buds had to be nursed carefully to get them into shape to sell. Other blooms in this line are trailing behind, but taking all in all are everything that could be expected of them. In carnations some very good red and deeper pink seemed to have recovered themselves and were presentable enough for a place in the display ice boxes. The Enchantress and white are in good supply. The price is such that if the retailer holds up his prices on this line at all he can realize handsomely. Shasta daisies have made their initial bow to the buyers and if the quick way they have been snapped up is a true criterion they will prove very good stock in the hands of the sellers and welcome blooms for the buyers. The lilies and lily of the valley are in sufficient supply to meet the call for them. Callas are very close to an end for a time at least.

Hardy phlox is coming in and looks very fine. Gladioli, sweet peas, sweet william, candytuft, feverfew and marguerites were also offered. In green goods there is more or less of a scarcity of smilax; all that is offered is snapped up quickly at the price prevailing on Third avenue. Among other branches in this line the fine eastern and Kentucky ferns that are arriving deserve special mention.

CLUB MEETING.

Owing to perhaps the fear that they might be nominated for office many members usually more or less regular in their attendance at meetings did not show up. Only an even dozen were present. The hoped for sufficiency of candidates for two or more tickets, which those at the last meeting so strongly advocated and hoped would be realized at the nomination of officers in open meeting, did not materialize. A gag rule in the shape of a motion to close nominations which was carried somehow stifled the names of other candidates. Another reason appeared when the present officers, whose administration had been a very efficient one, were all renominated at one time, and many thought it would be almost sacrilegious to nominate anyone against them. Some candidates withdrew for good and sufficient reasons. The final result of the nominations was: For president, C. E. Critchell and Gus Adrian, for vice-president, Wm. Murphy and Ray Murphy, for secretary, Al. Ostendarp and for treasurer, Ed. Forter. These names will be balloted upon at the annual meeting in July. The outing committee reported that the date selected for the picnic was Thursday, July 20, at Coney Island. The members of the committee are busy working out a program for the day.

PEONY, THE QUEEN OF THE SEASON.

The peony is the flower of the hour, everywhere you look are vases and decorations in which peonies predominate. It is a beautiful flower, and although it has but a short season, it is queen while it lasts. American Beauties too hold their own and stock is exceptionally good for this time of the year. Commencements and June weddings have kept most of the retailers hustling. Iris in all colors, larkspur, stock, gladioli and coreopsis are a part of the daily stock, nearly any color scheme imaginable being possible. In the up-to-date florists white and blue Canterbury bells are fine for wedding decorations and can be had in quantity, and the quality is fine. Sweet peas are plentiful, a few choice "Butterfly" varieties coming in daily. Lilies are moving slowly. Carnations are dragging as they always do during the peony season, and some very low prices on quantities is the result. Roses of all kinds have been moving quite freely, especially the better grades. Good, long, strong smilax is still scarce, most of the stock being short. Asparagus, Sprenger and plumosus in bunches are plentiful, but string asparagus for wedding decorations seems to be scarce on this market. Boxwood still has a good call.

### NOTES.

Arrangements for the Fall Flower Show are quickly shaping themselves into semblances of order. The finance committee report excellent success, and great enthusiasm among the retailers and growers whom they have visited. Everyone is taking a lively interest and assisting both financially and otherwise, in order to make this show a success.

The Jones & Russell Co. report a wedding decoration for every day in June and double headers on some days, which keeps the entire force busy all the time.

E. A. Reeves, of E. Cleveland, the peony man, took a shipment of peonies for exhibition purposes to Philadelphia, Pa., on Wednesday, June 7. C. F. B.

### Baltimore.

#### STOCK PLENTIFUL.

The market is well stocked but the demand for flowers is slow. The retailers are having light business but there are many wedding decorations and commencements near at hand. Funeral work keeps up well. Roses are still plentiful with little demand and selling at low prices. Carnations are in heavy supply but druggies and find poor sale, the stock is not as good as usual owing to the extremely hot weather we have experienced. They are selling at all kinds of prices and even the street fakir has trouble to dispose of the stock. Peonies are about finished, some good stock has been had

which brought fairly good prices. Sweet peas are in good supply, selling from 30 to 50 cents a hundred. Plant trade has suddenly dropped off with much stock still on the market.

### NOTES.

On Thursday, June 8, the members of the entertainment committee of the club were the guests of the Steamer Dreamland. At 2 o'clock the steamer left her wharf for Chesapeake Beach, the Atlantic City of Chesapeake Bay, and on the trip down the committee transacted much business of importance. Upon landing the committee inspected the beach and amusement enterprises. After obtaining all the necessary information a trip on the long board walk back to the boat was made, leaving at once for home. Supper was enjoyed as were the refreshments served during the day. Capt. Bosley was very attentive explaining everything in detail. This is a trip that will be long remembered, and likely the club will hold its annual outing here this summer. The party making the trip consisted of George Morrison, N. F. Flittton, R. L. Graham, J. Nuth, Robert Halliday and daughter, J. J. Perry and J. L. Towner.

The members of the S. A. F. will find Baltimore an ideal city for the convention to be held August 15-19. It is less than an hour's ride to the

Nation's capitol with many lines of conveyance and admirable service. Other points not far distant are Philadelphia, Atlantic City, Norfolk, New York, and the battlefields of Gettysburg. Here is, no doubt, the greatest hall in the country; the main floor is 30x200 feet clear of all obstructions, seating 12,000 people, with ample promenades and the balconies seat 800 additional. Excursions can be made on the beautiful Chesapeake to the many resorts, and the street car system is of the best. Baltimore is known as one of the greatest convention cities of the country, and the visitors are assured of a royal welcome with the renowned southern hospitality.

A hall storm wrecked many greenhouses in Arlington, Mt. Washington and Govanstown, June 12. J. L. T.

### The Horticultural Society of New York.

A meeting of the society, and an exhibition, were held on Saturday, June 10, at the New York Botanical Garden, in Bronx Park. The exhibition, which was held in the basement of the large Museum building, being open on the following day, Sunday. Prizes were offered for roses, carnations, shrubs and trees, and herbaceous plants. T. A. Havemeyer made a large exhibit of peonies, irises, and rhododendrons and azaleas and Mrs. F. A. Constable a collection of choice peonies and roses, and a large collection of roses was staged by Gen. E. A. McAlpin. The display of peonies by the Cottage Gardens Co. was superb.

The next exhibition will occur at the same place, Saturday and Sunday, July 1-2. Prizes will be offered for Japanese irises, outdoor roses, sweet peas, herbaceous plants, shrubs and trees and vegetables. Address all communications to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City, who will be glad to send schedules.

The following are the awards:

Three white peonies, six flowers each, T. A. Havemeyer (A. Lahodaj, gardener), first. Three light pink peonies, six flowers each, T. A. Havemeyer, first. Three rose peonies, six flowers each, T. A. Havemeyer, first. Collection of single peonies, three flowers each, T. A. Havemeyer, first. Collection of peonies, Cottage Gardens Co., first. Mrs. F. A. Constable (Jas. Stuart, gardener), second. Collection of hardy roses, Gen. E. A. McAlpin (John Woodcock, gardener), first; Mrs. F. A. Constable, second. Collection of flowering shrubs and trees, H. Darlington, (P. W. Popp, gardener), first. Hardy rhododendrons and azaleas, T. A. Havemeyer, first. Collection of irises, T. A. Havemeyer, first; John Lewis Childs, second. Best orchid plant, C. Moore (J. P. Mossman, gardener), first. Special prizes were awarded to: John Lewis Childs, certificate of merit for Philadelphus Virginian; Bobbink & Atkins, special mention for a collection of herbaceous plants; John Lewis Childs, special mention for a collection of gladioli; Julius Rothman, special mention for a collection of cut orchids; T. A. Havemeyer, special mention for a collection of hydrangeas.

GEORGE V. NASH, Sec'y.

### Philadelphia.

#### A LARGE OVERSUPPLY OF STOCK.

This is commencement time and much of the business of the past week has been contributed by the demand for flowers for the sweet girl graduates of the different schools and colleges in this neighborhood. There were also a number of weddings which always make considerable business, and give the hustling boys a chance to show their abilities and add to their fame. The supply of flowers is considerably in excess of the demand, this being shown particularly in the clean up on Saturday when the street men get their work in. To be able to match wits with these gentry is a feat indeed. Graduates of the university of hard knocks they are very clever and glory in getting the best of a hard bargain. Probably half or more of the stock that comes to market is handled by these gentry, many of whom are in business all the time, weather permitting. This class purchases good stock whenever they can get it at a price that pays them to handle it, but those who buy the quantity lots, or accumulations of the week depend on the crowds that frequent the market streets on Saturday night, when in the uncertain light a handful of anything at a low price looks good to the bargain hunter. Roses of all kinds are plentiful but are deteriorating sadly in quality, White Kill-

lary is getting very much off color and is almost out of it for funeral work. Kaiserin now is first choice with the Bride second. My Maryland also has a shade the best of Killarney and some very good flowers are seen. American Beauties are in good demand, the market was entirely cleaned out on Tuesday on account of the girls' high school at which everyone of 400 graduates carried one or more dozen, many of them specials on which the stems could not be too long. Sweet peas are now in good shape again, the recent rains adding length to the stems and size and color to the flowers, which were sadly lacking during the hot, dry spell of a week ago. Peonies are all cut from outside and the supply of the next two weeks will come from the storage boxes. These are fine for the first day out, but are of little use the next. Lily of the valley is in good demand and Easter lilies of very good quality also sell fairly well.

#### NOTES.

The exhibition of the National Sweet Pea Society of America to be held in Horticultural Hall June 29, promises to be quite an event. The recent rains have thoroughly soaked the ground and the excellence of the flowers now coming to market seems to indicate that some very choice flowers will be seen. There are also some very generous prizes offered for table decorations, bouquets and vases of these flowers that should stir the artists to show what they can do.

The peony exhibition at Horticultural Hall was very interesting the first day but the flowers proved to be in the same class as carnations, all going to sleep the next day. This was owing to the fact that many of them had been kept in cold storage to hold them for the show.

K.

#### Boston.

#### A GLUT OF PEONIES.

Trade is somewhat quieter than last week. Carnations are plentiful and the quality is good considering the hot weather we have experienced, but there is a lull in the sales, although the growers are pleased with the results a far and still rising which shows up on account of the replanting going on at this time. We saw some nice My Marylands in the market, but we were told that this rose was not a general favorite when Killarney could be procured, the fault being that it does not keep, and grows soft. Peonies are, in fact, too plentiful. It seems that every old lady with a 6x10 garden is sending these flowers in just now. It would be better to let them stay on the plants around the greenhouse and serve as an advertisement rather than pay express charges on something which seems to be overdone. Rain has fallen and everyone is rejoicing. The rain storm we had before helped considerably, but not enough to carry the plants along. Hay was quoted at \$27 a ton and still rising which shows what New England had to contend with, and other crops have suffered in like proportion.

#### NOTES.

Pierce Bros. of Waltham seek an injunction to prevent aeroplanes flying over their greenhouses. The meet is June 15, on the Metz grounds in that city. This is certainly a unique point of law. We are told that in Jerusalem the land owners own up to the sky, but here it will be a nice point of law to settle something which a man cannot use and for which he is not taxed. It will be of interest to every greenhouse owner to watch the proceedings closely, as we are living in an age of great things, and each one is liable to have the same thing happen to him.

#### Stamford Horticulturists.

The regular meeting of the Westchester and Fairfield Horticultural Society was held in Royal Arcanum hall, Stamford, Conn., Friday evening, June 9, President Stuart occupying the chair with 85 members present. Two life, two honorary and seven active members were elected. The preliminary schedule of the fall show and copies of the revised constitution and by-laws were distributed to all the members present, to others, copies will be mailed. President Stuart on behalf of the society appointed a committee of seven to assume charge of the floral display connected with the "Wonderland" fair and bazaar to be held in Stamford, Conn., June 14-17, for the benefit of the Day Nursery. The society will hold its first annual outing and games next month, the executive committee to make all arrangements and report at the July meeting.

The judge's report on exhibit at the meeting was as follows:

Chas. Adcock, four heads of lettuce four varieties; Jas. Stuart, vase of fouriegia long spurred hybrids; Carrillo & Baldwin, plant of Anemium Thrysiflorum, highly commended. F. W. Popp, vase of Spiraea Queen Alexandra; A. S. Peterson and Jas. Aitchison, vase of peonies in varieties, vote of thanks.

Several new members were introduced and were much impressed with the large attendance and fine exhibits. President Stuart spoke about the large number of classes in the preliminary schedule for the fall show and urged the members to secure prizes for the same which without doubt will be the largest and best show ever held in this section.  
J. B. MCARDLE, Sec'y.

CRANSTON, R. I.—The Budlong Rose Co. has been granted articles of incorporation to cultivate and deal in flowers, shrubs, etc. The capital stock is \$60,000 and the directors are, Frank L. and James A. Budlong of Cranston, and Harold W. Thatcher of Providence.

Victoria (rhubarb)—Twelve stalks, open culture, Frederick Mason, first; Oliver Ames, second. Gratiolite—Oliver Ames, tomatoes.

### Achillea Argentea.

Some confusion has existed with regard to this plant, which has been sometimes referred to *Tanacetum argenteum*. The latter, however, is quite distinct, being of shrubby habit, with large golden yellow flowers. *Achillea argenta* was sent out by Mr. Thompson, of Ipswich, about the year 1888, but its origin is somewhat obscure, states a writer in the *Gardeners' Magazine*. At the same time it is a very decorative rock plant, with silvery-white leaves. Like many other dwarf-growing achilleas it forms a spreading carpet that makes it a very attractive plant even when not in flower. During May and June the flowers are produced on stems from four to five inches

## Loretta or Huckleberry, \$1.50 per case

A fine substitute for Southern Wild Smilax. Extensively used for June decorations. Order direct from our Southern Branch.

HENRY M. ROBINSON & CO.,

McWilliams, Ala.

high, usually about six on a stem. The individual flower heads are about three-quarters of an inch in diameter, with pure white rays, and a pale yellow disc.

In choosing a position for this plant it must be borne in mind that damp or heavy soil is fatal to it in winter, therefore a sunny, somewhat sloping ledge should be selected. The soil should be deep, but of a strong nature. *A. Argentea* is readily propagated by means of division in early spring, or by cuttings in summer. The latter strike readily in a close frame, and soon make good flowering plants. As a pot plant for the cold house it is very useful and decorative, coming into flower in the cold frame a little earlier than in the rock garden. In a selection of six of the best dwarf achilleas for the rock garden this would be one of the first chosen, others being *A. ageratifolia*, *A. moschata*, *A. rupestris*, *A. tomentosa* and *A. umbellata*.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice President; M. H. Duryea, New York, Second Vice President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

CHICAGO.—Leonard H. Vaughan, of Vaughan's Seed Store, and first vice-president of the American Seed Trade Association, left for the east June 14.

DUTCH reports of June 2 indicate hot dry weather good for ripening hyacinth bulbs but not beneficial to tulips. Narcissi are reported looking well. Plants such as spiraea, dielytra and all perennials need rain.

VISITED CHICAGO: Chas. N. Page, Des Moines, Ia., enroute to the Marblehead convention; Marshall H. Duryea, of Henry Nungesser & Co., New York; H. A. Johns, of the Sioux City Seed and Nursery Co., Sioux City, Ia.

THERE have been numerous complaints on the germination of garden peas this season. Sown in the open ground they have in some cases not half met the growth percentages shown in the office tests. Fungous troubles have been suggested.

IMMOETES.—Latest reports from French districts indicate a possible advance of 25 to 30 per cent in prices, owing to severe frosts on the early plants, and this in addition to the heavy advance in import duty already noted in these columns.

SAN FRANCISCO, CALIF.—It is understood that F. H. Henry sailed for Japan on May 24 in the interests of Louis Boehmer & Co. Robert Fulton, manager of that company, expects to remain on the Pacific coast until July 15, when he expects to return to Yokohama.

HOLLISTER, CALIF.—Seed crops here are looking very well now. We have just commenced picking salsify, 10 days later than last year. All crops are two weeks to a month later than usual. Radish will undoubtedly be a short crop. Sweet peas under normal. Onion now promises a good crop.—Visitors: E. W. King and Frank Cullen, Coggeshall, Eng. W.

MEMPHIS, TENN.—The United States Seed Co. of San Antonio, Tex., has been incorporated under the laws of Texas and registered in Tennessee. The capital stock is \$50,000, fully paid, and the

incorporators are F. M. Roesch, president and general manager; C. M. Rathbun, secretary and treasurer, and C. M. Jackson, who are likewise the directors of the company. The firm opened their store at 121-123 South Front street June 1.

PEA men the world over, New Zealand, Germany, England and Wisconsin, are in the Blue Wrinkled state of pessimism regarding the crops. The condition seems chronic as well as universal. In New York State, away to the north of the Empire State Express tracks, and farther north beyond the lake of the Ontarios, however, are many patches about which the Sage of Saginaw is silent and western fields, even to the Pacific slopes, no more lie fallow. But let crops be what they may, the growers can be cheerful, for the oldest dealer has forgotten the date of the big crop of marrowfats and canners.

SEEDSMEN and truckers will be interested in the Department of Agriculture Farmers' Bulletin No. 434, "The Home Production of Onion Seed and Sets," the industry being comparatively new and literature on this subject consequently very scarce, but some Chicago growers will differ from the conclusions of the writer, W. R. Beattie, who says: "No large profit can be obtained from the production of either onion seeds or sets, and the greater profits are obtainable from comparatively small plantings. On a considerable portion of the land devoted to onion-set raising the yield is less than 300 bushels to the acre. Allowing for the cost of seed, fertilizers, cultivation, harvesting, and handling, the net returns are not large, especially when sets bring only 50 or 60 cents a bushel."

### Massachusetts Seed Crops.

Marblehead, June 3.—It is so dry that it is very difficult to get small seeds to germinate. The cut worm is doing considerable damage throughout this section. Carrots, parsnips, squash, beets and radishes, in a great many cases, have had to be replanted on account of the damage done by the cut worm. G.

### Connecticut Seed Crops.

Wethersfield, May 30.—We have had a late spring, consequently later planting than usual. The season has been very dry, but we have had recent showers, and some quite warm weather, so that vegetation is nearly as forward as usual. Cabbage, onion,

turnip, beet, carrot, limited acreage planted, and all these crops have suffered some from the dry weather. There is the usual acreage of corn, which has had a good start, as we have had favorable weather for planting and germination. Tomato and tobacco are about one week late. W.

### The Late Robert Buist.

The printed brief of proceedings at the meeting of the board of directors of the Wholesale Seedsmen's League, May 24, contains the following:

Immediately after roll call, Mr. Burpee offered the following motion of respect and esteem, and moved that the motion be placed on the minutes of the board, which motion was unanimously adopted:

"It is with deep regret that we record the death on December 13, 1910, of our friend and colleague, Robert Buist."

"Mr. Buist had been a member of the board ever since the incorporation of the Wholesale Seedsmen's League. He was faithful in attendance upon the meetings and we shall miss greatly his advice and sound judgment so freely and honestly expressed, while individually each of us feel the loss of a personal friend."

"Robert Buist was an old school gentleman, a seedsman of thorough training and a loyal friend, whose loss is mourned by a wide circle of both personal and business friends."

### American Seed Trade Association.

#### THE CONVENTION PROGRAMME JUNE 20-22.

An excellent programme has been prepared for the twenty-ninth annual convention of the American Seed Trade Association, to be held at the Rockmere Hotel, Marblehead, Mass., June 20-22, as follows: "Points of Interest at Marblehead," Edgar Gregory, Marblehead; "The Relation of Soils and Fertilizers to Seed and Crop Failure," H. J. Wheeler, Ph.D., director of the Agricultural Experiment Station of Rhode Island State College; "Departments of the Seed Business," W. D. Ross, Worcester, Mass.; "Distribution of Fungus Diseases by Seeds," Dr. E. Mead Wilcox, Prof. Agricultural Botany and State Botanist, Lincoln, Neb.; "Improvements in Grains," Prof. R. A. Moore, of the Wisconsin Agricultural Station, Madison, Wis.; "Peas and Beans: Future Probabilities and Cost, Supply and Demand," C. N. Keeney, LeRoy, N. Y.; "Proper Growing and Handling of Seed Potatoes," Chas. D. Woods, Director of the Maine Agricultural Experiment Station, Orono, Me.; "The Importance of Line Breeding in the Establishment of Varietal Forms Suited for Special Conditions," Dr. W. W. Tracy, Dept. of Agriculture, Washington, D. C.

Some special features of the convention are an open meeting, Tuesday evening, June 20; sail around the bay, Wednesday afternoon, June 21; annual banquet, Wednesday evening, June 21; automobile trip for the ladies, Thursday morning, June 22; sight seeing trip by special electric cars, Thursday afternoon, June 22; visit to Arnold Arboretum, Boston, Friday, June 23.

Marblehead is reached by train leaving North Union station, Boston & Maine R. R., every hour. Transfer from the South Terminal Station may be made on the Boston elevated. Tickets may be purchased and baggage checked through to Marblehead which is 17 miles from Boston.

## Market Gardeners

Vegetable Growers' Association  
of America.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Boston, Mass., Vice President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

### Cabbage Culture.

Cabbage is one of the most universally cultivated garden plants and in the bulletin issued by the Department of Agriculture the culture is divided under three heads; the truck crop of the south, the early market-garden crop of the north, and the autumn crop of the farm and gardens of the north. The growing of cabbage as a market garden crop in the north is frequently carried on in combination with other crops by interplanting one, two or even three short-season quick-maturing crops between the rows, and as a farm crop it is used as one of the factors in a crop rotation. Cabbage is adapted to a wide range of soil conditions and grows well on nearly all kinds of soil; the main thing, however, is an abundant supply of immediately available plant food. The seed for the extra early crop is sown in February and March, but the later varieties are sown in April and May and usually transplanted to the field, in the latitude of New York, from June 20 to July 1, in rows about 30 inches apart, the plants being set from 13 to 18 inches apart in the row. No other crop responds more quickly to good cultivation and it is a common expression among market gardeners that "cabbage should be hoed every day," but at any rate the cultivation should be frequent and thorough and not deep, the aim being to destroy all competing weeds and to maintain a loose, friable layer of soil about two inches deep over the surface. In harvesting the early crop is cut and marketed at once, but the later crop is sorted, the better heads selected, and stored in warehouses in sections where the winters are severe, or piled in long racks and then covered with rye straw and a layer of earth in milder portions of the country. The thickness of the covering depending upon the severity of the climate.

### Considering Young Onions.

Nature in a benignant mood set down to make young spring onions. The benevolence of the original intent may not be doubted. Possibly the dame had just put the finishing touches on parsnips and was contrite, or possibly it was in sheer good nature that she directed her hands to the shaping of this creation. Of one thing we may be certain: Nature planned a benefaction.

At this late day it is not given us to determine what happened in the course of manufacture; whether in pure mischief the dame reasoned that the bulb promised to be too good for mere humans, or whether, as she contrived the blessing, she passed from activity to dreaming and dozed, with idle hands in lap, and thus was surprised by a sour dispositioned demon who dropped the acid volatile oil into the elements with which she worked.

We have with us now the young green onion and are led to speculate whether it was by accident or design that a penalty was attached to the consumption of so estimable a food. If we lean towards the conclusion that there was a purpose in it, we have just cause for complaint. The season which brings us the young onion brings also the desire for it, the craving for the fresh, green produce of the earth. To yield to it means to fill up a cup of tribulation for persons unfortunate in their proximity to the weak character who looked upon onions when they were green and did eat of them.

It avails nothing to consider that if the bulb did not have the acrid volatile oil it would fail in its satisfying mission on earth. There remains the belief that if the effort to fashion this delicacy had been sincere or undisturbed we might have had the taste without the odor. The eating or use of garlic is a premeditated crime, planned and committed deliberately, but the victim of spring onions has succumbed to an amiable weakness. Yet the inexorable law of society punishes the lesser as it does the greater offender.

We credit Dame Nature with the intent to work a benefaction. We observe that the result of her labor was the fashioning of a temptation.—Chicago Tribune.

WALTHAM, MASS.—A deer becoming frightened, jumped into the greenhouse of J. T. Silman, breaking glass and sash. The animal was so badly cut that it died before any aid could benefit it.

TORONTO, ONT.—The June exhibition of the Toronto Horticultural Society was held in a large tent in Allan Gardens June 2. Flowering shrubs were a feature of the exhibit, several tables being filled with these.

HINGHAM, MASS.—The first regular monthly meeting and exhibition of the Agricultural and Horticultural Society was held in the Town hall, May 16. William L. Howard was chosen secretary vice W. H. Thomas, deceased.

FINDLAY, O.—S. J. McMichael, for twenty-five years identified with the floral business here, has disposed of his greenhouse interests to A. H. Marshall, who since February has been his manager. Mr. McMichael has retained certain interests which he will develop in the future.

### VEGETABLE PLANTS.

Cabbage, Wakefield, All Head, Succession and other varieties \$1.00 per 1000; 10,000 and over 85c per 1000.

Lettuce, Grand Rapids, Big Boston, Boston Market and Tennis Ball, \$1.00 per 1000; 10,000 and over 85c per 1000.  
Beet, Crosby Egyptian and Eclipse, \$1.25 per 1000 Cash with order.

R. VINCENT, JR., & SONS CO., White Masrh, Md.

### Springfield, Mass.

Business has been very good this season especially at Memorial day when everything was about cleaned up.

N. F. Higgins of State street contemplates enlarging his plant on Pine street, his growing trade requiring more space.

Fred Vetty, formerly foreman for J. W. Adams & Co., has left for Portland, O., where he has accepted a similar position. L. H. B.

CAPE GIRARDEAU, MO.—Charles H. Gelven will erect two greenhouses in which to grow carnations this summer equipped with Garland's iron gutters and the latest improvements.

BLUE POINT, N. Y.—F. E. Abrams is erecting two new greenhouses 40½x180 feet each and a head building 18x41 feet. The houses are steel frame and being erected by the Lord & Burnham Co.

MARIETTA, O.—The Marietta Floral Co., which recently purchased the Smith greenhouses, are making extensive improvements upon the heating plant and greenhouses preparatory to enlarging the business.

## The Nursery Trade

**American Association of Nurserymen**  
 W. P. Stark, Louisiana, Mo., President;  
 R. S. Welch, Shenandoah, Ia., Vice-Presi-  
 dent; John Hall, Rochester, N. Y., Sec'y.  
 Thirty-sixth annual convention to be held  
 at St. Louis, Mo., June 14-16, 1911.

For report of the annual meeting and exhibition of the American Peony Society see page 1084.

CHICAGO.—Carl Cropp of Vaughan's Nurseries, is at St. Louis this week attending the Nurserymen's convention.

BOSTON MASS.—Dr. Fernald of Amherst, President Wyman of the Massachusetts Nurserymen's Association and J. Lewis Ellsworth, secretary of the Massachusetts Board of Agriculture, appeared before the state authorities in an endeavor to establish the office of inspector of nurseries and to increase the appropriation from \$2,000 to \$25,000 for that department.

### Blister Rust of White Pine.

The dangerous European disease, blister rust of white pine, was recently introduced into America and was promptly eradicated and the United States Department of Agriculture has issued a bulletin giving a full and detailed account of the fungous producing the disease and its preference for pines, currants and gooseberries, and requests prompt information of the importation of these plants.

### Arnold Arboretum Bulletins.

In Bulletin No. 6 issued by the Arnold Arboretum June 6, the rhododendrons, kalmias, ilex, laburnums, diervilleas and Rosa Arnoldiana are noted as in bloom and their characteristics described. In response to a request for a list of hybrid rhododendrons which can be grown, the following have been most successful in the neighborhood of Boston: Album elegans, album grandiflorum, atrosanguineum, bicolor, Charles Bagley, Charles Dickens, delicatissimum, Edward S. Rand, Everestianum, F. L. Ames, H. W. Sargent, Hannibal, Kettledrum, King of the Purples, Henrietta Sargent, Lady Armstrong, Mrs. Millner, Mrs. Charles Sargent, Mrs. Harry Ingersoll, purpureum elegans, purpureum grandiflorum, roseum elegans and Sefton.

### American Association of Nurserymen.

The annual convention of the American Association of Nurserymen was held in the Southern hotel, St. Louis, Mo., the opening session being called to order on the morning of Wednesday, June 9, by President W. P. Stark, with one hundred and fifty members present. The association was welcomed to the city in an address by Mayor Kreisman, which was ably responded to by J. W. Hill of Des Moines, Ia., which was followed by an address by Norman J. Coleman, first secretary of agriculture. President Stark then delivered a very comprehensive address dealing with subjects that were of vital importance to the nursery trade. Secretary Hall then read his report showing a membership at present of four hundred. The treasurer's report showed a balance on hand of \$5,000. The

transportation committee reported that Colorado and Kansas rates were lowered fourteen per cent. Recommendations were adopted toward sending a representative of the association to the official classification meeting to be held in New York in August. The following special committees were appointed: President's address, John S. Kerr, Prof. John Craig and J. H. Skinner; auditing, Peter Youngers, E. W. Kirkpatrick, C. T. Smith; final resolutions, J. W. Hill, F. W. Heikes.

Among the prominent members of the trade present were J. W. Hill, Des Moines, Ia.; Peter Youngers, Geneva, Neb.; Orlando Harrison, Berlin, Md.; Carl Cropp, Chicago; W. P. Stark, Louisiana, Tex.; F. H. Stannard, Ottawa, Kans.; I. E. Ilgenfritz, Monroe, Mich.; J. C. Van Lindley, Pomona, N. C.; Prof. H. C. Irish, St. Louis, Mo.; John C. Chase, Derry, N. H.; E. W. Kirkpatrick, McKinney, Tex.; E. L. Watrous, Des Moines, Ia.; Guy A. Bry-

W. P. Stark, Louisiana, Mo.

President American Association of Nurserymen.

ant, Princeton, Ill.; Irving Rouse, Rochester, N. Y.; Thomas B. Meehan, Dreshertown, Pa.; E. W. Reid, St. Paul, Minn.

The address of President Stark was replete with important matters concerning the association and subjects of interest to the trade, which were treated in a very comprehensive manner. Among the more important subjects treated were the necessity of the members getting together and pulling together, and in order to get the best results through the association there should be a full attendance and participation at all the daily meetings. That the assistance and co-operation of scientific men and inspectors was absolutely necessary for the welfare of nurserymen and orchardists, and the necessity of a national inspection bill was very ably presented. The members were urged to grade their stock carefully and more uniformly to adopt regulation standards. The enactment of unreasonable laws should be given attention, and nurserymen should be more closely in touch with matters of this kind. Experimental stations and demonstration orchards should be established and their work encouraged and promoted,

supplying the material without price where needed and nurserymen as a whole should pay more attention to civic improvements and forestry. The time selected by the association for its meetings and the necessity of increasing the membership dues were presented to the members in a very clear manner. The publicity committee was a start in the right direction, but there must be a united effort, a campaign of education, to teach the country the beauty of the products of the nursery. Higher standards of business were urged, both in stock and its growth, and in packing and selling, and also to embrace the opportunities which were open to the trade, for each year the world is looking more and more to America for its supply of fruit in its fresh, preserved and dried forms.

CEDAR RAPIDS, IA.—John Stetka, formerly superintendent of Ellis Park, has purchased five acres of land which he will devote to the culture of flowers, shrubs and fruit, and will erect a greenhouse at once.

PHILADELPHIA, PA.—The annual rose show of the Germantown Horticultural Society was held in the Germantown Y. M. C. A. building June 5. A lecture on the "Cultivation of the Rose" was given by Earnest Hemming.

## GIANT PANSY SEED

### The KENILWORTH Strain

must not be compared with the flimsy Trimardeau; it is much larger and of good substance. The immense flowers of 3½ to 4 inches are of perfect form, every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings: it is the result of years of selections. The stock plants are selected from many thousands of plants grown for market. It is rich with shades of brown, bronze, red, mahogany and numerous others. 1911 seed now ready, light, medium or dark mixtures. 2,000 seeds, 50c; 5,000, \$1.00; ¼ oz., \$1.25; oz. \$5.00.

### Pansies in Separate Colors

Giant Adonis, beautiful light blue.  
Giant Emperor William, ultramarine blue.  
Giant King of the Blacks, coal black.  
Giant Beaconsfield, violet, shading to white.  
Giant Golden Queen, yellow.  
Giant Golden, yellow, with dark center.  
Giant Masterpiece, beautifully waved, and the richest combination of colors.  
Giant White.  
Giant White with large violet center.  
Giant Royal Purple, fine large flowers.  
Giant Orchard flowering, rare shades.  
Giant Bronze and copper shades.  
Giant Light Blue, delicate shades of blue.  
Giant Dark Blue, deep blue shade.  
Trade pkt., 25c; any 5 for \$1.00; any 11, \$2.00.

Rainbow is a blend of over 50 of the latest introduction of Giant Pansies of the most beautiful gorgeous colors: blotched, striped, veined, margined, etc. With every \$1.00 worth of Pansy Seed I will send 1000 of Rainbow free, and with other amounts in like proportion.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPAID CO., Youngstown, Ohio

If you want to get the want you want to get, you want to get your want ad into the

## AMERICAN FLORIST

Try it now.

Every advertisement represents a genuine want. It pays to answer them.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department 'W'

Detroit, Mich.

## Read What the Users Say

BETTER AND CHEAPER THAN ANY OTHER SYSTEM.

Zanesville, O., Feb. 11th, '11.

Gentlemen:

In regard to the Kroeschell Threaded Tube Piping System, I think it is better than standard piping system, not only in being cheaper but thinner, and giving more heat. I found the Generator was a paying proposition and would recommend its use to all using a hot water system. My No. 1 Boiler does the work satisfactorily on over 25,000 square feet of glass.

Very truly yours,  
C. L. HUMPHREY.

TEST AT 14 BELOW ZERO—HEATS WITH EASE.

Omaha Neb., Jan. 4th, '11.

Gentlemen:

It might interest you to know the results obtained from your boiler and threaded tube piping system. We have just had a night of 14 degrees below, with a stiff wind blowing and we carried the house at 52 degrees with the boiler at 170 degrees. The house is piped for 50 degrees and as we are using a cheap grade of slack, the result speaks for itself. We were told by the dealer when we ordered the coal that we could not burn it, so we bought a car of good coal to help along if the slack would not give results, but it was not necessary. Your Generator certainly helps the circulation, and your method of piping for hot water is a surprise to some of the greenhouse men in this vicinity.

Very respectfully,

FERGUSON BROS.

BETTER THAN STEAM.

Pontiac, Ill., March 16, '10.

Gentlemen:—

We have no trouble whatever in keeping a temperature of 50 to 55 degrees in our carnation houses, and 60 degrees in our rose houses, in the coldest weather. We fire once in three hours on very cold nights, and at other times once during the night. The boiler has given excellent satisfaction: it is simply wonderful. We had a fire-box boiler previous to this but your improved system has it beat to death in every way. Your system of piping, together with your improved Generator system has steam skinned to death in so many ways. We were on the market to buy high pressure steam, but after receiving such reports of your improved hot water system, we concluded that your experience was worth something, and have been delighted at the results, and so glad we took your advice and put in hot water instead of steam.

Very respectfully,  
W. J. MILLER & SON.

## The Ease of Erection of Our Pipe Frame House

Getting started is always the hard part, but it is simple enough with this construction. Set your Wrought Iron Posts in concrete, and then bolt on the Galvanized Angle Iron Eave Plate. When once you get the plate lined up, the rest comes along easy enough. With the Giant Arch next up, you have a complete scaffolding for the putting up of bars and ridge. The Bars are fastened to the eave plate by the Bar Clamps, making their spacing absolutely accurate, so you will have no trouble about that. The Wrought Iron Ridge Brackets are bolted to the ridge, and each bar screwed to the bracket and that does the trick there.

With the Gable Rafter bolted to the iron posts, which extend to the height of the eaves all around, the gable framing is greatly simplified. Now practically all that remains to be done are the sides and glazing.

So, you see, it is a construction with its strongest structural points so worked out that it is the easiest possible house to erect.

Next to our Sectional Iron Frame Construction, it is certainly the best house to buy and the easiest to build.

Send for circular showing the new Robert Craig range at Norwood, Pa.

By Prof. L. R. Taft. Price \$1.50  
AMERICAN FLORIST CO.  
440 Dearborn St., CHICAGO

### This Boiler Section

belongs to our new model 36 inch cast iron greenhouse boiler. We cast them with or without hubs just as you prefer. Hub connections seem the thing nowadays because it brings the connection down so low, a shallower cellar can be used. The new 36 is a low broad boiler that we must admit is considerably more economical than the old 36 and that is saying a good deal.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mistlike spray for 15 minutes.

All parts are made to gauge and may be had for repair.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

## Some Facts About The U-Bar

It was invented by two practical men—each standing high in his particular  
line. One a successful grower, who knows plant requirements from A to  
Z; the other a greenhouse builder of wide experience.

The main principle of the U-Bar, these two men worked out first, and  
then came months of minor problems upon which the success of the con-  
struction depended quite as much as on the U-Bar itself.

Then an experimental house was erected and theories proven to be  
facts. Then and not till then was a single U-Bar house sold. You know  
that no construction has yet been perfected that can approach it for demon-  
strated lightness, attractiveness and durability. Send for Catalog.

## SUGGESTIONS FOR PLANT GROWERS.

### Calceolarias.

A plant that always attracts attention and is as decorative as a cineraria or other plants of that kind, and yet but little grown, is the calceolaria. The culture is very similar to that of the cineraria and is fully as easy. The seeds should be sown at once and shaded until they have produced one or two leaves when the shade should be made lighter. As soon as large enough they should be potted into small pots and shifted along into larger sizes as fast as is required. They should, as soon as well established, be given a light, airy location not shady enough for them to become drawn, but if in the full sunlight will have to be watched closely that they do not get dry. They will require cool quarters during the winter, if nice stocky plants are desired, and under this treatment fine 6-inch pot plants may be had in bloom in early spring that will surely attract attention. For the last potting a good rich soil will be required and when they begin to bloom watering with liquid manure will be beneficial. Like the cineraria they are quickly ruined by aphids and constant fumigation will be necessary. Many growers stand the plants on tobacco stems which are renewed as the strength is lost.

### Freesias.

A crop of freesia, or a few plants in pots in bloom, at Christmas is a valuable asset on that holiday. In order to have them in bloom at that time the bulbs should be planted by July 1. Select the large strong bulbs, and by careful inspection many will be found on which the root eyes are beginning to swell. These will make the earliest blooming plants, and this selecting will produce plants that will all bloom at the same time. The bulbs should be planted in a good soil enriched with well rotted manure with a good proportion of sand, but no fresh manure, it is a well understood principle that bulbs of all kinds do not grow well in soil full of fresh manure. Eight to ten large bulbs in a 6-inch pot will give the best results. The pots should be well watered and placed in a dark, cool place until the shoots appear above

the ground, when they should be given a light location. As soon as the growths get tall enough they should be staked and tied. By continual early selection of the bulbs, and keeping the earliest separate, an early strain can be assured.

### Bougainvilleas.

The plants of bougainvillea that are through blooming should be cut back into shape and potted in preparation for the next season's growth. Much depends upon the summer care of all hard-wooded stock if nice specimens are to be grown. They should be plunged outside in a frame or placed in full sun in a light airy house. Outside culture is far preferable for all this class of stock in order that a good strong growth, well furnished with foliage, may be assured. Be sure that they never get too dry, the great danger of all hard-wooded stock is letting it dry out, for it does not show it as quickly as the softer growing plants but the check is more severe and the plants seldom fully recover from it. The young stock rooted earlier should be placed in a similar location, and kept well pinched back into shape, until enough shoots have been obtained to insure a good shapely plant, when they can be allowed to grow freely, but any extra strong leaders are better cut back during the season. Any chance flowers that show should be picked off at once, that a good strong stocky plant may be obtained and the strength all retained for that purpose.

### Nephrolepis.

Probably no plant that the florist grows gives more return for the labor spent in its culture, or the space that it occupies than the Boston fern and its various sports. The old Boston is still, however, the easiest to handle and grow. The plants should be repotted every year, and with good treatment are sure of making nice plants. Any plants that are in poor condition can be divided and with the young stock planted in a bench of good rich soil. The house should be shaded enough to assure of good color on the foliage but not heavy enough to prevent the house being maintained at a good high temperature. During the day the house

should stand at about 80° with a little ventilation which should be closed down before the sun leaves the houses. The plants can be set six inches apart and the soil should be two parts loam, one part leaf mold, and one part rotted manure. The house should be frequently syringed to keep a moist atmosphere. Under these conditions fine plants can be produced from young stock in three months. In September they should be lifted and placed in 6-inch pots, if single specimens are desired, or three or four plants can be placed in a 9-inch or 10-inch pot if larger plants are wanted. In lifting the plants they can be cut around about two inches from the crown, and lifted with a trowel leaving the runners in the bench, if the place they occupy is not wanted at once. The runners will immediately break into small plants which can be placed in flats for young stock for the next season. The finer varieties of this fern such as Whitman do not submit to the lifting and potting as well as the old Boston and better plants can be obtained by potting along into larger pots as may be required. The only insects that trouble these ferns are the brown scale, and the plants should be kept clean from these either by washing, or spraying with aphine, or a weak nicotine solution.

#### Oleanders.

A plant that does not receive the attention that it should is the oleander. While there probably would not be a large demand for this plant, yet it is an old time favorite and well grown specimens in bloom are a valuable addition to a porch or lawn. They are too often so sadly neglected that they get unshapely and far from being an ornament, but a little attention to trimming them into shape after they get through blooming will keep them in good condition. They can be wintered in any cool quarters, and if brought into the heat and light in early spring will be full of bloom in June and July and a valuable decorative plant. The cuttings root easily and at any time when the plant is in growth, and grow very rapidly for a hard-wooded plant. Any florist carrying a line of assorted stock should include a few of these in the variety which he cultivates. The only insect which troubles them is the mealy bug, but a good frequent hard syringing will soon dislodge them.

#### Poinsettias.

The propagation of poinsettias should be pushed to the utmost at this time, for it is the plants that are rooted early in July that make the best single specimens at Christmas. Those that are rooted later in July and during August will make fine plants for pans, placing four to eight plants in a 6-inch or 8-inch pan, for they will be much shorter than those rooted early in July. The plants that were rooted earlier should now be growing nicely and should be shifted into larger pots as soon as they require it, under no circumstances allow them to become pot-bound until the bracts begin to set in November. They should be placed in the bright sun as soon as strong enough to endure it, that the growth may be short and sturdy and the leaves as close together as is possible. A long, drawn plant grown in the shade, with the leaves far apart, is not the typical plant for the holidays and does not meet with approval.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### The Cornflower Wedding.

The butterfly made of cornflowers is very effective, using the two shades of the blue for the different markings of the wings—lining it with the lighter shade of satin and also covering the antennae with this shade. From the antennae suspend a pretty shower of orange blossoms. Place hydrangeas of the blue coloring in groups on either side. For the aisles use bay trees extending between each a loosely arranged garland made of cornflowers made full and thicker in center narrowing towards the end. The garlands should be attached to about the center of the trunks of the bay trees with a sash ribbon of the lighter shade of blue using long streamers to cover the trunk, and place electric lights in the bay trees.

White peonies may be used for the bridesmaids tied with the two shades of the cornflower blue ribbon, the bride's bouquet to be of white lilac and white chiffon. For the flower girls use the hunter's bag of cornflowers. This can be made of a blue silk foundation on which the flowers are arranged, using long streamers to throw over the shoulders with showers of cornflowers attached.

A. E. KLUNDER.

### Preservation of Cut Flowers.

Everybody but those commercially affected will be glad to learn of methods by which not only is the life of flowers in water prolonged, but, in addition buds are induced to open with greater freedom, and in some cases the colors deepened and improved. The "Revue Horticole" has published the results of

experiments with a great variety of flowers, and declares that such excellent results may be obtained from simply adding sugar or salt to the water that we advise our readers to put the matter to a test themselves. The saying has it "What's one man's meat is another man's poison," and this apparently applies to flowers with much greater force. Sweet peas are said to last best in pure water; carnations to last longest in a 10 to 15 per cent sugar solution; roses in a 7½ to 10 per cent solution; and chrysanthemums in a 15 per cent solution; whereas lilies, lilac and pelargoniums do better in pure water than in sugar solutions, but respond to an addition of five per cent of common salt (one pound to two gallons of water). Experiments with other substances, such as nitrates and chlorides of soda and potash resulted in failure, and in some cases hastened the decay of the flowers, with the solitary exception that phosphate of potash was found to prolong the life of orchids; but the results were no better than those obtained from a 10 to 20 per cent sugar solution. Very possibly florists and some others have long been familiar with these facts but if so, and of the nature of a trade secret, it has been very well kept.

CAMDEN, N. J.—Arthur Crouch, who has conducted a florist business on Woodlawn avenue for several years, has discontinued the business and is selling out his stock.

MINNEAPOLIS, MINN.—The demand for window boxes filled with plants is so large that the florists have their hands full to meet it. This display of plants, being made for the civic celebration, is taking on an appearance of extraordinary beauty and it is believed it will be a decoration which will attract universal attention.

WREATH OF IVY LEAVES AND LILY OF THE VALLEY.

## THE CARNATION.

### Preparations for Planting.

The plants in the field will need steady attention right along, they are now well established in the ground and growing rapidly, therefore the work of keeping the shoots pinched back should be followed up closely to encourage the plants to branch out liberally. The growth of the plant at this time is so fast that it becomes necessary to go over them every week to keep the shoots from running up to bud. Cultivating the land and keeping it free of weeds is also another big job, but a little extra push in this connection will soon result in the weeds being under control, after which it will be a great deal easier to keep the field clean the balance of the season. The hand cultivator ought to be continually in use going over the field every few days to loosen up the surface and keep the soil open, taking care not to cultivate close enough to the plants to damage their roots or branches. This is the time for heavy thunder showers and should there be any low places in the field where the water will settle in pools, it is a wise plan to make small furrows to drain the water off, as there is nothing more detrimental to carnation plants than for them to be under water or on sodden ground, they quickly take on a yellow caste and become diseased.

It is a few weeks yet before the planting generally will be under way, but in the meantime there are several little items that can be attended to, the soil pile should not be overlooked and if the weeds are pushing up there pull them out, they are sapping a quantity of the nourishment from the soil as well as taking the moisture from it, cutting them off with a scythe does not do very much good, they should be pulled out by the roots and cleaned off the pile entirely. After the work in the field has been got well in hand there is plenty to do in the houses in preparation for the plants, any old plants not in use that have been left remaining there should be cleaned out, they are only acting as a breeding place for thrip and red spider. Then clear out the old soil and thoroughly clean the benches, washing out any of the old dirt that is lodging in the cracks, every particle of rubbish should be removed from under the benches, and then take the hose and give a thorough washing down inside the benches and the sides and ends of the houses. After these have had a good scouring the repairs should receive attention; do not try to run any benches another season unless thoroughly satisfied that they are strong enough to carry. The work of having to patch and repair benches after the soil and plants are in them is a difficult job. In cases of a shortage in stock to cover the intended plantings through an increase of glass or any other cause, now is the time to make arrangements for enough plants to come in from elsewhere, they can be ordered shipped when needed, but it more than pays to look up the best. Make arrangements for their proper care and the stopping back of the shoots until such time as it is desired to have them shipped.

### Violets and Carnations.

FROM A WOMAN'S POINT OF VIEW.

Paper prepared by Mrs. S. I. Smith, Scranton, Pa., and read before the Florists' Club of Philadelphia June 6th.

It is often said, that one is not in business for their health, I believe the pursuit of horticulture is a vocation apt to render that blessing, and therefore has lured to its fold many who have ventured without any prior experience, and through determination, and prompted by a keen love for plants and flowers, have made partial if not complete success. The trade journals have done much in bringing to us some knowledge of our fellow florists in our own land, and as much so, those of Europe—often telling us how success is achieved by those who specialize,

how and what their beginnings have been. The mutual benefit of this open and free discussion has helped the commercial side of horticulture more than it is possible to tell. The broad standard of the profession to-day, has stepped far ahead in the past decade, it has placed the grower and dealer before the public as important factors in the commercial world, created a demand for a higher grade of product, a more critical selection of what to grow, and a keener conception of what will satisfy the consumer. I am frank to say, that these are some of the salient points that I have learned since giving my entire attention to the business of a grower. I owe much to the trade papers for having kept me informed on many points, telling me how

things are being done successfully by others who are struggling as I am. The information that I have gained, has also been shared by a host of others throughout our land, both men and women, who have entered the profession as enthusiasts with little or no practical knowledge.

I was seeking health, I found it, should I not in turn be free to accord my strongest sentiments in favor of the florist business as a health giving vocation. I read with great interest the many notes concerning the women florists, who perhaps not all have entered the ranks as I have, but some are forced to continue the business left by a deceased husband, and also with a family depending upon the efforts of the mother, who believes that her experience gained while working in hand and shoulder with the bread winner, has fitted her to continue, with equal good returns for her efforts. I believe that women have a natural love for flowers, a more intense desire for everything that grows, a mother's instinct for nursing the tender growing child, is also shown in her close attention to the growing plant, and when this care results in profit, and a close study, shows what response the plants will give, then, I believe that she is fitted to conduct a business successfully, and if she possesses some executive ability, there is no reason why she should not be a profit sharer in the profession. The foregoing introduction is my idea of the qualification necessary to conduct a florist business by either man or woman.

I say with pardonable pride; that I started out as a specialist, and while this is the modern idea, I believe it is the best; it is better to do one thing well, than to dabble in many things; so I resorted to violets and carnations, a few other things have crept into my care and keeping, which I will touch on in a commercial way. To bring about the results, which necessity demanded, it was important to decide upon a few things needful for success, good soil, heating under proper control, cultivation and close attention. This could be done better by studying the habits of a few things, than by launching heavily into a labyrinth of variety. My first beginning was very modest—having a special fondness for violets, I thought best to begin in a small way, it was small, and yet enough to know whether my extreme fondness for a vocation on which my mind was set, would tire from the close care and attention which commercial growing required. I started in Atlantic City, N. J., with three sashes of violets, this very small beginning proved that violets had become a commodity, and only needed producers, and having learned enough to convince me that I dare venture deeper. The following year my possessions in equipment had grown to six sashes, so you will perceive that I had decided conclusively it was better to creep first, but my creeping was of a long duration, yet I believe that violets have peculiarities which requires several seasons to learn, and to overcome the troubles they yield to so easily. My ambition and anxiety to launch heavily into the business was encouraged by my success in this very small beginning, while slow yet entirely satisfactory. My next venture was transferred from Atlantic City to Secane, Delaware County, Pennsylvania, purchasing five acres of

ground, and erecting two houses 10x75 each. It is evident that my confidence had become fixed. This area of glass would produce violets which must find market, so a small shed was built over the boiler pit, this shed was the workshop for preparing the stock for market, bunching violets etc.—and was also the place where every conceivable plan of better and larger equipment was running through my mind, hoping that I could devote all of my time to commercial horticulture, as I had then decided that my intense love for flowers and their cultivation would never abate through even excessive labor demanded by increased facilities. It was necessary to provide for a domicile. I at once set to work making plans for a dwelling which was built during the summer and ready for occupancy in the fall.

My first year with all these responsibilities was up-hill work. I started with three varieties of violets viz: Luxonne, California and Lady Hume Campbell, double. I found the singles to do much better than the doubles, except in spring. This, however, did not discourage me. I was preparing for better and greater things, and when the following fall arrived, I had fine field grown plants with which to fill my houses, and was seized with that dominating desire which seems to have claim on every florist, of wanting more glass, so I purchased some sash and also some Princess of Wales violets, more to give them a test, although I knew it was a good standard variety. These sash gave me quite an extra area besides the houses, from which I reaped a good crop until Christmas, and then again in the spring. My houses were heated with hot water, and while my boiler seemed small I felt that a little coaxing might induce it to perform greater work, so I procured more sash, which with the help of the sash I had, would build a sash house—then I decided on one variety of violets, Princess of Wales which I still grow, and discarded all others. My boiler experience is what might happen to any florist who is straining all parts of the business to do its best, but I have since learned that it is false economy to tax one boiler for all work—another important item learned by experience, but as I could not boast

of a modern up-to-date establishment, had to resort to old-time methods.

The demand for my violets was greater than the supply; this was gratifying not only from its remunerative point, but I felt assured that I had used my knowledge gained by my very small beginning, being only an amateur, this gave me courage. The next year I enlarged my violet houses, secured a new boiler and dug a larger cellar, with a large new shed, and constructed a new house 25x125 in which to grow violets. I was told by experts that the house was not practical, "the glass was too far from the plants," and many other suggestions unsolicited were given, but my violets were the best, and all theories were exploded, as the violets seemed to like their new quarters. I also grew asters in this house, which were the finest in the market.

My stock was responding to the care which my knowledge prompted, I had already secured a good source as a market for my product, and like many, felt that my flowers were not good enough to be called first class or number one, but hoped that time and experience would create a demand for my special stock. My aim was high, and so should it be with every one. I felt proud to think that my flowers would be exhibited in the leading shop windows, and was anxious that those which my care and coddling produced, should be in demand by critical customers. This and many other conditions has been the means of encouragement. I then turned my attention to carnations, and purchased enough plants to fill my sash house 12x40. I may have been particularly careful and not enough sufficiently daring in my ventures, but I was sure that I could study few, better than many, so I began with Mrs. Joost and Queen Louise, and propagated enough from these plants to fill the large house by the following fall—my method of propagating was perhaps different from the usual system, a sand bed was prepared in one corner of my violet house—the carnations took nearly all winter to root, as the temperature was often 40° at nights. When they were rooted, they were put in flats, in soil without any fertilizer, my reason for doing this, is that the young ten-

PEONY FESTIVA MAXIMA AT GILBERT H. WILD'S, SARCOXIE, MO.

VINES AND SHRUBBERY AROUND A PORCH AT NEWTON, MASS.

Clematis paniculata, Aristolochia siphon and Spiraea van Houttei.

der plant will not become affected by any disease. They were planted direct from the flats into the open field which had been coated heavily with rotten stable manure and plowed under and kept cultivated through the season. The plants were in fine condition to be put into the house in September into solid beds. After they were established they were fed with ground bone. Ventilation was freely given during the day. My crop was good and continued to produce throughout the season. I then put up another house of even span 35x100 and planted it with violets the first year, but in which I now grow carnations and sweet peas together with another house alongside which I have recently built. I have added a propagating house, which is arranged to be converted into a growing house when wanted. The varieties of carnations now grown are Enchantress, White Enchantress and White Perfection, Beacon, Winsor, Mrs. C. W. Ward and Alma Ward. After venturing largely into construction from my point of view, there were many little drawbacks which I did not experience with my first venture with three and six sash and even the first house, and with the larger boiler pits, I experienced the trouble of water gathering around the boiler, and a possibility of having fires extinguished during cold weather. I have since seen construction which would never be affected that way. So with all these possible hindrances I gained experience and knowledge.

My reason for adhering mostly to violets and carnations is probably like the mother who wanted her boy to be either a butcher or a baker—for, she said, everybody eats bread and meat, hence the need of the producer. I

thought carnations and violets were so essential among flowers, that I would make no mistake, and should I wish to visit growers for the purpose of learning, I would not need go far away. I have never been backward in asking questions from others who know much more than I do—much of the information regarding fertilizers and other necessities has been gained in this way—and while there are many adverse conditions, which in spite of close attention and hard work often causes losses, yet with it all, I love my plants, the open air life, I love the work and everything connected with it, for when I began about nine years ago, I was in very poor health, and now I am well and strong.

#### The Planting of Porches.

A branch of the business that is too much overlooked is the adornment of porches, especially those with a sunny exposure. Some very beautiful effects can be brought out by the proper planting and care. The porches where the sun beats down during the middle of the day or in the afternoon need vines that will give a shade, and there are many of these that rapidly cover the porch and when in bloom add greatly to the decoration of the residence.

It is not necessary to be confined to one species of plant for these locations, for with a good-sized porch plants that will bloom in spring and fall can be planted at proper distances and thereby make this an interesting feature. The wistaria has always been popular and when it is full of its lovely hanging blue blossoms in early spring is always a great attraction and a beautiful sight. The Clematis paniculata is an equally decorative plant in the fall when it is covered with its sprays of

white flowers; the other clematis are fine for this purpose, although they do not make as heavy a shade; the Jackmani, with its large purple flowers in mid-summer, makes a very beautiful plant for this purpose. Roses are, of course, well known as among the best plants for this purpose and with different varieties of the climbing roses fine effects may be produced.

Where heavier shade is desired, Aristolochia siphon is one of the finest and in two or three years from planting will cover a large area, which with its heavy foliage and hanging flowers is sure to attract attention. Another plant that is much used, and does equally as well on porches on the north side, is the Ampelopsis quinquefolia, or Virginia creeper, which is also a very rapid grower after once getting established. While the flower of this plant does not amount to much, yet the foliage in the fall takes on beautiful colors and the large clusters of purple fruits are an added feature. The proper planting of the lower part of the porch demands attention and most of the low flowering shrubs are particularly adapted for this purpose, especially the deutzias or spiraeas. The porch which we illustrate is at Newton, Mass., and it is always an attractive sight throughout the year. It is planted with Aristolochia siphon at the rear and Clematis paniculata in front and in the ground at the base are Spiraea van Houttei, which are kept trimmed in shape.

There is one thing that should be always borne in mind in planting a porch with these hardy plants, and that is that they should be trained upon trellises that can be easily removed, and the plants not trained to the porch itself, for the porch must be painted and it is almost impossible to take the

plants down and replace them in good condition, but if attached to a trellis this can be laid over while the painting is being done and replaced when the paint is dry.

#### Notes of Aquatics.

Next in importance to the proper planting of aquatics is the care of the plants during their season, for, like most plants, they have their natural enemies, in the way of insect pests and some diseases that may be troublesome. Numerous incidents may occur where aquatics die from apparently natural causes, but this is a most unsatisfactory reason to the owner of the plants. The best and safest method to pursue is to become thoroughly familiar with one's plants, and note their likes and dislikes. Knowledge as to the conditions conducive to the best results comes with experience. Few plants suffer from being overfed or the soil being too rich, yet this does happen occasionally. Many suffer from starvation and over-crowding because of a desire to possess all the good things in limited quarters.

Where no artificial means exists for heating the pond it is not safe to venture planting *Victoria regia* before the end of June. It is yet in good season for planting *nelumbiums*, especially plants that are grown in pots or seed pans.

In natural ponds with muddy bottoms a leaf miner is occasionally troublesome. It cuts channels through the leaves and not only disfigures them but renders them useless to the plants. If this pest is not combated the plants will receive a serious check and suffer considerably. A weak solution of kerosene applied with a hand syringe or spray pump will quickly remedy this evil.

In sections where the lotus moth is troublesome keep guard and watch the first floating leaves. The larvæ can be readily detected on the margins of the leaves, where the edge is turned over and held in place by a fine, silky cobweb. Here is a shelter for the worm and it stretches full length from its hiding place, devouring all in front of it, retreating at the least alarm. The most effective remedy is hellebore applied with a bellows. The applications may have to be repeated frequently, as it is difficult to keep anything on the leaves, and the slightest shower will wash off the powder.

It is yet in good season to plant *Victoria Trickeri*. Plants set out at the end of June or early in July make most satisfactory growths and will produce flowers by the end of August or early September. Much difficulty is still experienced in the cultivation of this grand aquatic plant. It must not be treated like the *Victoria regia*. The seed will not germinate in the high temperature necessary for *V. regia*. The best temperature for seedlings is 65° to 70°, and after that 75°. The greatest hindrance to the proper cultivation of this plant has been the mistaken notion that it is a variety of *V. regia* and requires similar treatment. The *Victoria regia*, the Amazon lily, is a native of the tropics, while *Victoria Trickeri* grows wild in the quiet bays of the Parana and its tributaries in Argentina, and is also found in Uruguay.

WM. TRICKER.

BOSTON, MASS.—W. R. Finlay has opened a flower store at 175 Federal street near the South Terminal station.

#### A New Ventilating Arm.

A new device in the form of an arm to be used in connection with ventilating apparatus has been invented and is being placed upon the market by The Advance Co., of Richmond, Ind., manufacturers of greenhouse ventilating apparatus and fittings. The accompanying illustrations with the descriptions, clearly show the advantages of this arm as compared with other ventilating systems. The illustrations

Fig. 1.

were made from an arm giving the same throw as an eight inch elbow arm, the cross rods being eight inches long and the sash rod 21 inches long.

Figure 1 shows the arm in a right angle position, which with the elbow arm, is the position which twists the shafting pipe the most. In this new arm, by reducing the distance from the center of the shafting pipe to the center of the rods, without reducing

Fig. 2.

the throw, the twist which the arm exerts on the shaft when at right angles to it, is entirely eliminated.

Figure 2 shows the arm in a closed position. The distance from the shafting pipe, when in this position, to the center of the rod rivet is eight inches or the same as in the elbow arm, but the advantages of the arm when in

Fig. 3.

this position is that it is more rigid and very easy to start.

Figure 3 shows the arm in an open position. The arm, when in this position, has the same distance from the center of the shafting pipe to the center of the rod rivet as it has when it is closed, that is eight inches. The arm is very rigid when in this position and it requires no strain on the machines or other parts of the apparatus to hold it in an open position.

Fig. 4.

Figure 4 shows the construction of the arm. The part of the arm that clamps to the shafting pipe is made of two duplicate castings riveted together by a center rivet, and one bolt is all that is required to hold securely to the shafting pipe, for the rivet that holds the two clamp parts together also forms a hinge in the proper place on the opposite side of the pipe from the bolt. This feature makes the arm very easy to set up. After attaching the two clamp parts together an eight inch rod is fastened to each one of them near the outer edge, these rods are then crossed and fastened to the rod bracket, which carries the rod which is afterward fastened to the sash. The rod bracket is so constructed that it carries the sash rod between the two shorter rods that form the cross. The sash rod being carried on the inner side of the bracket is more rigid and has no tendency towards side action. Every allowance has been made, and every detail worked out, even to providing for rust corrosion, which will make the arm free in action after years of service.

This new style arm will give the same throw as the standard elbow arm, and when at right angles the rod will stand only seven and a half inches away from the shafting pipe. This arm has been named the "twistless" which is very appropriate. A test of this arm was made at the factory by placing a 50-pound weight on the end of the arm where it would be fastened to the sash. The pull on the chain over a 12-inch sprocket wheel which was found to be 42 pounds, while with an elbow arm the pull was 72 pounds, thus showing an advantage of 41 2/3 per cent for the new arm. The company claim they are fully protected by patents on this arm for they have a patent on the construction of the clamp parts that fasten around the shafting pipe and have a patent pending on the rod bracket which holds the two eight inch cross rods and carries the sash rod. Over 6,000 of these arms are in use at the present time and every one has given perfectly satisfactory results.

#### Propagating *Vinca Major*.

ED. AMERICAN FLORIST:

When and how should *Vinca major variegata* be propagated? How should the rooted cuttings be handled?

J. W. K.

*Vinca major variegata* can be propagated either in the fall or during the winter. The fall cuttings are made in September, cutting the long vines into pieces, being careful that each piece has two eyes. They will root slowly but surely, ordinarily taking about four weeks, when they should be potted in 2½-inch pots. About the middle of February they should be shifted to 3-inch or 4-inch pots and some very good stock will be had by May and June. When the plants are started in February the cuttings made in the same manner can be very easily rooted in a propagating bench and potted in small pots. These as well as the smaller plants of the fall truck stock should be planted in the field in May. By September they will make good-sized plants and should be potted in 5-inch or 6-inch pots and wintered in a cool house. About the first of March they should be given warmer quarters, where they will grow into large plants for decorative purposes.

W.

### Edwin Lonsdale at Home.

We are able this week to present to the many friends of Edwin Lonsdale an illustration of his home on the Burpee seed farms at Floradale, Lompoc, Calif. It was taken on Mothers' day, Sunday, May 14, and he is at ease in his hammock on the rose covered porch, where he can sit and look upon the beauties of nature in the garden in front of the house, which he so much admires.

Co. of Buffalo, N. Y., who are extensive manufacturers of this and other lines of special machinery.

### The Postal Express.

The sub-committee on post office and post roads met June 14 and took up for consideration the Lewis bill, which provides for condemning and purchasing the express companies and adding them to the postal system, and establishing a complete system for the quick trans-

eat, at living prices. Second, the contracts of the express companies with the railways give them an average transportation rate of three quarters of a cent a pound; and with this rate the express charges by post would be reduced from two-thirds to one-half on parcels ranging from 5 pounds to 50 pounds, and about 28 per cent on heavier weights, as a consequence of the co-ordination of the express company plants with the postoffice and rural delivery, and the elimination of the express company profits, which are averaging over 50 per cent on the investment.

"The express companies are positive hindrances and obstacles to the business of the country. The average charge for carrying a ton of express in Argentina is \$6.51, and for the countries of Europe \$4.12, while the average express company charge in the United States is \$31.20. They charge five times as much to carry a ton of express as a ton of freight in other countries. Here the express companies charge 16 times as much. Of course, these charges simply prohibit by half or more of the traffic in the United States. Our average is less than one hundred pounds per capita, while that of the other countries is over two hundred pounds per capita, although we have far greater demand for quick transport on account of our longer distances and more extensive business.

"We cannot have an efficient parcels post. The government cannot conduct it on mail railway transportation rates, at over four cents a pound, in competition with the express companies' paying but three-fourths of a cent a pound, excluding the weight of equipment in both cases; which enables the express corporations to pay over fifty per cent in profits to themselves, although rendering no service whatever to the farmers and to points off the railways."

Mr. Lewis has worked out a system of "zones" based on scientific methods, from which a five pound package, for instance, can be sent 196 miles for 11 cents, while the express companies now charge 25 cents and more for like distances; from Calais, Maine, to San Francisco, Calif., will cost 30 cents for five pounds, and \$2.42 for 50 pounds, as against the express company charges of 85 cents and \$7.50.

With the rural free delivery a part of the express system, an agricultural parcels post will market the farmers'

THE KLEINSCHMIDT SOIL GRINDER.

### The Kleinschmidt Soil Grinder.

All greenhouse owners recognize the desirability of getting the soil thoroughly well ground and perfectly incorporated with fertilizer. In a great measure this is a thing not thoroughly done by the crude means generally employed. The machine here illustrated was designed by Frank Kleinschmidt in 1901 for general grinding purposes, such as stable manure, etc. During the past year this grinder has been tried out on various kinds of soil grinding, and a special mill designed particularly for high class gardening and greenhouse work, with a view to producing a mill that will not only grind much more rapidly than any known mill, but at the same time most thoroughly incorporate all parts of the soil and fertilizer and grinds to any desired fineness.

These mills are carefully made. All working parts of the machine are made extremely heavy and substantial. The material used in the working parts being of either crucible cast steel or steel forgings.

One of these mills has for some time past been in service at W. J. Palmer & Son's, at their extensive greenhouse plant at Lancaster, N. Y., and B. S. Myers, manager of the establishment, says as follows: "The Kleinschmidt grinder No. 4 is a great time saver in the mixing and grinding of soil for our greenhouses. We formerly ground soil with the Kasting hand grinder, two men doing about six yards a day. With your grinder, run by a motor, we now grind fifty to fifty-five yards a day with five men. By putting conveyors to carry the soil in, and away, so as to be able to put more men feeding it, we would be able to double the amount, as the machine now runs empty half of the time, thus making the grinding of soil a very small expense." This grinder is manufactured by F. Kleinschmidt &

port of packages and the estate products of the farm and truck garden, etc. At their last conference in Washington the representatives of the business men of the country and of the farmers' granges asked congress to establish such a system, and representatives of these interests were present at the hearing before the committee today.

"There are two main reasons why the express companies must be added to the postal system," said Mr. Lewis in his argument. "First, the express company service does not reach beyond the railways to the country or the farmers, which the post office does, through the rural free delivery, which is waiting with empty wagons to receive the express packages and take them to the country stores and the farmers, and carry back to the towns and the cities the produce of the farms and truck gardens for the people to

EDWIN LONSDALE ON MOTHERS' DAY AT FLORADALE, LOMPOC, CALIF.

produce and save them the time and labor of marketing their truck. Rates even lower than those quoted are promised, by having the rural and city carriers assemble the small consignments of the individual shippers and utilize the fast freight service on trunk lines, with passenger trains on the branch roads to hurry the stuff to destination, at the regular fast freight rates. The postoffice will recoup itself by securing carload rates for the assembled shipments, while the small shippers get their advantage over present conditions by having their collect-and-delivery system for practically nothing.

This system is now in vogue in Germany, and shippers, Mr. Lewis shows, pay only double freight rates, less than a tenth of the express rates here. The food problem, the "high cost of living," according to Mr. Lewis' figures, is largely the result of the want of a proper articulation of our transportation with the rural sources of supply. While prices are often prohibitive to the consumer, crops may be rotting at the place of production, for want of a real express service."

[Readers who favor this movement should write their congressmen at Washington, urging its adoption.—Ed.]

#### The Kroeschell Medal.

The Kroeschell medal, which we illustrate, was offered as a special premium by Kroeschell Bros. Co. of Chicago at the exhibition of the American Carnation Society, held in conjunction with the Second National Flower Show of the Society of American Florists at Boston, March 28, 1911, for the twelve largest carnation blooms, and was awarded to Charles S. Strout, Biddeford, Me. The medal is beyond a doubt one of the most beautiful in design ever offered as such a premium, and was the work of the Schrader-Wittstein Co., Columbus Memorial building, Chicago. The general design is along the lines of an ancient coin, and in order that the recipient may be able to enjoy it to the fullest extent, it is made to be worn as a watch charm or fob. The charm proper is made of solid polished gold, the lettering on the outer edge being in rich green enamel. The carnation in the center is carved out of a piece of light yellow gold, brought out in high relief; this with the calyx of olivines, is a perfect carnation in miniature. The carnation rests upon a background of antique rose-colored gold, and these contrasting colors bring out the whole design in a very effective manner. The reverse side of the charm is finished in Roman colored satin-finished gold, and the inscription shows out in bright color.

NEW BEDFORD, MASS.—J. K. M. L. Farquhar of Boston delivered a lecture on "Growing of Roses" before the Horticultural Society June 5.

PENNOX, PA.—The West Laurel Hill Cemetery are preparing to erect four greenhouses 28x150 feet, an addition to a range of six houses of the same dimensions.

HUNTINGTON, L. L. N. Y.—The annual rose and strawberry exhibition of the Huntington Horticultural and Agricultural Society was held in the Trade School building June 15.

WISSINOMING, PA.—Fred A. Dittrich is making extensive improvements to his greenhouse plant this season. The stocks and myosotis which were grown last season were of fine quality.

## AMERICAN SEED TRADE ASSOCIATION

### THE MARBLEHEAD CONVENTION.

#### The Opening Meeting.

The twenty-ninth annual convention of the American Seed Trade Association convened at the Rockmere Hotel, Marblehead, Mass., Tuesday morning, June 20, and was called to order by President Page. Edgar Gregory made an address describing local points of interest and historical associations. President Page delivered a dignified and forceful address evidencing appreciation of and a conscientious attention to the duties of his office, a broad comprehension of the purposes and work of the association and an active enthusiasm in its accomplishment. He urged a maintenance of the present high standard of efficiency and personnel of membership, recommended the reappointment of state correspondents and the soliciting of all eligible and desirable concerns for membership, commended the work of the National Council of Horticulture and recommended its continued support, and the manner of use of disclaimer was commented on. Federal seed legislation along proper lines was indorsed. He referred to the deceased members and thanked the various committees and officers. Secretary-treasurer Kendel reported a total membership of 164, the receipts for the year were \$2,526.16, and the disbursements, \$2,453.20. The recommendations in the president's report were referred to the following committee: Leonard S. Vaughan, Watson S. Woodruff, D. C. McCullough. It was voted that the annual dues remain as at present. An obituary committee was appointed consisting of Chas. N. Page, Henry W. Wood and W. H. Barrett, and S. F. Willard, J. C. Robinson and J. S. McCullough as an auditing committee. At the afternoon session papers were read by H. J. Wheeler, Ph. D., Director of the Agricultural Experiment Station of the Rhode Island State College on "The Relation of Soils and Fertilizers to Seed and Crop Failure;" W. D. Ross of Worcester, Mass., on "Departments of the Seed Business;"

and Prof. R. A. Moore of the Wisconsin Agricultural Station, Madison, Wis., on "Improvements in Grains."

The following members were elected: E. A. Buck & Co., Worcester, Mass., German Seed and Plant Co., Los Angeles, Calif., F. H. Woodruff & Sons, Milford, Conn.; H. T. McCullough, Santa Inez, Calif.; L. B. Schulte, Houston, Texas; W. F. Cobb, Franklin, Mass.; E. Curtis Smith, F. H. Ebeling, G. H. Clark, Canadian Department of Agriculture. Prof. Woods in discussing the methods of opposing detrimental seed legislation thought it was best not to combat but for all interests to unite and assist in the enactment of fair legislation. Canadian reciprocity was discussed by G. H. Clark, C. H. Keeney and S. F. Leonard, and a hopeful view of the probable results predicted. The country was large enough to take care of everything that would result. The extent to which buyers will demand germination as well as purity tests in field seed was discussed. Prof. Woods took radical ground, declaring that germination tests will come sooner or later and the seed trade must get ready for them. F. M. Bolgiano of Washington advocated the establishment of a central bureau by the seed trade for carrying out tests of purity, but believed that vitality tests were impracticable, in which Mr. Ebeling agreed.

#### The Visitors.

Among the early arrivals were noted the following:

Linnaeus Allen, Floral Park, N. Y.  
H. C. Anthony, Portsmouth, R. I.  
W. W. Barnard, Chicago.  
O. J. Barnes, Malone, N. Y.  
W. H. Barrett, Adrian, Mich.  
F. W. Bolgiano, Washington, D. C.  
C. S. Briggs, Rochester, N. Y.  
Arthur B. Clark, Jr., Milford, Conn.  
Geo. H. Clark, Ottawa, Ont., Can.  
C. Herbert Coy, Valley, Neb.  
E. F. Crossland, Toronto, Ont., Can.  
Edw. F. Dibble, Honeoye Falls, N. Y.  
Albert Dickinson, Chicago.  
F. H. Ebeling, Syracuse, N. Y.

THE KROESCHELL MEDAL.

C. E. Kendel, Cleveland, O.  
Secretary-Treasurer American Seed Trade Association.

E. L. Page, Greene, N. Y.  
President American Seed Trade Association.

Marshall H. Duryea, New York.  
Second Vice-President American Seed Trade Association.

F. W. Eberle, Albany, N. Y.  
Geo. B. Edgerton, Buffalo, N. Y.  
H. E. Fiske, Boston, Mass.  
J. H. Ford, Ravenna, O.  
M. S. Griffith, Baltimore, Md.  
H. L. Holmes, Harrisburg, Pa.  
Frank Howard, Pittsfield, Mass.  
H. W. Johnson, Philadelphia, Pa.  
M. P. Johnson, Boston, Mass.  
C. N. Keeney, LeRoy, N. Y.  
C. E. Kendel, Cleveland, O.  
Burnet Landreth, Bristol, Pa.  
S. P. Landreth, Bristol, Pa.  
W. C. Langbridge, Cambridge, N. Y.  
S. F. Leonard, Chicago.  
Albert McCullough, Cincinnati, O.  
J. Chas. McCullough, Cincinnati, O.  
C. C. Massie, Minneapolis, Minn.  
L. L. Olds, Madison, Wis.  
Chas. N. Page, Des Moines, Ia.  
E. L. Page, Greene, N. Y.  
W. T. Phillips, Toledo, O.  
Hy Rice, Omaha, Neb.  
Jerome B. Rice, Cambridge, N. Y.  
J. C. Robinson, Waterloo, Neb.  
W. D. Ross, Worcester, Mass.  
H. A. Sculthorpe, Port Hope, Ont., Can.  
E. J. Sheap, Jackson, Mich.  
Herman Simmers, Toronto, Ont., Can.  
Curtis Nye Smith, Boston, Mass.  
W. D. Steele, Toronto, Ont., Can.  
W. E. Stone, Toledo, O.  
Dr. W. W. Tracy, Washington, D. C.  
Leonard H. Vaughan, Chicago.  
H. J. Wheeler, Kingston, R. I.  
Kirby B. White, Detroit, Mich.  
S. F. Willard, Wethersfield, Conn.  
C. F. Wood, Louisville, Ky.  
H. W. Wood, Richmond, Va.  
Watson S. Woodruff, Orange, Conn.  
C. D. Woods, Orono, Me.

#### Hail At Baltimore.

On Monday evening, June 12, at half past six o'clock, a terrific hail storm passed over part of Baltimore, coming from the southwest; it passed over Arlington, Lutherville, Towson, Govanstown, Pikesville, and along the Reisterstown road. The storm was accompanied by a heavy wind that uprooted trees and ruined shrubbery. The hail stones in some cases measured seven inches in circumference and fell in such quantities that at some places they covered the ground to the depth of two inches. Propelled by the high wind they ruined everything in the path of the storm, breaking glass and cutting the crops, some greenhouses not having

Leonard H. Vaughan, Chicago.  
First-Vice President American Seed Trade Association.

a whole pane left. It is estimated that the loss will reach \$100,000. The florists are the heaviest losers and only two carry insurance. Relief has been already offered by brother florists, who have come forward in the same spirit which they did a few years ago when a similar calamity occurred. President Graham visited the afflicted growers and in one went right to work assisting the owner and next day sent two men to help clear up the wreck.

The growers of Govanstown were the heaviest losers; Isaac H. Moss had 60,000 square feet of glass which was nearly all destroyed, two new houses being glazed with 9,000 lights of 16x24 double thick glass. The stock was nearly all ruined and the nursery stock badly damaged, the loss being \$10,000. M. Thau & Co. had nearly all the glass in their 25,000 square feet broken, the loss being estimated at \$7,000. F. C. Bauer's entire range of eight houses was destroyed and the stock badly cut up.

Stevenson Bros.' large range was greatly damaged. A. Anderson lost 80 per cent of his glass and the stock was considerably injured. M. Madison's three rose houses were damaged and the plants badly cut. Tischinger's three houses were broken badly. J. E. Bartell's houses were almost completely wrecked and the stock the same. At Arlington, G. M. Cook lost heavily, the houses being almost destroyed, the roof of the stable was blown off and the stock ruined, not even a vegetable left. E. A. Seidewitz and John Oler suffered considerable loss and A. J. Tonney lost over 3,000 lights of glass.

At Towson, J. Wagner & Son's range of houses were completely wrecked, the stock ruined and the outside crops suffered badly. Harry Klein escaped with a loss of about 300 panes. C. B. Hoffman at Pimlico was a heavy loser, the houses being badly damaged and the houses of O. J. Gregorius were wrecked and considerable stock ruined. At Woodlawn, George Tauth's range was badly broken and the crops injured and E. A. Seidelitz's three houses damaged. At Catonsville the storm was not severe, Charles Cook had just finished glazing a new house 20x100 and fifty lights were blown out. Frederick Seidlitz suffered a small loss, James T. Hamilton at Mt. Washington was a heavy loser, twenty large houses containing over 50,000 square feet were badly damaged as well as many valuable plants, the loss being about \$10,000. S. E. Sands of Hollings had 1,700 lights broken in his 19,000 square feet of glass, but was insured. G. V. Smith's place above Pikesville was considerably damaged. D. T. Quick did not suffer much from loss of glass, but the outside crops were ruined. At C. R. Diffendorfer's of Woodbrook, the houses were badly broken and many valuable plants destroyed. Many greenhouses on private estates were badly damaged and much shrubbery ruined. The demand for glass in Baltimore on Thursday was very large, to replenish what was destroyed by the storm, and the merchants were entirely cleaned out. Most of the growers will rebuild immediately, many having already started.

J. L. T.

AMERICAN ASSOCIATION OF NURSERYMEN AT THE SHAW GARDEN, ST. LOUIS, MO.

### Lincoln Park, Chicago

Although the season has been very dry and the weather very hot for early planting, yet the parks in which the citizens of Chicago take so much pride, and where the people throng on Sundays and warm days are in splendid condition at present, and by a liberal use of water the grass is as nice and green and the flower beds are beginning to be a joy for the visitors. A visit to Lincoln Park found everything in the pink of condition, the greenhouses, which are always an attraction for the thousands of visitors who pass through, are interesting and filled with a collection of palms and tropical plants that is rarely excelled, as well as a fine assortment of spring blooming plants. The orchids, around which a throng of interested spectators may be seen, are approaching the end of the season, but they have been glorious sight through the year and many fine cattleyas, laelias and odontoglossums are still to be seen. A fine lot of gloxinias well grown and full of bloom are a handsome sight, a very beautiful pure white, of which there are a number of nice specimens, being particularly attractive. A large bed of pelargoniums just coming into bloom is sure to be a grand show throughout the summer. The large herbaceous border is now full of bloom and a great education to those interested in home decoration, each plant and variety being correctly labelled. The smaller greenhouses are filled with splendid stock, particularly noticeable were a fine collection of tuberous begonias coming into flower and some especially well grown plants of chrysanthemums which give promise of a grand show in the fall. Head gardener Rudolph Schiele has the bedding out nearly completed and the large lawn in front of the greenhouse with its bright flower beds in fact approaching summer form. The tulips this year were quite disappointing, the same trouble which was noted last year of many plants not showing being much more pronounced than the year previous, one bed being almost a total loss. Mr. Schiele thinks that there is no question but that it is caused by the soil being infected by a fungous disease. The bulbs died out in the same places in the beds that they did the previous year, and in most cases the infected spots were larger. He believes the only way is to remove the soil and place new soil in these beds, which he intends to do another year. He does not think it is caused by any worm or insect or in any failing or disease of the bulb.

## AMERICAN ASSOCIATION OF NURSERYMEN

### THE ST. LOUIS CONVENTION.

#### In: Business Meeting.

The annual convention of the American Association of Nurserymen, held at St. Louis, Mo., a preliminary report of which appeared in our last issue, page 1114, was continued June 15 and 16. The meeting was called to order on the morning of Thursday, June 15. A report of the committee on civic improvement was submitted by J. Horace McFarland, who urged upon nurserymen the necessity of co-operating in the improvement of municipalities. He said: "The nurseryman is naturally and basically interested in civic improvement, or ought to be, because his business is an improving business. When he sells fruit trees and plants, he does it to those who are proposing to get a greater reward out of Mother Earth and to add actual wealth in the products resulting. When he sells ornamental trees and plants, he does so that 'the homes of men may be at least as pleasant,' in the rather bitter words of William Morris, 'as those of beasts.'"

A paper was read by F. H. Stannard, of Ottawa, Kansas, on "Extending the Retail Trade." He recommended sending out young, loyal, enthusiastic salesmen to create a demand by seeing the planters personally, and furnish superior stock. It is a mistake to suppose that in order to establish oneself in a territory that one must offer his goods at a low price. You cannot successfully conduct a retail business, and allow the retail prices to fluctuate with the wholesale prices.

Abner Hoopes, of West Chester, Pa., read a paper on "Standardization of Prices at Retail," in which he said: The nurseryman devotes his land, time, labor and capital to the production of his goods. If he grows stock by modern methods, fighting and destroying the numerous pests and successfully contending with climatic and other unfavorable conditions, it is only right that he should receive a price for his product which will justly and fairly compensate him for his trouble, expense and capital invested, as well as the risks he is obliged to take. By standardization of prices I do not mean a combination to fix prices, but rather a uniformity of price as an aid to the establishment of the confidence of the customer. Nothing is more injurious to business or more unjust than the sliding scale, or the so-called "elastic" price, which expands for one man and

contracts for another. Spare no expense in getting the best trees that can be produced, and then ask a price that will yield you a good profit.

"How to Extend our Wholesale Markets," was the subject of a paper by E. S. Welch, of Shenandoah, Iowa. All of us can help extend our wholesale markets by producing a better grade of trees, by being careful to grow the hardiest and most desirable varieties, and encouraging the distribution and planting of such stock as will give the planter the best possible results. Another method of extending the market consists in the introduction of valuable fruits, ornamentals, roses, vines, etc. The introduction of Frau Karl Druschki and ramble roses, the weeping birch, elm and mulberry trees have helped wonderfully in this direction. The nurseryman can materially assist in creating a demand for the best and most desirable varieties by planting freely himself, and giving the necessary attention to produce the best possible results.

W. F. Heikes, who was the first nurseryman in the country to establish grading of trees according to caliper, and himself devised a caliper that is being largely used in the trade, read a paper on "The Standardization of Grades." He recommended making six to eight grades in the leading kinds of fruit trees, as a rule allowing only the difference of a sixteenth of an inch in caliper between the grades. It is desirable that the particular point on the tree and plant where the caliper is taken should be definitely established, and that the character of the tree and plant belonging to each grade be more accurately described than is now customary.

The subject of grading was also spoken of by E. P. Barnardin, of Parsons, Kas., who said: The aim of uniform grades is to get every one to grade by both caliper and height, so that when one sees apple 5-6 ft. priced, or even No. 1, he knows that if he buys from the list that he will get three-quarter and up trees, and not from the size of a lead pencil to the size of one's wrist, simply because they have attained the required height. Mr. Barnardin submitted a grade list adopted by the Western Association of Nurserymen in 1906, and on his motion a committee was appointed to investigate and report on grades to be generally adopted at the next annual meeting.

AMERICAN ASSOCIATION OF NURSERYMEN AT THE SHAW GARDEN, ST. LOUIS, MO.

Mailing lists came in for extended attention. E. W. Kirkpatrick, of McKinney, Texas, spoke on the question, "Who Are Entitled to Trade Lists?" denouncing the practice of issuing trade lists indiscriminately to planters and unworthy dealers as a menace to the business and to all parties concerned. C. J. Maloy, of Rochester, N. Y., urged that all mailing lists should be classified, and no planter or large buyer outside the trade should receive either the list for trade prices or surplus lists.

Harlan P. Kelsey, of Salem, Mass., contributed a paper on "The Ethics of Our Business." He referred to the various unfair methods practiced by business men, among them being the nurseryman who endeavors to increase his sales by unfair methods; by giving the bribe or graft to the gardener, superintendent of estate, or public official; by stealing information the property of others; or by claiming what is, is not, or what is not, is. The gardener or other employee is hired to represent his employer's interest, and no sane man will argue that he is free to do so, or liable to do so after having accepted a bribe, or the promise of a bribe or gratuity. One can scarcely blame the underpaid gardener for increasing his meager income by accepting the small graft, when all concerned know that the employer is possibly or probably an employer only as a result of larger and more successful graft, bribery or other dishonest business methods. Actual bribery in the form of gifts and favor to employees of customers can and should be done away with, and the American Association of Nurserymen might very well declare itself at this time, in no uncertain voice. Let the power of public opinion, at least, act on those who practice this form of dishonesty and law-breaking, even if actual convictions cannot be had as quickly as some of us hope for.

Dr. J. C. Whitten, University of Missouri, read a paper on "Fall versus Spring Planting." Data showing the actual growth made by apple trees planted in the fall, as compared with those planted in the spring has, for the past two seasons, been recorded. Experiments were conducted in the experimental nursery on the horticultural grounds of the university, precaution being taken to eliminate as far as possible any other factor than the time of year when the trees were planted. The tables submitted by Dr. Whitten showed that the length of growth made by new limbs on fall transplanted trees was almost double that made on trees transplanted in spring. It was also noticeable that new root growth began to form very quickly on the trees planted in autumn, and callous formed more

J. H. Dayton, Painesville, O.

President Elect American Association of Nurserymen.

John Hall, Rochester, N. Y.

Secretary American Association of Nurserymen.

quickly where a large root was cut back in transplanting. On spring transplanted trees the root growth was very slow in forming. It is a well known fact that our soil is warmer in the autumn than it is in the spring, even though atmospheric temperature may be the same. There is a storage of heat in the soil which reaches its greatest depth in the autumn, and is given off during autumn and winter. It seems possible that the release of this great quantity of heat stored in the soil may furnish conditions to the autumn transplanted trees almost akin to mild bottom heat in hot beds. The farther south we go, the more is autumn transplanting to be recommended, while farther toward the north, where the autumn leaps quickly into winter, and where the severe winters make winter-killing at all likely, it will be safer to transplant in the spring.

Prof. S. J. Hunter, State Entomologist, University of Kansas, read a paper on "The Nurseryman and the Entomologist," urging a cordial co-operation between the two.

E. A. Smith, of Lake City, Minnesota, read a report on Root gall, giving the results of investigations carried on by him for several years which seem to indicate that the disease is not contagious. Mr. Smith urged that other nurserymen set out experimental plots in which to make further tests under varying conditions.

The Committee on Transportation made a report in which it stated that the members of the Uniform Classification Committee of the Interstate Commerce Commission who are handling the nursery schedule have decided that in the new classification trees and shrubs on bills of lading will have to be specified as "dormant shrubs," "dormant plants," etc., in order to avoid being billed at a higher rate. Rates to Colorado common points were lowered about 14 per cent and all intermediate points in Western Kansas and Eastern Colorado have been correspondingly lowered.

Mr. William Pitkin, Chairman of the legislative committee east of the Mississippi river, read a comprehensive report, touching on the evils likely to result from legislation now being proposed in Congress, and after an animated discussion the following resolution was adopted:

Resolved: That the report of the chairman of the legislative committee be accepted, and that this association heartily and thoroughly approves of the course of its legislative committee in connection with federal legislation during the past three years, and further resolved that this association confers on its legislative committee full

power and authority to act for it during the coming year in all matters of federal legislation, with the suggestion that this association favors federal inspection on some safe and practical lines, and that said committee shall use its strongest efforts to defeat any legislation that will place such absolute, arbitrary and discretionary powers in the hands of the Secretary of Agriculture and his Bureau Chiefs as has been proposed by the bills under discussion during the past three years.

Peter Youngers, of Geneva, Nebraska, reported for the legislative committee west of the Mississippi, citing several instances where grave injustice had been done nurserymen by the drastic inspection laws in force in various of the western states. Upon his recommendation the following resolution was adopted:

Resolved: That the president, executive committee and legislative committee be instructed and authorized to arrange for and conduct test cases in connection with the legislation affecting nursery interests in the States of Maine, Wisconsin, Montana, Colorado and Wyoming, and to expend such an amount as in the judgment of the executive committee is advisable.

Resolutions were also adopted, favoring the institution of the parcels post, and also the reduction of first class postage to one cent per half ounce.

The following officers were elected: J. H. Dayton, Painesville, O., president.

W. H. Wyman, North Abington, Mass., vice-president.

John Hall, Rochester, N. Y., secretary.

C. L. Yates, Rochester, N. Y., treasurer.

E. M. Sherman, H. B. Chase, J. M. Pitkin, executive committee.

Boston was chosen as the place for the next meeting.

### The Exhibits.

A. B. Morse, St. Joseph, Mo., nursery catalogs.

McFarland Publicity Service, Harrisburg, Pa., catalogs, booklets, etc.

Farker Nursery & Orchard Co., Tecumseh, Okla., new v. apple grafts.

E. A. Riehl, Altam, Ill., peaches, plums, apricots, pear, apple, crabapple on branches, this year's crop.

Wild Bros., Sarcoxie, Mo., peony blooms.

Homer L. Reed, Louisiana, Mo., graft wrapper, box clamp.

B. G. Pratt & Co., New York, lime sulphur, scalecide, scabicide, etc.

Stark Bros., Louisiana, Mo., tree digger.

Clinton Falls Nursery Co., Owatonna, Minn., packer, trencher, box clamp and quack grass digger.

National Nurseryman Publishing Co., Rochester, N. Y., copies June edition. Gilbert H. Wild, Sarcoxie, Mo., peony blooms, and photos blooming peony fields.

Thos. A. McBeth, Springfield, O., hydrangea plants in bloom, shrubs, vines and evergreens.

Fountain Cutlery Co., Philadelphia, Pa., hedge shears.

American Fruits, Rochester, N. Y., June edition.

The Austin Nursery, Austin, Tex., various varieties of pecan and other nuts.

Thos. Meehan & Sons, Dreshertown, Pa., raffia and calipers.

The Deming Co., Salem, O., spray pumps, nozzles, etc.

Grasselli Chemical Co., Cleveland, O., arsenate of lead, lime-sulphur and other spray material.

The Jeschke Mfg. Co., Bellevue, O., cyclone tile ditching machine.

L. F. Dintelman, Bellevue, O., tree baler.

St. Louis Cordage Co., St. Louis, Mo., twines and ropes of all kinds.

Jackson & Perkins Co., Newark, N. J., shrubs, ornamentals, etc.

J. G. Harrison & Co., Berlin, Md., ornamentals and fruit trees.

Rochester Lithographing Co., Rochester, N. Y., plates and books.

D. Hill Nursery Co., Dundee, Ill., evergreens.

W. N. Scharff, New Carlisle, O., raspberry, blackberry and dewberry transplants.

Benj. Chase Co., Derry, N. H., wood labels.

Dayton Fruit Tree Label Co., Dayton, O., wood labels.

The committee on exhibits added the following comment to its report: We feel that this feature of our annual meeting should be encouraged, and take this opportunity to express to the exhibitors our appreciation of the excellent showing made at this meeting. We hope that the incoming committee on exhibits will make it a point to stimulate the interest already manifested in this feature to the end that we may have in Boston next year, if possible, an exhibit which will continue to be the pride of the association.

### Hospitalities.

The entertainment committee, under the leadership of A. W. Ueber, of St. Louis, were exceedingly active in their efforts to make the social feature of the convention a success. The Shaw banquet, a boat ride down the Mississippi river, automobile rides and an outdoor luncheon and musicale for the ladies were among the pleasant affairs that were provided. W. P. Stark, the retiring president, also extended an invitation and the privileges of free transportation to all members and ladies who remained over Saturday to visit the Stark Bros. nursery at Louisiana, Mo.

### Secretary's Report.

In rendering a report of my stewardship for the past year I make note of the fact that, in accordance with instructions of the association at its last meeting, a card, containing the recommendations of a special committee of which J. H. Dayton was chairman, was prepared and a copy mailed to each member of the association. The recommendations or suggestions referred to treated upon the importance of establishing certain rules relating to maintenance of prices, etc. Doubtless members have heeded the injunction of Chairman J. W. Hill to "post them on your desk as a reminder that you voted for their adoption."

In further compliance with instructions of last year's annual meeting a "separate" containing the papers read at that meeting with reference to crown gall was also published. These papers bore the following titles: "Effect of Crown Gall upon the Orchard," by Peter Youngers, Geneva, Neb.; and "Royal Gall," by E. A. Riehl, Lake City, Minn. The edition of a thousand copies was proportionately divided for distribution by the committee, and the secretary retained a few copies to mail to those who made application to him for them. Of these there was quite a number.

It is to be regretted that in large organizations of such practical value as this there are annually recurring fluctuations in the membership. Over forty of those whose names were in our last year's list have failed to renew for the current year. Each one of these delinquents has received from the secretary at least two, and in some cases, more reminders of the importance of renewal. But there is another and a brighter side to the situation. Your secretary is considerable of an optimist, and not easily discouraged. Acting upon the declaration of Richelleu that "there is no such thing as a fail," he at once entered upon a widespread campaign after new material, and this has resulted in our not only making up the loss in last year's list but of also bringing the number of members up to over

thirty in excess of last year's registration. If members have not already made an analysis of the membership roll with reference to representation by localities we commend such a study as affording considerable interest. As an illustration I will mention the states having a representation of six or more, viz.: Colorado, six; Connecticut, six; Illinois, 25; Indiana, 15; Iowa, 12; Kansas, 21; Michigan, 20; Missouri, 18; Nebraska, 10; New Jersey, eight; New York, 78; Ohio, 25; Oklahoma, six; Oregon, six; Tennessee, 13; Texas, nine. I trust this reference may awaken a new interest among members, even to the creating of a friendly rivalry to see which state can next year make the largest addition to its present representation.

In our anxiety to reduce expenses we have this year invited bids for the publication of the badge book and of the annual report. There was a difference in figures between the lowest and the next highest of \$50, and a difference between the lowest and the highest of \$146 for the printing of both publications. We believe the appearance of the badge book of 1911 justifies the experiment.

### DECEASED.

Prosper J. Berckmans passed away on November 8, 1910, in his 51st year. He was long identified with this association, and those who knew him best heartily endorse the comment of the Florists Exchange, viz.: "Mr. Berckmans was endowed with a graceful, commanding figure, and a charming personality. His death will be generally regretted in horticultural circles."

In the removal of Samuel C. Moon this organization has lost another valued associate. Mr. Moon died in January last, in the 51th year of his age, and was buried on January 22. The National Nurseryman thus referred to him: "A refined, cultured gentleman, a true plant lover, his loss to nursery growing interests is heavy."

James H. Kennedy died September 6 at Dansville, N. Y., aged 49. Though not a member with us at the time of his death, Mr. Kennedy formerly held membership in this association.

More extended reference will be made to the above in the annual published report.

It seems not unfitting that we should mention of the fact of the death of several others who have died during the year, and who, though not officially identified with this organization, claim passing recognition because of their prominence in the horticultural world:

Robert Buist, the well-known seedsman of Philadelphia, died December 13, 1910, in his 73d year. The father of Mr. Buist came to this country from Scotland, and was reputed to be the first florist and nurseryman in the Quaker City. Thomas Meehan, writing of Mr. Buist's death, remarked: "Horticulture does not yet know the full value of the friend it has lost."

J. H. Reynolds, the oldest nurseryman in the state of Michigan, and pioneer of Monroe, died July 21, 1910, in that town, in the age of 91 years. Now can we refrain from mentioning the death of Jean Souperet, a well-known rosarian, who died July 16, 1910, at the age of 76 years. The name of Jean Souperet, and that of his brother-in-law and partner, Pierre Notting, who died in 1895, will long remain fragrant as the roses which bear their respective names.

Perhaps one of the saddest of sad events of the year was associated with the death of F. Haussman, one of the largest nurserymen in Los Angeles, Calif., which occurred March 9 last, at the age of 56 years. He left a widow, one son and one daughter. Fourteen days later the son, described as a quiet, industrious boy, only 20 years old, was so grieved at the death of his

father that he crept under the propagating bench in the greenhouse and shot himself in the head.

The secretary makes the following financial statement. He had received to June 3 from all sources \$2,771.85, which has been remitted to the treasurer or is in deposit in the bank.

#### The Shaw Banquet.

The twenty-second annual banquet tendered the gardeners of the Missouri Botanical Garden and the invited florists, nurserymen and market gardeners of St. Louis and vicinity, which was provided for in the will of the late Henry Shaw, founder of the Shaw Gardens and Tower Grove Park, was held in the banquet room of the Southern Hotel on the evening of June 15. About 400 guests were present of whom some 300 were members of the American Association of Nurserymen, which was holding its convention in the city at the time. Dr. William Trelease, the director of the Missouri Botanical Garden, welcomed the guests in behalf of Mr. Shaw, and said that this was the twentieth occasion at which this had been his pleasant duty. The toasts of the evening were all glowing tributes to the man, who by his generosity and farsightedness, had made possible the gathering each year, of men representing the best interests of the horticulturists of the country.

The toast, "Our Guests," was responded to by the new president of the American Association of Nurserymen, J. H. Dayton of Painesville, O. In part he said that this was the third time that the nurserymen had met in St. Louis as the guests of Mr. Shaw, this being his first occasion to attend. Adolph Jaenicke, head gardener of the Missouri Botanical Garden, responding to the toast, "Our Guests," gave an outline of the work of the institution, its growth in the past and the plans for the future. In the course of his talk he spoke of the plans which the trustees are now considering, for the building of new greenhouses for the accommodation of some of the splendid tropical specimens at the garden. The Florists' Club of St. Louis, which is the strongest organization of its kind in the city, celebrates its quarter century anniversary this month. Secretary J. J. Bencke responded for the club to the toast, "Our Quarter-century." He said that it was curious that among those present at the first meeting of the club was Mr. Shaw. The club is now in a prosperous condition and has a membership of over 90. "Our Parks" was responded to by the new park commissioner of St. Louis, Dwight N. Davis. He spoke of the necessity of park spaces in the down town districts, and said that he believed that such work should aim to interest the children. He also scored the park waters of the "Keep off the grass" signs were on exhibition. "Our Opportunities" was assigned to J. W. Hill of Des Moines. He spoke of the visit of the nurserymen to the Shaw Gardens on the afternoon of June 14, and also of the marvelous growth of the nursery business in this country. He ended with a tribute to Mr. Shaw that brought hearty applause.

The plans for the future park and business development of St. Louis were ably presented by the Hon. J. H. Gundlach, president of the city council. He spoke of the plans for the improvement of the levee by a walled terrace garden, and the construction of an immense parkway connecting Union station and the municipal center, in the heart of the city. The plans for the other park system were also described in detail.

J. C. Whitten, professor of horticulture at the University of Missouri, fittingly answered the toast to "Our Men" as a former garden employee. He said that the work of the garden in its relation to the results obtained in a scientific way, is for the best interests

of all plantmen, and that the scholarships and fellowships at the disposal of the garden, all eventually, in their application, tend to the improvement of the trade as a whole. In every part of the world there may be found men that have derived their inspiration, and sometimes their instruction, from the men at the Shaw Garden.

#### Convention Notes.

About 60 of the members went in a special on Saturday, June 17, as the guests of Stark Bros. to their nurseries at Louisiana. They were received upon their arrival by a brass band and the mayor of the city, taken to the nurseries and a tour of the thousand acres was made. A picnic lunch followed by speeches and a tour of the town was the final feature.

The Chicago Tribune stated that because the women at the Chicago Beach hotel, when the convention was previously held there, referred to the delegates of the Association as a "bunch of farmers," Chicago lost the next year's convention.

The "high handed action of some entomologists" came in for considerable censure, especially those who have condemned and destroyed carloads of nursery stock without the shippers having anything to say about the matter.

John Watson made such an eloquent nomination of J. H. Dayton that the election of president was unanimous and he was liberally applauded for his address.

The members did not forget the efforts of former Speaker Cannon in his efforts to assist the nurserymen in Congress.

#### Additional Visitors.

E. P. Barnardin, Parsons, Kas.  
W. C. Barry, Rochester, N. Y.  
D. E. Bingham, Sturgeon Bay, Wis.  
R. J. Coe, Pt. Atkinson, Wis.

John Watson, Newark, N. Y.  
H. J. Weber, Nursery, Mo.  
G. H. Whiting, Yankton, S. D.  
A. E. Willis, Ottawa, Kas.  
C. L. Yates, Rochester, N. Y.

#### Salt Lake City, Utah.

The spring rush is over and the florists have nothing on hand but the season's work. Everyone seems well satisfied with the year's business, in fact, the florists seem to be more prosperous than those in many other lines. With the favorable weather that we are now having garden flowers will be good. Sweet peas are just coming in. There was a large crop of peonies which came in too late for Decoration day and had to be sold at low figures, but most of them were disposed of at some price.

#### NOTES.

There is considerable new glass going up in this vicinity. Olaf Lingreen has been in charge nearly completed at Bountiful. Great success is predicted for Mr. Lingreen as he is a good grower and has the necessary quali-

cations to make a successful florist. The Miller Floral Co. of Farmington have added a large addition to their range and will be in much better shape to handle their growing trade in the future. Mr. Miller has demonstrated to the people of Utah that roses could be grown successfully here, and it looks now as if we should soon be able to grow all the stock needed for local demand.

The Pinchin Floral Co. are making some repairs and improvements to their greenhouses. They are planning to put in a new hot water boiler with the Honeywell generating system.

The Ogden Floral Co. are sending in some good carnations for this time of the year.

The Sugar House Floral & Seed Co. say that this season was the best they have ever had. They make a specialty of carnations and sweet peas, and grow them to perfection. UINTA.

#### Catalogues Received.

Bobbink & Atkins, Rutherford, N. J., nursery stock; R. Vincent, Jr., & Sons Co., White Marsh, Md., wholesale trade list of vegetable, greenhouse and bedding plants; King Construction Co., North Tonawanda, N. Y., greenhouse construction; E. A. Ormsby, Melrose, Mass., ventilating system; American Woodware Mfg. Co., Toledo, O., plant tubs, etc.; Kramer Bros. Fdy. Co., Dayton, O., lawn vases, window boxes, etc.; Northrup, King & Co., Minneapolis, Minn., seeds; David Herbert & Son, Atco, N. J., dahlias; John Lewis Childs, Floral Park, N. Y., gladioli and other summer flowering bulbs; Henry Field Seed Co., Shenandoah, Ia., seeds; Wintersop's Seed Store, seeds, roses, etc.; Peter Henderson & Co., New York, lawn supplies; Horticultural Co., Worcester, Mass., landscape gardening; Leesley Bros. Nurseries, Chicago, wholesale list of nursery stock; Robert T. Pinkerton, Montreal, Que., seeds, plants and bulbs; North Shore Ferneries Co., Beverly, Mass., garden furniture; Noah's Ark Stores, Boulder, Colo., seeds; Campbell Floral Co., Calgary, Alb., seeds and bedding plants; Conrad & Jones Co., West Grove, Pa., trade list of roses, cannas and shrubs; Sadie A. Thomas, Pasadena, Calif., chrysanthemums; National Co-operative Show Gardens, Spencer, Ind., dahlias, bulbs, plants and seeds; Alonzo J. Bryan, Washington, N. J., wholesale list of flowering, decorative and vegetable plants; F. W. Kelsey Nursery Co., New York, special list of trees, shrubs and hardy plants; Geo. H. Walker, North Dighton, Mass., dahlias; Collidge's Fernery & Rare Plant Gardens, Pasadena, Calif., rare ornamental fruiting plants, etc.; Rocco Boiler Co., Erie, Pa., boilers; W. H. Barrett, Adrian, Mich., tomato seeds.

L. Daehnfeldt, Odense, Denmark, seeds; Conrad Appel, Darmstadt, Germany, list of forest and agricultural seeds; J. Blaauw & Co., Boskoop, Holland, nursery stock; Gt. van Waveren & Kruljiff, Sassenheim, Holland, bulbs and spirae; Barr & Sons, London, Eng., land, trade list of daffodils, tulips, etc.; S. Bide & Son, Farnham, England, trade list of new roses; G. Overdeest & Sons, Wassenaar, Holland, wholesale list of bulbs and flower roots; V. Lemoine & Fils, Nancy, France, plants, seeds and bulbs.

ST. PAUL, MINN.—August Swanson, who has been in business here for 22 years will retire from the florist business, having sold out to the Merriam Park Floral Co. He will devote his attention to the Five Finger Coal Co., of which he is president, and will shortly leave for Alaska to look over the property and inspect the mine.

# THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, \$1.00 a year; Canada, \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements. Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

THE class "flour" of the Smithville school, according to the Orville (O.) Courier, was "American Beauty." Why not "—'s Best?"

THE St. Louis Florists' Club's twenty-fifth anniversary banquet will be held at Peckman's Hotel, 4205 Olive street, June 28, at 7 p. m.

COMPLAINTS are at hand that bulbs of Narcissus poeticus albus plenius odoratus (commonly called N. Alba Plena Odorata) fail to bloom in southern Mississippi. Does any reader know the probable cause of failure in that section of the country?

### Personal.

President Valentine of the American Carnation Society was born June 26,

### National Council of Horticulture.

The seventh installment of the press service of the National Council of Horticulture contains articles entitled, "More About Watering Plants," "Window Gardening," "Salvia," and "Annual Phlox." These articles are forwarded to the press free of charge by James H. Burdett, secretary, 1620 West One-hundred and Fourth place, Chicago. Florists should see that their local editors receive and publish them, for they promote an interest in the culture of plants and flowers.

### Society of American Florists.

#### DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the roses, Ruby Queen, May Queen, Pearl Queen and Royal Cluster by the Conrad & Jones Company, of West Grove, Pa., becomes complete.

#### MID-LENT MEETING.

At the Mid-Lent meeting of the society the following appropriations were made for the year 1911:

|                                                                                           |          |
|-------------------------------------------------------------------------------------------|----------|
| Tariff work of the legislative committee .....                                            | \$100.00 |
| General work of the legislative committee .....                                           | 100.00   |
| Entomologist .....                                                                        | 50.00    |
| Pathologist .....                                                                         | 50.00    |
| Botanist .....                                                                            | 50.00    |
| Annual badges .....                                                                       | 75.00    |
| Clerical assistance to secretary at annual convention.....                                | 50.00    |
| Clerical assistance to secretary at adjourned meeting.....                                | 25.00    |
| Sports committee .....                                                                    | 50.00    |
| President's messenger and assistants, or so much of such amounts as might be needed. .... | 25.00    |

Attention should be called to the work of the entomologist, pathologist and botanist. Prof. H. H. Whetzel of Cornell University is the pathologist and has taken up the study of certain plant diseases upon which he will report at the August meeting. Dr. S. A. Forbes, the entomologist, being unable this past year to give the work the proper amount of time, placed it in the hands of J. J. Davis, who presented the report given on pages 34-42 of the twenty-sixth annual report. This is well worth studying. The botanist, Prof. J. F. Cowell, is always ready to help the members on any botanical question. I call your attention to the work of these officers as it is well worth your support.

At the same meeting, on motion of F. R. Pierson, seconded by W. F. Kasting, the adoption of the following amendment was recommended to the society:

To amend article IV., section 2 to read as follows:

Sec. 2. Fees and assessments—Any eligible person may become a member of the society on the payment of \$5.00, and such payment shall cover the annual dues for the balance of the calendar year.

The annual dues shall be \$3.00 per year, payable in advance on the first day of January. Any person may become a life member on payment of \$50.00 and be exempt from all further assessments.

The object of this amendment is to make it possible for any person to become a life member of the S. A. F. on the payment of \$50.00 irrespective of

the fact that he is already a member or not.

A rate of 13-5 on the certificate plan has been granted by the Trunk Line Association. The New England, the Central and the Eastern Canadian are still to be heard from. Further information regarding rates will appear later.

H. B. DORNER, Sec'y.

### National Sweet Pea Society.

The National Sweet Society of America will convene at 3 p. m., June 29, 1911, at Horticultural Hall, Philadelphia, Pa. After an address of welcome, President Burpee will deliver his address and the secretary's report read. The next business will be the nomination of officers and the receipts of invitation for the next meeting place. Leonard Barron of New York, will read a paper on "The History of the Sweet Pea." The society will then elect officers for the ensuing year. In the evening at 7 p. m., the next meeting place will be selected and a paper by Prof. John Craig or A. C. Beal read. On Friday, June 30, the question box and unfinished business will be attended to and in the afternoon on the invitation of W. Atlee Burpee, the members of the society will visit the trial ground of W. Atlee Burpee & Co., at Fordhook Seed Farms, Doylestown, Pa.

### Tulips Coming Blind.

#### ED. AMERICAN FLORIST:

I hear many conflicting reports on the "coming blind" of tulips both forced and grown outdoors. Growers seem inclined to blame the Hollanders while some of the latter say the bulbs are kept dry too long before potting, and are not well treated in subsequent care. What light can you give me on the subject? VERITAS.

There is no question but that when bulbs are kept too dry, and too long before planting, or are allowed to become too dry after being potted, the foliage will grow and that no flower will be produced, or the bud will blast after showing in the foliage. Whether this is the whole cause of the trouble is a question, but bulb buyers have a remedy. When purchasing bulbs of tulips, narcissi and hyacinths if there is a question as to the vitality a few bulbs can be cut in halves, and the flower can be plainly seen wrapped in the centre of the bulb. If the bud is fresh and plump, the bulb should produce good flowers, but if it is dry and has begun to shrivel, the chances are that the flowers will either not show or will blast. Bulbs for forcing should be potted as soon as they are received, and properly taken care of, and all grounds for complaint from this source obviated. W.

### Cut Worms on Carnations.

#### ED. AMERICAN FLORIST:

My carnation plants, planted in the field, are being eaten by cut-worms. Can you inform me how to get rid of them? W. A.

Wisconsin.

The cause of cut-worms in the carnation field comes from newly ploughed soil. The best remedy we have found for them is to mix a little paris green with air-slaked lime or fine sifted wood ashes and dust over the plants in the evening. C. W. JOHNSON.

## Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—In packing and shipping department of a Chicago wholesale house; experienced; can furnish the best of references.  
Key 467, care American Florist.

**Situation Wanted**—By all around seed man, either as manager of retail house or a position of trust; can give high class reference; about 30 years' experience in the seed business. Address

### Chicago.

#### SIGNS OF SUMMER.

The approaching summer can be easily observed in all branches of the business, not only by the flowers that are shown but by the general tone of all in the trade. Both the retailer and wholesaler now have time to talk baseball and ask business questions, and in some of the stores the checker boards have had the winter's accumulation of dust brushed off and are in handy reach for those that have a little time at their disposal, which has not been the case for the last ten months. The retail business showed a marked falling off during the first half of the present month as compared with the same period of previous years. Some attribute this condition to the unusually hot weather of May and early June. The replanting of the rose house which is now being done has caused quite a falling off in the receipts of roses and the past week has seen the stock disposed of very nearly as fast as it comes in. On Saturday night there was a general clean up, and Sunday there was very little to spare at any of the wholesale houses. Considering the weather that the growers have had to contend with, much of the stock is in fine condition, and much better than it was after the excessive hot weather early in the month. Roses are particularly good, some fine American Beauties and Killarneys being seen, and splendid My Maryland and Kaiserins. Carnations are approaching the end and are not nearly up to the desired size and many are off color. Lily of the valley is fine and in quantity for all the month's weddings. Lilies are in good supply and of good quality and some very fine Liliun candidum are seen on the market this week which are very nice for funeral work. Sweet peas are also good and the beautiful Spencer varieties, which have been

aply called "Butterfly," are very conspicuous in all the retail stores. Nymphæas both white and colored are features in the window displays and they attract a great deal of attention. Field daisies in vast quantities are to be seen and used freely. Beautiful cattleyas adorn the windows and for the light trade that is being done are receiving their share of attention. Of outdoor flowers the early summer varieties are being shown; white phlox made its appearance on the market this week and gaillardias, coreopsis and delphiniums with the large vases of peonies fill the windows with bright colors.

#### GLADIOLI.

Gladioli, forced for early bloom, have been quite a feature of the market this season and the spikes were remarkably fine. The varieties most generally employed for this purpose are America, Augusta, Mrs. Francis King and Shakespeare, and the season and prices (per dozen spikes) ran about as follows:

| Variety.          | Apr. | May.   | Jun.   |
|-------------------|------|--------|--------|
| America.....      | \$ — | \$1.50 | \$1.00 |
| Augusta.....      | 1.00 | .75    | .75    |
| Mrs. F. King..... | 1.00 | .75    | .75    |
| Shakespeare....   | —    | .75    | .75    |

#### NOTES.

H. C. Wendland of Wendland & Kelme, the well-known growers of Elmhurst, will leave June 25 for Germany to join his family, who have been visiting relatives there since last April. Mr. Wendland's many friends wish him a safe journey and a speedy return.

Chas. E. Morton, manager of the Los Angeles Flower Market, Los Angeles, Cal., surprised his many friends in the local market when he called on them this week. Mr. Morton is by no means a stranger among us, for it will be remembered that he was formerly in the retail business here several years ago.

The force at the Poehlmann Bros. Co.'s store worked overtime on June 18, when a large number of shipping orders were filled. The American Beauty roses that this firm is cutting are of the first quality, of exceptionally fine color, on long stem, with luxuriant foliage. This firm received 104 cases of orchids this week from their collectors in South America.

Fred Hinks, formerly with the Chicago Carnation Co., is meeting with much success as gardener at J. K. Lyons' home at Hubbard Woods.

The gladioli that J. A. Budlong is cutting are of exceptionally good quality and the finest we have seen in the market.

Frank Kral, 1907 South Halsted street, who was elected delegate of the Pilsen Court 1421, was in attendance at the state convention of the Catholic Order of Foresters, held at Rockford, last week. Frank reports a good meeting and a good time.

L. Hoeckner realized a nice profit from the sale of flowers at his booth in Riverview Park last Sunday, when the attendance was unusually large. "Stogie" is an industrious worker and is deserving of much success.

E. E. Pieser of Kennicott Bros. Co. says that his customers from all parts of the country are writing that they are having a continued dry spell.

The Athenian Floral Co., who recently started in business, is now comfortably located in their handsome new store at 35 East Van Buren street.

Zech & Mann are having their share of business nowadays and are filling a large number of local and shipping orders.

Klem's fancy peonies continue to be the chief offering at Kyle & Foerster's store.

Ed. Amerpohl, of Janesville, Wis., was a welcome visitor on Saturday, June 17.

Frank Pisternik the popular young buyer for the Ernst Weinhaber Floral Co., and Miss Elizabeth Kleinselter were married at the St. Paul Lutheran church on Wednesday, June 21. The happy young couple left for Wisconsin after the ceremony where they will spend their honeymoon. Mr. Pisternik's many friends wish him a safe voyage on the sea of matrimony and hope that all his troubles will be little ones. The groom wishes to express his thanks through our columns for the many wedding presents received and was especially pleased with the one presented to him by his many friends in the local market.

The Florists' Club transportation committee held a meeting at Ed. Winterson's, June 15, to consider plans for the Baltimore trip. The route and fares will be announced at an early date. Phil Foley is chairman. Call him up on Canal 54.

N. J. Wietor and John Sinner, two prominent wholesale florists, H. E. Griffin of the Wagner Electrical Co., J. A. Maloney of the Santa Fe Railway Co., Edw. A. Ollinger of the AMERICAN FLORIST staff and Frank Kneip a prominent chef will leave Friday, June 23, for a two week's fishing trip at Sand Lake, Wis.

A. Chronis of Johnson & Chronis, the well-known florists of this city, is making preparations to visit his boyhood home in Greece and will sail from New York on Wednesday, July 5. Mr. Chronis, accompanied by his family, expects to be gone about three months, returning some time in October.

The Chicago Carnation Co.'s crack baseball team won its second game of the season last Sunday when it defeated the Morley's by a score of 11 to 7. The players have been measured for their uniforms and are anxiously awaiting the day when they will arrive.

John Degnan badly wrenched his shoulder at his home on the evening of June 14. He tripped on the stairs and would have fallen had he not caught himself, which caused the injury; but he is on the job as usual, none the worse for the accident.

Vaughan & Sperry are filling many orders for an exceptionally fine grade of American Beauty roses, lily of the valley and peonies. Some splendid cattleya blooms are being received at this store this week.

Hoerber Bros. are having a good demand for their My Maryland, Mrs. Jardine and Killarney roses. The local and shipping trade at this store has been very good this week.

The Chicago Flower Growers' Association is on the lookout and is advertising for a capable manager. Those wishing to apply for the position should address Geo. C. Weiland, Secretary, Evanston, Ill.

The regular meeting of the Florists' Club will be held at the Union Restaurant, July 6. W. G. McGee of the Pulverized Manure Co. will read an interesting paper on fertilizers at this meeting.

Peter Propps, who formerly had a stand in one of the down-town clothing houses, is now conducting a store at the corner of Arlington and North Clark streets.

Ed Winterson truly says the longest day is none too long for him as he was born on that day 1898. And the funny thing about it is that every man in the crowd believed it except those who had been to church with him. He had his hat on.

Bassett & Washburn are showing some extra fine Liliun candidum and a fancy grade of sweet peas at their store this week. The eastern ferns that this firm is receiving are arriving in good condition.

J. C. Craig says that he is going to spend his vacation in California this year, leaving some time in August.

W. N. Rudd, J. F. Ammann, Edwardville; F. L. Washburn, Bloomington, and J. C. Vaughan attended a meeting of the Experiment Station advisory board at Champaign, June 16.

John Muir filled several good sized commencement orders at his store on Michigan avenue this week. One order was for 40 bouquets of Killarney roses and another for 108 dozen peonies.

Martin Peterson, the West Division street florist, brought back a nice string of black bass from Twin Lakes, Wis., last week.

Tim Matchen, the manager at the Peter Reinberg store, says that both the local and shipping trade has picked up considerably the past week.

John Mangel says the traveling public is now disposed to concede that the Blackstone is a top-notch hotel.

John J. Welsh, who opened a store last November at the junction of Montrose boulevard and Evanston avenue, reports business good.

Frances B. Stanmeyer, 5430 Evanston avenue, is talking about adding a small greenhouse to her store.

Daniel Branch is moving into his new store which he recently built at Fifty-eighth street and Prairie avenue.

M. Wolniewicz, 3301 Claremont avenue, is going to install a new Moninger Furman boiler in his greenhouses.

Fred Strail and family will leave July 1 for Twin Lake, Mich., to spend a few months at their summer cottage.

John Poehlmann celebrates his birthday on the longest day and this is the forty-fourth anniversary.

Deamund's fancies run very heavy on peony sales this month.

Chas. Balluff is now in the employ of Bassett & Washburn.

# Large Crop of Beauties

**and Roses all of the Best Varieties**

The quality is as fair as the weather conditions will permit, and we can truthfully say that there are no better flowers coming into this or any other market.

**Send Your Orders Direct to the Grower and They Will Be Taken Care of**

**2 000 000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

The planting is about finished at the Geo. Reinberg greenhouses and the help is now prepared for the summer work. Mr. Reinberg informs us that his foreman, Wm. Arnold will leave his employ on June 22 after seven years of valuable service. Mr. Reinberg speaks very highly of his foreman's ability as a grower and wishes him much success in his future undertakings.

Mrs. George Asmus, wife of the president of the Society of American Florists, and Mrs. Chas. W. McKellar will represent this city in the ladies' bowling contest to be held at the convention at Baltimore. Mrs. McKellar jokingly says that she intends to bring back to the city the Peter Reinberg cup which she has already once won.

E. C. Amling is acting as bookkeeper at the store while Miss Minnie Watman is enjoying her vacation at Alton, Mich. John Michelson points with pride to the splendid grade of cattleyas that they are receiving, also to the American Beauty roses of which they have a large quantity.

Leonard Kill, still located at Los Angeles, Calif., is now selling irrigated farm lands.

W. H. Kidwell is making frequent trips to Bloomington, Mich., where his summer cottage is located.

George is king.

Visitors: J. E. Lapes, Cedar Rapids, Ia.; Geo. Franks of Thos. E. Franks & Sons, Champaign; Chas. Crabb of

**WIETOR BROS., 162 N. Wabash Ave., Chicago**

## Chicago Coal Market.

There has been very little change in the local coal market since our last report. In fact, the only thing of note is that the prices on coal are now becoming steadier, as we near July. Of late there has been very little cutting among the coal dealers, for they have come to the stage where they are taking the present demoralized market as a boy takes a dose of medicine and looks forward to better days. The coal dealers are looking forward to the coming months with much hopefulness. We advise our subscribers who are on the market for coal to take advantage of the present demoralized market and get their orders in early, especially those who use Block coal, for this grade will advance 15 cents July 1.

## Cincinnati.

### GOOD STOCK SELLS WELL.

Since the passing of the commencement season, a week ago, business, locally, has been more or less quiet. The last Wednesday in the month will undoubtedly prove quite a flurry with a demand for wedding flowers if little Dan Cupid gets to work, for to date he is way behind last year's high water mark. First-class stock is running short of the demand and the near future promises even shorter supplies. Some of the blooms arriving are in such condition that the shippers would better have consigned them to their own ash barrel instead. Everything that is real good sells, but the poorer stock is an eyesore in the ice-boxes. The supply of roses, while adequate, is not very large, especially in summer roses, which seem off crop at present. Carnations are rapidly nearing an end for the season. As fast as the present crop is ending some of the growers are throwing theirs out, while others are paying little attention to them. The good carnations find little trouble in finding a market, especially white and Enchantress. Shasta daisies are offered in quantity and are finding quick sales. Easter lilies are good in quality but are only in limited quantities. Sweet peas are uncertain; some days they easily meet all requests and others they run short of the calls for them. Other stock in the wholesale

## "The Busiest House in Chicago"

Is prepared to fill all orders with a choice grade of **Roses, Carnations, Peonies, Sweet Peas** and all other kinds of seasonable stock. If you want **Quality, Price and Service** come to us.

**J. B. DEAMUD CO.**

Long Distance Phone  
Central 3155

**160 N. Wabash Ave., CHICAGO**

houses includes gladioli, lily of the valley candytuft, feverfew, stocks and phlox. In the green goods market smilax is still short, while other lines are ample. The cut ferns are good and include eastern, Kentucky and dagger varieties.

### NOTES.

Wm. Murphy and S. S. Skidelsky have closed a deal with C. C. Murphy whereby they have acquired his new red seedling carnation Delphi. They will disseminate the same in the spring of 1912. The blooms of this variety have been on the local market for four years. During this time it has been a decided hit with the buyers. It always produces a heavy crop for Christmas and then blooms freely into early summer.

In the current publication of the local Woman's Club will appear an article by E. G. Gillett giving the history of flower shows in this city and brief plans for the show next fall. The article was written at the request of the editors of the publication.

Ray Murphy and wife left last Saturday for a fortnight visit to Portsmouth. Mr. Murphy will then go to Virginia to visit Lee Witterstaetter, who is playing ball there.

In the last issue the writer inadvertently omitted the names of the candidates for director of the local club. They are Herbert Greensmith and Al. Heckman.

Albert McCullough has gone to Marblehead, Mass., to attend the annual convention of the American Seed Trade Association.

## St. Louis.

The past week has been a very busy one with the retailers, which was a great relief to the wholesalers, who seeing the increased demand did not hesitate to increase prices. Weddings, funerals and especially school closings caused the demand and both carnations and roses stiffened in price. Sweet peas are about done, as the dry weather has made them very poor in quality.

Mullanphy Flower Co. is about sold out of its extensive stock of plants. The firm has done a splendid spring trade and all hands will now take a little needed rest, but will be up and doing when the season opens.

M. M. Ayres Floral Co. were busy Thursday at Central High School. Bouquets and all green tastefully arranged in shower form, tied with white ribbons were the features.

Chas. Schoenle has a very attractive show window tastefully arranged. People can be seen at all times admiring the flowers and arrangement.

Robert J. Windler had the decorations and bouquets at the McKinley High School, which were of red carnations and asparagus.

Grimm & Gorly had the decorations and bouquets at Soldan High School. Sweet peas were the flowers used.

# OUT OF TOWN FLORISTS

Who appreciate High Grade Stock will find it to their interest to write us for prices before placing their orders elsewhere.

**CHICAGO.**

### Davenport, Ia.

Business the past week has been quite good, many flowers being used at the funerals of several prominent people and at the graduating exercises. The extreme warm weather has resulted in indoor stock being very poor for this time of the year, roses and carnations are small and of poor keeping qualities, and there is hardly enough of them to meet the demand. Outdoor flowers, such as sweet peas, are small and short-stemmed, owing to the three weeks drought and excessive heat, the thermometer standing at 90° and above every day. Some straggling plant orders are still coming in, which with other work has kept the florists of this vicinity quite busy. Rose and chrysanthemum planting is about completed, and several are starting with their carnations.

### CLUB MEETING.

One of the pleasantest affairs ever held by the Tri-City Florists' Club occurred on the evening of June 14 at the Flora Hill Gardens, the home of Theo. Ewoldt, president of the club. It was the sixth annual strawberry supper and with the exception of two, all the members were present, coming out in automobiles. Mr. Ewoldt had hired several extra pickers and had provided enough berries for every member to have all he could possibly eat, as there is always a contest at these annual affairs to see who can hide away the most berries. A fine medal had been provided by Mr. Ewoldt which was presented in a neat speech to Alvin Anderson of Moline, the judges claiming him champion for the year 1911. Mr. Anderson has now held the championship for three years, but he has a warm rival in Hansen, also of Moline, who will no doubt be better prepared another season. Several members were called upon for speeches and responded in a happy vein, thus making the an-

nual strawberry feast a long to be remembered occasion, and one which the members all look forward to. In fact, all the monthly meetings have come to be pleasant affairs. One new member, Sorensen of Moline, was admitted. "Christmas plants" was the topic for the evening discussion, the culture of cyclamen, begonias, poinsettias, primroses, azaleas and other plants being well discussed by the different members. A committee of three, Hensley, Patton and Rohlf, was appointed to make arrangements for the annual picnic and to report at the next meeting, which will be held at Henry Gaethle's, Rock Island, on the evening of July 13. T. E.

### Indianapolis.

#### TRADE QUIET.

Trade has been very quiet. Weddings have been the chief attraction and the retailers' only salvation. Stock is plentiful and of fairly good quality. A much-needed rain fell June 18 and helped the plants in the field to a great extent. The cool weather which followed the rain has acted as a brace to the roses and carnations.

#### NOTES.

Adolph Bauer and Sidney Smith are as yet still selling the products of their separate greenhouses conjunctively and will continue to do so until the new stock is ready to cut. In all other respects, however, they have separated their business. Sidney Smith has styled his place "The Columbia Conservatory," and expects to change the business to a strictly retail basis before many months. The city is being built up around him and it is very probable that he will realize a good retail trade from his locality. Adolph Bauer, on the other hand, intends to keep his greenhouses in the "strictly wholesale" classification and devote his time and en-

ergy to producing top-notch cut-flowers and young geranium plants for the wholesale market. He expects to have a fine lot of asters this summer which should bring good returns, for it looks as if there would not be many good ones grown here.

After a stay of ten days, Albert Pitet has returned from Texas with an enthusiastic report of the fine climate and prosperous state of that part of the country. He bought a piece of land while there, which he later intends using as a winter residence.

John Rieman is still on the sick-list with a rheumatic knee. Frank Saal, his head clerk, seems to be holding down the business very nicely and John Rieman is turning this period of indisposition into a little vacation.

Herman Junge is now joyfully telling his friends of how he finally disposed of his \$250 phonon for \$40. He expects to invest the proceeds in further bee-supplies.

Walter Bertermann and Herman Junge participated in the "secret time" automobile run to French Lick under the auspices of the Indianapolis Trade Association.

D. S. Greene, salesman for Bayersdorfer, was in the city this week with a broad smile and a happy hand as usual. He reports business good.

Arrangements are being made by the Indiana State Florists' Association to hold a picnic at Fairview Park some time during July.

A. W. Brandt has changed the entire arrangement of the interior of his store-room and has re-decorated throughout.

Lester Benson, it is rumored, has contracted for a Cadillac touring automobile.

Roland Brennen, employed at Brandt's, is on his vacation. A. W. B.

### Los Angeles, Calif.

June weddings and a much greater amount of funeral work than usual at this time of year have helped materially to keep down the surplus of outdoor flowers but even with this assistance, great quantities of the cheaper and commoner kinds have gone to waste. The most prominent flower has been the gladiolus and this, in all the favorite varieties, has been extremely popular, but the price has been low. Outdoor *Lilium giganteum* has been arriving in considerable quantities, the flowers remarkably good but showing signs of careless handling. The prices obtained seem very low and some of the growers what there is in it for the growers after the bulbs are paid for. Other outdoor stock is practically the same as at the last writing. Indoor roses of good quality have met with a very fair demand but some of the stock is thrifty eaten and otherwise poor in quality, and this is not wanted. My Maryland and Killarney, as usual, are the worst affected; Richmond has been extra fine for the season, the cool nights keeping the foliage good. American Beauty has been in over supply and a good many flowers have gone to the doorway florists. Orchids are selling well.

### NOTES.

A new parkway, nearly three miles in length, connecting Westlake and Sunset parks, and 35 miles of new boulevards, joining up some of the most picturesque scenery in Southern California, are among the many improvements to be carried out in the near future by the park commission. The wild mountainous scenery of Griffith park and Mount Hollywood and the rarer beauties of Elysian park are to be connected via Silver lake and an unsightly ravine will be turned into one of the most beautiful spots around the city. The commission has already planted 2,000 trees around the lake and the entrance at Wilshire boulevard has been planted to coccas plumosus, one of the best of street palms. Winding drives along the sides of the arroyo are planned, also streams and miniature lakes in the bottom. The native flora is extremely fine hereabouts, and planters would do well to study up some of the fine indigenous trees and shrubs with a view of preserving and planting these, rather than the indiscriminate rubbish and odds and ends of nursery stock that are now foisted on an ignorant or careless public by "landscape?" gardeners.

The postponed meeting of the Los Angeles County Horticultural Society was held June 13 at Kruckerberg's hall, 237 Franklin street. Arrangements were made for a special meeting the first Tuesday in July at the Chamber of Commerce rooms when several speakers will be present to discuss fumigation and insect pests. A full

and interesting meeting is looked for. Later in the month, probably about July 20, a picnic will be held at J. Dietrich's place at Montebello. Jake has promised everyone a good time and he will doubtless make good.

Three Florists have enjoyed good business of late, funeral work being heavy and several large wedding decorations coming their way. At a recent outdoor wedding the ceremony was held under a canopy of *Asparagus plumosus* and Bride roses, the reception rooms being decorated with *Gladiolus America*. Several fine baskets of American Beauty and Ulrich Brunner roses were used and much other choice stock. Frank Lichtenberg was in charge.

Large quantities of stock in all varieties continued to be handled at the Los Angeles Flower Market. We found Charlie Morton on the eve of departure for Chicago and New York, whence he intends to return via New Orleans and Florida, calling on his brother, Hubert, at Fort McCoy en route.

Jack D'Ortignac, late of the Redondo Floral Co., has opened a store at 201 West Fifth street, opposite the Alexandria hotel, to be known as "Jack's Flower Shop." He is carrying good stock and, though rather crowded for room, has a good location. E. Bret is Jack's partner in the enterprise.

At the Angelus Flower Shop there is usually a greater variety of orchids and other choice stock than in the majority of the stores and we noted fine blooms of *Dendrobium superbum* and phalms in variety, as well as choice cattleyas.

Work at the new greenhouses of Wright's Flower Shop at Gardena is progressing rapidly and with the addition of the reconstructed Edendale houses, Tom Wright says he has about 90,000 square feet of glass.

### Syracuse, N. Y.

The first annual rose show of the Syracuse Rose Society drew an attendance of nearly 300 flower enthusiasts to the Y. M. C. A. Assembly hall June 15. First honors in the awards went to David M. Dunning, president of the Auburn Savings Bank, who took nine firsts, including the S. T. Betts' grand challenge cup.

The hall was a scene of activity. A large floral design, made by Joseph Kinney, gardener for Mrs. Lyman C. Smith, and standing eight and one-half feet high by five and one-half feet wide was placed on the stage. On this was inscribed in flowers, "Syracuse Rose Society." The exhibits were arranged in vases on four long tables extending the entire length of the hall. Across the rear of the hall was hung a mammoth American flag. Everything was

in readiness when the hour for the formal opening arrived. An orchestra was stationed in one corner of the hall to the left of the stage. Officers of the society assisted the reception committee in receiving the visitors. Those receiving included John R. Clancy, Mrs. Robert Dey, Mrs. James M. Gilbert, Mrs. B. E. McKevitt, Mrs. Frank C. Soule, Mrs. J. William Smith and Samuel T. Betts.

During the evening announcement was made that S. G. Harris of Turin-town had offered a special prize of \$10 for the best 72 blooms, six each of twelve varieties. D. M. Dunning, one of the best-known amateur rose culturists in central New York, will probably enter an exhibit for this prize at once. One of the exhibits which attracted considerable attention was a variety of blue rose, which has been the subject of considerable discussion for some time in floral trade papers. This was shown by Mrs. J. J. Kullmer of Syracuse. During the evening punch and ices were served and cut flowers sold by a committee of women under the direction of Mrs. Max H. Schwartz for the benefit of the Day Nursery. Of the 300 patrons of the show more than one-half were active members of the society.

The awards were as follows:

Best exhibit of roses open to all classes, S. T. Betts' challenge cup, David M. Dunning. Best exhibit of rose blooms (amateurs)—Miss Edith M. Eggleston, Marcellus. First. Best exhibit hybrid tea roses—D. H. Dunning, Auburn, first; Mrs. John Wilkinson, Onondaga valley, second. Best exhibit of hybrid perpetuals—First, D. M. Dunning; second, Mrs. W. L. Lyman, Syracuse. Best exhibit of moss roses—First, Mrs. J. E. Barton, Parish. Best exhibit old fashioned rose bloom—Newell E. Woodworth, Syracuse. Six distinct varieties hybrid tea roses, hardy in Syracuse—D. M. Dunning. Six blooms Marchioness of Londonderry—Miss Ann McDonald. Six blooms Prince Camille de Rohan—Mrs. H. C. Snow. Six blooms Marshall P. Wilder—Mrs. J. J. Barber, Solvay. Twelve blooms, Pink La France—Miss Eggleston. Twelve blooms, Kaiserin Augusta, Victoria—Mrs. John Wilkinson. Six blooms Killarney—David M. Dunning. Six blooms Gruss au Teplitz—David M. Dunning. Three blooms Caroline Testout—David M. Dunning. Best bowl cut roses, lightly arranged, rose foliage only—Newell E. Woodworth. Best exhibit pink hybrid teas—D. M. Dunning. Best exhibit rose blooms (private gardeners)—Mrs. Frank Harris Hiscock, first; Mrs. James M. Gilbert, second.

STOCK A DRUG ON THE MARKET.

Business has been dull the past week. There have been a few Wednesdays and commencements and funeral work which is keeping up fairly well and used considerably many flowers. Stock is arriving in abundance, and finds poor sale, becoming a drug on the market. Roses, carnations, rambler roses, lilies, sweet peas and gladiolus are in heavy supply. Liliun candidum are arriving by the thousands and are selling at any price obtainable. The street fakir finds things slow and is selling at very low prices. Yet, with all the supply, the stock is of an inferior grade. Pot plants are moving very slowly, with the exception of ferns. Greens of all kinds are plentiful to meet all demands.

CLUB MEETING.

The regular meeting of the Gardeners' and Florists' club was held in their hall June 12. The attendance was good, taking into consideration the severe hail storm which occurred the same evening. Many members who had come into town had to leave to go back to their greenhouses which had been damaged. The executive committee held a meeting early in the evening and report everything progressing finely. Refreshments were served during the evening.

CONVENTION NOTES.

The press committee are doing arduous work, the public press taking up the coming convention and presenting it before the citizens. They are anxious that there will be a large attendance of the members of the S. A. F., and extend a cordial welcome to all. The arrangements are nearly completed. The Belvidere hotel, which is the headquarters, is one of the best appointed in the city, and the large convention hall is but a short distance away. Baltimore is known as a great convention city and the committees are leaving nothing undone for the pleasures and comfort of the visitors.

NOTES.

F. C. Bauer and wife of Govanstown left last Monday for New York and sailed June 13 for Holland. They will be abroad about two months. Before their departure a supper was tendered to Mrs. Bauer by some of the la-

dies of the Washington and Baltimore Ladies' Bowling teams. J. J. Perry left at midnight to overtake Mr. Bauer and inform him of the terrible hail storm and the wrecking of his entire plant. They, however, continued on their trip and repairs will be commenced upon his return home. He fortunately was insured.

Halliday Bros. have disposed of their property on Pulaski street and North avenue. There is a large range of greenhouses on the property of which Mack Richmond, superintendent of trade exhibit at the coming convention, is foreman. The property will be improved with modern up-to-date dwellings.

The local seedsmen are having heavy calls for seeds to replace the crops damaged by the recent hail storm. Many farmers had their crops entirely ruined, wheat and rye is flat upon the ground, tomato plants were cut to pieces.

Martin Duckstein, of Brooklyn, has ordered a forty horse power convertible automobile. He will do away with his team as he can utilize the auto for both pleasure and business.

The hail badly damaged the greenhouse of R. C. Hoffman at Ruxton. (John Williams, gardener), as well as

## STOCK NOT OVERPLENTIFUL.

Just at this time a little scarcity has developed with almost all flowers. We are in the midst of all the school closings and the commencement exercises are using a large lot of pink roses and American Beauties. Weddings are also making a big demand for white roses, which are very scarce, also lily of the valley. Lilies are moving very nicely. Pond lilies have made their appearance, but do not move very fast.

## NOTES.

Randolph & McClements have had numerous jobs on the last two weeks which called for an immense amount of flowers. John Madden of the Penn avenue store is interested in East Liberty Red Letter day, and usually runs a special on this day.

Max E. Schreiber, McDonald, was a recent visitor. Mr. Schreiber sends chrysanthemums to this market, but states that he does not know how he will be fixed this year with these flowers, as they are not rooting well in the soil.

Roy Dashbough has issued cards announcing the fact that he is now with the Ziegler Co. This firm had an immense wedding decoration in Altoona last week.

J. W. Glenn, Kittanning, was in town and states his business has grown so much that he has to give his personal attention to it at all times.

Karl Klinka states funeral work has been very good with him and that he is sending out quite a number of commencement bunches.

Earl Tipton, buyer for the A. W. Smith Co., is again dodging in and out of the wholesale houses—a sure sign of a scarcity.

Mrs. E. A. Williams has been a heavy buyer of American Beauties and lilies, which indicates some big affairs. Walter Demberg, who has recently been with L. H. Neff, is now on the staff of J. B. Smith, McKeesport.

Peter Miller, who has run a street flower stand off and on for the past 15 years, died May 17.

Michael Holleran, of the McCallum Co., is spending two weeks' vacation at Conneaut Lake.

Johnson, of the McKeesport Floral, is spending a week or so in the west.

John Harris spent last week in Cleveland.

BROOKLYN, N. Y.—Henry Hession is building two greenhouses 52x192, of Lord & Burnham construction, on Clarkson and E. Forty-eighth street, at a cost of \$12,500.

A Complete Line of Wire Designs.

white. Some of the carnation growers are beginning to transplant and this will make carnations a little bit less plentiful. Good sweet peas are not in over supply, but short and poor stock is plentiful, and a great many go to the street fairs. Easter lilies are meeting with only a fair demand, and Lilium candidum are coming in of exceptionally good quality. Peonies are about through for this year. Eastern fancy ferns are good. Lily of the valley is good and sells well.

## NOTES.

Edwin A. Reeves, of E. Cleveland, took three firsts and one second prize at the American Peony Society's exhibition at Philadelphia, Pa. The Cleveland Florists' Exchange handle the entire output of this farm.

J. Leuschner, F. Utzinger and F. C. Withuhn are going to visit the "Old Country" this summer, making a trip extending over five or six weeks. They intend to leave the latter part of this month.

The Smith & Fetters Co. have received orders during this month for several of the largest wedding decorations they have ever had. C. F. B.

WEST NEWBURY, MASS.—T. C. Thurlow's Sons' peonies were at their best this season June 10 to 20.

## Philadelphia.

The demand for flowers for the past week was only fair and those that were offered graded very low. In roses, American Beauty, My Maryland and Kaiserin are leaders, the Killarneys, both white and pink and Brides and Bridesmaids being very small and unsatisfactory. The American Beauty, which, by the way, is now much the best rose in the market is deteriorating rapidly, the local stock coming in with small buds with fringed petals. The eastern stock which sells from 25 to 33 per cent higher, is of much better quality and the shipments are cleaned up daily. There are still a few fairly good carnations, although much of the stock arriving is hardly worth shipping. Sweet peas are much better since the heavy rains and some very good stock is seen which sells as well, or better, than anything else. Lillium candidum is now in and helps with the window decorations. It is also very useful for sprays and design work. Hydrangea arborescens alba is seen in many of the stores and as a cut flower is quite a success, as it is very decorative and makes up well into designs. Cattleyas are now unusually fine and fairly plentiful and the price holds at about \$5.00 per dozen. Cornflower mums lately on is much used, as the gentleman does not find himself dressed for business or pleasure without his cornflower boutonniere. Easter lilies are plentiful and being as good as at any season, are preferred for sprays and for wedding decorations. Dorothy Perkins roses from outside are in good demand. Some rarely good stock is seen, that from growers who have been wise enough to prune their bushes, only leaving the strong wood, has the preference; \$3.00 per hundred sprays is about the price. Now that the sale of bedding plants is about over the season can be said to have been very good.

## NOTES.

H. A. Dreer has had a great sale, particularly of their herbaceous stock and pot roses, the latter so out in large quantities which aggregate up into the hundreds of thousands. The rose beds have attracted thousands of visitors. The climbers, with their wealth of bloom have been especially admired and many sales have been made from this exhibit. The bird's nest fern, as seen growing outside in the frames, is most luxurious and when finished they should sell on sight. Fern flats, each containing about 200 of a variety, are now being sent out in quantity; over 30,000 flats have so far been shipped, when these are all potted up they will take up some table space.

Some of the papers boomed the third Sunday in June as Father's Day with a red rose as the flower to be worn. We saw one rose bedecked gentleman and inquiry among the trade failed to find any evidence of a more or less observance of the day. George C. Watson says that a "Mother-in-Law" day is the real thing. George who is a disciple of single blessedness should get one of these much maligned, but really meritorious ladies in his family and then start the observance of the day in her honor, and go down the annals of time as the best son-in-law who ever lived.

The Leo Niessen Co.'s new building is now above the fifth floor and is progressing rapidly. Since the building was projected about a year ago, property in this neighborhood has enhanced in value wonderfully and the investment promises to be very successful. The entire first floor will be occupied by the business.

The Robert Craig Co. say they have never had such busy time and are almost entirely cleaned out of all the standard sorts. Fern and crotons have also sold exceptionally well. K.

## Nassau Horticultural Society.

The summer exhibition of the Nassau County Horticultural Society was held at Pembroke hall in connection with the regular monthly meeting. Despite the heavy rains which we had just previous to the show there was quite a good display. Messrs. Duthie, Marshall and Johnstone were the judges and their decisions were as follows: Best collection of tea and hybrid tea roses, 25 varieties, Mrs. B. Stern (G. Augey, gardener) first; Mrs. H. L. Pratt (H. Gauf, gardener), second; best 12 distinct varieties, hybrid perpetual, roses, Mrs. Stern, first, Capt. J. Delemar (H. Marshall, gardener), second; best 12 varieties distinct of tea and hybrid tea roses, Mrs. B. Stern, first, Mrs. H. L. Pratt (F. O. Johnson, gardener), second; best vase of hybrid perpetual roses, one variety, 12 flowers, Mrs. Bucknall (G. Eaton, gardener), first, Capt. J. Delemar, second. Best vase of tea and hybrid roses, one variety, Mrs. B. Stern. Best collection of ramblers roses, 12 varieties, Mrs. H. L. Pratt, first. Best 12 sprays of ramblers roses, one variety, Mrs. B. Stern, first. Best collection of herbaceous flowers, Mrs. H. L. Pratt, first. Best vase of peonies, 12 flowers, Mrs. Bucknall, first. Best vase delphiniums, Mrs. H. L. Pratt, first. Best vase of snapdragon, Mrs. H. Pratt, first. Best vase of flowering shrub, J. H. Otley (J. McDonald, gardener), first. Best vase of ornamental foliage, Mrs. B. Stern, first. Best varieties vegetables, A. G. Hodenpyle (F. Petrocchia, gardener), first; J. H. Otley, second. Best six lettuce, A. G. Hodenpyle, first; F. S. Smithers (V. Cleres, gardener), second. Best two heads of cauliflower, Capt. J. Delemar, first. Best six varieties of strawberries, 12 of each, Felix Menze, first. Best twelve largest strawberries, Mrs. H. L. Pratt, first. Best dish any other outdoor fruit, Mrs. H. L. Pratt, first. Certificate of Culture was awarded to T. A. Havemeyer (A. Lahodny, gardener), for a very fine display of peonies and hydrangeas, also to V. Cleres for three cucumbers and to F. Petrocchia for mushrooms. Honorable mention was awarded to J. F. Johnstone for a vase of Trachelium. Cereulium, also to F. Petrocchia for lettuce.

On account of the show there was not much other business done at the meeting. F. O. Johnstone was elected to active membership and there was one application for membership. Mrs. B. Stern offered through T. A. Havemeyer a silver cup for dahlias, a collection not to exceed 50 varieties. Mrs. Stern was accorded a unanimous vote of thanks. The society's prize at the July meeting will be for sweet peas—25 pink, 25 white and 25 of any other color. The \$5.00 prize—that of J. Ingram—offered for June was not completed so he offers it for July for 12 varieties, 25 sprays of sweet peas.

E. WESTLAKE, Sec'y.

## Buffalo.

## GOOD STOCK NOT PLentiful.

Another warm spell and with school commencements and weddings on the calendar for every day this week, the prospects for good stock are none too bright. Carnations are getting smaller daily, many of the roses are getting poor, sweet peas, lily of the valley, Harebell lilies and orchids are about all that could be called good. A very large convention here has brought a great crowd, but they are not flower buyers. The death last week of George E. Matthews, one of Buffalo's newspaper proprietors and president of the Matthews Northrop Co., gave the leading florists some very large orders in which American Beauties, roses, lily of the valley, orchids and the choicest of other flowers arranged principally in wreaths and loose sprays was a great help to what had every

| Donaldson    | 163 | 264 | 160 | 161 |

## Toronto.

## JUNE WEDDINGS.

We have much to be thankful for, the June bride, the shower bouquet, the artistic house decorations, with the profuse quantities of peonies, palms and ferns at the church have kept the florists fairly busy. Peonies are the main attraction at present and they are both plentiful and good, the market not being overstocked as in former years as many are being shipped to distant points. In roses, American Beauties are about done, Richmond are still in good shape while the other varieties are deteriorating in quality, which makes good stock scarce. Carnations are plentiful and of the usual quality for this season. Lily of the valley is, at times, scarce, and orchids have shortened up so much that at times it is impossible to get them at all.

## NOTES.

Miss Lena Watson, bookkeeper at Dunlops, has a severe case of poisoning, which started from a thorn in the finger and extended the length of the arm; three operations were necessary, and her condition was critical, but late reports are of improvement.

Many building operations are now going on and there will be a large increase of glass for next season, which will mostly be devoted to roses. The Pennock-Meehan Co. have been here and found good sale for both double Killarney and Melody.

### The Garden of Shade.

It is probably in London and other towns that gardens shadowed by walls and trees are chiefly left unbeautified, the ground allowed to become damp and unhealthy, weeds and rank grass permitted to struggle together for existence; the place, in fact, given up to the use of the animal and insect pests that never fail to adopt it. Why should there be ugliness, the squalor of decay, asks a correspondent in the Gardener's Magazine, where a little culture could create a floral and foliage Eden?

Among the shrubs that will make coverts of real beauty under tall trees *Berberis aquifolium* ranks high in order of merit, the glossy foliage resists London smuts, and turns to glorious ruddy hues each autumn, the yellow blossom is showy, early, and continues long, the blue-purple berries are charming out of doors or in the home vases. To cover a waste of ground with a shrubbery of this costs but little, no frost of winter will destroy it, no atmospheric conditions rob it of attractiveness. There are other *berberises* that can rise above this one here and there form a high bushy ground, or hedge at the sides, notably *Berberis Darwini* and *Berberis stenophylla*, both spring bloomers, and the latter an elegant grower that attains large dimensions. *Berberis Thunbergii* offers a change, as its blossom includes red among the yellow petals, its berries are crimson, and the leaves take on extra rich tones late in the year. As a foreground to this shrubbery, under the plane or lime trees down the long side of a garden maybe, can live and thrive the spreading low-growing rock sprays or *Cotoneasters* *Simonsi*, *microphylla*, and *rotundifolia*, all giving white flowers followed by coloured berries. The final edging to the ground may be a wide belt of London pride, that glossiest and most vigorous of all the saxifragas, so pleasing to the eye after every washing by the rain, so fairy-like when sending up its early summer forest of long-stemmed miniature pinky-white flowers.

Cold shaded alleys between houses need not be left unadorned; the green euonymus, that furnishes so many house-fronts in Brighton and other seaside towns, will flourish in almost any city or situation; it can be planted as a hedge jutting out across the chief width of the alley, leaving only a path, if needed for tradesmen, which itself can be simply arched over by ivy, supported on two upright poles eight feet high nine inches apart on either side of the walk, and a single cross bar a foot from the summit. Down the border space against the house wall let a narrow border be dug and enriched, planted with variegated Irish ivy, a row of summer and autumn-blooming tall phloxes, and an edging of the mossy saxifrage, *Saxifraga hypnoides*; the last gives velvety green cushions of foliage that are permanent, and has white bloom in early April or March that continues until July. Across the path, in the wide border of the alley, a background of *Rosa rugosa*, the hardy Japanese rose, should be tried, choosing the red, white, or pale pink varieties in preference to the ordinary purplish-pink that is a dull heavy tone. These vigorous, tall *rugosas* are so accommodating that they can be used to form coverts in woods. In addition to the buds and flowers of summer and autumn, they offer gold and red streaked leaves in the wane of the year, and their large bright fruits appear in profusion, often remaining on the branches until spring calls forth the tender green again upon the myriad-spined boughs.

There is no lack of herbaceous plants to arrange in tall groups here and there in this shadowy, cool bor-

der. Golden Rods can bud and bloom as profusely without sunshine as with it; indeed, the late spikes of amber, feathery and deep, are of extra value when they come later, reluctantly maybe, after warmth has faded the plumes of their sisters in the open parts of the garden. Common tall lavender, and rosy-red Michaelmas daisies may also be relied upon, and the stately snow-white *Aster Novæ Belgæ* alba will begin in August and be still a floral mass in October. Day lilies will succeed nearer the middle of the border, for they bloom in dense copses in the country, or amidst all the evil climatic conditions of smoky towns; *Heimerocallis* *dava*, clear yellow, and *Heimerocallis* *fulva*, coppery-orange, look well in groups together. Then the old-fashioned form of moon daisy, plain *Chrysanthemum maximum*, will be found willing to yield a harvest of its often ill-shaped, but bold yellow-eyed blossoms on two to three foot stems, clothed in the glossiest of gay green leaves; foxgloves, rose or white, may be safely introduced, woodland denizens by nature though they are, and stately mulleins, *Verbascum Chaixi*, and *Verbascum pannosum* may accompany them where pyramidal spires of yellow, six to eight feet high, will be suitable. Then, for a bright lavender-blue flower to give a pleasing contrast, may be chosen *Campanula latifolia macrantha*, whose bells are set closely up long stems, above tufts of evergreen foliage that has itself a real value for border furnishing in winter.

In front of all these, between them, too, since the giant plants look so much more artistic in clumps at varying distances instead of informal rows arranged according to their heights, may appear carpets, relieved by groups of innumerable plants of noted hardiness. St. John's Wort alone is sufficient to brighten and cover many yards; although not actually evergreen, there are few years in which it is not always possessed of some leaves from January to January, while those gardeners who care to keep the handsome golden flowers from ever developing into seed pods, will be rewarded by a succession of them during nine of the twelve months.

Wallflowers sometimes fail, but is it worth while to put out sturdy small plants, for even if the leaves become blasted by nipping east winds, the new growth in spring will probably give us lemon, apricot, amber, copper, rose, crimson, brown and purple blossom trusses to harmonize with similar tints in the polyanthes and primroses. White arabis will make an excellent edging improved by single plants here and there of the twelve-inch *Megasea cordifolia*, with tall pink-lilac trusses and large leaves of bronze-shaded green. There is not the yellow or common stonecrop to be spread out in formal lines or over banks; may the woodland primrose not be used as a carpet even in city gardens; and can we ever be really excused if we neglect to fill the best places with daffodils, large and small, single and double?

A neglected waste of land around any home is a reproach to the occupier; better a field of hart's-tongue fern, or an expanse of pegged-down ivy, in the shadow, than a bareness of lonely earth.

### European Horticulture.

FROM THE FRENCH TRADE PAPERS.

The New Multiflora Rose, Graf Zeppelin.—A sport of Weigand's Crimson Rambler, itself an amelioration of the Crimson Rambler type, brings a new and rich coloring into the rambler series; it is hardy and very free of bloom, its stems are long, flowers abundant and brilliant, a vermilion crimson; the plant is hardy and if not remontant, its period of bloom is much longer than the type.

Curled Chicory: Surpasse Guillaud.—A new truly curled chicory or endive is said to produce fine heads of great lightness and attractiveness for salads. It is best for early planting, as being so finely curled it is more liable to rust than the ordinary endive, particularly in the fall.

Double Hardy Aster Beauty of Colwall.—This variety is extremely free of bloom; flowers quite double, a handsome lavender blue, four feet high, erect and well branched.

GREENWICH, CONN.—Robert McMillen is seriously ill at his home and under the care of physicians. He has been ailing for several weeks but kept at work.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention. Hotel Rock mere, Marblehead, Mass. June 20-22, 1911.

GERMAN pea crops, from the present outlook, will be as short as those of last year, which is the next thing to a failure.

TORONTO, ONT.—The Steele-Briggs Seed Co. reports that the retail business started in slow this year as compared with 1910, but this firm expects the close will show the business of 1911 ahead of any previous year.

FISHKILL-ON-HUDSON, N. Y.—The Hammond Slug Shot works report the largest trade in the history of the business. The drastic government insecticide law enables the manufacturers to boost prices in pretty good shape.

BIRMINGHAM, ALA.—The Amzi Godden Seed Co. says: "Mail order business this year has been very satisfactory. We have had a considerable increase in orders from four to five southern states. All indications show that the farmers are going to use more grasses, clovers, and other forage crops, and that more stock is being raised in the south. They also show a tendency of the farmers in the south to diversify their crops. Our retail store trade is increasing very much. Our vegetable and floral business is still very good." This firm's retail store is now in charge of James A. Wiebens, formerly with the W. W. Barnard Co., Chicago.

HARRISBURG, PA.—The Holmes Seed Co. reports as follows regarding the season's business: "Although the season is considerably ahead of last year with us, yet the months of March and April were not up to the same months of the preceding year. However, the month of May has more than caught up over the preceding months of March and April. Taking the business as a whole this year, it has been exceedingly good, in the jobbing, retail and mail. The mail business fell off during the month of March, but during April we gained all the loss. We are very well satisfied with the outlook and we are busy even today with plants, seeds, insecticides, etc."

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,  
Growers for the Wholesale  
Trade Only.

SAN JOSE, CALIF.

PRELIMINARY report of the annual meeting of the American Seed Trade Association, held at Marblehead, Mass., June 20-22, will be found on page 1136 of this issue.

PHILADELPHIA, PA.—W. Atlee Burpee & Co. say the retail seed business, the past season, in January and February was a little ahead of 1910 and March, owing to the severe cold weather, considerably behind, but in April and May so much ahead as to almost, if not quite, make up for the loss in March.

FLORAL PARK, N. Y.—John Lewis Childs states that the retail catalogue business has not been up to the usual standard this year. It was away off in March and while the period including May and the latter part of April was unusually good it has not made up the loss sustained early in the season.

PEDRICKTOWN, N. J., June 19.—Seed crops in this vicinity are very backward, due to the prolonged drought at planting time. Much depends on the next six weeks as to the outcome. Acreage on most seed crops is larger than usual, especially on pumpkin and squash, probably 100 acres more than last year.

VISITED CHICAGO: E. W. King, of E. W. King & Co., Coggeshall, Eng., and F. J. Cullen, of Thomas Cullen & Sons, Witham, Eng., returning from the Pacific coast. Messrs. King and Cullen left for Toronto June 19. They will remain in the Dominion a few days, and then proceed to Philadelphia, sailing with W. Atlee Burpee for Europe on the S. S. Olympic, from New York, June 28.

HOLLISTER, CALIF., June 19.—In Santa Clara and San Benito counties, the principal seed growing sections, radish probably will be little better than half a crop. Sweet peas, which have been attacked by aphids, will be under half a crop. Carrot will hardly average a quarter crop. Lettuce is late, but may reach normal. Onion is now good and, should the heat not cause injury, promises slightly more than a normal crop.—W.

CHICAGO.—Onion sets growing about here are generally looking well, some small lots, maggot-eaten, have been plowed up.—A meeting of onion set wholesalers was held here this month.—A representative of Wood, Stubbs & Co. was the first onion set inspector in the field this season.—From this time on onion set scouts from all over the central west and south may be looked for.—Lawns were burned early in June by the heat, over 100 degrees in the sun.

## Two English Seedsmen in California.

When we left the old country for the purpose of visiting the seed growing districts of America we were quite prepared to find big things; but now after a fortnight among the sweet pea, onion, lettuce, radish and other seed crops in California we must admit that the seed growing business there is altogether a bigger thing than we expected to find it.

The soil and climate of the valleys are perfectly adapted for seed growing and that good crops can be produced year after year without manure is surprising to English growers who spend anything from \$15 to \$30 per acre on manuring for a seed crop. On the other hand, labor is considerably more expensive than in England and rents are in most cases higher. Irrigation, too, appears to be an expensive process where it is carried out, but the majority of the farms visited were on the "dry" system. Though there has been little rain since March, there appears to be an abundance of moisture two or three inches below the surface, and the growers make every effort to retain this by keeping the surface soil in fine condition.

The sweet pea crop generally will be light as a large part of the acreage was planted late owing to the rains continuing much later than usual. Many varieties quite out of date in England, such as Katherine Tracy, Lovely, Hon. F. Bouverie, Firefly, Queen of England and others are still grown, which is surprising when the same color may be had in newer varieties with flowers practically double the size and at the same price. For instance, why grow Queen of England, Blanche Burpee, etc., when Dorothy Eckford is the finest and largest white of the grandifloras?

The radish crops appeared very promising where sown early but the late sown crops must be very light. Onion and lettuce, of which we saw vast acreages, were good and given favorable weather these should produce good crops.

We have been splendidly received and hospitably entertained wherever we have visited and the very pleasant time we have had will be long remembered. We are, we believe, the first English growers to make a thorough inspection of the seed grounds in the growing season but feel sure that others will follow suit when we tell them of our own pleasant experience.

*E. W. King*  
*F. J. Cullen*

VISITED NEW YORK: Leonard H. Vaughan, of Vaughan's Seed Store, Chicago.

MINNEAPOLIS, MINN.—The early part of the selling season, according to Northrup, King & Co., was not quite as high as usual. However, commencing April 1 and up to date it improved materially, so that on the whole it compared favorably with that of last year.

**GIANT PANSY SEED****The KENILWORTH Strain**

must not be compared with the flimsy Trimardeau; it is much larger and of good substance. The immense flowers of  $3\frac{1}{2}$  to 4 inches are of perfect form, every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings; it is the result of years of selections. The stock plants are selected from many thousands of plants grown for market. It is rich with shades of brown, bronze, red, mahogany and numerous others. 1917 seed now ready, light medium or dark mixtures. 2,000 seeds, 50c; 5,000, \$1.00;  $\frac{1}{4}$  oz., \$1.25; oz., \$5.00.

**Pansies in Separate Colors**

Giant Adonis beautiful light blue.  
Giant Emperor William, ultramarine blue.  
Giant King of the Blacks, coal black.  
Giant Beconsfield, violet, shading to white.  
Giant Golden Queen, yellow.  
Giant Golden, yellow, with dark center.  
Giant Masterpiece, beautifully ruffled with a wide range of rich colors.  
Giant White.  
Giant White, with large violet center.  
Giant Royal Purple, fine large flowers.  
Giant Orchard flowering rare shades.  
Giant Bronze and copper shades.  
Giant Light Blue, delicate shades of blue.  
Giant Dark Blue, deep blue shade.  
Trade pkt., 25c; any 5 for \$1.00; any 11, \$2.00.

Rainbow is a blend of over 50 of the latest introduction of Giant Pansies of the most beautiful gorgeous colors: blotched, striped, veined, margined, etc. With every \$1.00 worth of Pansy Seed I will send 1000 of Rainbow free, and with other amounts in like proportion.

## Scarlet Sage

Bonfire or the Genuine  
 Clara Bedman

Nothing is more attractive in a garden or lawn than a bed of Scarlet Sage, the fiery kind we grow. We have a fine new stock, purposely raised for our summer trade, in 4 in. pots, with fine green foliage from bottom up. Bushy plants of medium height, price \$6.00 per 100.

Another attraction is to show off, when you use in connection with Scarlet Sage as a border, in center of the bed, large sizes of **Cannas**. Look! We have provided specially for these beds the dark bronzed leaved **Robusta** and **Esandie**. Nothing looks more attractive than a bronze center and a fiery red border. We have them in large 4 in. pots, 2 1/2 to 3 ft. high per 100. We also have other best green leaved varieties of the same height such as **Aloha**, **Bouvier**, **Richard Wallace**, **Austria**, **Maiden**, **Push**, **Mt. Blanc**, **J. D. Eisels**, **Mme. Crozy**, **Crimson Bedder** 4 in. pots \$7.00 per 100.

Annual meeting at Boston Mass., 1911.

**POTATO SHORTAGE.**—Edwardsville, Ill., usually ships 60 carloads of early potatoes, but this season there are none; heat and drought has ruined the crop, says J. F. Ammann.

### Soil Acidity.

Generally when warm weather sets in, acidity is most likely to occur on soils well filled with humus or manure. That is to say, the same soil would do very well during cool weather, but in hot weather, coupled with the necessary moisture, dangerous acids form quickly. The remedy is lime in the air slaked form. We have had several examples of this trouble recently, one of which is a very good one. We potted several frames full of cucumber plants and although everything seemed in proper order the plants did poorly. Recently they were attacked by the striped cucumber bugs, for which we use air slaked lime; no sooner was the lime put on, when our plants commenced to flourish. Of course during this hot weather the plants were thoroughly watered each day which required renewal each time of the lime dust. This treatment corrected the acidity; the peculiar point is that in the rush of work we are apt to overlook the real cause of trouble. In this case no one thought of using lime to correct the poor thrift of the plants.

MARKETMAN.

### European Horticulture.

FROM THE BRITISH TRADE PAPERS.

No Flowers by Request.—Tradesmen in Paris who supply wreaths for funerals have been holding a meeting to protest against the fashion which has set in of no longer laying floral tributes on graves. They point out that the discontinuance of this ancient and pious practice will throw 6,000 persons out of employment, and bring ruin to several thousands of others dependent upon them. It appears that it was Father Hippolewte Leroy who, as a result of his fiery denunciations of flowers in funerals, persuaded many Catholics to abstain from purchasing wreaths for funerals. Father Leroy's argument was that the money would be better spent in buying masses for the souls of the departed, and his appeal was made the subject at the time of an interpellation in the French chamber. The late Cardinal Richard, Archbishop of Paris, disapproved of Father Leroy's action, and reprimanded him. As shown by the lamentations of those engaged in the funeral wreath trade, the seed sown by Father Leroy has, says the Newcastle Chronicle, nevertheless borne fruit.

The Cinematograph and Floral Study.—The Cinematograph has become of the utmost value to botanical study. A remarkable film, depicting the birth of a flower, is to be exhibited shortly in the various picture theaters throughout the country. "The cinematograph has led to the observation and chronicling of what may be termed subsidiary phenomena, which were heretofore unnoticed," says Charles

Urban, who is responsible for this remarkable development in cinematography, and it is most useful in physiological botany, as showing the movements of plants between activity and rest. Photographs of a germinating seed may now be taken by the cinematograph at regular intervals during many days, until the seed sends up its seed leaves. The projected pictures show the earth raised up by the swelling seed, and the seed-coat thrown off; the seed leaves enlarge, straighten themselves out, and then the first leaves break forth. Phenomena of plant life, which take several days or weeks to record—such as the stages of growth in a plant, and the opening of a flower bud—can be projected upon the screen, condensed to a single film, as if successive stages followed each other in the course of a few minutes."

The latest film depicting the stages of a flower's development from bud to bloom is now being exhibited privately at a color studio in the West End. By means of speed magnification the actual movements of bud and foliage take place as the bloom bursts from the bud, and thus transform them, as it were, into sentient beings. The coloring of these botanical subjects is pronounced and perfect in every degree, whilst the red tints (a hue which has hitherto proved a stumbling-block to many experimentalists in color cinematography) are shown in all their splendor. The film in question is 500 feet in length, and undoubtedly marks a distinct advance in botanical cinematography. The amateur gardener, says a writer in the Evening Standard, will find much of interest in a Pathé film depicting the cult of the dahlia and chrysanthemum, which is now on exhibition. All the stages in the growth of these from January until early autumn, when the flowers are in full bloom, are demonstrated. The film depicting the development of the dahlia is 380 feet in length, and is realistically tinted.

Burnt Clay.—Burning is an old device for improving clay land, now seldom practiced. It is expensive, but it is a useful way of improving heavy, intractable land of this kind, and indeed it is not applicable to any other sort, except peat. It is perhaps not generally known how useful it is in regard to the potash in such soil, where it is very largely in an insoluble and crude condition. This is, in fact, the chief use of burning, besides the alteration of the texture for the better, which is another very considerable feature. In a lesser way, burning is perhaps too lightly embarked on at times, because

Beet, Crosby, Egyptian and Eclipse. \$1.25 per 1000; Cash with order.

R. VINCENT, JR., & SONS CO., White Masrh, Md.

it is absolute death to nitrogen in the soil. The case is different with the ash constituents, but except with potash, there is little done towards increasing the fertility of the soil by burning, and phosphates are not, as a rule, improved by the process. It is a waste of money to burn with this end in view, that of improving fertility directly, unless lime is present in considerable quantity. It should be added before instead of after burning, if it is required, and another point to bear in mind is not to have too hot a fire. This does not give the best results, and a very high temperature may even cause a loss of potash, or at any rate make it less available. Clays that are very poor in mineral matter will never pay for burning, and, in fact, it is only in small quantities probably that it would be worth while even to burn it.

WAKEFIELD, R. I.—John Cirwein is making preparations to build a greenhouse on Kenyon avenue.

BROOKLYN, N. Y.—Henry Winfield of Bedford avenue, Williamsburg, shot and severely injured his wife on June 13. He admitted the shooting, but stated to the court that he only intended to frighten his wife. As she refused to appear against him he was discharged.

## The Nursery Trade

### America's Association of Nurserymen

J. H. Dayton, Painesville, O., President;  
W. H. Wyman, North Abington, Mass., Vice  
President; John Hall K. Chester, N. Y. Sec'y.  
Thirty-seventh annual convention to be  
held at Boston, Mass., 1912.

REPORT of the annual meeting of the American Association of Nurserymen, held at St. Louis, June 14-16, will be found on page 1138 of this issue.

THE Secretary of Agriculture has just issued Bulletin 92 on "Lights in Relation to Tree Growth," designed to show the benefits derived by the tree by light from all angles, particularly that reflected on the roots.

### Notes From Southern California.

After the drenching rains enjoyed the past month trees and shrubs in Southern California as well as a number of herbaceous subjects are extremely attractive. Many plants that in the east are annual in duration, or at most herbaceous, have become quite tree like. The ricinus or castor oil plant for instance grows 12 feet and 20 feet high with stems a foot in diameter and they are fine now, with large handsome foliage and great bunches of seed pods. Wigandia urens is magnificent on lawns and shrubberies and the large panicles of violet blue flowers hold on a very long time in good order. Those who have only seen Ribes speciosum in nursery rows or in eastern shrubberies can form no idea of its beautiful coloring here on its native mountains. The "Fuchsia flowered gooseberry" must be a very deep rooting subject, for it grows here amidst sage, brush and cactus on dry hills where not a drop of rain falls all summer. Now it is a mass of flowers of the richest, deepest red, the blooms pendant, almost exactly the shape of a fuchsia. On the more exposed positions it grows only about three feet high, but in the canyons where it gets a little shade at times and the benefit of any rain that falls the plants are six to eight feet high, large spreading bushes that are truly magnificent in color. Romneya Coulteri is also in flower close by, though the full beauty of this finest of all California plants is not yet.

Erica Mediterranea is one of the very few heaths that do well here and is just now a pretty sight, its pinkish flowers with black anthers being very attractive. It looks well planted close to some of the yellow acacias and both are in full beauty now. Senecio grandifolius with its large heads of yellow flowers is fine, while the various trumpet creepers, especially Bignonia venusta are at their brightest. For fine foliage the rubber plants would be difficult to beat, the glossy green of Ficus elastica and F. glomerata being fine since the rains. Some very queer combinations are often seen in the gardens here, aloes, cacti and other succulents rubbing shoulders with such moisture-loving subjects as callas, cyperus alternifolius and papyrus reeds, the latter being, of course, freely irrigated during summer. Southern California, in fact, is at her greenest and best just now to welcome the crowds of eastern visitors. H. R. R.

### Magnolia Stellata.

On a sunny day in April or early May there is nothing among hardy shrubs which will light up the landscape with such telling effect as masses of the pure white, star-shaped flowers of Magnolia stellata. It is a deciduous shrub, flowering just before the leaf-buds unfold. Sometimes it is grown as a wall plant, but is seen to advantage when allowed to grow naturally and form a dwarf shrub. This species has the distinction of being the earliest of the magnolias to flower. It has been in cultivation for many years, and is sometimes known under its old name, M. Halleana. The headquarters of the magnolia family are in China and Japan, the one under notice being a native of Japan. There is also a variety of M. stellata with bluish-colored flowers. It was sent from Japan by Mr. Maries, and, like the type, is a dwarf-growing deciduous shrub.

Considering the merits of magnolias in general, it is at first a matter for surprise that these lovely trees and shrubs are not more extensively grown. One reason to account for this is owing to the dislike which magnolias have for certain soils and situations. They succeed best in warm positions on loamy soils of an open and porous nature, says a writer in The Garden. In the cultivation of magnolias it must be borne in mind that they resent disturbance at the root more than any other class of plants; consequently, it is never advisable to remove a plant after it has become established. However, transplanting is sometimes a necessary evil, and under such circumstances the best season is in the spring just when growth commences. If transplanting is done in the autumn, the roots which are very easily bruised, are inclined to rot away, and the plant receives such a severe check that it may never recover. After planting the trees require most careful attention; they should be sheltered under mats, and well syringed if the weather is warm and dry. Magnolias will sometimes ripen their seeds, and if it is desired to raise plants from these sowing should take place at the time of gathering, for no seeds seem to lose their vitality so soon.

### Herbaceous Roses.

This sounds rather a strange term, but I daresay many have noticed how some varieties of tea, monthly and polyantha roses appear to produce such pithy wood and grow so late in the autumn that it is really necessary when pruning to cut the shoots down to the ground line. I maintain that for ordinary bedding roses, in order to obtain a uniformly low growth and also free, healthy shoots, it is essential to prune hard, and I often cut my roses quite down, so that only the stumps are visible. There is another point in connection with bedding roses, and that is their renewal every few years. Do we desire our roses to grow into huge bushes, as they will do if allowed? Is it not better to have younger plants to keep up the continuous growth, asks a writer in The Garden? When the plants become old, their roots are coarse and vitality is rather low, and at the cheap prices bedding roses are now obtainable it is surely worth while renewing the plants, or, at least in some of the beds,

occasionally installing therein a more modern variety.

As the huge output of novelties continues, many old-established sorts will be superseded, and no one who is desirous of being up to date will mind the small expense of superseding some varieties. Recently I saw a bed of Mme. Abel Chatenay, each plant a huge gawky specimen, all grand in their way, but totally unfitted for their position. To have renewed that bed with the same grand old sort would have cost the owner but a few shillings, and he would have derived far more pleasure from it. I do not say such a rose as this will be superseded, but it is quite certain some varieties will be; for instance, Kaiserin Augusta Victoria will have to give way to Entente Cordiale (Pernet) as a bedding variety, and there are others I could name. This renewing of beds with younger and better plants is certain to be more largely adopted in the future than it has been in the past.

DUBUQUE, IA.—The new electric sign which has been erected in front of the store of the Hartnett's Floral Nursery adds greatly to the already attractive store.

Nashville, Tenn.

Everything is parched and burnt up, the earth as dry as a powder horn, no rain or relief depicted in the sky or forecast by the weather bureau. All the flower-beds are having a hard struggle except where copious watering can be had. The grass is brown and the prolonged dry spell is getting to be something worse than awful, and while it has already injured the growing crops, will bring disaster if continued much longer. The florists windows have long since taken on their mid-summer appearance, being decorated mainly with ferns, and palms. Trade has been most excellent, the graduating season of our many schools has just closed. Funeral work, too, has been extensive, but there has been a scarcity of flowers, with a quality surely up to standard.

NOTES.

McIntyre Bros. say the dry spell has not hurt them any. It has called for more water and more labor, but, if anything, it has helped trade, for they have had a nice business, better than ever. In asters they are growing the "Queen of the Market," with fine success. They also have a large supply of the most beautiful gloxinias, of every fine color imaginable.

Geny Bros. say the dry weather is worse on the asters than on the other flowers, and while they have an abundance of water at hand, the crop has been cut short about half. Trade has been most excellent, the demand continuous and satisfactory.

The Joy Floral Company say the prolonged drought has not hurt them much. They still have an abundance of sweet peas, gladioli, phlox and other small flowers.

Arnold Schmidt, was very cheerful over the drought, said it had no effect on him. He has an irrigation system, and is connected with the city water main.

## Gold Letters

Gummed Gold, Silver and Purple Letters for inscriptions on Floral Designs. Best and Cheapest on the Market. Send for Samples and Prices.

J. Lichtenberger, 1564 Ave. A. NEW YORK. Telephone Lenox 5644.

## THE STANDARD

**VENTILATING MACHINERY**  
 The old reliable machines are the most powerful, least complicated of any on the market  
**The Standard Steam Trap**

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.  
**E. HIPPARD CO.,** Youngstown, Ohio

## The Trade Directory

Florists, Seedsmen and Nurserymen of the United States and Canada.

Price: \$3.00 postpaid.  
**American Florist Co.**  
 440 S. Dearborn St., CHICAGO.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, as the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

**MOREHEAD MFG. CO.** Department "N" **Detroit, Mich.**

What the Users say

"Temperature Easily Maintained; Fires Only at Night."

We have at present 1,500 sq. ft. of glass and think this boiler will take care of 25,000 sq. ft. of glass, at 52° in greenhouses. We have no trouble in maintaining proper temperatures, and fire but once at night. We put in the piping system according to your plan in three new houses. The two old houses we left the way they were, which caused us some trouble. We will change pipes this summer according to your plan, and will then have no trouble. Your piping plan is fine, and the Generator works well; in fact, we could not have done without it on account of the pipes in the old houses.

WENSEL & HECHT, Anglum, Mo.

Send for Catalogue.

**KROESCHEL BROS. CO.,**

452 W. Erie St., Chicago, Ill.

# Ready Reference Section.

10 CENTS PER LINE, NET.

## AGAVE.

## Mr. E. L. Glaser, of Glencoe, Ill.,

### Builds One of Our Curved Eave Greenhouses

Built it, because it appealed to his sense of the practical. And when you come to think of its having an indestructible steel frame that, although amazingly light, is rigid and enduring, you at once see where its practical side as an investment comes in. To this add its undoubted increased productiveness over other types of construction and its down right attractiveness, and you have an ideal greenhouse.

Such is our Curved Eave construction.

Send for catalog and know still more about it.

## Lord and Burnham Co.

Factories: Irvington, N. Y. and Des Plaines, Ill. New York Boston Philadelphia Chicago  
St. James Building. Tremont Building. Franklin Bank Bldg. Rookery Bld

## The Best Color Chart

For Florists, Seedsmen  
and Nurserymen.

ERFURT, GERMANY, May 9, 1911.  
AMERICAN FLORIST Co.,  
Chicago, U. S. A.

Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged if you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.

Yours truly, ERNST BENARY.  
Published and For Sale by the  
American Florist Co., 440 S. Dearborn St.  
CHICAGO  
PRICE ONE DOLLAR, POSTPAID.

Ventilating Apparatus **ADVANCE** Twistless Arms

Note that the distance from the center of the shafting pipe to the center of the rod rivet, when the arm is at right angles, is only 7 1/2 inches.

Note that when the arm is closed, that it has an 8-inch throw.

Note that when the arm is open, that it has a 8-inch throw.

Note the simple construction. One bolt securely fastens it to the shafting pipe. Easy to set up. Free from rust.

Our Twistless Arm is fully protected, a patent having been allowed us on the construction of the parts that clamp to the shafting pipe, and a patent pending on the construction of the rod bracket.

## Greenhouse Construction.

By Prof. L. R. Taft. Price \$1.50

AMERICAN FLORIST CO.

410 Dearborn St.,

CHICAGO

**CHARLOTTE, MICH.**—William Breitmeyer, formerly of the firm of J. Breitmeyer & Sons of Detroit, has purchased four acres of land and will build three greenhouses 22x150 feet, the construction of which will be started at once.

**GRAND RAPIDS, MICH.**—The Grand Rapids Greenhouse Co. has 32,000 tomato plants set out in their houses which aggregate nearly 100,000 square feet of glass, and are picking 40 bushels a day. They contemplate going extensively into the culture of geraniums, intending to propagate 1,000,000 cuttings for sale to the trade.

**Good Strong Team Work**  
Is What Counts in Greenhouse Building

By Hitchings team work we mean that our main sales office is at the factory; which means our salesmen are in close daily touch with the men who construct our constructions—which in turn means they are in a position to know construction from A to Z. And they do know. Not theory, but facts with them.

When some unusual building problem comes up, the construction department and salesmen get together and work it out together. Each department pulls with every other department to secure the best possible, thoroughly practical house at the lowest construction cost, consistent with safety and endurance. Such team work eliminates guess work. If you want to be sure you are sure, then Hitchings are the only logical builders for you.

# The Kleinschmidt SOIL GRINDER

Here is a machine for all Greenhousemen that  
**Will Grind and Mix to Any Desired Fineness  
More Soil Than Any Other**

It is substantially and heavily made, all working  
parts being of crucible cast steel or steel forgings.

B. S. Myers, foreman for W. J. Palmer & Son, Lancaster, N. Y., states  
that the No. 4 Mill now in use will grind 50 to 55 yards of soil a day,  
and, had he conveyors to take the soil away, would double the amount.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repair

Ask your Dealer about our Extension Hose, E tension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lick Hose Coupler.

Sold by leading American Seedsmen.

Also Thomson's Special Chrysanthemum and Toppressing Manure, An Excellent Stimulant.

Freight paid on quantities; liberal terms to retailers. Write for our special offer to the American trade. Agents' circulars, pamphlets, etc., to sole makers.

Also Exporters of Pure Scotch Soot Write for prices, etc.

**Wm. Thomson & Sons, Ltd.,** Tweed Vineyards, Clovenstone, Scotland.

## Nikoteen

The most effective and economical material there is for spraying plants and blooms.

## Nikoteen

Is skillfully extracted from leaf tobacco and carefully refined; it is clean and easy to apply.

## Nikoteen

Does the work when vaporized either in pans on pipes or over a flame. Full Pint Bottles, \$1.50.

## Nikoteen Aphis Punk

Specially prepared for fumigating closed houses. It vaporizes the Nicotine evenly and without waste. Nothing keeps a house free from Aphis so cheaply.

Price \$6.50 per case of 12 paraffined boxes. All Seedsmen.

## Garman's Antipest

INSECTICIDE AND FUNGICIDE  
For the Garden, Orchard and Greenhouse  
Non-poisonous and harmless to vegetation.

Kills Green Fly, Aphides, Bark Lice, Thrips, Mealy Bug, Red Spider, Scale, Wire Worms, Ants and Slugs.

This is the Grower's Friend. Handy use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down mildew. Circulars on application. \$1.50 per gallon. Also in quarts, half gallons and in bulk.

**PERFECTION CHEMICAL CO.,**  
FLUSHING, N. Y.

Approved by the New York State Agricultural Dept. Certificate No. 223, July 8, 1910.

Guaranteed under Insecticide act, 1910. Serial No. 91 of U. S. Agricultural Dept.

## Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

## Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for good top-dressing. Unequalled for all field use. Write for circulars and prices.

### Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements should be carefully pre-  
served, as they mean much to the retail florists  
in dealing with their customers, illustrating as  
they do the various kinds of work that the  
everyday florist is called upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## SUGGESTIONS FOR PLANT GROWERS.

### Pot Grown Roses.

The hybrid perpetual or rambler  
roses after blooming if desired to force  
another year, in order to bloom them  
early should be grown in pots during  
the summer. They can be pruned back  
after blooming and lifted, or if in pots  
should be repotted. This will require  
a good, strong soil, composed of two-  
thirds loam and one-third manure.  
When potting be sure to give good  
drainage and pot firmly, ramming the  
soil down hard. It is impossible to  
grow roses successfully in a loose soil.  
The plants should be plunged to rim  
of the pot outside where they can be  
freely watered. Avoid, if possible, plac-  
ing them against the greenhouse or  
other building or against a fence, but  
plant them where they will have a  
free circulation of air and can be  
sprayed from either side. If planted  
against a building or in close quarters,  
they frequently become infected with  
red spider during the hot weather and  
it is nearly impossible to get rid of  
them.

### Asparagus Plumosus and Sprengeri.

It is a good time now to plant, reset  
or renew the soil of asparagus beds  
either plumosus or Sprengeri. If the  
beds are to be set out with young stock  
preparation should be started at once.  
Asparagus plumosus does better in  
solid beds, well drained, with a good  
rich compost about two feet deep.  
The plants should be set 12 to 15 in-  
ches apart and the shoots be given  
strings upon which to climb as soon  
as they begin to grow. But little cut-  
ting should be done the first year as it  
is necessary that the plants become  
well established. The old beds should  
be given a good mulch of half-decayed  
manure, and if possible, without injury  
to the roots, removing the top soil.  
Asparagus Sprengeri can be success-  
fully grown in the bench, but also re-  
quires a good rich soil. The young  
stock the first year should be planted  
10 to 12 inches apart, and will pro-  
duce many stems that can be cut. The  
beds that have produced this year will  
require a renewal of the soil. It is  
better to replant than to try to renew  
the soil in the bench. The plants are

great feeders and the bench is gener-  
ally full of roots after a year's growth  
and it will be found difficult to keep  
the bench watered during the spring  
of the second year. If the plants are  
too close together they can be given  
more space in resetting, good large  
plants will do better if set about 15  
inches apart. If a mulch is attempted,  
care should be taken to use no fresh  
manure but manure that is well rot-  
ted. The ammonia that arises from  
fresh manure will affect the plants,  
turning the foliage light, and in severe  
cases the foliage will become nearly  
white, making it worthless.

### Dry Culture.

From all parts of the country come  
reports of the excessive drought, which  
will necessarily increase the labor of  
the growers who would obtain a good  
growth on the plants in the field. Much  
can be done to conserve the moisture  
in the soil and in such seasons it amply  
repays for the labor. Keep the hoe  
going all the time and have a light  
mulch of soil around the plants, which  
will prevent the rapid evaporation of  
the moisture on the bright hot days.  
Many growers seem to be afraid to  
stir up the soil during a dry spell. This  
is a great mistake, the experience of  
the growers in the arid sections show  
what can be done by "dry farming."  
If the grower is fortunate enough to  
have a good shower, be sure to run  
the wheel hoe over the ground as soon  
as it can be successfully done, in order  
to lighten the soil up and keep all the  
moisture in the ground that is possible.  
A mulch of straw or half decayed ma-  
nure will greatly assist the sweet peas,  
and a good mulch of manure will be of  
great benefit to the dahlias. During  
such dry weather as a rule, weeds are  
not over troublesome, but there are a  
few kinds that revel in such weather,  
purslane (the despised "pussy") will  
make rapid growth during hot weath-  
er, and rob the soil, not only of its  
richness, but of the moisture, and  
many of the low wiry grasses make  
rapid growth during the hot spells.  
These should all be hoed out before  
they get much of a start. Constant  
hoeing and judicious mulching will  
carry many a crop successfully through

a long drought and is much better than insufficient watering, after the ground has become dry.

#### Mignonette.

To be able to cut fine spikes of mignonette in early winter will require an early start and although it demands care and attention to germinate small seeds during hot weather, yet it will be necessary to sow seed early in July in order to have a cut in by the holiday season. A north propagating house is one of the best locations for the sowing of seeds in summer. Mignonette does not transplant from the seed flats successfully, so it is better to sow it in 2½-inch pots, five or six seeds to a pot, which can be thinned out to one or two plants as soon as they are large enough to select the strongest. Some growers prefer to sow the seed in hills in the bench, but to grow the large spikes of this flower requires a soil very heavily manured, and the constant watering often sours the soil before the plants have pushed out roots enough to absorb the water. As soon as the plants have attained a height of two or more inches the tip should be pinched or rubbed out, that the plant will branch, and again later these branches will have to be pinched off, until there are six or eight good, strong shoots. The plants will grow in most any kind of good soil, but to get the best the compost should be about one-half partly decayed manure well mixed in the soil and this will produce splendid spikes of bloom. After the plants begin to form their leaves a careful watch must be kept for the cabbage worm; these worms are very fond of mignonette and are voracious eaters, and soon denude the plant. They are a little difficult to find, being of the same color as the leaf, but are generally found along the midrib of the leaf or on the stem. Growers who cultivate large quantities of this crop screen their ventilation with mosquito netting to keep out the moth which lays the eggs. The plants should be set about one foot apart in the bench and staked or tied in some suitable manner to keep the stems straight and erect.

#### Marguerite Nicholson's White.

The marguerite has become a very popular flower the last few years, being used extensively in table decorations and basket work. In the Boston market Nicholson's White, which we illustrate, has been noted as the best offered for sale in that city. It is grown by William Nicholson of Framingham, who cultivates it extensively. As will be seen, the flower is very large yet not coarse and it is a good producer, the plants being full of flowers all the winter. Mr. Nicholson grows his plants in pots, they being in 9-inch and larger sizes during their blooming season, and after they begin to bloom are liberally fed, and the house is a sight worth seeing when in full bloom.

MINNEAPOLIS, MINN.—By the proclamation issued by Mayor Haynes, Saturday, June 17, was named as "Flower Day" and the day as outlined by the edict was to be one on which vacant lots, lawns, school grounds, and every piece of property not used for other purposes be planted with flowers. In the proclamation was written, "I predict that Minneapolis during the civic celebration week will be a pride to us all and a wonder to our visitors."

Conducted by Robt. Kliff, Philadelphia, Pa.

### The Standing Wreath.

SEE SUPPLEMENT WITH THIS ISSUE.

Of all the designs that the florist arranges for funerals, with no other can the display be made with such a proportionately small amount of material as can be produced with the standing wreath. It not only has all the excellent features of the ever popular wreath, but also the added beautiful base to give it the proper setting. It stands high enough to make a fine showing and no matter where placed in an arrangement of designs and other flower pieces is always conspicuous and attracts attention. The wreath can be made of all the seasonable flowers that are obtainable by the designer, and can be made beautiful with any of the choicer flowers, therefore the florist is not restricted in any way; either short stemmed or long stemmed flowers may be employed, the only difference being in the style and make up of the design. The most artistic designers at the present time seldom use many varieties in the same design, generally making the wreath of one flower entirely, sometimes using two, with each arranged in a section by itself. Some beautiful combinations and contrasts are developed in arranging the wreath in this manner. Roses and lily of the valley make a very beautiful floral piece, the lily of the valley being arranged in spray form on one of the lower sides and across the bottom. Orchids instead of lily of the valley or a combination of the two are equally beautiful. These

combinations give to the designer an opportunity to display his best ability.

The base also is capable of being treated in many different ways and add considerably to the general appearance of the design. The back should be of galax or other suitable foliage and this can be brought around the front with a few prominent flowers arranged to relieve the sameness, or the front made of any of the large prominent flowers backed with cypress and other greens. It is far better not to attempt to hold to the cone-shaped form of the base, but make a fitting foundation for the large wreath. A spray of asparagus or smilax wound around the stand which supports the wreath and also around all wires that are not covered gives the design the proper finish. The design which we illustrate is a beautiful piece of workmanship, the wreath being of cattleyas and the base appropriate greens relieved by a few sprays of *Lilium longiflorum* and *Lilium auratum*, the handsome bow of ribbon finishing the design in a proper manner.

### Fertilizers for the Florist.

Paper read by H. B. Dörner before the Illinois State Horticultural Society.

"A fertilizer is any substance which when added to the soil adds directly or indirectly to the amount of nutritive substances available to the plants growing in that soil." However, to better understand the role that fertilizers play in the growing of plants one should understand what elements are necessary for the development of the plant itself. Among the elements necessary for plant growth are carbon, oxygen, hydrogen, sulphur, potassium,

MARGUERITE NICHOLSON'S WHITE.

phosphorus, calcium, magnesium, iron, chlorine, sodium and silicon. Although the last three are found in nearly all plants, the plants will grow without them. The question then arises as to where the plant secures these elements. With the exception of carbon all are taken from the soil. The soil then is the source of all the mineral elements which are represented by the ash of the plant. All this mineral food-stuff is taken up in solution through the minute root-hairs of the plant.

The carbon which is used in building up food substances which are later used in the construction of plant tissues is taken through the breathing pores of the leaves and other green parts of the plant. Carbon is taken up in the form of carbon dioxide, is decomposed by the energy of sunlight acting on the chlorophyll bodies of the living cell; the carbon and part of the oxygen are combined with other elements to form foods and the remainder of the oxygen is given off to the air. As carbon-dioxide is always present in the air there is no need to worry about the source of the supply of this food stuff. To give the plants a sufficient supply means merely good ventilation. It is well to study the role of some of the more important mineral elements.

Nitrogen is necessary for cell building or growth. It is specifically directed to increasing the vegetative parts. An excess of nitrogen tends to make the plant grow for too long a period, forming more leaves and shoots and retarding the development of the flowers and seeds. It also tends to deepen the color of the leaves.

Phosphorus is necessary for the formation of protoplasm and tends to increase the ripening process and particularly seed formation. It thus causes an early ripening of the crop.

Potassium is necessary for the formation of carbo-hydrates such as sugar and starch and plays an important part in the development of the wood and in the fleshy parts of the fruit.

Magnesium is a constituent of chlorophyll.

Calcium is present in all plants and serves to neutralize the acids formed during growth.

Iron is necessary for the formation of chlorophyll and its absence produces chlorosis.

All these elements are found in the soil in varying quantities but three of them, notably nitrogen, phosphorus and potassium, are used in such large quantities that they are likely to become exhausted. These, then, must be added from time to time to secure the best developments. Also to get the best results they must be in the proper proportion. The effect of the presence in insufficient quantity or absence of the necessary elements entirely is perhaps best expressed by the law of minimum: "The nutrient present in the soil in minimum quantity gives a standard for the amount of production as a whole" or in other words the limited element determines the size of the crop. The availability of an element also affects the growth of the plant. The availability is determined by the form in which it is found in the soil.

Fertilizers are of two general types known as natural manures and artificial fertilizers. By natural manures are meant the cleanings from cow barns, horse stables, hen coops, etc.,

mixed with decaying vegetable matter of various kinds. Natural manures when added to the soil serve two functions: first, add to the supply of the elements necessary for growth and, second, improve the physical properties of the soil. Those soils that are clayey and compact are made more open and porous by the separation of the particles so that air and water can enter more freely thus acting directly on the insoluble constituents. The roots of the plant can also penetrate more readily. Those soils that are light are also benefited by the filling the spaces between the particles and making it more compact. Artificial or commercial fertilizers, on the other hand merely add to the fertility without making any great change in the physical properties of the soil. This is not always true as a few are sometimes injurious if used by themselves. It must also be kept in mind that bacteria do much to increase the fertility of the soil by making many of the insoluble compounds soluble. To give these helpful forms the best chances for development the soil must contain decaying organic matter. It is well, then, to keep in mind that a small quantity, at least, of natural manure should be added to our greenhouse soils.

In the past the tendency has been to use nothing but natural manures but their scarcity in the present day has made it necessary to add commercial fertilizers to the florist's list. Of the natural manures the two that are in most common use are barnyard and stable manures. These differ somewhat in character. Barnyard manure is a cold manure and ferments rather slowly so that there is less danger in its use when it is not thoroughly decayed. Stable manure on the other hand is a warm manure, fermenting rapidly and giving a high temperature which is injurious to plant growth. Sheep manure is used in a dry state and is somewhat stronger than cow manure. It also heats on fermenting and so caution should be observed in its use. It should, then, be used in much smaller quantities than decayed manures. Hen manure is a highly nitrogenous manure and should be used in very small quantities. Cattle manure is now put upon the market in a dry form and is much used for mulching purposes. It should be kept in mind that this manure differs somewhat from ordinary barnyard manure in that it has little foreign matter mixed in it. This makes it stronger and so should be applied in smaller quantities.

Commercial fertilizers or chemical fertilizers, as they are also called, are used merely to supply nitrogen, phosphorus and potassium and so naturally fall into three groups. Of those bearing nitrogen there are several of importance in greenhouse work. Dried blood which should contain 14 to 15 per cent nitrogen is insoluble and so must decompose first before the nitrogen is available. This makes a good form both for incorporating with the soil and also for a mulch. Sodium nitrate is the only nitrogen salt that can be used in solution as all the other soluble salts of nitrogen become fixed as soon as they come in contact with the soil. However, they become available in a short time. The released sodium may correct soil acidity or may liberate calcium, potassium or magne-

sium from the soil. Care must be exercised in the use of sodium as it deflocculates the soil leaving behind the carbonate of soda. When this happens the clay soils are likely to become sour.

Ammonia salts increase the amount of lime removed from the soil. The sulphate and chloride act as acids and the soil finally becomes sour. This is partly caused by moulds using the nitrogen and setting the acids free. As nitrogen can only be taken into the plant in the form of the nitrate these compounds must be converted into nitrates before available. Bacteria play an important part in this conversion. Ammonia sulphate is the more useful of the two owing to its greater abundance and lower cost.

Phosphorus may be secured from several sources. Steamed bone carries from 12 to 14 per cent of phosphorus. It should be well steamed and finely ground. The steaming removes most of the nitrogen which is in the form of fats. The organic structure of the bone is also destroyed making it soft and so reducing it to a finer state of division. The more finely ground the larger the surface exposed to the agencies of decay and so the sooner it will give up its phosphorus. Natural rock phosphate is not readily enough available for greenhouse crops so should not be used unless mixed in the compost heap where it is made available by the fermentation. When used in this way should be quite efficient and has the advantage of not being injurious when used in large quantities. Acid phosphate, which is the natural rock treated with acid, is likely to be corrosive and injure plants unless mixed with the soil several days before planting. All phosphorus fertilizers should be added to the soil before planting.

Potassium salts in the form of sulphate and chloride may also deflocculate the soil. Potassium sulphate is, perhaps the best of the potassium salts to use. Kainit is a mixture of soluble salts of potassium, magnesium and sodium as it is mined. Considering the potassium only it is one-fourth as strong as commercial potassium sulphate. Wood ash is another source of potassium but to be of value must contain at least five per cent of potassium. Wood ash also contains large quantities of lime.

Probably the best forms of commercial fertilizers for greenhouse work are dried blood, ammonium sulphate and sodium nitrate for nitrogen; acid phosphate, steamed bone and natural rock phosphate for potassium. To this list might be added many more but their great cost or their scarcity make them prohibitive.

To the list of commercial fertilizers should be added one other, namely, lime. While this substance adds but little directly to the nutritive substances of the soil, it does much to improve the physical condition of the soil and helps to make other forms more readily available. Lime influences the soil under three mechanical conditions by causing flocculation as in the case of heavy soils. The soil is thus made more open. It also helps to bind sandy soils. Second, it affects its chemical composition by ridding it of many acids formed by the decay of organic manure or in other words keeps it sweet. It renders other plant foods available. It supplies needed plant

food. Third, it affects its biological conditions by favoring bacterial growth and affecting insects and fungous growth. Lime may be used in the form of air-slaked lime, ground limestone and marl. Air slaked lime differs little from ground limestone except in the fact that it is separated into smaller particles. Fresh lime should never be used on account of its caustic properties. Ground limestone is perhaps the best as it can be applied in quantity without injury to the plants.

It must always be kept in mind that commercial fertilizers are so much stronger than natural manures that great caution must be observed in their use. It is hard to realize that a very small amount of commercial fertilizer may be equal in fertilizing value to a very large quantity of natural manure. With the increasing scarcity of natural manures there is no doubt that commercial fertilizers will have to replace them in part. Experiments being carried on at the present time will, without doubt, show that just as good flowers and plants can be grown with chemical fertilizers when supplemented by a small quantity of natural manures as when grown with natural manures alone.

#### Grafting Roses.

ED. AMERICAN FLORIST:

We grafted last winter rose scions on a native wild stock in the same manner as apples, etc., are root grafted, which failed to grow. Is it possible to graft roses in the winter without potting the roots? In what manner can the native wild species be used as stock for grafting? E. S.

State of Washington.

In reply to E. S. concerning the grafting of the native wild roses, would say that, personally, we have had no experience in handling the native wild rose in that manner. We thought of doing it at one time as an experiment, but found by potting the stock that they were inclined to check up indoors under glass as soon as the weather got as low as 35° outside, that is, at a regular temperature of 60° at night the plants seemed to want to go to sleep, or require a rest. For indoor forcing Manetti stock (English stock) cannot be beaten in our estimation, and they can be purchased, we think, much cheaper than we could grow them here in the east.

If E. S. wishes to experiment with the wild stocks we would suggest planting the seed and growing the scions in this way. Rose canina would be a good variety also to try the graft on. The seedlings can be grown on in small pots and handled as prescribed in THE AMERICAN FLORIST issue of January 7, 1911, page 1194. If E. S. obtains that issue of THE AMERICAN FLORIST and reads the article which describes rose grafting in detail, illustrated, it may help him; at the same time we are rather doubtful about the success with stocks of the wild rose used for grafting purposes, and the method employed by E. S. is impracticable, we think, except for fruit grafting. E.

APPLETON, WIS.—W. H. Rogers, one of the oldest florists of Appleton, Wis., died June 15. The funeral was held Monday, June 19.

PUTNAM, CONN.—The referee in bankruptcy has issued an order to sell the contents of the greenhouses of the Ernest F. Arnold estate.

## ORCHID NOTES.

ENDEAVOR to keep *Cattleya labiata* dormant after flowering.

GIVE *Vanda coerulea* a light sunny position from now on and water the roots only moderately.

PHALAENOPSIS greatly dislike heavy overhead watering, though they like an abundant supply at the roots when growing freely.

#### Midsummer Treatment of Cattleyas.

By June 1 practically all the repotting of the established stock should be finished and growth will be active in all departments. Were we tied to one species of *Cattleya* C. Trianae would certainly be that one. Its flowering season extends over a longer period than any other—it is second to none in beauty and freedom, while it is as easily grown as any. All our stock has been repotted this season and the plants have made good roots which have reestablished them. No fire heat has been given since a week before Easter, so the growth has not been

very free so far, but with the warmer nights the young shoots have come with a rush and owing to the numbers of new roots made these will all probably sheath and flower. Already some of the most forward are showing sheaths and the plants are taking considerable water.

Circumstances often lead us to change our ideas about cultural matters. At one time we were opposed to any but the lightest spraying of the *labiata* *Cattleyas* overhead, but during hot, dry weather it is quite a task to keep the atmosphere sufficiently moist during the day and we have found one or two fairly good sprayings very helpful in maintaining this moisture and very refreshing to the plants. It enables us to close the house earlier in the afternoon with the sun shining on the plants, the moisture gathering on the glass and preventing burning of the foliage. Then when the sun has left the house we put a chink of air on again which dries up superfluous moisture before nightfall and is invigorating and restful to the plants. All orchids like this buoyant atmosphere by day and cool night air and none more than *Cattleyas*.

CYPRIPEDIUM BARBATUM NIGRUM.

C. Mossiæ is in flower, having been repotted earlier in the season. The slight check given by repotting we find an advantage rather than otherwise, as the demand for the cut flowers is better during June than May and we get the bulk of the flowers during the former month. After flowering C. Mossiæ needs the best position at command in order to finish up its growth in good time to ripen up with the waning sun in autumn. C. Schroederæ is the latest of the Triana section to flower and joins hands with the earlier Mossiæs. The plants have been potted when necessary and are growing freely. We have had grand C. gigas already and there are many more plants to flower, some of them just showing the tips of the flower sheaths in the new growth. This does not check like the majority of cattleyas but the flower buds form directly the growth is matured. In this respect it differs from C. labiata which was showing sheaths at the same time but will not bloom before September.

After C. Mossiæ comes C. Gaskelliana. This, too, flowers at once upon the new growth but it checks for a little while and does not push up so rapidly as C. gigas and C. Dowiana. It requires ample root moisture now and a light position to perfect its flower sheaths. C. Percivaliana is rather erratic. It should be growing strongly now and some of our plants are doing so, but others are still dormant. We never try to hasten them but just let the plants have their own way. The small pseudo-bulbs do not take long to mature and there is ample time for them to do so. Although the worst ravages of the cattleya fly are over for the season it is well for the grower to have his eyes open for the characteristically misshapen growths caused by this pest and cut off all that are seen. Should any of the flies be seen about the houses a couple of fumigations with nicotine should be given or light doses of cyanide. But there is considerable young growth in the houses now and this gas must be used with caution.

Newly imported stock of C. Trianae has again arrived in good condition and fit for potting at once on arrival. We are always careful to set the plants into as small size pots as possible so that the next season they can be slipped entire into a larger size. We also use very little fiber over free drainage and make this absolutely firm with the dibber, clipping off ragged ends with a strong pair of scissors or shears. C. labiata is again said to be very scarce and the plants small and poor. It looks as though collectors will either have to go further back, where the trouble and expense of collecting the plants are greater, or else give this species a rest for a year or two. The immense number of plants sent home since its rediscovery must naturally have greatly depleted its native haunts and it would be a pity to again lose this popular and useful cattleya.

H. R. R.

#### Cypripedium Barbatum Nigrum.

Cypripedium barbatum is one of the oldest and best known cypripediums in existence and a very useful, free flowering species. The variety figured, nigrum, is deeper in color than the type and of medium size only. The pouch of the lip is of the deepest brown purple or portwine color which gives it a very distinct appearance. C.

CATTLEYA TRIANAÆ ALBA.

At El Regal Greenhouses, Hollywood, Calif., February, 1911.

barbatum is a native of the Malay peninsula and likes considerable heat, moisture and shade while growing, as this brings out the beautiful dark marbling on the foliage which is one of the plant's principal attractions. A compost of equal parts of peat and loam with some leaf mould added and plenty of broken crocks to keep the soil open will be found suitable and the roots should be well watered all the year round. Dryness either at the root or in the atmosphere is very distasteful to this cypripedium and leads to red spider and other insect attacks. An orchid house, as generally understood, is not necessary for this cypripedium, as it thrives just as well among other plants needing a warm moist greenhouse. When potting give ample room and spread the roots out, working the compost down between them.

CYPRIPEDIUM INSIGNE is growing and also producing its flower spikes and needs a liberal supply of water now.

#### Albino Orchids.

White or albino varieties of orchids are always much sought and highly prized by connoisseurs. In the majority of instances they are more beautiful than the types from which they spring, though in the case of albinos having no spot of color like *Celogyne cristata* alba there is a peculiar dead appearance which is relieved by the yellow blotch in such as the albinos of cattleya. Perhaps the finest white orchid in existence is the white form of C. Mossiæ (C. M. Wageri). In this form the yellow area on the lip is much reduced in size and by its clear purity of color enhances the snowy whiteness of the outer segments. This form is very rare, much more so than *Reineckiana*, a form in which the lip does not vary much from the type but the sepals and petals are pure white.

The albino form of C. Mendelli (Blunti) is another extremely chaste and white cattleya, bearing the same relation to the type as Wageri does to C. Mossiæ. This species also has a

form with white sepals and petals (Morganian). The purest white form of *C. Trianae* is *C. T. virginialis*, which has no color whatever on any of the segments excepting a yellow blotch in the throat. *Alva* has the flowers pure white with the exception of the lip which has, in addition to the yellow blotch, a very faint suffusion of pink in front. *C. gigas*, *C. Gaskelliana*, *C. Percivaliana* and *C. Schroederiae* all have their white forms, the albino of the last named having much more substance and being a better grower than the majority of white forms.

In connection with albinos generally it should be noted that they are not usually as vigorous as the typical forms of the various species, and the utmost care is necessary in their culture. It frequently happens that the growth producing the pure white flower occurs in the center of a large specimen plant of the type and it is often difficult to detach it and set it going on its own account. We remember a case in point that occurred some years ago. Some large masses of *Dendrobium nobile* had been received and among one of these were a few small bulbs that produced pure white flowers (*D. nobile virginale*). It was quite impossible to determine exactly how many bulbs were of the albino, so all the surrounding bulbs were carefully saved and placed on a pan of live sphagnum moss. Not one of the resulting plants turned out to be white nor did the original plant produce any back breaks. Had this been of the type in all probability it would have produced at least half a dozen plants. Without going deeply into the culture of albinos, which in all essentials is the same as for type species, we may advise all who are fortunate enough to possess them to keep a careful eye on their treasures. Rather smaller receptacles should be used and the greatest care taken in the selection of the compost, in watering and in giving them the best position in their respective houses. A skilled propagator of orchids will divide these treasures into almost as many plants as there are bulbs and bring them all through safely but those having less experience will be well advised to have their plants entire at least until some practice has been obtained with common varieties. H. R. R.

NEGAUNEE, MICH.—The Negaunee Nursery and Greenhouse are erecting a new house 21x15 feet.

GOVENEUR, N. Y.—John T. Humphrey of Rome has leased for a term of years, with the privilege of buying, the Brainard greenhouses, and intends to enlarge and improve them and operate an extensive florists' business.

ALLENTOWN, PA.—The hail, wind and rain storm which passed over the city, June 12 damaged greenhouse property badly. Ernest Ashley was the worst sufferer. Every pane in one house on Fourth and Tighman streets was broken and the other houses had but few whole panes left. At Andrew Yeager's an entire side was blown out into Sixth street. At O. J. Sawyer's nearly all the glass was broken and the interior flooded. E. N. Kroninger's large plant on Emaus road, was badly broken and the plants cut by the broken glass. J. F. Horn & Bro. did not suffer from the hail. No panes of glass were broken but water surrounded the greenhouses to the depth of three inches.

## CHRYSANTHEMUMS

### Tying Up Chrysanthemums.

As soon as the chrysanthemums are planted preparations should be made for keeping them growing erect. Different methods are adopted for the tying up of the chrysanthemum plants, some growers use a wooden or wire stake, to which the plant is tied; others stretch wires the length of the bench just above the soil and at a sufficient height in the houses, and strings are stretched from the lower to the upper wires and the plants tied to the strings. Both of these methods are, however, inconvenient if it is desired to mulch the plants. A method employed by many growers is to stretch wires five feet above the bench, over each row of plants, and long strings of raffia fastened on this which are loosely fastened to the plant a few inches above the ground and as the plant grows the raffia is wound around the stem. Under no circumstances, however, try this method with cotton string, for the string will shrink when wet and pull the plant out of the ground. If long raffia cannot be obtained tie two shorter pieces together.

### Planting for Cut Blooms.

The planting of the second early and midseason varieties intended for commercial cut flower purposes should now be finished without further delay. One of the important points to consider when mapping out the plan of planting is to get the varieties that grow about the same height on the benches together. The varieties Timothy Eaton, Yellow Eaton, Col. D. Appleton, Dr. Enguehard, Clementine Touset, Pres. Taft, Gloria and October Frost are tall growers and require plenty of head room, and ought to be planted in the center of the houses where they will receive plenty of air all around them. To the grower who has the large modern houses with head room of five to six feet on the front benches, the matter of planting the taller varieties in the center benches may not seem of so much importance, but to those who are not so fortunate it is very important, as it is impossible to turn out first class stock without ample head room for the proper development of the flowers. Even with the most modern houses better results can be obtained if the arrangement of planting is planned according to the height the varieties will grow as it does away with the danger of the dwarfier ones being shaded by the taller. Polly Rose and Glory of the Pacific are good varieties for side benches with three to four feet of head room, late propagated Pink Ivory and Ivory will also do for these benches, but the early propagated stock of these varieties that has been grown along strong will need more head room. Of the newer varieties that will be planted in great numbers this year the variety Oropa is a dwarf grower and will do well on the same bench with Polly Rose. Donatello is a little taller grower and strong, early propagated plants will grow about four feet, but later struck stock will be much shorter, it being inclined to a dwarf habit, and the late plants do not stretch out as do some varieties. The variety Gloria is a climber and will need seven feet or more of head room.

Another feature to study in planting is that of time of blooming, the early

varieties should be given space by themselves, so should the midseason varieties, and the same with the later ones. This gives the grower a chance to better take care of the plants' needs as regards feeding, temperature and keeping the insect pests in check after the blooming period has commenced. The anemone, pompon and single varieties are very useful for special work and a large number are grown to be used as sprays, which is the only way to do these types, they should be planted now and pinched back to form four to six shoots to each plant, set them eight by nine inches apart, and as soon as the shoots begin to lengthen out attend to the work of giving them support.

C. W. JOHNSON.

### Bulbous Flowers at Lake Forest, Ill.

A visit to the estate of Cyrus H. McCormick, Lake Forest, Ill., late in May found much for the lover of nature to admire. This estate has been left in a very natural condition, the landscape gardener taking advantage of all that had been provided by the Maker to make the estate beautiful. Situated on the bluffs of Lake Michigan with a beautiful view of that large sheet of water and abounding with ravines and hills, it was covered with a fine growth of trees and natural flora. Through and over these ravines have been constructed drives and bridges by lavish expenditure, that enable the visitor to walk or drive all through the estate and admire the beauties of nature. Besides the natural growth, quantities of trees and hardy shrubs and plants have been set out and all are in prime condition, and the place at the time of our visit was a great credit to E. O. Orpet, the superintendent in charge.

The herbaceous border which contains a very extensive collection of varieties was beginning to show its beauty, as can be seen by the accompanying illustration. The tulips were all in full bloom, and the iris just beginning to flower. The tulip bulbs were planted in masses of a color, each variety by itself, beginning with the earlier bedders and ending with the Darwin section, the latter being used in larger quantities, for it seems that the later a variety blooms the longer it lasts, and is better both in the quality and texture of the flower. These bulbs are not lifted each year, as is so often the custom, but are allowed to remain for three years at least, and as long as they do well. When they show that a replanting would be advantageous the clumps are carefully marked and lifted after the foliage has died, keeping each variety separate, and dried in the shade until time for planting. The proper time and the best way to lift bulbs is when the leaves are about to die down late in June and the root action is completed.

The irises were just coming into flower and promised a great showing, there being a fine assortment of colors all in full bud. These Mr. Orpet says are better the second year and should be lifted the third for the bulbs increase rapidly by offsets, and the larger ones are far better than can be obtained by importing from Holland. Behind the bulbous plants the herbaceous stock was just coming into bloom, large clumps of *dielytra* were showing color and the border gave promise of an elegant show throughout the summer.

BULBOUS FLOWERS AT CYRUS H. McCORMICK'S, LAKE FOREST, ILL.

The estate abounds in natural flora and these have been given the best opportunities to grow and increase and many wild flowers that are not indigenous to this section but which are perfectly hardy have been transplanted in congenial surroundings. All through the stretches of woodland, which are very extensive, could be seen the trilliums in bloom, and here and there were clumps of *Cyripedium pubescens*. Plantings of *Cyripedium spectabile* were just throwing their strong growths through the ground and promised splendid showing in the near future. The whole estate abounds with subjects for the study of the botanist or the lover of trees and wild flowers.

WEEDSPORT, N. Y.—Irving LeDuc is contemplating making an addition of 5,000 square feet to his glass the coming summer, his business having outgrown his present structure.

EDWARDSVILLE, ILL.—Articles of incorporation were granted the J. F. Ammann Co., to carry on a general greenhouse and floral business. The capital stock is \$6,000, and J. F. Ammann, J. H. Buchsenschutz, Le Roy Smith and Edward C. Buchsenschutz are the incorporators.

ST. PAUL, MINN.—The annual flower show of the State Horticultural Society and the Minnesota Rose Society was held June 15 at College of Agriculture at the State University. The exhibits were confined to cut roses and perennials and a fine display of both was staged. The judges, Olaf Norquist, August Swanson, and John Hawkins for the perennials, and R. A. Latham, C. A. Malmquist and T. M. Lyon for the roses.

## THE CARNATION.

### Care of Young Stock.

The young stock in the field occupy much time at this season, from the fact that showers are frequent during June, and each heavy rain gives the weeds a fresh start, besides beating down the surface of the soil to such an extent that renewed cultivation is required. It therefore becomes necessary to hoe frequently, and as the plants branch out it takes more care and more time in avoiding injury to the plants, and in hand-weeding around the stems. The amount of work in the field, of course, depends in a great measure on the consistency of the soil and the thoroughness of its preparation in the spring, and those who have to contend with a heavy soil, or one that soon bakes hard, have a much more difficult proposition than the grower whose land is sandy and open. But whatever the soil may be, it is one of the essentials of good culture that the surface should be kept well pulverized by frequent and shallow cultivation, thus allowing the soil to be well aerated, and at the same time conserving the moisture by means of a dust mulch. With this in view, it is necessary to stir up the surface of the ground after each heavy rain, and to get at this work just as soon as the ground dries enough for cultivation.

Topping also becomes a bigger job each week, for the plants are now growing rapidly, and as some shoots are liable to be broken by the wind if allowed to get too long, it pays to go

over them frequently, and to top them low enough to ensure a stocky and well-balanced growth.

The variations of growth between different varieties are quite marked in the field, and thus far it seems hard to find any to beat those of the Enchantress group for rapidity and regularity of growth, the white variety of Enchantress being possibly the strongest of all that group, while Rose Pink is a good second. Beacon is also a good grower in the field, and usually produces good bushy stock by lifting time, or say, about the end of July. Pink Delight is another healthy grower, though longer in the joints than the Enchantress varieties, and consequently more given to splitting off its shoots unless they are topped back pretty well.

The neighborhood of New York has been more favored in regard to comfortable weather than many other portions of our country, extremely hot days having been very few, and practically no uncomfortable nights have been experienced thus far, with the result that carnations, both indoor and out, have kept in rather better condition than they do in a really hot season. Of course, the flowers are growing smaller, and likewise the price and the demand, so it will not be long before the carnation men are making a general clearing out, making all necessary repairs, refilling the benches, and then hustling the plants in again from the field.

In the meantime the old plants dry out rapidly, and take up a lot of water, and as red spider appears, frequent

syringing becomes a necessity, although the latter treatment does not benefit the flowers in any way, and as a matter of fact, the less water a carnation gets on its petals the better it is for both color and keeping qualities. Free ventilation both night and day is an absolute necessity, and a light shading on the glass will help greatly in keeping up both the size and color of the flowers, to say nothing of the additional comfort of those who have to work in the houses. This shading will also prove its value during the laborious work of emptying and refilling the benches, a period when the poetry of flower growing is rather notable for its absence, and when a little comfort will be welcomed by those taking part in the exercises. W. H. TAPLIN.

### Carnation Growths Wither.

ED. AMERICAN FLORIST:

The growths on my carnation plants wither and dry up. The plants were purchased and looked healthy and were planted in old pasture sod. They have been fertilized with Peruvian guano, the same as the plants were last year, which did finely. I have had trouble with red spider and have syringed with a fine spray daily. When the blooms are cut the stem dries up instead of sending out new shoots. I enclose specimen of the growths. Can you inform me what is the trouble? P. S. W. Tennessee.

Examine the roots. I am inclined to think the trouble is due to the roots being burned, through being treated to Peruvian guano when not in a fit condition to receive it. The daily syringing is also wrong for this season of the year. A thorough syringing once in ten days, as the weather permits, together with plenty of fresh air at all times, will do more to keep the red spider in check than a fine daily spraying. Also, it is a good plan to keep up regular fumigations with one or the other of the nicotine preparations. There is considerable presence of stigmatose, due to the foliage being punctured by thrips. C. W. JOHNSON.

HAVERHILL, MASS.—Leith & McDonald have dissolved partnership by mutual consent. The business will be continued at Primrose street by Frank Leith.

BERKELEY, CALIF.—Edmond Eglinton has taken charge of the orchid houses of J. A. Carbone which is one of the large establishments on the Pacific coast.

CHEYENNE, WYO.—C. H. Garwood is planning to build three greenhouses, one 20x36 feet and two 20x32 feet, and a new store building at the greenhouses 20x30 feet.

HAVERHILL, MASS.—W. W. Emerson will build a new semi-iron frame carnation house, 20x75 feet, the material to be furnished by the Lord & Burnham Co. of New York.

AUBURN, N. Y.—W. J. M. Edmonds is rebuilding his range of houses, combining the three houses into one 30x120 feet.—Dobbs & Son are building a new house 40x250 in which it is intended to grow carnations.

MONTGOMERY, ALA.—The Morningview Floral Co. is the new name of the florist's business conducted by H. L. von Trott formerly known as the Fernhill Greenhouses. The houses are to be moved from Wetumpka road and rebuilt on Evergreen street before the fall trade begins.

## AMERICAN SEED TRADE ASSOCIATION THE MARBLEHEAD CONVENTION.

### The Closing Sessions.

The annual convention of the American Seed Trade Association held at Marblehead, June 20, a preliminary report of which appeared in our last issue, page 1136, was continued June 21 and 22. The meeting was called to order on Wednesday morning and Albert McCullough made report as a delegate to the National Board of Trade, detailing the work of that organization in keeping in touch with national legislation affecting trade conditions. Prof. Chas. D. Woods, director of the Maine Agricultural Experiment Station, Orono, Maine, and president of the National Association of Seed Analysts, read a paper on "Proper Growing and

different styles of culture, and got the best results with medium depth of planting and broad ridge culture. C. F. Wood, of Louisville, reported that Maine potatoes did not succeed in his state until acclimated. Secretary Kendel said one farmer recommended to him planting every fourth row later, and attracting the bugs to this fourth row because they seek the fresher growth, and then kill them on this row. Prof. Woods recommended an arsenate of soda as a poison where poison was necessary, in addition to Bordeaux mixture, as the arsenate of soda is cheaper than paris green. He explained the method of using formaldehyde gas to disinfect potatoes, and Secretary Kendel told about his manner of using this gas. Leonard H. Vaughan asked if the formaldehyde would burn out potato eyes, and was told there was no danger of this if the method explained was followed. A paper was then read by C. N. Keeney, Le Roy, N. Y., and vote of thanks returned to Messrs. Keeney and Woods.

A resolution introduced by Kirby B. White by request, was unanimously adopted, that the association urge upon the house of representatives and senate of the United States the imperative need for amendment of the corporation law, whereby it shall be made permissible for corporations and companies to make returns as of the close of their individual fiscal years, to the end that obedience to the law may be rendered the least burdensome, and accurate compliance with its provisions made possible, thereby conducting to the benefit of the government and the public, and that the attention of congress be directed to the necessity for instant action. This was strongly favored by K. B. White, W. D. Ross and F. H. Ebeling, who urged that efforts be made by all members to have similar action taken by all mercantile organizations in their respective communities.

Wednesday afternoon was devoted to an executive session at which were read telegraphic crop reports, a feature which has grown in importance and which was more generally followed out than ever before.

The association reconvened on Thursday morning, June 22, and the first matter brought before the meeting was the resolution submitted by Kirby B. White, and unanimously adopted, which was as follows:

Whereas, it has been charged in the present congress of the national legislature that the seed trade of the United States was under suspicion of having committed fraud in importing certain seeds under false pretenses, and that American dealers have systematically committed perjury to escape the payment of lawful excises; and

Whereas, these charges, if true, are worthy of unqualified condemnation, but if unfounded are a libel on the trade in general; now, therefore, be it Resolved, in justice to ourselves and in the name of simple decency that we urge the legislative and the executive branches of the government to spare no pains to ascertain the facts in the case, and to prosecute all offenders wherever found; and further,

Resolved, That to the end of securing punishment for the guilty and vindication for the innocent, we pledge ourselves individually and as an association to cordially support all reasonable efforts to secure rigid justice; and

Resolved, That copies of these resolutions be respectfully submitted to the

Edgar Gregory, Marblehead, Mass.

Second Vice-President American Seed Trade Association.

Handling of Seed Potatoes" which elicited much comment. C. N. Page asked if Prof. Woods had experienced any trouble with seed potatoes being injured by cold storage. Prof. Woods said he had had no experience of that sort, and advised that purchases be made in Maine where the Almighty had provided natural cold storage in the climatic conditions. Secretary Kendel suggested that if cold storage was avoided it ought to be cold storage from natural ice, and not ammonia, as the latter would affect the flavor of fruits and might be the cause of the trouble reported by Mr. Page. F. C. Woodruff predicted that unless the Aroostook county growers stopped using poorer potatoes for their own planting they would lose prestige. Prof. Woods thought they fully realized this and had formed an association which would remedy the trouble and keep the product up to standard. In reply to a query from E. A. Sheep as to what was meant by "thorough spraying," Prof. Woods said from eight to ten sprayings per season, spraying to be done under 100 pounds' pressure. If there is no trouble with flea beetle or ordinary potato bug, do not begin spraying until the tops are about six inches above the ground; otherwise begin at once. He had experimented with planting two inches, four inches and six inches deep, with

A REGATTA AT MARBLEHEAD, MASS.

Secretary of the Treasury and to the Hon. J. R. Mann.

Chas. N. Page, chairman committee to confer with the National Seed Analysts, submitted his report, which was duly filed. The financial condition of the association was discussed in connection with proper amount of annual dues, and no change was made in the dues from the present basis in the constitution. The report of the obituary committee, Chas. N. Page, chairman, was read, containing eulogies prepared by the following members: C. C. Massie on the death of Chas. P. Braslan, San Jose, Calif.; W. C. Langbridge on the death of W. A. Dennison, Ellsburg, N. Y.; Herman Simmers on the death of William Rennie, Toronto, Ont.; Watson S. Woodruff on the death of S. M. Pease, Avon, N. Y.; W. G. Scarlett on the death of John L. Turner, Baltimore, Md.; E. F. Crossland on the death of R. C. Steele, Toronto, Ont.; and S. F. Willard on the death of Edward L. Coy. C. E. Kendel presented a report of the delegates to the National Council of Horticulture.

The paper prepared by Dr. E. Mead Wilcox, professor of agricultural botany and state botanist of Lincoln, Neb., was read by Secretary Kendel, treating of the distribution of plant diseases by seeds infected with fungus and parasites, especially with reference to the leading cereals; sources of infection were pointed out, and methods of combating the same were described. This was a valuable paper, going into much detail.

A special committee consisting of Curtis Nye Smith, Kirby B. White and S. F. Leonard were appointed to consider and report on the matter of seedsmen's disclaimer. Various reports of state correspondents were read and referred to the executive committee. Invitations were read from W. Atlee Burpee and Harry A. Bunyard, president and secretary of the National Sweet Pea Society of America, inviting the members to attend the exhibition of that society to be held at Philadelphia, Pa., June 29-30; Mr. Burpee expressing regret at his inability to attend the convention of the American Seed Trade Association on account of pressing business and his shortly leaving for a European trip. A letter was read from P. W. Bruggerhof acknowledging the compliment paid him in his election to honorary membership in the association and regretting his inability to attend the annual banquet.

The election of officers resulted as follows:

Leonard H. Vaughan, Chicago, president.

Marshall H. Duryea, New York, first vice-president.

Edgar Gregory, Marblehead, Mass., second vice-president.

C. E. Kendel, Cleveland, O., secretary-treasurer.

J. H. Ford, Ravenna, O., assistant secretary.

E. L. Page, Kirby B. White, C. C. Massie, Henry Nungesser, C. F. Wood, executive committee.

Albert McCullough, Chas. N. Page, J. W. May, membership committee.

An informal discussion then followed as to the place of the 1912 meeting and the matter was referred to the executive committee. The general opinion appearing to be that the meeting should go farther west next year, probably in the lake region.

#### President Page's Address.

I find on referring to our printed minutes of our last annual meeting that I said in part, on accepting the office of president, that I hardly knew whether I was to be congratulated or sympathized with, but that no doubt

I would know better about it another year. I can now make a positive statement and say that I am not to be sympathized with in any way, but congratulated, for while I have found that the office required some time and thought, yet it has been to me a most pleasant duty, and if whatever I have done or may do during this convention meets with your approval and support, and if the work done in the past year shall add numbers, strength and honor to the association, I shall feel that I have been many times repaid. During the past year I have come to know many of you better, and formed friendships which I trust will last for many years. I know more about the association, its aims, object and things hoped for, and while it is not a large association in numbers, it is large in quality and achievements. This association has honored twenty-eight men (one being elected twice) by electing them as its president, for it was indeed an honor to be chosen its first president, and still a greater honor from year to year.

A member of this association told me, not long ago, that he would consider it a greater honor to be elected president of the American Seed Trade Association than he would to be elected governor of the state in which he lived. (This party is not a candidate for your next president.) I am speaking of this more particularly for the reason that, while a great many of the members are very loyal and ready to do all they can for the good of the association, yet I feel that some do not appreciate the association enough, do not value it as highly as they ought. Many of us have obtained information and knowledge through and from the association and its members that have been of great value to us. We have formed friendships and business connections that have not only been very pleasant but profitable. We have come to know each other better, and to have a higher regard for each other, and although we are competitors, to a greater or less extent, and oftentimes cover the same territory and sell to the same people, yet when we are gathered here we seem to forget this to a very large degree and meet as friends and companions and co-workers in a great business.

I shall never forget the kindly interest taken in me by some of the mem-

STREET SCENE IN MARBLEHEAD, MASS.

bers of this association during the first few years of my membership. The reminders of those words from the good old book, "I was a stranger and ye took me in." (I have been taken in several times since in various ways but the results were not nearly so pleasant.) During the years of my membership I have been permitted to attend every annual association meeting; sometimes the distance has seemed great, the time necessary almost more than I could spare, the cost considerable, but never yet have I returned to my desk but what I have felt that the information received, knowledge gained, companionship enjoyed, new friendships formed, old friendships renewed, have paid, yes, many times repaid me for any effort and time spent, and I am glad to know that many of you feel the same way. Also that you are ready at any and all times to stand shoulder to shoulder with each other, to promote the best interests of this association and to further its prime object, "the advancement and protection of the interests of the seed trade."

We, as an association and members, are not naturally or intend to be selfish. As a rule I think we are about as ready to give information and help as we are to receive it, and one will learn sooner or later, if they do not already know it, that in order to gain information, knowledge, friendship or love they must be just as willing to give as to receive. It has seemed to me that in a way this association was a close corporation. To be sure, our membership of a little over 140 includes nearly all of the largest, best and most representative seed houses in the United States and Canada; yet there are a great many seed firms, honest, reliable and responsible, some of them rather small, I will admit, but most of us, unless we inherited our business, were once small; that it seems to me ought to be members of this association, and it appears to me there are just two reasons why: first, for the benefit that they will receive in various ways from being members, and second, the benefit the association will gain by having them as members. I do not believe in cheapening the association in any manner. The past records of the association have been honorable in every way and the present members are proud of it, and I would not have a prospective member think for a moment that he was asked to join on account of the membership fee and dues, for if this is the only benefit he is to the association, then it were better for the association that he does not become a member. A member of the membership committee has said, and I believe he is entirely correct, that "He does not think it good policy for the association to throw down the bars entirely." Certainly this would be a great mistake and in the end work great harm to the association, but one of the questions has been and is, How can we secure desirable new members? I do not believe we ought to feel any delicacy in asking reliable and responsible seedsmen to become members. Therefore as recommendation number one, I would recommend that each state correspondent be instructed to look up the eligible and desirable seed firms in their state or states, and those that they can personally recommend, secure their application for membership, if possible, and submit the same to the membership committee for action.

It has always been more or less difficult for the officers of the association, and particularly for our counsel, to know just the person to write to in any particular state for information upon certain matters, and oftentimes the right party was not written to and very often no reply was received. Last year for the first time state correspondents were appointed in each state, or nearly state, and it has proven a most excellent plan. So far as I can recall,

there has been but one instance of my writing to a state correspondent without receiving a reply. Our counsel has also found the state correspondents of great value and help, but it has added largely to his work as well as increasing his efficiency. Therefore, as recommendation number two, I recommend that state correspondents again be appointed for the year 1911-12.

The past year has been a very strenuous one for the seedsmen. Some varieties of seeds were the shortest in years, some in surplus, some varieties were almost prohibitive in price, some were much below the cost of production. Some varieties contained too much moisture and averaged low in vitality. The season was not a normal one. Business was disappointing some months, a surprise others. Our lawmakers at Washington sent out as usual millions of free packets, postmasters in some places insisting on transparent packets; yet, notwithstanding all this, I think, on the whole, the seedsmen had a fairly prosperous year, and would not have added largely to their gray hairs had it not been for the so-called pure seed legislation,

The Churn, Marblehead, Mass.

which appeared at unexpected times and places. No matter how busy we were, on receiving a call from our state correspondent, to appear at our state capital at a hearing to be held on a bill, that had been introduced, we dropped everything and went, or at least many of us did. There were over sixty bills introduced in the different state legislatures, most of them either never reported out of committee or failed to pass, and for reasons which will be explained in the reports from our committees on seed legislation, and our counsel, and these reports, together with the reports of our state correspondents, will give you full information in regard to these matters, so I need say no more in regard to legislation, but make my recommendation number three: That counsel be employed to represent this association and its members, and if the present counsel can be engaged at a satisfactory fee, that he be engaged for another year. His services, so far as I know, have been entirely satisfactory to the association and its members. He has been prompt, energetic and successful. He has made a study of our business and of legislative matters affecting the seedsmen, and is, without doubt, the best posted along these lines of any man in this country.

There is no question but what the National Council of Horticulture are doing a good work and should be supported. Some of our members in the past have not favored making an appropriation to this council, and I am inclined to think that it is lack of knowledge of what this council is doing and accomplishing that makes them so feel. At our last meeting we voted an appropriation of \$200, but at the suggestion of our secretary and delegate they used but \$125, so there is really left from last year's appropriation \$75. Recommendation number four: I would recommend that \$75 in addition to the \$75 left from last year, or a total of \$150, be voted to the National Council of Horticulture.

Some things are old, yet ever new. I do not know if this can be said of our disclaimer or not, but there is one thing certain, that at about every meeting of our association this matter is brought up and discussed, and only recently a disclaimer was adopted that we thought to be as near perfect as possible. Now, an attorney, who is said to have made commercial law a specialty, says that unless the disclaimer or non-warranty clause used by seedsmen is placed on stationery between the date line and the signature, it is no part of the contract and is useless. If this is so, most of us will have to make some changes, and as this is an important matter, I make recommendation number five: That a committee of three be appointed, one of which shall be our counsel, to consider this matter, and report at a future session of this meeting, if possible, but if unable to do so, report to our secretary, who shall notify each member of this association by mail the findings and decision of this committee.

It is with regret that I am obliged to announce that our association has been sadly invaded during the last year, and that we have lost by death more members than in any previous year. Chas. P. Braslan, of California, known by nearly every seedsmen; W. A. Denison of New York state, John L. Turner of the firm of Griffith & Turner, Maryland; Wm. Rennie of Canada, R. C. Steele of Steele, Briggs Seed Co. of Canada, one of our honorary members; E. L. Coy of New York state, and our former well-known member, S. M. Pease.

In closing, I wish to thank the members of the executive committee for the work and help they have given me, also all of the various committees and state correspondents, some of whom have spent much time and of their means liberally, for the benefit of this association, as well as all other seedsmen, and as I have said in your hearing before, no matter whom you elect for your president, he cannot do all the work and in fact can do but a little of it. Most of it must be done by the various officers, committees and members, and no matter whether you are an officer, member of a committee or not, each of you have or should have a work to do, and if that duty is well done, this association will go on from year to year as it has in the past, increasing not only in numbers but in quality, power and achievements.

#### Hospitalities.

On Tuesday evening a reception and dance was held and on Wednesday afternoon there was a boat ride. A baseball game was also participated in by two nine men designed as the Garden Seed and Field Seed, which was won by the latter by the score of 3 to 0. The nines were composed as follows: Garden Seed nine, C. H. Coy, p.; Linnaeus Allen, c.; Fred M. Clark, 1st b.; C. Hart, 2nd b.; Will Woodruff, 3rd b.; Lyons Williams, 1. f.; F. G. Johnson, c. f.; E. W. Dorey, r. f.; W. L. Holmes, s. s.; Field Seed nine: Hammond, c.; Gordon F. Wood, p.; J. A. Smith, 1st

b.; A. B. Hammond, 2nd b.; R. Wood, 3rd b.; W. E. Stone, r. f.; Fred Plant, 1. f.; F. P. Kiser, c. f.; W. G. Scarlett, s. s.

On Wednesday evening, June 21, the banquet was held, Pres. Page acting as toastmaster, and introduced the following speakers: Watson S. Woodruff, Orange, Conn.; Leonard H. Vaughan, Chicago; George H. Clark, Ottawa, Canada; Frank C. Woodruff, Orange, Conn.; H. L. Holmes, Harrisburg, Pa.; Hon. J. Lewis Ellsworth, Worcester, Mass.; Frank H. Smith, Norwich, Conn.; W. C. Langbridge, Cambridge, N. Y.; C. F. Wood, Louisville, Ky.; F. Willard, Wethersfield, Conn.; E. F. Dibble, Honeyoe Falls, N. Y.; Linnaeus Allen, Floral Park, N. Y.; C. N. Keeney, Le Roy, N. Y.

The surprise of the banquet was the presentation of an elegant gold watch to retiring President Page from the membership of the association, the presentation being made by Frank C. Woodruff in a very felicitous manner. There was a fine turnout of ladies robed in beautiful gowns, and the witty responses by the men made the occasion both enjoyable and noteworthy in the association's history.

There was an automobile drive for the ladies Thursday morning, and a visit to St. Michaels church and the celebrated old Lee mansion in the afternoon. On Friday many of the members visited the Arnold Arboretum, Jamaica Plain, Boston.

#### Second Vice-President Gregory.

Edgar Gregory of Marblehead, Mass., elected second vice-president of the American Seed Trade Association at that place last week, was born December 12, 1869, and received his education in the public schools of Marblehead and the Massachusetts Agricultural College at Amherst, graduating from the latter in the class of 1890 with honors. He was married in Amherst, June 17, 1891, to Miss Flora D. Stebbins, and became associated with his father in the seed business after graduation. In 1891 he was admitted to partnership under the firm name of J. J. H. Gregory & Son, continuing thus until the senior partner retired July 1, 1907. It was at this time that he purchased the seed farms at Middleton, Mass. Since then he has been sole proprietor under the same firm name, and has increased the business about 40 per cent.

#### Those Present.

Following is a list of those in attendance so far as the names can be secured by our representative.

Linnaeus Allen, Floral Park, N. Y.  
W. W. Barnett, Chicago, Ill.  
W. H. Barrett, Adrian, Mich.  
O. P. Beckley, Harrisburg, Pa.  
F. W. Bolgiano, Washington, D. C.  
C. A. Bolter, Rochester, N. Y.  
C. S. Briggs, Rochester, N. Y.

B. F. Brown, Fitchburg, Mass.  
D. A. Brown, Cincinnati, O.  
Joseph E. Brown, Fitchburg, Mass.  
C. Burroughs, Cambridge, N. Y.  
Arthur B. Clark, Milford, Conn.  
Arthur B. Clark, Jr., Milford, Conn.  
A. N. Clark, Milford, Conn.  
Geo. H. Clark, Ottawa, Ont., Can.  
Dr. W. Irving Clark, Worcester, Mass.  
C. B. Coe, Detroit, Mich.  
Ben P. Corneli, St. Louis, Mo.  
C. Herbert Coy, Valley, Neb.  
C. Willard Gay, Boston, Mass.  
W. F. Crossland, Toronto, Ont., Can.  
E. H. Currie, Milwaukee, Wis.  
Edw. Dibble, Honeyoe Falls, N. Y.  
Albert Dickinson, Chicago.  
Chas. Dickinson, Chicago.  
B. W. Dulaney, Cincinnati, O.  
Marshall H. Dwyer, New York.  
R. H. Ebeling, Syracuse, N. Y.  
W. E. Eberle, Albany, N. Y.  
Geo. B. Edgerton, Buffalo, N. Y.  
H. E. Fiske, Boston, Mass.  
Alex. Forbes, New York.  
Gideon Forbes, Cambridge, Mass.  
J. H. Ford, Ravenna, O.  
M. S. Griffith, Baltimore, Md.  
Chas. C. Hart, Wethersfield, Conn.  
H. G. Hastings, Atlanta, Ga.  
H. L. Holmes, Harrisburg, Pa.  
Frank Howard, Pittsburg, Mass.  
F. W. Jaeger, Toledo, O.  
F. G. Johnson, Jackson, Mich.  
F. W. Johnson, Philadelphia, Pa.  
M. D. Johnson, Boston, Mass.  
W. Frank Jones, Hartford, Conn.  
C. N. Keeney, Le Roy, N. Y.  
A. E. Kelly, Cleveland, O.  
C. E. Kende, Cleveland, O.  
J. A. Kennedy, New York.  
F. P. Kiser, Paris, Ky.  
Burmet Landreth, Bristol, Pa.  
S. P. Landreth, Bristol, Pa.  
W. C. Langbridge, Cambridge, N. Y.  
S. F. Lapham, Chicago.  
W. M. Lupton, Mattituck, N. Y.  
Albert McCullough, Cincinnati, O.  
J. Chas. McCullough, Cincinnati, O.  
C. C. Massie, Minneapolis, Minn.  
John W. May, Alexandria, Va.  
Henry Nungesser, New York.  
L. L. Olds, Madison, Wis.  
Chas. N. Page, Des Moines, Ia.  
E. L. Page, Greene, N. Y.  
Frank H. Page, Des Moines, Ia.  
H. Perkins, Chicago.  
W. T. Phillips, Toledo, O.  
Fred S. Platt, St. Louis, Mo.  
Frank S. Platt, New Haven, Conn.  
A. E. Reynolds, Crawfordsville, Ind.  
Hy Rice, Omaha, Neb.  
Jerome B. Rice, Cambridge, N. Y.  
J. B. Rice, Jr., Cambridge, N. Y.  
J. C. Robinson, Waterloo, Neb.  
Walter D. Ross, Worcester, Mass.  
W. G. Scarlett, Baltimore, Md.  
A. W. Schaefer, Chicago.  
H. A. Scullthorpe, Port Hope, Ont., Can.  
E. J. Sheap, Jackson, Mich.  
Herman Summers, Toronto, Ont., Can.  
Curtis Nye Smith, Boston, Mass.  
Frank H. Smith, Norwich, Conn.  
John A. Smith, Toledo, O.  
E. E. Squires, Chicago.  
F. A. Stecher, Rochester, N. Y.  
W. D. Steele, Toronto, Ont., Can.  
W. E. Stone, Toledo, O.  
Jefferson Thomas, Harrisburg, Pa.  
A. F. Tracy, Wenham, Mass.  
B. Hammond Tracy, Wenham, Mass.  
Dr. W. W. Tracy, Washington, D. C.  
Leonard H. Vaughan, Chicago.  
H. J. Wheeler, Kingston, R. I.  
Kirby White, Detroit, Mich.  
Amni Whitney, Portland, Me.  
S. F. Willard, Wethersfield, Conn.  
L. H. Williams, Norfolk, Va.  
F. P. Wood, Louisville, Ky.  
Gordon F. Wood, Richmond, Va.  
H. Wood, Richmond, Va.  
H. W. Wood, Richmond, Va.  
Frank C. Woodruff, Orange, Conn.  
Stiles D. Woodruff, Orange, Conn.

Watson S. Woodruff, Orange, Conn.  
Wm. H. Woodruff, Milford, Conn.  
Chas. D. Woods, Orange, Me.

#### The Ladies.

Miss L. Bolter, Rochester, N. Y.  
Mrs. C. S. Briggs, Rochester, N. Y.  
Mrs. J. E. Brown, Fitchburg, Mass.  
Mrs. Arthur B. Clark, Milford, Conn.  
Mrs. Everett B. Clark, Milford, Conn.  
Mrs. W. Irving Clark, Worcester, Mass.  
Mrs. Albert Dickinson, Chicago.  
Mrs. E. W. Dulaney, Cincinnati, O.  
Mrs. Alex. Forbes, New York.  
Miss Gertrude Ford, Fitchburg, Mass.  
Miss Jean A. Fraser, Richmond, Va.  
Mrs. M. Fraser, Richmond, Va.  
Miss Gray, Greene, N. Y.  
Mrs. M. S. Griffith, Baltimore, Md.  
Mrs. Frank Howard, Pittsburg, Mass.  
Miss Claire Johnson, Philadelphia, Pa.  
Miss Ethel Johnson, Philadelphia, Pa.  
Mrs. E. G. Johnson, Jackson, Mich.  
Mrs. H. W. Johnson, Philadelphia, Pa.  
Mrs. M. P. Johnson, Boston, Mass.  
Mrs. W. Frank Jones, Hartford, Conn.  
Mrs. K. B. Kendell, Fitchburg, Mass.  
Mrs. W. C. Langbridge, Cambridge, N. Y.  
Mrs. L. H. Loveley, Cambridge, N. Y.  
Miss McCullough, Cincinnati, O.  
Mrs. J. Chas. McCullough, Cincinnati, O.  
Miss McGowan, Cincinnati, O.  
Mrs. C. C. Massie, Minneapolis, Minn.  
Miss L. E. Page, Greene, N. Y.  
Miss Ida Page, Whitby Point, N. Y.  
Miss Etta Phelps, Cambridge, Mass.  
Mrs. Frank S. Platt, New Haven, Conn.  
Mrs. Hy. Rice, Omaha.  
Mrs. Jerome B. Rice, Cambridge, N. Y.  
Mrs. J. B. Rice, Jr., Cambridge, N. Y.  
Mrs. W. D. Ross, Worcester.

Mrs. Jefferson Thomas, Harrisburg, Pa.  
Mrs. B. Hammond Tracy, Wenham, Mass.  
Mrs. S. F. Willard, Wethersfield, Conn.  
Mrs. H. W. Wood, Richmond, Va.  
Mrs. Catherine Woodruff, Orange, Conn.  
Mrs. Watson S. Woodruff, Orange, Conn.

#### Government Seeds.

How dear to his heart is the little farm garden  
My congressman pictures with laudable skill!  
The lettuce, the cabbage (with heads that won't  
harden).  
And each tiny pea pod (intent not to fill!)  
The gaudy tomatoes and peppers he mails me!  
The carrots and turnips (which prove to be  
weeds!)  
The tempting description, the picture that balls  
me  
On each little packet of government seeds!  
The wee little packet, the partly filled packet,  
The elderly packet of government seeds!  
That little franked parcel I hail as a treasure  
For often in spring when returning from field  
I find it (a source of most dubious pleasure,  
The poorest and cheapest that congress can  
yield).  
How ardent I seize it (!) with heart over-  
flowing (?)  
I fancy our congressman silently pleads:  
"For me, next election, your vote please be  
stowing  
In the big ballot box—for these government  
seeds."  
This wee little packet, this partly filled packet,  
This elderly packet of government seeds!"  
How sweet from the capitol mill to receive it  
(a present superb for a farmer like me!)  
Not a full packet purchased from seedmen  
(believe it!)  
Can equal these seeds in their antiquity.  
But now I've abandoned my rural vocation  
A tear of remembrance its furrowed course  
leads,  
For the Aprils I fed to my poultry a ration  
Of useless innaminate government seeds—  
A wee little packet, a partly filled packet,  
An elderly packet of government seeds.

## Horticultural Society of Chicago.

SPRING AND EARLY FALL SHOWS.

The executive committee of the Horticultural Society of Chicago has voted not to hold the usual fall flower show in the Coliseum building this year, but to hold a big exhibition next March in its stead.

A dahlia and aster show will be held at the Art Institute in September, the exact date to be determined by the conditions of the plants later in the season. A premium schedule for this exhibition is now being printed and will be issued shortly.

A premium schedule for the spring show next March is being prepared by a special committee. It will offer prizes as large as usually given for fall exhibits at Chicago. It is hoped in the spring exhibition to obtain a more varied display, and to arouse renewed public interest in the flower show.

J. H. BURETT, Sec'y.

## Society of American Florists.

### TO MEMBERS.

Secretary Dornier is sending each member of the Society of American Florists a message calling for just a little effort on the part of each individual member, and it is earnestly hoped that every member will respond promptly.

It is requested that each member send in one new name for membership in the society. There is not one member that can not easily do so and this action by increasing the membership would mean a great deal for the welfare of the society and the trade in general. As the secretary points out in his message, the florists are greatly indebted to the society for its excellent work in the past, and a large membership roll will most certainly give it strength when there are wrongs, local or national, to be righted in the future.

The society needs the support of all the trade, and each member should see that every commercial establishment in his locality is represented in the national organization. Open the campaign now by securing one new member. Take advantage of the local club meetings and summer outings to talk it up with those in attendance, pointing out that each name added to the list increases the usefulness of the society and makes it stronger when it has a case to present before the courts, the legislatures, the express companies, the interstate commerce commission, the railroads, or any other body which has power to extend or withhold privileges.

In other lines of business grievances are quickly removed by close organization of the interests affected and our difficulties in making new laws and amending old ones would be greatly reduced if we could present a more united front and batter down the opposition. Farmers and others get what they want in this way and there is no reason why we should not get prompt consideration if each member of the organization does his duty now. The work is light—secure one new name now, and this strengthened membership will just double the power of the organization in acquiring rights and privileges too long denied us.

I say again, we need added force, the strength of numbers. Business conditions grow more strenuous every year and we need the assistance of everyone in every effort for the general good. The society exists for the good of all and every man in the trade should help.

GEORGE ASMUS, Pres.

### REGISTRATION OF ROSE.

Public notice is hereby given that Hoerber Bros., of Chicago, offer for registration the rose described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

### DESCRIPTION.

Wilhelmina.—Parentage unknown. Appears to be a cross of Killarney and Golden Gate. Has the habits of Killarney and flowers the shape of Golden Gate but much larger. Growth very strong and free; height 4½ to five feet; color bright pink, a shade darker than Killarney; an easy grower and free from disease; foliage strong and clean a fine forcing rose; at its best from October to May.

H. B. DOEBNER, Sec'y.

## Flower Day.

Mayor Haynes of Minneapolis, Minn., issued a proclamation naming June 17 as "Flower Day" and called upon the citizens of the city to plant their gardens with flowers, and also desired that all vacant lots, school grounds, and every piece of property not used for other purpose, be made to bloom, that the city may be made beautiful for the civic celebration to occur early in July. He says: "It is a work in which every one can join: the school boy who wants to see the grounds surrounding his school beautified, as well as the property owner who feels the touch of civic pride. I predict that Minneapolis during the civic celebration week will be a pride to us all and a wonder to our visitors." The work to make Minneapolis a "flower" as well as a "flour" city is bound to bear fruit and its effect will not end with the present year but will be seen and felt for years to come. The nasturtium has been chosen as the flower for the occasion, and the business houses and citizens have joined together to make the city a vast flower garden during the celebration. Window boxes full of flowering plants are to line the streets and all empty lots cleaned up and planted to flowers. The appointing of a flower day is worthy of emulation by other municipalities for it certainly must result in not only beautifying the city but is bound to exert a refining influence upon the people and also to imbue them with the love of nature. This is a movement that can be well taken up by improvement associations in all parts of the country.

## Arsenate of Lead.

Arsenate of lead, an insecticide used against leaf-eating (chewing) insects, is preferably applied as a liquid spray. There is one common insect against which the dry powdered "lead" has proven more effective than the liquid, namely the cotton-ball weevil, a most destructive insect pest of cotton in the southern states. Home-made arsenate of lead may be prepared by combining arsenate of soda and acetate of lead, but, unless very large quantities are needed, the saving, if any, would scarcely warrant the extra trouble. A number of reliable brands of arsenate of lead are sold on the market, usually in the form of a thick paste, which are ordinarily used at the rate of two to three pounds to 50 gallons of water. In cases of severe infestation, or when used against insects especially resistant to arsenical poisons, four or even six pounds to 50 gallons of water may be used without the slightest injury to the foliage. The stock supply of commercial arsenate of lead should be kept covered with water to prevent drying.

Arsenate of lead is superior to other arsenical poisons, such as Paris green, in that it is decidedly more adhesive, necessitating fewer applications; it remains in suspension longer than the heavier Paris green; and it contains little, if any, soluble arsenic and therefore may be used at excessive strengths without injury to the foliage.

The same amount of poison in arsenate of lead costs a little more than Paris green but for reasons given above, i. e. its "sticking qualities and its harmlessness to foliage," the arsenate of lead will prove the more economical under most conditions. D.

## Meetings Next Week.

Albany, N. Y., July 6, 8 p. m.—Albany Florists' Club, 71-73 State street.  
 Buffalo, N. Y., July 4, 8 p. m.—Buffalo Florists' Club, 355-57 Elliott street.

Key 466, care American Florist.

## NEW YORK SALESMEN

We need men who are familiar with the greenhouse trade in and around New York. State age, experience and salary.

Address

## Boilers, care of American Florist

Here's a Mighty Fine Opportunity for a Good Man Who Knows the Nursery Business, or a Firm Who Wants a Branch House.

I own one of the best greenhouse and nursery plants in the country—60,000 feet of glass is now in carnations and 130 acres in general nursery stock. I am a banker, a mighty busy man, and cannot give this enterprise the attention it deserves. A reliable nursery firm, or a competent man who possesses good business ability, will be sold a half interest at a fair price and on reasonable terms. It is desirable—but not absolutely necessary—that such a man should have a knowledge of greenhouse management and a married man is preferable. This locality is unexcelled for growing many kinds of nursery stock, and I believe it is an opportunity for a nursery firm or a capable man to establish a splendid business. If you feel that you are the type of a partner I am looking for and can invest from \$15,000 to \$20,000 write to me at once.

V. Z., McFarland Publicity Service, Box 5, HARRISBURG, PA.  
 Peach budders, who know how, wanted now.

### Chicago.

#### SUMMER CONDITIONS.

The first week of summer the city has had a taste of genuine summer weather, hot and more or less muggy with frequent thunder showers, and the flower business has certainly taken on a summer tone. The stock as a whole shows the effects of the warm weather, consequently first-class stock finds a very good sale but there is a large quantity of inferior grade that does not find a purchaser. Light business is the general report, yet many say that it is surely as good as could have been expected considering the weather and time of the year, that there is a call for all the best grade stock, and business is really fair. While there are, of course, many poor roses yet some very fine blooms are to be seen. American Beauties are very good for so late in the season, taking into consideration the unpropitious weather. Some very fine Kaiserins, My Marylands and good Rhea Reids are to be obtained. Killarney is of good color but the flowers lack substance and open quickly and White Killarney has the same fault and the color of these flowers is not nearly as white as the Kaiserin. The planting of the young stock has shortened up the cut, but it is now about completed and the general reports are that it looks fine and has taken hold nicely. While there are some very fine carnations they are not numerous and there are many that are small. The quantity received is growing smaller as preparations for planting the young stock proceeds. It has been so dry that many of the growers came to the conclusion that the plants would be better off in the houses and are getting the plants in as rapidly as possible. There are some exceptionally fine Liliun giganteum to be seen of good substance which are espe-

cially nice for funeral work and some good Liliun candidum which are in bountiful supply. There are also some good Liliun speciosum to be had. Lily of the valley of very good quality is plentiful enough to meet all demands. Nymphæas are plentiful, the retailers are featuring them in their windows and they attract considerable attention. Gladioli are of excellent quality, some splendid spikes, three to four feet long, being offered and the flowers are very fine, especially the Mrs. Francis King and America. Large vases of Iris Kämpferi make a splendid show in the stores and though they don't last any too long, yet make a fine display. Orchids are not plentiful the receipts being quite small. Sweet peas are plentiful but much of the stock is poor, especially that which clearly shows that it is the end of the greenhouse crop. The outside stock is better, yet owing to the heat and dry weather is not as good as is generally found at this season. Peonies are still a factor on the market a few of the dealers still having a good supply and they make a grand showing when displayed in the windows. Gaillardias, coreopsis, rudbeckias, daisies and delphiniums all add to variety to be seen and make a fine show. Ferns are now arriving of good quality and the prices are down to normal figures. There is a good call for asparagus but the stock is plentiful and of excellent quality.

#### NOTES.

Dann Eros. are shipping in to Zech & Mann an exceptionally high grade of Liliun giganteum, the flowers being of extra heavy texture. Mr. Zech is highly elated with the quality of the blooms and says that they are the finest he ever saw grown from cold storage bulbs.

The John C. Moninger Co., 902 Blackhawk street, is having a new catalogue, descriptive of greenhouse build-

## U S Budlong's E Blue Ribbon Valley.

ing and all supplies for that purpose, which will be ready for mailing at an early date, and they will gladly send a copy to our readers on application.

The force at John Muir's had about all they could handle on June 21. The funeral of a prominent automobile dealer calling for a large number of funeral designs, which aggregated into quite a fine day's business for this season of the year.

Emil Kroll has about finished planting his houses with 4,500 American Beauty rose plants. He has been greatly troubled with that bane to all greenhouse men, the cut worm, and is anxious to find some remedy to get rid of them.

W. H. Rogers, the ever-accommodating salesman of Weiland & Risch's store, left on his vacation Sunday, June 24 for Pentwater, Mich., where he will visit his father-in-law.

The Chicago Growers' Association, we are advised, will open for business at 176 N. Michigan avenue, between Randolph and Lake streets, with four floors and basement, July 15.

George Klehm attended the convention of the American Association of Nurserymen held at St. Louis, June 14-16, and while in that city purchased a pair of mules and bronchos.

Alex Newitt, a former resident of this city but now with the Stuppy Floral Co. of St. Joseph, Mo., visited the market this week renewing old acquaintances.

## POEHLMANN'S FANCY VALLEY } We make these a specialty. EXTRA FINE HARRISII LILIES } Can supply them all the Year Once tried you will have no other

Canger & Gormley have had a beautiful arranged display of nymphaeas in the window this week. In the centre of the window was a tank filled with water upon which pink, white and red lilies were placed and around the tank and in the window were banks of green moss and sod on which grass seed was planted and growing. Pots of gloxinias and vases of spring flowers completed the display. The window attracted a great deal of attention.

Vaughan & Sperry report that the business has been very good throughout the week and the demand of good stock has been equal to the supply. They are receiving an extremely good grade of sweet peas considering the unfavorable weather with which the growers have had to contend. The peonies are about at an end, the demand for the blooms having about cleaned up the cold storage stock.

The lily of the valley now being grown by Poehlmann Bros. Co. is as fine a grade as we have ever seen during the summer months. Some of the spikes are fully 15 inches in length with extra large bells. The American Beauty roses are of excellent color and splendid stock for the season of the year.

Ed. Winterson celebrated his forty-third anniversary of his birth June 21. It was a long day, the longest of the year, but Ed. was on hand to receive his friends, who are legion, and they all called around and found Ed. fully prepared for their reception. It was a day of reminiscences and good cheer.

Mrs. J. A. Budlong, A. H. Budlong and wife and Philip Schupp and wife are at their summer cottage at Lake Geneva, Wis. Phil is only able to spend a day or two at a time away from the store, however, going up to spend Sunday and rushing back to attend to business.

W. F. Kasting of Buffalo paid the market and his friends a flying visit the first of the week. He speaks very encouragingly of his chance of obtaining the appointment as New York's commissioner of agriculture, but the matter does not appear to be worrying him at all.

The next meeting of the Florists' Club will be held at the Union Restaurant, 72 West Randolph street, July 6, at 8 p. m. The arrangements for the picnic will be announced, and the committee on transportation to the Baltimore convention will make a report.

The Wietor-Sinner fishing party, Sand Lake, Wis. report the fish biting good, and that in two days there were caught 27 pike weighing from two to five pounds each. This report may be relied upon, the writer not being a fisherman.

The Chicago Carnation Co.'s baseball team have been challenged by the A. L. Amling Co.'s team of Maywood for a game in the near future which they have accepted. The date and place for the contest have not yet been fixed.

J. A. Budlong is cutting an extra fine grade of gladiolus, some very beautiful America and Miss Francis King with spikes fully four feet long and with fine large flowers. They report that they are bringing a special price.

Harry Balsley, as genial as ever, was a visitor to the city on June 23, meeting old friends and, incidentally, telling everyone what a good pot the Detroit Flower Pot Co. made and sold and endeavoring to book their order.

Bassett & Washburn have enjoyed a good shipping trade during the week. Their roses are of exceptionally good quality, some very fine Kaiserins now being cut at the houses.

## U S Budlong's E Blue Ribbon Valley.

Peter Reinberg is cutting some very fine American Beauty roses. The color is good for the season of the year and the stem and foliage are exceptionally fine.

J. E. McAdam, of Fort Worth, Tex., is an interested visitor this week looking over the market and meeting his many friends in the trade.

Jack Byers, the hustling little salesman of the Chicago Carnation Co. took a motor boat trip to Saugatuck, Mich., with a party of friends the last week.

J. A. Beaver and wife are spending their vacation on the shore of Lake Erie near Toledo, O. They expect to be away about six weeks.

Chas. Schaffer, Des Plaines, is at Rhinebeck, N. Y., looking up stock for the new violet houses of the Des Plaines Violet Co.

O. P. Bassett and wife, who recently returned from Pasadena, Calif., are going to Detroit for a short visit this week.

Reserve Sunday, June 23, for the Florists' Club picnic at Ehrhardt's grove. Visitors—A. Y. Ellison, of the Forestry Department, St. Louis, Mo., accompanied by Mrs. Ellison; J. E. McAdam, Fort Worth, Tex.; W. F. Kasting, Buffalo, N. Y.; Alex. Newitt, St. Joseph, Mo.; Gus Obermyer, Parkersburg, W. Va.; John Boehner, Dayton, O.; Harry Balsley, Detroit, Mich.

ROSES, our selection, - \$2.00 per 100

WIETOR BROS., 162 N. Wabash Ave., Chicago

## St. Louis.

### STOCK PLENTIFUL.

The weather the past week has been a little cooler. Roses are plentiful as are also carnations, but with few exceptions they are growing poorer every day. During the week there have been a few weddings and graduation exercises as well as some funeral work which has used considerable stock.

### FLORISTS' CLUB.

The Florists' Club celebrated its twenty-fifth anniversary on June 28 with a banquet at Peckman's hotel. The club was organized by J. M. Jordan, Charles Connon, Henry Shaw, Henry Michel, Luther Armstrong, E. W. Gay, Charles Juengel and J. S. Wilson. The first four have passed away, three of them serving the club as its president. The club has had but four secretaries: Luther Armstrong, two years; S. Kehrman, four years; Ernest Shray, fifteen years, and J. Beneke, the present incumbent, three years. The latter has worked indefatigably for the interest of the club. He served as president in 1904 and during his term of office the membership was increased from 50 to 100. The organization has been of great assistance to the florists of the city and stands very high as an association.

H. G. Berning is receiving some fine longiflorum lilies and American Beauties of good color. Arthur Krings, salesman at the store, has returned from a fishing trip down the Gasconade river.

The annual picnic of the St. Louis Florists' Club will take place at Ramona park July 20. All the florists and their families are invited to attend.

Mrs. Ayres of the M. M. Ayres Floral Co. is busy redecorating the store and hopes to be able to enjoy a short vacation.

Louis Magen was killed by a train on the Missouri Pacific railway. He leaves a wife and three children.

W. F.

## Louisville.

At a supper given in the Louisville hotel by the Kentucky Society of Florists in June, R. W. Brown, managing director of the Louisville Convention and Publicity League, addressed the society upon the extending of an invi-

tation to the Society of American Florists to hold the annual convention in Louisville in 1912, and the necessary steps to be taken to induce the society to accept the invitation. He explained to the members the great benefit which would be derived from such a meeting being held here, not only by the florists but by the city at large. He extolled the merits of Louisville as a convention city, saying it was one of the most celebrated cities in the country for such occasions, and one whose hospitality was unbounded, and gave the members his ideas as to the manner of entertaining the visitors. J. B. Stuessy, chairman of the executive committee of the society, has worked hard for several months on this matter, and is leaving no stone unturned to increase the interest in the society and accomplish the task of having the S. A. F. hold its convention here. He is ably assisted by the president, G. R. Miller, who is doing all in his power in getting every florist in Louisville to join the society and do all that they can to help the matter along. G. R.

## Brampton, Ont.

Peonies are done for this season, and with the June weddings all over, the greenhouses are at present in the least inviting condition possible. Roses have been keeping uncommonly well, but carnations run big risks traveling over 400 miles during such weather as we have been having lately. The ground is very dry in this neighborhood and the outdoor carnation plants and asters are badly in need of attention from above.

### NOTES.

Although hardly a single week elapses without a shipment of orchid plants arriving from some part of the globe, for the Dale Estate, so great has been the demand for blooms this month as to render the supply wholly unequal. This season's potted rose plants are in the most vigorous condition, and several orders from the United States testify to the high appreciation of the quality disseminated by this concern, especially when the almost prohibitive duty of four cents per plant is taken into consideration. This firm has three 650-foot houses and ten 350-foot houses planted with American Beauties this year, and the

new rose Mrs. Aaron Ward is also being tried for the first time.

J. E. Cooper, assistant manager of the Dale Estate, also W. R. Taylor and V. Hoskins are away for a couple of months' holiday in Europe.

Isaac Bunting, Colchester, Eng., was here a fortnight ago, on his way to the firm's large lily plantations at Yokohama, Japan.

W. G. P.

## Pansy Lore.

It is comparatively easy to write an article all about pansies, but it is quite another matter to tell readers all about pansies in an article, and when your scribe spoke to the editor about the ambiguity of his title, the great man looked troubled for a moment, but soon came to and said, "Go ahead and tell what you know," with the accent on the you, as though that settled the question, and still leaving the writer in doubt as to the meaning of the infection.

We have never met a man, woman or child who did not like pansies. The little man in the picture, when he strolled into his father's pansy fields, was doubtless already feeling the charm of their delicate beauty, and although the photographer says he caught him in the act of looking over the beds to see if there was likely to be a shortage of flowers for Memorial day—his father is a prominent Boston florist—we know better.

### EFFECT OF CULTIVATION.

Probably no plant is so much affected and improved by cultivation as the pansy. Take any one of our best varieties, plant

it in poor soil and leave it alone for a few years, and it will revert to a small-flowered, weedy specimen, still pretty, but without the lovely coloring and fine shape of the “show” pansy. And, incidentally, the pansy is a flower that cannot be spoiled by cultivation. The old florists of Europe—and some in this country—have a recognized standard for many plants. The flower must have just so many petals; the markings must be just according to their standard, and the flower must hold itself in just such a way. This stiffness has spoiled many flowers from a truly artistic point of view, giving us a set, artificial affair, instead of the graceful forms we all admire. But not so with the pansy. It is true we have seen the flowers set up on flat green boards, with paper collars and frills and other “dressing,” but the flower itself, away from all this frippery, is always beautiful.

### ONE PANSY'S HISTORY.

A good many years ago we found a pansy plant growing in the hard soil of a fruit plantation close up to the bole of an apple tree. There was something about this plant that attracted our attention. Perhaps it was the hopelessness of the struggle it was making against very untoward circumstances, and we at once took a few cuttings and rooted them to see what it would come to. From the first it was apparent that it was a good thing. The habit was excellent; it kept to close tufts, and every little shoot produced a fine, broad flower, not a florist's

Headquarters for **ORCHIDS** and all Fancy Stock  
**CHAS. W. McKELLAR,**  
 162 N. Wabash Avenue, CHICAGO.

pansy, by any means, as the markings were so irregular as to drive an old-time florist crazy, but just the kind of pansy that you and I like to see in our garden, a plant producing countless thousands of showy, beautiful flowers in the ordinary soil of the garden. We had at that time a good collection of herbaceous flowers in the borders and a more or less noted collection of orchids and other valuable plants under glass, but there was not a plant on the whole place that we would not sooner have parted with than the pretty pansy that had so well repaid us for the little trouble we had taken with it. Many hundreds of it were grown and scores of fellow gardeners seeing it were supplied with stock for their gardens, all from the one little forlorn plant we found under the apple tree.

### TUFTED PANSIES.

Speaking of this plant reminds us of the value of the tufted pansies generally. Violas was the very inadequate name given by old-time gardeners to these useful and showy plants, a name that has led to much confusion, as all pansies are, of course, violas in a botanical sense.

**U S Budlong's**  
**E Blue Ribbon Valley.**

The name tufted pansies, given them by a famous horticulturist, suits them well. The habit is close and compact as compared with that of the show pansy, and the flowers are produced in great abundance. They are much the best pansies to grow for garden decoration, as they put up with soil conditions that would not suit the show varieties. They are excellent for bedding and for forming long lines of brilliant color in such parts of the garden as these are needed. They flower in about four weeks from the time the cuttings are inserted, yet they go on improving and flowering more and more freely all the season and, if protected, stand the winter and may be grown again

the second or even the third season if left undisturbed.

### SHOW PANSIES.

The show or florists' pansies are larger flowering and these are the best for cutting, as the flowers are larger and borne on longer stems. The true forms are either self-colored or regularly marked, an important point from a show point of view being that the marginal band of color usually found in them is regular all around, while the nearer the flower approaches the circular form the better. But, leaving out these true types, there will be plenty of fine, richly colored forms in any batch of seedlings raised from a good strain, and their very variety is their greatest charm. In habit these are not as good as the tufted pansies, as the joints are longer and the plants take on a kind of climbing or rambling habit as distinct from those with which we are comparing them. To obtain the best results, cuttings of selected sorts should be rooted every month and a constant succession will be kept up of large, well-colored flowers.

### WHERE PANSIES THRIVE.

Independent of soils, a suitable position should be sought for pansies. Heavy shade on the one hand and too great exposure to sun on the other are to be avoided; the one leads to weak, spindly growth, and in the other the plants are burnt up and the color taken out of the flowers by the hot sun. There are usually many suitable positions in most gardens, places where adjacent trees throw a shade during the hottest part of the day, yet far enough from the stem of the tree to be out of the reach of the largest roots, which rob the soil. Where there are walls with a north or northeast exposure semi-shaded spots are found that are excellent for the summer culture of these plants, where the foliage keeps clean and cool and the flowers last in perfection for a long time.

### WINTERING PANSIES.

In cold localities pansies must have some protection. They are hardy enough to stand a few degrees of frost, but not sufficiently so to withstand the constant freezing and thawing and the bitter winds of winter in the northern states and Canada. Everyone must be guided by his or her circumstances. In the open ground they are best covered with leaves and litter; not deeply or heavily, but lightly. A better plan is to have the plants taken to a cool greenhouse or protectors where they can be protected from the elements without having all the light excluded. It is hardly worth while protecting more than is wanted for stock purposes, as they can be easily and quickly propagated, and where a greenhouse bench can be spared, either seedlings or plants from cuttings may be had quite as early as it is safe to plant them out.

### SOIL FOR PANSIES.

The most suitable soil for pansies is one containing some clay or marl, yet not so heavy as not to work freely. Very light, sandy soils are not so suitable, but may be improved by the addition of clay or marl in a finely divided condition, by mixing turfy or fibry loam with it, and by using half-decayed cow manure as a stimulant to growth, as this is cooler to the roots and more lasting than horse manure. A mulch of an inch or two of old soil or well-decayed manure in hot weather is also an advantage in keeping the surface moist and the roots cool.

Very stubborn or heavy soils are improved in just the opposite way. They are inert; cold in winter, and in summer crack badly and bake up, allowing the sun's rays to penetrate to the roots and the moisture to escape. But when, by the addition of grit, sand or silt or even ashes, these stubborn soils can be made to work well they are the very finest possible medium for show pansies, producing fine, strong growth and heavy, well-colored, substantial flowers. It is necessary to plant somewhat later in such soils and to keep the surface constantly stirred to prevent cracking. A thin mulch of light, littersy manure is also of advantage here, and by pricking this in spring and autumn humus is made and the soil still further improved.

### SOWING PANSIES.

Pansy seed may be sown either in spring or fall: in fall for early flowering under glass; in spring for flowering outside. Always buy the best seed procurable, of a good strain and from seedsmen of repute. If only a few plants are needed, sow a pan or flat in the greenhouse or frame. If more, allow a part of a greenhouse bench, large enough for the requirements. Have the soil thoroughly moistened before sowing, sow very thinly and cover the seeds with only the merest covering of light, sandy soil. Cover the seed bed with paper or a mat, and probably no more water will be needed until the seedlings are up. But should the surface be dry, a light sprinkling may be given, carefully avoiding swilling out the seed, or swilling it to one side of the bench or flat. As soon as the plants are large enough, prick them out two inches apart each way in a cold frame or house to grow into stout plants for putting out in May or earlier, according to locality. February and March are the best months, respectively, for southern and northern localities. We hope to return to this subject anon, and in the meantime the experience of fellow cultivators would doubtless be of interest to others besides.

### Seasonable Floral Arrangements.

At no season of the year are flowers more abundant than during the months of June, July and August, and at the present time there are numerous subjects, hardy and otherwise, that al-

## U S Budlong's E Blue Ribbon Valley.

low of a frequent change being made. A well-arranged hardy flower border invariably provides a goodly number of subjects from the early spring until quite late in the autumn, and during the three months mentioned there is a wealth of material available for those who will take the trouble to grow these hardy plants. The first expense is practically the only one, and, except for adding an occasional new and choice subject to the already long list, the grower has only to keep his plants growing, and divide the extra large clumps every few years. One may cut and come again without materially interfering with the display, and monotonous in floral arrangements is almost unknown in such circumstances.

Just now (July 2) the oriental poppies are very striking in the hardy border. Where numbers of plants are grouped together, it is quite an easy matter to cut many stately and effective blossoms for large vases. Large jars, trumpet vases and receptacles of a similar character display these beautiful flowers to perfection, and if they are lightly disposed, they make a noble decoration. The Spanish iris is another subject that merits special attention at this time. These flowers are grown in many gardens and in wonderful variety. The Spanish iris is often described as the "hardy orchid," and it certainly deserves all the commendations bestowed upon it, on account of its easy culture and its great value for cutting. Infinite variety of color is now represented in these beautiful flowers. The uses to which blooms of this iris may be put are endless. They are welcomed in almost every decoration, but to see them at their best, they must be cut with long stems, and disposed so that both the flower and the flower-stalk each contribute to the floral picture. Some people are foolish enough to gather the blossoms with just a few inches of stem, in which case it is impossible to set them up artistically. The long, spiky foliage of the iris is quite sufficient embellishment for the flowers. In arranging the blossoms in the various receptacles, avoid crowding, each flower being so disposed that individually and collectively its full beauty is seen and properly displayed.

The pyrethrums are also much in evidence at this season. The single-flowered kinds, in the opinion of many flower-lovers, are considered better for cutting than the double-flowered kinds.

It may be attributed to the more vivid and rich coloring seen in the single section, and then we should remember that the rich yellow center or disc of the single flowers contrasts so very effectively with the crimson, scarlet, carmine, pink, rose, and many other pleasing colors represented in the ray-flowers of this type of the pyrethrum. They are plants of the easiest possible culture, are extremely hardy, and, when established, yield a wonderful display of blossoms for a considerable time. Trumpet vases, deep bowls and deep glasses, etc., set off these flowers to advantage, and so long as a stiff system of arrangement is avoided, the result is always pleasing. In gathering the flowers they are sure to be cut in varying lengths, and so long as the ends of the stems are always kept together, the disposition of the blooms in the vase, etc., will be all right. When gathered in this fashion, just drop the blooms into the receptacle, leaving them to adjust themselves in position. It is well to contrast the colors somewhat. We recently judged a vase in which brilliant crimson flowers were contrasted with other flowers of a cream color, and under artificial light the effect was excellent.

In a vase I recently saw, the flowers were all white, and the arrangement was very chaste. The flowers represented were White Stocks, which stood out well above *Gladiolus The Bride* and a number of double white pyrethrus, each subject being lightly dispoised, so that the good points of each flower were seen to advantage. The only foliage was a few sprays of hornbeam gathered from the hedgerow, the varying tints of green and bronze being most appropriate in association with the white flowers. Sweet peas are coming on apace. There is now infinite variety in color in any ordinary collection of plants. It may be well to emphasize the importance of taking advantage of the full length of stem of these flowers. Nothing is more distressing in an arrangement of the flowers of the sweet pea than for one to see the stately and elegant flower-stalks shortened to six or eight inches. When treated in this fashion, much of the beauty and grace of this subject is

lost. The stems of the sweet peas are an important element of their beauty, and I cannot understand shortening them in the manner I have described. A few pieces of sweet pea haulm and dainty tendrils are the most appropriate accompaniments for sweet pea flowers; other foliage, etc., seems to be quite out of place. I have no sympathy with the practice of using *Gypsophila elegans* and grasses with sweet peas as they seem to detract from the value of the latter flowers. In the floral arrangements of the house, sweet peas should be in frequent request, and, as the plants do so much better when the flowers are gathered regularly each day, it should be an easy matter to frequently change the color scheme. Lavender and kindred tones of color, or lavender and cream or white flowers, should be avoided for evening decoration, as they are not effective under artificial light. Pink and rose or blush colors are beautiful at all times, creating a pleasing and charming picture both by natural and artificial light. Crimson and scarlet tones are brilliant at night. On a hot, trying day, these rich and vivid colors are less pleasing than the softer tones of color of the pinks and kindred shades. A few flow-

WHOLESALE GROWERS

121 Seventh Street,

PITTSBURGH, PA.

Cincinnati.

BUSINESS SLOW.

Business locally is none too brisk, in fact it is decidedly slow. As is usual at this time of the year funeral work forms the bulk of the retailer's business. There are but few really choice flowers. The good ones are completely comprised in a list including a few varieties of roses, lilies, sweet peas, Shasta daisies and gladioli. Beyond that a large amount of the stock would do for nothing but design work. In white roses the supply easily more than equals the demand, while in pink the offerings and the calls are about equal. Carnations are about ready to make their last bow to the 1910-1911 season. Sweet peas are good and enjoying a fine sale. The market on Shasta daisies varied last week. At times, probably the times for replenishing the retailers' ice boxes, the sale was everything the grower might expect, while between these spurts they did not move at all. Other flowers offered include Lilium giganteum, lily of the valley, gladioli, reverfew, candytuft and coreopsis. The green goods market is ample.

NOTES.

Geo. Magrie has been cutting some excellent sweet peas at his plant in College Hill. H.

Cleveland.

STOCK OF GOOD QUALITY.

There are plenty of roses to go around of all colors. Kaiserin of good quality are arriving in quantity and the demand is all that could be desired they being used both for wedding bouquets and funeral work. American Beauties, both medium and short stemmed, are now in full crop and meet with good sale, for they keep longer and the flowers are better than either red or pink roses. Short stems are used for funeral work and the medium and long stems for decorations and vases. Carnations are about the same, both as to quality and quantity, as the last report and have sold up clean. Sweet peas are very plentiful, one retailer selling "about a million," as he expressed it at a sale which he held. Candidum lilies are meeting with an excellent demand, the quality being exceptionally fine. Water lilies, white, pink, red and yellow, are selling splendidly, the colored ones especially being in demand far in excess of the supply. The call for gladioli far exceeds the supply. Larkspur, iris and phlox are used extensively for decorative purposes as are rambler roses both pink and white. Lily of the valley is in good demand and the quality exceptionally fine. New fancy and dagger ferns are very good.

NOTES.

Schneider Floral Co. on Euclid avenue. The entire store has been remodelled in up-to-date style, and is doing a very fine business. Mr. Bramley is a hustler and will conduct a first-class store in every respect.

G. P. Braund, one of the oldest florists of the city died Sunday evening, June 18, after a long illness.

C. F. B.

Pittsburg.

BUSINESS QUIET.

The good old summer time rights itself again. Lots of hot weather and business is a little quiet, with a good supply of stock. Summer roses are coming in heavily and arriving in nice condition. Lilies are moving slow. Greens of all kinds are overplentiful.

NOTES.

M. B. Schreiber, McDonald, was very unfortunate last week. Thieves entered and looted his home and escaped uncaught.

J. Beck, New Castle, was a business caller today, and states business is a little slow down his way.

J. B. Martin, of the McCallum Co., is spending his vacation at his home in Waynesburg, Pa.

J. J. Fuchs, South Side, is having quite a run on funeral work this week.

## Baltimore.

## SHORTAGE OF STOCK FOR PLANTING.

Trade has dropped off considerably the past week, still there are some weddings and entertainments that call for decorations and floral work. Great difficulty is being experienced by the retailers in procuring stock, for the hail storm put many of the growers temporarily out of business. The rose growers were nearly all in the section where the hail did the most damage, and the plants were badly cut, in some cases almost down to the roots. Lily of the valley is the only flower that is not in short supply. There is a great shortage of carnation and chrysanthemum plants many of which were destroyed during the storm.

## NOTES.

A trip through the district where the recent hail storm did so much damage found the houses and stock in terrible condition. The stock is badly damaged and cart loads of broken glass are being hauled out of the houses, extra help being employed in clearing up, but the same spirit is manifest that was shown after that other great calamity, the Baltimore fire, and it will be but a short time before the devastation will be obliterated.

A party representing the entertainment committee of the club which consisted of R. L. Graham, M. Richmond, G. Morrison, J. J. Perry, J. L. Townner and G. Johnston, took a trip on the bay to Betterton, inspecting the grounds, after which supper was had at the Chesapeake hotel.

James T. Hamilton of Mt. Washington is erecting a house 42x200 feet, which will be planted to roses. Mr. Hamilton now has over 40,000 square feet of glass devoted to rose and carnation culture.

During the storm that did so much damage in the vicinity of this city, Fred Reitz of Franklinville had the ventilator sashes blown off of one house.

The new Gem City boiler was received at the new plant of Stevenson Bros. at Govanstown this week.

Two new seed houses will be established in this city, the Frederick Weisseman Seed Co. and Robinson Bros.

J. L. T.

## Philadelphia.

## GOOD STOCK SELLS WELL.

Quite a few weddings gave an impetus to business the past week, the good stock being gathered up about as fast as it was offered for sale. American Beauties have deteriorated greatly and pots of one hundred or more blooming medium priced roses more than two to three dozen specials. The eastern stock now has the call and for the best specials as much as \$8.00 per dozen is asked. My Maryland roses are now preferred to Killarneys. Some new crops of the latter are coming in showing very good flowers. There is a good demand for white roses and in fact all kinds of white flowers. Those who had them found a good sale for Dorothy Perkins. Sprays of flowers of this beautiful pink climbing rose were in good demand at from \$2.00 to \$3.00 per hundred. The Robert Craig Co. also cut quantities of the American Pillar which is another sure winner. Another outside flower that met with good sale was larkspur, the beautiful spikes of this lovely blue flower are very decorative and should prove a profitable field crop. Lily of the valley sells well, the quality of the special stock running very good. Considerable eastern stock is sold in this market, the home growers not seeming to be able to keep up with the demand. Cattleyas keep moving, at times there appears to be too many, but the market soon balances and too often in fact

goes the other way. The shipping trade is increasing rapidly, the outside demand being much greater than that of a year ago.

## NOTES.

Friday, June 23, was opening day at the Waretown Rod and Gun Club. Commodore John Westcott's Bay Side cottage on Barnegat Bay. A goodly crowd gladly accepted the invitation to be present, Wm. R. Smith, John Clark, and Wm. Gude came on from Washington. John N. May of Summit, N. J., W. J. Stewart and John K. M. Farquhar of Boston, were the out of town guests, while John Burton, George Anderson, David Rust, Robert and George Craig, S. S. Pennock, F. Michell, Jr., Wm. Westcott, Robt. McKinney, D. C. Donoghue, George C. Watson, Dr. Lane, and Hugh Eble, composed the party from Philadelphia. Sailing and fishing parties enjoyed the waters of the bay, the fishermen making quite a nice haul of blue fish. As an appreciation of the work of the Commodore, making possible these delightful trips, he was presented with a complete set of Balzac's works, Robert Craig making the presentation in his usual good style. The Commodore in accepting thanked them, but wished in his modest way that they would not bring gifts, he only wanted their presence and that they should come and enjoy themselves to the full and he would feel more than repaid. The health of the Commodore was drank with a will and the hope that he would live long to enjoy many more of these pleasant occasions.

Building is a trifle slow although D. T. Connor, the pushing representative of the Lord & Burnham Co., says he had to work hard to keep ahead of his orders. He reports that the Stephenson's Sons' large house is now completed and being planted. Wide doors, either side of the house, which admitted carts, greatly facilitated the filling and the Stephensons are delighted with the structure. Frank Adelberger of Wayne, is erecting a house 28x145 feet. John Burton of Wyndmore, is rebuilding two houses 22x100 feet. F. M. Palmer of Kennett square, has three houses under way 20x140 feet, F. Carey, one 28x100 feet and Worrall & Wilkinson, two 28x140 feet, the latter two firms are also of Kennett Square. Carnations and tomatoes are the specialties of the Kennett Square growers. Mr. Connor says that the Lord & Burnham Co. will remove their offices on July 1 to No. 516 Franklin Bank building corner of Broad and Chestnut streets, which is one of the most central locations in the city. K.

## Washington.

## EFFECTS OF THE DROUGHT.

Business, which was very good through May and the first weeks of June, is now a very elusive quantity. The best patrons of the retail stores are, as a rule, at their summer homes or traveling abroad. Funeral work and cheap bunches constitute the bulk of the retail trade. The quality of flowers, as may be expected is poor, though considering the condition of business there is plenty to supply all demands. Though it is dull in stores there is no lack of work in and about the greenhouses. Rose planting being over the growers can only pause to take breath before they begin to bench their carnations. The great drought of May gave us a good illustration of how dry carnations can get, and live. Since the rain came the plants in the field have picked up wonderfully, particularly those that were large and strong when planted. The small and weak stock is very slow in making growth. Several growers, seeing no prospect for asters in the field during

the dry weather, there is a shortage of their carnations and asters, which are doing well. The asters in the fields are also making good growth and if they can run the gauntlet of bugs, worms and possibly more dry weather there may be a fair crop but it will be late.

## NOTES.

Percival M. Brown, a son of the late Geo. M. Brown, died at his home in this city, June 18. He was 42 years old, and had been a successful and highly respected lawyer. He was also a director of the Chamber of Commerce. Among the honorary pallbearers at his funeral were Chief Justice Claybaugh and Associate Justices Gould and Wright of the District Supreme Court and Wm. F. Gude, ex-president of the Chamber of Commerce.

The bowling team now meets every Wednesday night for practice in anticipation of the coming event at Baltimore. Geo. H. Cooke still has his left hand bandaged but as he bowls with his right he always gets in the game. It is now believed that his hand, which was poisoned, will soon be healed.

Geo. E. Burnap, who succeeded the late Geo. H. Brown, as landscape architect for the parks, under the War Department, is showing by his work in Potomac and other parks, that he is well qualified to carry out the great improvements that must be made as the park system is extended. Adolphus Gude, who superintends the growing at their extensive range, acknowledges that he is very busy getting ready for another season. His roses are looking well and a great stock of chrysanthemums has been planted. Mr. Gude will be seen at the S. A. F. convention.

The annual outing of the Florists' Club will be held at Huntsville, Md., on July 12. Incidentally it may be stated for a fact, that no heads will be broken on account of that date being the anniversary of the Battle of the Boyne.

J. R. Freeman, who was in poor health during the latter part of the winter and early spring, has, we are pleased to state, recovered and his cheerful face is now frequently seen in his store and about town.

John Robertson, Jr., was married in Baltimore about two weeks ago and rumors come thick and fast of others in the younger set of florists who contemplate this serious and solemn business.

A. B. Garden is building two new rose houses, the glass being now on the one first started.

Geo. Field furnished a large number of fine orchids to the retailers for the Taft silver wedding.

J. H. Small, who has been very busy during the season, has gone north for a short vacation.

W. F. Gude attended Commodore Westcott's opening at Waretown.

THE FIRM OF A. HENDERSON &amp; CO.

**Buffalo.****VACATIONS COMING.**

Warm weather, a moderate supply of flowers of fair quality, and a big demand for what is usually scarce in cheaper flowers for the school commencing have given us the largest part of our work the past week. Weddings of various proportions from the lone bouquet for the brick block to the elaborate church and house decoration has kept the florists more than busy, but this week will finish it, and from July 1 until vacation time comes, everyone will have that tired feeling. After vacation will be another lull until fall trade commences, and many get tired looking for trade to come, but such is life and the florist must take his share. Sweet peas are getting better daily. Candidum lilies have come and gone and Harrisii are getting scarce. Carnations are small, but Killarney and American Beauty roses are fair and all are looking for asters and Lilium roseum. But if we do not get more rain many will be sadly disappointed in their supply.

(FOR BUFFALO NOTES SEE PAGE 1212.)

**A. Henderson & Co., Chicago.**

The firm of A. Henderson & Co., which started in business January 1, 1911, at 162 N. Wabash avenue, Chicago, with A. Henderson and G. Reburn as partners, have added A. Miller, another bright young man with considerable experience, to the personnel of the concern. The firm has been doing a general jobbing trade in seeds, bulbs, plants and supplies, and is now looking for a suitable store in which to carry on a retail business in these lines. It affords us great pleasure to present herewith the portraits of the members of the firm, all of whom are well known to the trade. Mr. Miller, the new acquisition, has lately been representative of the Philadelphia firm of Skidelsky & Irwin, on the road.

## The Seed Trade.

### American Seed Trade Association.

Leonard H. Vaughan, Chicago President;  
Marshall H. Duryea, New York First Vice  
President; Edgar Gregory, Marblehead  
Mass., Second Vice President; C. E. Ken-  
del, Cleveland O., Secretary and Treasurer.  
Next annual convention, June, 1912.

To open 500 mail orders of a morn-  
ing is considered good business in  
England.

CANNED (cull) beans have lately been  
seized by the government food in-  
spector at Chicago.

ST. LOUIS, MO.—The Schisler, Cornell  
Seed Co. states that there is very lit-  
tle difference between the seasons of  
1910 and 1911 in the volume of busi-  
ness.

IOWA Experiment Station gave the  
seedsmen of that state a left-handed  
boost by advising farmers to buy seed  
corn grown within 25 miles of their  
homes.

SIoux CITY, IA.—The Sioux City Seed  
and Nursery Co. states that the whole-  
sale business is about the same as last  
year, some lines a little heavier and  
some a little lighter.

BOSTON, ENGLAND.—General Manager  
E. J. Beal informs us that in his opin-  
ion biennial seed crops will be shorter  
than ever and that peas will easily  
maintain the high prices of last sea-  
son.

LOS ANGELES, CALIF.—The Aggeler &  
Musser Seed Co. reports that the sea-  
son of 1910-11 has been very favor-  
able for retail trade and late spring  
planting especially has been consid-  
erably ahead of a year ago.

REPORT of the opening sessions of  
the annual convention of the American  
Seed Trade Association will be found  
in our issue of June 24, page 1136,  
and the closing sessions are given in  
this week's issue, page 1188.

THE varieties of corn for silage best  
adapted for Colorado conditions ac-  
cording to the news bulletin of the  
Colorado Agricultural College, are Iowa  
Silver Mine first, with early maturing  
types of Leaming second. Varieties  
grown for a long time in the state pro-  
duce a short stalk making a low ton-  
nage, while those grown in Nebraska  
and Kansas produce a much larger  
stock growth and higher yield can be  
obtained by using such corn as seed.

### Elements of Value in Garden Seeds.

Seedsmen usually contract for the  
growing of their supplies of seed of  
sweet corn, peas, and beans, instead  
of depending upon purchase by sample  
in the open market, because the el-  
ements of value in the case of seeds  
are different, at least, as to their rel-  
ative importance, from those in the case  
of most merchandise.

Appearance.—The good appearance  
of the seed as to cleanliness, size,  
plumpness, and color of the grain is a  
most desirable quality and, in most  
instances, one easily recognized, but  
one which is often misleading as to  
comparative value. An illustration is  
the case of Red Valentine beans, in  
which a plump, full, symmetrical bean  
of a bright red color is apt to go with  
inferior varietal quality, while a

many, particularly by those of little  
horticultural experience, as the most  
important of all qualities, and in the  
case of a single seed viability is es-  
sential to its value. However, of two  
lots of seed, in one of which 60 to 75  
per cent of the grains will develop  
into plants which are typical of the  
variety, while the remainder will not  
germinate at all, and in the other,  
though every seed is viable, only 10  
to 20 per cent of them will produce  
typical plants of the sort, the others  
developing into a medley of different  
forms and qualities, the first lot,  
though only 60 to 75 per cent viable,  
is decidedly the most satisfactory and  
valuable.

Stock.—Purity and evenness of va-  
rietal character are the most impor-  
tant factors in determining the real  
value of seed. A seed is essentially a  
plant packed for transportation, and  
carries within itself the potentialities  
and limitations of development of the  
plant into which it may grow. With  
the aid of climate and soil and through  
the control of cultural conditions man  
may secure more or less perfect ex-  
pression of these potentialities, but he  
can not add to or change them; they  
were predetermined by the varietal  
characteristics of the producing plant  
and its ancestors. In a few excep-  
tional cases such inherent varietal  
character is more or less clearly indi-  
cated by visible peculiarities of the  
seed, but generally such indications  
are neither readily discernible nor re-  
liable, and one can only know the  
varietal character of the plant any  
given seed will develop into by having  
far more knowledge of the producing  
plant and its ancestors than is to be  
gained from the appearance of the  
seed itself.

Relative supply and demand.—The  
commercial value of all kinds of seed  
is dependent, even to a greater degree  
than is the case with most merchan-  
dise, upon relatively temporary sup-  
ply and demand. A shortage of seed  
can not usually be met with a fresh  
supply until the next season, and the  
forcing upon the market of even a  
small surplus has a more depressing  
effect than with most merchandise. As  
most seeds retain their vitality for  
several years seedsmen usually guard  
against a short crop by carrying over  
a portion of the previous season's  
growth, but this carrying over of a  
large proportion of one's stock is ob-  
jectionable not only because of the  
cost of storage, insurance, etc., but  
because of the prejudice, which in  
many cases is quite unjustifiable, in  
favor of "fresh" seed, and also because  
of the depressing effect which the put-  
ting upon the market of even a little  
more seed than is actually needed has  
upon current prices.

A wise seedsmen will therefore not  
only hesitate to risk his reputation for  
handling pure and true stocks through  
purchase by sample, no matter how  
good the sample may seem to be, but  
will endeavor to limit his supply to

Arthur L. Deál.

twisted, unsymmetrical shape and a  
dull color are generally indications of  
a pure and true stock of the sort.

Purity of varietal character can  
rarely be determined by even the most  
critical examination of the sample, and  
though viability can be readily ascer-  
tained by germinative tests it requires  
some days to make these, so that the  
appearance of the seed gives little  
indication of its comparative value.

Viability.—That every grain will un-  
der favorable conditions develop into  
a healthy plant would be regarded by

**GIANT PANSY SEED****The KENILWORTH Strain**

must not be compared with the flimsy Trimardaut; it is much larger and of good substance. The immense flowers of  $3\frac{1}{2}$  to 4 inches are of perfect form. every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings; it is the result of years of selections. The stock plants are selected from many thousands of plants grown for market. It is rich with shades of brown, bronze, red, mahogany and numerous others. 1911 seed now ready, light medium or dark mixtures. 2,000 seeds, 50c; 5,000, \$1.00;  $\frac{1}{4}$  oz., \$.125; oz., \$.50.

**Pansies in Separate Colors**

Giant Adonis beautiful light blue.  
Giant Emperor William ultramarine blue.  
Giant King of the Blacks, coal black.  
Giant Beaconsfield, violet, shading to white.  
Giant Golden Queen, yellow.  
Giant Golden, yellow, with dark center.  
Giant Masterpiece, beautifully ruffled with a wide range of rich colors.  
Giant White.  
Giant White, with large violet center.  
Giant Royal Purple, fine large flowers.  
Giant Orchard flowering, rare shades.  
Giant Bronze and copper shades.  
Giant Light Blue, delicate shades of blue.  
Giant Dark Blue, deep blue shade.

**Florists and Seedsmen, Scratch or Poultry Food Sell Your Own**

We will make it for you, under your own brand, for \$28.00 per ton. Send today for sample 100 lb. bag \$1.50. Mr. C. E. Jensen, of Atlantic City, N.J., on Oct. 27th, 1910, writes as follows: "I want to state that your three grades of Poultry Food—Chick Starter, Developing Food and "Square Deal" Scratch or Poultry Food—stands without equal today. They are perfect mixtures and sound in grain and a pleasure to handle."  
**J. BOLIGIANO & SON, Importers and Wholesalers**  
(Established for 92 years) Baltimore, Md.

seed which he knows was grown from pure and true stock seed, and as far as possible to that which was subject while growing to his own inspection and approval. He will also discourage the growing and speculative crops with the intention of selling by sample because of the liability of such crops to disturb the most profitable balance of supply and demand.

W. W. TRACY, SR.

**Arthur L. Deal.**

Arthur L. Deal, representing W. W. Johnson & Son, Boston, England, will shortly arrive in this country in the interest of the firm of which his father, who is so well known by the seedsmen of this country, is general manager. This will be his first visit to America and he will arrive in New York the latter part of July. He has had a thorough training in the seed business and is entirely conversant with the European seed trade, having spent three years with the various seed growers in France and Germany and is a fluent talker in the languages of both of these countries. He is at present regaling the beet crop in France and will have, when he arrives in this country, the latest information as to the European crop prospects. He is very popular with the trade in England and on the continent and will, no doubt, make a great many friends in his journey through the country, where he intends to visit all the principal cities going as far west as Denver, thence to Texas and New Orleans, stopping at Toronto, Sioux City, Minneapolis and Boston.

## Scarlet Sage

**Bonfire or the Genuine**  
**Clara Bedman**

Nothing is more attractive in a garden or lawn than a bed of Scarlet Sage, the fiery kind we grow. We have a fine new stock, purposely raised for these birds the dark bronzed leaved **Robusta** and **Egandale**. Nothing looks more attractive than a bronze center and a fiery red border. We have them in large 4 in. pots, 2½ to 3 in. high (Cannas must be higher than the Sage), only \$7.00 per 100. We also have other best green-leaved varieties of the same height, such as **Alph. Bouvier**, **Richard Wallace**, **Austria**, **Maiden Blush**, **Mt. Blanc**, **J. D. Eisele**, **Mme. Crozy**, **Crimson Bedder**, 4 in. pots \$7.00 per 100.

Another attraction is to show off, when you use in connection with **Scarlet Sage** as a border, in center of the bed, large sizes of **Cannas**. Look! We have provided specially for these birds the dark bronzed leaved **Robusta** and **Egandale**. Nothing looks more attractive than a bronze center and a fiery red border. We have them in large 4 in. pots, 2½ to 3 in. high (Cannas must be higher than the Sage), only \$7.00 per 100. We also have other best green-leaved varieties of the same height, such as **Alph. Bouvier**, **Richard Wallace**, **Austria**, **Maiden Blush**, **Mt. Blanc**, **J. D. Eisele**, **Mme. Crozy**, **Crimson Bedder**, 4 in. pots \$7.00 per 100.

S. W. Severance, 505 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

NEW YORK.—A valuable premium is offered for the best exhibit of marketable, late potatoes at the American Land and Irrigation Exposition to be held in Madison Square Garden, Nov. 3-12, 1911. It is a cup valued at \$1,000, donated by A. E. Sulwell, president of the Kansas City, Mexico and Orient railway. Full particulars can be obtained by addressing the exposition, 149 Broadway, New York.

### Irrigation.

This has been an ideal season to find out the merits and faults of any irrigation scheme. Before the season opened we had our plans well along to cover most of our small tract with overhead pipes. The result is we have suffered less if anything from the seven weeks' drought; in several ways we have been benefited as no heavy rains have delayed work and the market has been excellent. Aside from the advantage of being able to soak any given field thoroughly we find great value in syringing or lightly spraying during the hot noon hours. In fact, a good many things do not need any soaking at all. They are content with a little air moisture to prevent flagging. We make it a rule not to soak any crop until it really needs it, as we cannot tell how soon a heavy rain may set in. But with the temperature in the nineties, the earth mulch as dry as dust and not a cloud in the sky, a good many crops suffer during the noon hour even with ample moisture at the root. Such things are greatly benefited with a general spraying but not enough to destroy the earth mulch created by cultivation. In other words, we prevent flagging and wilting between eleven and three o'clock. It is surprising how little water it takes to do this and how effective a good overhead system is. We find this necessary to obtain best results in wet seasons as well as dry ones. We remember one year, long ago, when the month of August came in cloudy and close with high temperatures, we had a fine field of musk melons and the peculiar weather conditions promoted a soft rank growth. These conditions lasted about ten days when we entered the other extreme—clear sky, extreme heat and drying winds. The plants were unbalanced—too much top and insufficient roots and the first clear day simply destroyed that field of melons. Had we been equipped with overhead pipes to assist with a spray we no doubt could have avoided that disaster entirely. In short when we install mechanical watering outdoors we enter into a new system of growing crops, we really produce greenhouse conditions outdoors. As a rule, what holds good under glass will hold outdoors. There is no doubt that with skillful management in regard to planting, watering and feeding, results outdoors can not only be doubled but increased

fourfold; added to this of course must be the enormous advantage of having high-class goods when the other fellow has poor, or having something to sell when the other fellow has nothing. In the course of time as competition increases and demands become more exacting, most garden crops will be produced with the aid of mechanical watering.

MARKETMAN.

### Effect of Advertising Lost.

In a recent issue of the leading British hardware journal is a page advertisement by an American firm that has had admirable success in introducing its articles into the United Kingdom.

The advertisement presents an old article with new features that specially recommend it. It is attractively worded and so prepared as to immediately arrest the eye, and yet by quoting prices in American money, reports Albert Halsted, consul at Birmingham, England, the effect upon the English reader will be to prejudice him against the goods by requiring him to calculate what the price would be in English money. Most English dealers in such articles would immediately lose interest, and to quote articles in American money arouses a prejudice that offsets the attractiveness of the article offered.

It seems that this point should be emphasized, not only because much advantage is to be obtained by advertising good quality American goods in British technical papers, but because of the almost universal practice of American manufacturers in sending out catalogues with prices quoted in American money. At the same time it may be stated that in most lines it is highly important to quote articles delivered all charges paid at some British port, instead of free on board at some American port.

### Buffalo Notes.

On Saturday evening, June 24, Joseph Streit, foreman for S. A. Anderson, and Mrs. Streit celebrated their crystal wedding, the day being also the birthday of Mrs. Streit. Friends to the number of about 100 were their guests. The lawn was brilliantly lighted and all enclosed with box trees,

laurels and palms. The starry decked heavens was the roof of the entertainment, and Mr. and Mrs. Streit lavishly furnished their table with the best of everything. After the dinner, W. A. Adams called on F. C. W. Brown for a few remarks, who at the same time presented Mr. and Mrs. Streit with a handsome cut glass fruit bowl on behalf of their friends at the Main street and Elmwood avenue stores. The employees at the greenhouse presented them with a very handsome picture, and many other presents were given. Mr. Streit responded in a happy vein on behalf of Mrs. Streit and himself, thanking their friends for their kind thoughts. Music and dancing followed, all passing a most enjoyable evening.

There has not been much activity shown by the florists as to who are going to Baltimore, but the next club meeting will decide what steps will be taken.

The special committee on entertainment of the Florists' Club are making arrangements for the annual picnic, time and place having been left to them.

Visitors: J. C. Connon, Connon Floral Co., Hamilton, Ont.; J. K. Davidson, Hamilton, Ont. BISON.

# Heacock's Palms and Ferns

**Home Grown, Strong, Clean and Well Established**

We grow all our Kentias, above 6-in. sizes, in cedar tubs made especially for us, avoiding breakage of pots in shipments and giving better satisfaction to our customers; and while they cost us a great deal more than pots, we sell the plants for the same money. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see us before placing your order.

## The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Fainesville, O. President;  
W. H. Wyman, North Abington, Mass. Vice-  
President; John Hall, Rochester, N.Y. Sec'y.  
Thirty-seventh annual convention to be  
held at Boston, Mass., 1912.

ROCHESTER, N. Y.—The roses were in their prime at the Ellwanger & Barry nurseries June 21-24 and a general invitation was issued to the people of the city to visit the grounds and enjoy the display, which was accepted by a large number. The climbing roses were a grand sight, presenting an array of so many colors. The newer varieties attracted a great deal of attention, especially Yielchanblau, the blue rose. Goldfinch, a beautiful yellow, and the many new white, pink and crimson varieties.

### The Ethics of the Nursery Business.

Paper read by Harlan P. Kelsey before the American Association of Nurserymen, at St. Louis, Mo., June 15, 1911.

It is significant as well as hopeful that anyone should have been asked to prepare a paper on the ethics of a business to be presented at the annual convention of the leading men engaged in that particular business. The question of ethics in the professions is an old one, and doctors, dentists, lawyers, architects, engineers, and even landscape architects have adopted ethical codes, which, when disregarded or ignored, tend to place the delinquent in an unenviable light with his fellow members, if not actually making him amenable to more or less drastic disciplines. Curiously enough, however, the subject of ethics in business, and particularly so-called "big business," has been persistently tabooed and even vigorously throttled until quite recently, and prevailing practices have been all too quietly accepted by the business man while financial success has been the one great test of a business man's right to general community esteem. Even now, in the face of judicial exposure, of vast frauds and systems of frauds involving our largest corporate interests and our wealthiest and hitherto most respected citizens, he who questions everyday business methods is usually termed muck-raker, if not socialist and anarchist.

Assuming that the dollar-getting methods of the average citizen are often unclean, when closely analyzed, and even dishonorable, and that the scramble for position and preferment leads to questionable practices to attain desired, though oft-times undesirable, ends,—this might truly give us reason to ponder carefully on the causes and possible remedies. Yet is it not a still graver problem when we consider how hushed is the voice of the teacher and the preacher on fundamental questions of every-day business ethics, which in the definition we are here disposed to discuss, means every-day business honesty and dishonesty? Down the ages, the preacher has thundered against immorality, while his voice seems forever strangely still about the immorality of his leading church members, even deacons, who supply his salary and build and support churches out of wealth acquired by dodging taxes, stock gambling, stealing public utilities, or even petty stealing of sidewalk space that belongs to the humble,

meek and non-complaining "common" citizen at large.

From the beginning, our teachers have taught classics, art, literature, law, science, and even religion, etiquette and so-called ethic ad nauseam, while at the same time they have given Young America precious little schooling in fundamental business honor, or ethical business methods. They have received a more or less efficient training to go out in the world in various directions and shift for themselves, which they promptly proceed to do, by "playing the game," as their fathers have played and are playing it, which means, to arrive with the goods,—straight if you can,—but above all else, arrive. And it's a silly fool who doesn't early learn that this is just what is generally expected of him by those who taught him, and by those who paid for his teaching, and desire their own so-called "successful" footsteps followed. And so we witness the merchant with his unfair competitive methods and shoddy, falsely-advertised goods, the importer evading duty, the builder and contractor bidding below cost, and relying on evading contract for his profit, the patent medicine fakir dealing out poison, the sweat-shops and child labor murderer, the manufacturer breeding tuberculosis in dusty, illy ventilated shops, the crowded tenement-house owner, whose profits are too often the price of crime, misery, and disease, the lawyer becoming the vote-buying politician, and so through the long list we all know so well, and admit of so little, to the nurseryman, who endeavors to increase his sales by unfair methods; by giving the bribe or graft to the gardener, superintendent of estate, or public official; by stealing information the property of others, or by claiming what is, is not, or what is not, is.

The gardener or other employe is hired to represent his employer's interest, and no sane man will argue that he is free to do so, or liable to do so, after having accepted a bribe or the promise of a bribe or gratuity. There can be no distinction in its moral or ethical aspects, between the case just cited, and the legislator or public official, theoretically serving the people, yet riding on a free pass or accepting a retainer from the railroad or other public service corporation whose selfish interests are rarely in accord with the best public welfare. It is bribery, pure and simple, and a conspiracy to defraud, and the most charitably inclined can hardly make the indictment less specific or comprehensive. In Massachusetts, the giving of a gratuity to a servant or agent with a view to influencing business with the principal is a felony under the law, and I believe it is now the same in Pennsylvania, New York, and possibly other states. Yet, from its very nature, such bribery is the most difficult to prove, when both briber and bribed are equally guilty, while the unlawful practice is universally conceded to be as common as business itself. The results of this bribing of employes cannot be other than a blunting of the sensibilities in other directions. I know of cases where the employers themselves wink at the practice, allowing themselves to be robbed, if within decent limits, feeling it hopeless to fight against a system so thoroughly entrenched, and which they practice themselves. One can scarcely blame the underpaid gardener for increasing

his meagre income by accepting the small graft when all concerned know that the employer is possibly or probably an employer only as a result of larger and more successful graft, bribery, or other dishonest business methods.

Time bids me close, and I have specifically touched on but one phase of ethics in our business. Misleading advertising, exaggerated and incorrect description of goods, speaking unfairly of our competitors, the nursery-agents' oft-times too enthusiastic tables and statements of yield, size, color, and fragrance, the utterly inexcusable practice of supplying two or more rare and high priced varieties out of one common cheap variety, our honest packing and grading relations to our employes, and other ethical questions must be left for later discussion, important as they really are. If I have partially diagnosed the case, it should be cause for optimism, for a disease once recognized and admitted will be surely combated.

Perhaps right ethics in our business or in business generally will never be universally practiced until co-operation in business takes the place of competition, or perhaps until our economic system is radically changed in many other respects. Yet actual bribery in the form of gifts and favors to employes of customers can and should be done away with, and the American Association of Nurserymen might very well declare itself at this time, in no uncertain voice. Let the power of public opinion at least act on those who practice this form of dishonesty and law-breaking, even if actual convictions cannot be had as quickly as some of us hope for.

It is necessary, yet not sufficient, for individuals to be personally clean in business practice, for each citizen has public duties to perform and public service to render, if nothing more than standing back of those who are striving for juster, more equitable economic conditions, an actually applied code of ethics among public officials and in private business life. Tainted dollars will probably continue to be equal in buying value to clean dollars, yet we recently have most abundant proof that American conscience is so aroused that the dollar mark as indicative of our national life and character will sooner or later be replaced by a coat of arms representing square deal, social service, and co-operative effort.

Naturally, it is the easier and more profitable course to "play the game" according to current rules, number one being "Do the other fellow, and do him first"; number two, "It's no crime, unless you are caught." Yet the uneasy seats of some of our distinguished senators and representatives in congress and the striped design of clothes worn by an increasing number of well-known bankers, promoters, and other public and private officials who have played the game, not observing rule two, would indicate a growing desire on the public's part to change the rules for perhaps more ethical ones. Each individual is partly responsible for existing rules and standards of ethics in business, and when we really want a change for the better, the change will come. Don't duck behind the other fellow,—it's up to you and me individually, and the changing of the code is a personal matter; for when these things are settled individually, be sure collective action will promptly and effectively follow.

PLANT OF DOROTHY PEACOCK.

Notice the heavy vigor of plant, and eye at base of young tubers.

### The Sensational New Cut Flower

# Dahlia Dorothy Peacock

## Representing the Highest Development in Dahlias

Flower larger, finer form, better color and every way far superior to the celebrated English Dahlia, Mrs. Gladstone. Does better in America than Gladstone in England,

### Beautiful, Pure Pink

Long stems, hardy, free bloomer, full to the center. Send for catalogue. Cut shows we know how to propagate, as well as the vigor of this new Dahlia.

P. O.: Berlin, N. J. Williamstown Junction, N. J.

### Nurserymen's Guarantee.

#### ED. AMERICAN FLORIST:

How much responsibility should be assumed by stating "We guarantee trees to grow?" Would it mean that the guarantee had been fulfilled if the trees had been properly planted, or transplanted, guyed and watered, then put forth growth and started to grow? Afterward on account of not being properly cared for, the trees died, should the guarantee hold as though it read "We guarantee the trees to live?" S. & S.

In furnishing nursery material we rarely make guarantees. Indeed, we are rarely asked to stipulate a warranty, and usually decline when asked, further than that the stock shall be of good quality and in good condition when shipped, or, if delivered, in a like condition when received. In rare instances we guarantee to replace, either at half price, or, if without further charge, make an additional charge in the first instance sufficient to cover the risk for time the guarantee runs. Even in such cases we never assume liability further than to replace the stock without additional charge. In such cases, too, we have a contract drawn directly applicable to the particular case, which will stand or is supposed to stand in the courts, so that each side thus know in advance what the status of the legal rights of each may be.

We consider that on general principles guaranteeing nursery material, like other things of life, is an unattractive proposition. In any event, this is our view, and our action as already indicated is governed accordingly.

### Lysichitum Camtschatense.

This is a little-known plant, and one that appears to have been quite overlooked in works on horticulture. An account of this species appears in "A Practical Guide to Garden Plants," by John Weathers. The author refers to it as "A noble-looking Aroid, native of the swamps of northern Asia and America. It is a stemless plant, throwing up large oblong lance-shaped acute leaves one to two feet in length and three to ten inches across, from a thick horizontal rootstock. The leaves are sometimes spotted or mottled like those of the Dieffenbachia, a tropical relative. The stout flower stalk is six to 12 inches high and bears a spathe with a broad sharp-pointed blade, and a spadix three to four inches long. The flowers on the spadix are hermaphrodite and all fertile." The author goes on to say, "It is not yet in cultivation, but will doubtless prove to be perfectly hardy in marshy parts of the rockery or near the banks of lakes, streams, etc. It would probably produce seeds freely in our climate, and by this means could be readily increased."

In actual practice it is found to propagate quite freely by offsets, says a writer in The Garden, consequently there is no need to adopt the slower practice of raising plants from seed. There is only one known species of Lysichitum, although there is now a

white variety in cultivation which is not nearly so strong in constitution. The type has bright yellow spathes which are very showy indeed. That the plant has proved hardy in our climate is shown by the fact that it may now be seen flowering outside at Kew. Even though it is a little-known plant in this country, it is the possessor of a common or popular name, for it is known as the skunk weed.

#### BUSINESS BETTER THAN LAST YEAR.

Belated June weddings and a fair amount of funeral work keep business a little better than last year, the continued warm weather shows its effect on the roses and carnations that are coming in, many of the houses are being replanted and things generally are beginning to look very much like summer. Brides and Killarney constitute the majority of the rose stock, Richmond being small and blowing quickly. American Beauties are about over for this season. Sweet peas, lily of the valley and outdoor flowers form the majority of window decorations in the stores. Peonies, except the very late varieties, are about over as the cold storage stock meets with little approval here. Iris of the Spanish, English and German varieties is plentiful.

#### NOTES.

The Bedford Park Floral Co. are erecting a 250 foot house for roses, a number of the English varieties which have not yet been disseminated will be tried and arrangements are being made for the increasing of their already good plant.

The increased price of real estate has been a boon to the growers in the near vicinity, their ground in many instances being worth six and eight times what it was a few years ago; \$65,000 was cleared by one firm on ten acres.

The continued drouth and warm weather have retarded the growth of carnations in the field and where there is no connection with city water many of the plants are very small.

John Dobie of Niagara Falls was a visitor looking up Boston ferns. He stopped on his way back from Ottawa, but reports that it is impossible to find Boston anywhere.

Coronation day did little to help the retailers; there were a few banquets but transient trade was very poor, most of the stores taking a half holiday.

W. E. Mackay is bringing in well grown glloxinias. These have been off the market here for so many years that they meet with ready sale.

Chas. Tidy & Son are showing Golden Glow chrysanthemums, the first of the season.

A. Houle is still cutting quantities of sweet peas which have been a steady crop since before Christmas.

H. G. D.

MILLVILLE, MASS.—All of the good stock is sold, the spring trade has been better than the average. The stock on hand in the stores in Woonsocket, R. I., just over the state line, is mostly odds and ends. There never was such a scarcity of good geraniums. As for pansies, hardly any plants have

## Gold Letters

Gummed Gold, Silver and Purple Letters for inscriptions on Floral Designs. Best and Cheapest on the Market. Send for Samples and Prices.

J. Lichtenberger, 1564 Ave. A, NEW YORK. Telephone Lenox 5644.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown, Ohio

## IT IS NOT...

what you pay for the advertisement but what the advertisement pays you. It pays to advertise in the American Florist.

## Greenhouse Heating

Is a Perplexing Question to All Florists Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

## What the Users say

Cast-Iron Boilers Require twice the Amount of Coal; Kroeschell Boiler Only One-Half.

"I bought a No. 3 boiler in 1901. We had a corrugated cast-iron fire box boiler and sectional cast-iron boiler before we bought yours in 1901. The cost of heating with this boiler is one-half less than it was with my cast-iron boilers. Your No. 8 boiler, which we bought recently of you, is not being run to its capacity."

W. GEENEN, Kimberley, Wis.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill

Send for Catalogue.

# Ready Reference Section.

10 CENTS PER LINE, NET.

## AGAVE.

AMERICAN FLORIST CO.,  
Chicago, U. S. A.

Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged if you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.

Yours truly, ERNST BENARY.  
Published and For Sale by the  
American Florist Co., 440 S. Dearborn St. CHICAGO.  
PRICE ONE DOLLAR, POSTPAID.

# The Truth About Boilers

It Being the First of Four Frank Talks.

**B**UYING a boiler for that house of yours is a pretty serious matter.

When you want heat you want it—that's one side. But you want it with the least care and least coal expenditure—that's the other side.

Every boiler man claims his is "the wonder of the age"—"the modern coal saver." Who and what can you believe, that's the question. Don't believe—settle it for yourself—settle it by common sense deduction.

Let's take the kitchen range and the tea kettle for a talking comparison.

First, there's the fire itself, if it is shallow, it needs constant attention or it dies down; so it is only common sense that a boiler must have a **deep fire pot** if you want the fire to keep humming long intervals without attention. The Burnham's made that way.

Then there are the so-called "indirect surfaces;" which in a tea kettle is the part coming in contact with the flame—you know that the broader the bottom and shallower the water in a kettle, the more quickly it heats up. Exactly the same principle, in modified form, applies to an economical boiler.

With the Burnham boiler there is at least three

And so this is the tea kettle.

And this The Burnham as it is from the outside, looking in.

times the fire surface in proportion to the amount of water there is in a tea kettle. On looking carefully at the interior view of the boiler you will see this result is accomplished by deep corrugations, or waterways, which the fire surrounds on three sides. These waterways carrying a thin, narrow body of water, it heats quickly just as the small amount of water in the kettle.

If it were possible to put some hollow pipes through the kettle leading from the fire to the chimney of the range the water would heat still more quickly from the same amount of coal burned, because a still greater amount of heat would be coming in contact with the water—these tubes would be called **indirect surfaces**. In the Burnham, the heated gases do not at once reach the chimney; but first must pass back and fourth through water lined flue openings, extending three times the length of the boiler, giving to it tremendous indirect surfaces.

These flue openings are called "The Burnham's Fire travel," and the longer the fire travel, the shorter your coal bill.

In a couple of weeks, another frank talk. In the meantime why not be frank with yourself and send for our catalogue, and be mulling things over in your mind? Burnhams are made for Hot Water or Steam.

## Clean Glass.

President Bunck, of the Anderson Specialty Co., Chicago, calls attention to a paper on "Factors Determinating Color in Roses," by Prof. M. A. Blake, which appeared in our issue of May 13, 1911, page 821, also note on "Light a Factor in the Color of Roses," which appeared in the same issue, page 828. Light is the one great factor to be considered and Mr. Bunck advises that his company has solved the problem and guarantees that with the aid of Anderson's Daylite Cleaner every greenhouseman can keep his glass clean with very little trouble. This powerful cleaner is self-acting, commencing its work as soon as applied to the glass. After a few moments the glass can be rinsed off with cold water, leaving the cleansed area free from dirt or grease and that, it is claimed, without injury to the paint or putty, a very important feature.

WHEELING, W. VA.—Davidson Bros. are erecting a greenhouse 28x150 feet which will be used exclusively for the culture of carnations.

## Your Heating

The dollars and cents side of the question shows up the very first season when it comes to heating

No use trying to jolly yourself when you are up against a coal bill.

It talks out loud.

That's why we have a separate heating department—a department under the direction of an expert heating engineer. This is the engineer who is called our Trouble Man, because he keeps people out of trouble and gets those out, that are in.

These men of the heating department are not theory men.

No, not that kind! Every one of them has had a turn at actual heating installation work.

They have cut pipes, caulked joints. They know from experience.

They can successfully tackle any kind of a greenhouse heating problem, old or new.

They are not tied fast to any one system or method.

They are after results—economical results for you. And they get them.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and is brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.  
When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repair

Ask your Dealer about our Extension Hose, Extension Reels, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

eighth St. and Rockwood Ave., Indianapolis,  
Ind., Secretary.

## SUGGESTIONS FOR PLANT GROWERS.

### Cyclamens.

The plants of cyclamen should now be growing rapidly, especially those which were grown from seed sown last fall. These plants should now be in four or five-inch pots and the foliage growing full and strong. If the plants are plunged in a frame, they should be lifted out of the soil occasionally to see that the drainage is not stopped up. There is nothing that will ruin a young growing cyclamen any quicker than to have the drainage get closed and have the soil become sodden with water. Angle worms will often cause this and if they are detected should be removed. It is very easy to find whether they are in the pots. If the soil on the top of the pot is rolled into small lumps it is a sure sign that there are worms in the soil. If there are but a few the plants can be knocked out of the pots and the worms removed; if there are many a watering of lime water will soon rid the soil of the worms. The plants that are in small pots should be potted up as fast as they require it that they may be as large as possible for the holiday season, but do not go the other extreme and pot in too large pots. As soon as the roots get around the side of the pot shift them into the next size larger. If the plants are in the greenhouse a close watch for thrips must be kept during the summer. If the foliage is twisted when the leaf begins to unfold it is sure to be caused by insects and the plants should be sprayed with a nicotine solution. To have good plants for the holidays in full bloom they must be constantly watched and well grown.

### Lilium Harrisii.

The bulbs of *Lilium Harrisii* for early winter blooming will soon arrive and preparations should be made to handle them as soon as they are received. They should be potted as soon as they arrive and then placed in a cold frame. They can then be brought forward as they are wanted. The bulbs can be planted either in pots or boxes and later if it is desired set out in the benches to bloom. While it takes a little longer to plant them in pots they transplant much more suc-

cessfully than when disturbed in moving from the boxes. Place the bulbs for the early flowering in a four-inch pot and dig out a frame, place the pots side by side in the frame and give them a good watering, then sprinkle on the top a thin layer of sand or ashes and cover with three or four inches of soil, place shutters on the frame to keep them dark and cool until the bulbs have made roots. They can then be brought into the houses during the fall and early winter as they are wanted.

### Smilax.

The beds of smilax for the next season's cutting should be planted not later than July 15. The beds should be prepared at once and this soil should be composed of one-fourth rotted manure. Take all means possible to have soil that is free from cut worms. Watch carefully when the soil is turned and carried into the house. There is no crop which these worms more quickly ruin than smilax, and they are very difficult to find on the thick strings. They eat off the tender tip and that is the end of that string. The plants should be set four to five inches apart in the row and the rows a foot apart. Wires should then be stretched over each row and another set of wires five feet or more above those over the bench. Strings should be fastened from one wire to another directly over the plant. This should be done as soon as the bed is planted that the vines may have something upon which to run. In tying the strings one man will often tie twice as many as another simply because he has found a more efficient way. But the strings should all be taut and not some looser than others. The best and quickest way we have ever found is to cut the strings the proper length first, pass one end over the top wire and tie a slip-noose and pull it tight to the wire, then pass the other end around the lower wire, holding it taut by placing the little finger against it on the wire, pass the end of the string around the taut string and make a half-hitch around the wire, pulling tight against the string where it is held by the little finger.

The old smilax bed if it is to be grown another year will need to have the soil renewed. A good rich soil should be used and placed between the rows and leveled around the plants. This should be given a good watering and then watered sparingly until the plants begin to grow. The young stock also should not be watered too heavily until growth starts.

#### Compost Pile.

The extra help that is so often employed during the spring trade can be utilized for a few days before they are let go, in getting together a good compost pile, and there is no better time of the year than the present to do this. The sod can be taken off now after the mowing with no great amount of grass upon it, and if stacked at this time the warm summer days will soon rot the sod and make the pile fine and mellow. So many growers will spend their money for coal and labor and skimp on that most necessary thing for good product, the soil upon which the plant depends for its culture, and again put the matter off until the fall when the days are cold, the soil too often full of moisture, and the hauling poor, which makes the work more expensive and in the end not having as good an article for the succeeding year. It is not necessary to stack the manure with the pile at this time, but if ground bone is to be used it is better to sprinkle it into the pile now. Bone dissolves slowly and the earlier it is incorporated in the soil the better and it also helps the rotting of the sod. Take advantage of the slack time with both the men and teams and get the compost pile up at once.

#### Bouvardias.

The bouvardias will demand more or less attention during the warm weather when they are growing rapidly. Keep all the strong leaders pinched back so that they will branch out into more shoots. If planted in the field keep them well hoed that the moisture may be conserved and the weeds kept down. During the hot weather keep a sharp lookout for red spider and if they appear upon the plants spray them heavily night and morning. These minute insects quickly ruin bouvardias and if they once obtain a foothold are hard to get rid of and during the warm days of fall after the plants are moved into the houses will work havoc with the stock. It is easier to prevent their getting established than to overcome them later.

EVERGREEN, LA.—E. A. Beaven is now using a motor truck in his smilax and green business.

NYACK, N. Y.—R. C. Pye has leased the store in the Young Men's Christian Association building and will soon occupy it as a florist store.

RHINEBECK, N. Y.—The Rhinebeck Violet Association has recently purchased four acres of land on which they expect in the near future to erect several more violet houses. The plant now consists of six houses 20x200 feet.

BOSTON, MASS.—Penn, the Florist, has taken a lease for a long term of years of the entire store and basement of 37 Bromfield street. The property adjoins the store he now occupies and he will make extensive improvements and occupy it as an addition to his present large quarters.

#### The Late Paul de Longpre.

Paul de Longpre, the world famous painter of flowers, died at his home in Hollywood, Los Angeles, Calif., June 23, aged 56 years, from a complication of diseases from which he had suffered for the last two years.

He was born in Lyons, France, in 1855, and was one of ten children. He had few early advantages, and attended the public schools in Paris until he was 12 years old. He often said that even such schooling opportunities as he had were side-tracked in favor of a trip to the fields for the companionship of foliage and flowers for which he early displayed a great love and passion. At the age of twelve he had fifteen months of education to his credit and was obliged to seek employment. He had found

The Late Paul de Longpre.

numerous purchasers among his fellows for somewhat crude delineations of daisies, roses and buttercups and now finding a demand for more finished handiwork in the shape of fan decorations he submitted specimens with fear and trembling but soon his success was assured and from this beginning he became one of the most noted of floral painters.

At the age of eighteen he married and his work was attracting attention and in 1876 his first oil paintings were accepted at the Paris salon. Later he met with financial reverses by the failure of a bank in Paris and in 1890 came to America taking up his residence in New York. In 1896 he made his first exhibition, consisting only of flower paintings. Its success was immediate and annual exhibitions have been held ever since. His paintings were noted for their fidelity to nature, something that cannot be acquired by an artist without long years of the hardest kind of work and thorough knowledge of his subject, while at the same time the most engaging qualities of each flower were emphasized with true poetic feeling and the arrangements were harmonious and artistic. In recent years more than 25,000 art students in the United States alone, copied the studies of De Longpre and there has been published

enough copies of his pictures to put two in every home in this country.

His success was so great that in 1899 he removed to California, and in 1901 built a residence in Hollywood, Los Angeles, surrounding it with three acres of flower gardens. For ten years the place has been a noted point of interest to tourists. He maintained an exhibition in his villa which as well as his gardens he threw open to visitors with the utmost hospitality and his residence was a mecca for flower lovers.

Mr. De Longpre made a close study of California flora during his residence in Hollywood, confining himself for the most part to the more colorful types and conventionalizing a number of California flowers. He was one of the originators of the annual Hollywood flower festival and cultivated a profusion of flowers on his grounds. Beside being recognized as without a peer in his particular field of painting, during the past ten years of his life he contributed to both music and the drama and began in 1907, a country wide campaign for a national art gallery.

#### Sweet Peas at Cornell University.

In cooperation with the National Sweet Pea Society of America, the Department of Horticulture of the New York State College of Agriculture at Cornell University, has conducted field-plot and forcing-house tests of the culture of sweet peas, essentially with the object of the elimination of synonyms and the testing of new varieties. The care of the test grounds was intrusted to A. C. Beal, and the results of the first year's work have been issued in bulletin form. The extent of the work may be judged when it is considered that 469 individual varieties were grown, 20 feet to each variety, there being a total length of row of more than one and one-half miles.

#### FALL AND SPRING PLANTING.

In order to compare the results of fall plantings of the same variety with those planted in the spring, three varieties, Mont Blanc, King Edward VII and Countess Spencer, were selected. The first planting was made October 20 and successive plantings 10 days apart were continued until five had been made, and the same varieties were sown successively from March 12 until the end of May. The first two sowings in the fall appeared above the ground before winter. The last two sowings were made after the surface of the ground was frozen and gave a small percentage of germination. These fall plantings were all mulched during the winter and the mulch removed in the spring when fine weather arrived. The percentage of plants that came through the winter varied greatly, from four to 80 per cent, with the different varieties and different plantings. Mont Blanc and King Edward VII gave the best results from the planting November 10 and Countess Spencer the best from the earlier plantings. The spring plantings were greatly influenced by the dry hot weather which hurried many so that they bloomed together. The fall plantings bloomed two weeks before the regular spring plantings and the quality of the flowers was much superior. The results of the spring planting indicated it is not worth the trouble to sow the seed after May 10, and it was apparent that the

"COREOPSIS AND COSMOS."

Reproduced from Study by the Late Paul de Longpre.

white seeded varieties should not be planted until the ground is warm; but the results are undoubtedly greatly influenced by the character of autumn and spring and the experiment is being repeated the current year.

#### WINTER FLOWERING SWEET PEAS.

The distinctive characteristics and the history of winter-flowering sweet peas are fully covered in the article

under this head. The varieties are divided into three groups, the Christmas flowering, which originated in the United States, where the culture of sweet peas in winter has reached the highest perfection and which has been greatly developed by A. C. Zvolanek of Bound Brook, N. J.; the Telemly group which was originated by the Rev. Edwyn Arkwright in Algeria, Af-

rica; and the Engelmann group (*Lythyrus odoratus præcox*) which first appeared with C. Engelmann of Saffron Walden, England. The first two groups were sports or descendants of Blanch Ferry, and the latter an early blooming sport of Captain of the Blues.

All obtainable varieties of winter-flowering sweet peas have been tested with regard to their earliness and dis-

inctiveness. The varieties are divided into extra early flowering and winter flowering. The first includes Earliest of All, Reselected Earliest of All, Earliest White, Snowbird, Watchung, and possibly Blanch Ferry. These varieties flower together at least three weeks earlier than the other group, but except for early blooms are not the equal in size of flower or length of stem to the other kinds. A description of the many varieties is given and synonymous and similar varieties named. The *Præcox* group are distinct with one exception (*Præcox Blue*) and are inclined to be rather late as a class but are vigorous growers and produce large flowers on long, stout stems. The *Telemly* varieties are of open form showing readily their relation to *Blanch Ferry*. The following summary of leading varieties is given, classified by color:

White—*Watchung* or *Snowbird*, *Florance Denzer*, *Præcox White*.

Primrose—*Earliest Sunbeams* and *Canary*.

Pink—*Mrs. F. J. Dolansky*, *Telemly Pink* or *Zvolanek's Pink*.

Cream Pink—*Mrs. W. W. Smalley*, *Mrs. Wm. Sim*.

Crimson—*Meteor*, *Red Seedling*, *Carmine*—*Flamingo*, *Pink Beauty*, *Præcox Carmine*.

Red Bicolor—*Christmas Pink*, *Telemly Pale Pink*.

Lavender—*Telemly Lavender*, *Mrs. C. H. Totty*, *Præcox Mauve*.

Mauve—*Telemly Mauve*, *Wallacea*, *Præcox Deep Mauve*, *Greenbrook*, *Mrs. Josie Reilly*.

Maroon—*Telemly Maroon*, *Præcox Maroon*.

Violet and Purple—*Wm. J. Stewart*, *Telemly Blue and Red*.

Blue—*Blue Bird*, *Le Marquis*, *Red Stripes*—*Miss Helen M. Gould*.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Florists' Tags.

With the dual end in view of improving the looks of the box of blossoms and of having a record of delivery, many florists have adopted the couponed florist tag similar to that shown in the illustration. The method of use is almost self-explanatory. When making out the tag the salesman or shipping clerk also fills out the coupon, leaving blank the line "Received by .....". The delivery boy asks the person receiving the package to sign the coupon. As a further check a line may be added "Time delivered ....." so that the proprietor from the return stubs is able to follow his wagon over its entire route. When the delivery boy returns, the stubs, properly filled out, are filed alphabetically in a folder. Any complaints arising from an alleged tardy delivery or from the fact that the flowers have not been received are quickly and accurately traced by means of the coupon.

A florist in an inland metropolis who uses the system is enthusiastic in his praise of its operation. He keeps the stubs, arranged alphabetically under the names of the persons to whom the flowers were delivered, in a file near his telephone. If *Mrs. Robinson*, for example, calls up and asks where the *Killarney* roses are that she ordered to be delivered at six o'clock, the florist, by referring to his stubs, is able to assure her that the roses were left at her home at 5:30 o'clock and signed for by *M. Jones*, the maid. The coupon system, in this particular instance, did away with a vast amount of verbal

trade mark or crest. In others it takes the form of an adopted color in the stock or ink used. Inasmuch as the tag is the first part of the put-up examined, it behooves the florist to make that detail of his package smart and attractive. The advertising value of a distinctive tag is universally recognized. A poorly printed cheap tag on a box of flowers immediately suggests that the contents of the box are in keeping, i. e. cheap and unattractive. Conversely, a neatly printed tag made of special white stock that can not be stained by water, and carrying on its face a well known name or crest, is an instant guarantee that the flowers in the box are fresh and carefully chosen. Tags used in the illustrations were supplied by the *Dennison Mfg. Co.*

### The Crepe Spray.

Flowers for the door pull to take the place, or to be used in connection with the regulation crape at funerals, are becoming more popular, in fact are now considered almost as necessary as the ribbon of the undertaker. Some of the arrangements are quite pretentious and elaborate, while others are very simple. A dozen roses in a cluster at the top, together with a couple of strings of *smilax* tied to the ordinary door crepe, are enough to relieve it of its somberness. Of course almost any flower in season can be used in place of the roses and the color varied with the age of the person, using pink or white and pink for youth, to pure white and lavender for middle age and lavender and dark purple for the very old.

Oval crescent wreaths of *magnolia* or *galax* with flowers or of all flowers are often used and are quite as effective as the sprays. These are sometimes made like a narrow crescent and hung with the points down and a bow and long streamers of ribbon. Many sprays have their streamers, either of *asparagus* or *smilax*, covered with flowers, and in this case they often take the place of the regulation ribbon. Quite elaborate arrangements in sprays of this style are often made in which only the choicest flowers, such as *valley*, *double violets* and *orchids* are used. These can be made very beautiful and are sure to attract attention. Crepe sprays are generally renewed each day, as they are as a rule pretty badly wilted after an exposure of twenty-four hours. In attaching them to the door jam it is best to use an independent screw eye, which is a guarantee that it is securely fastened. For an elderly person a pair of palm leaves with a cluster of lilies or purple flowers at the stem end and some running down the leaves makes an appropriate door draping. K.

### By the Roadside.

The *Little Boy* sat by the roadside idly poking the warm dust with his bare toes. When the *Big Man* came along the *Little Boy* looked up and said:

"Mister, is this your park?"

"What'll you gimme for it?" quizzed the *Big Man*.

"Fourteen hunderd thousan' milyun dollars," replied the *Little Boy*.

"All right," smiled the *Big Man*, "just take it right along with you."—*Youngstown Telegram*.

ONE OF DENNISON'S FLORISTS' TAGS.

LOS ANGELES, CALIF.—*Wolfskill Bros.* will discontinue business at the end of this month.

MT. STERLING, KY.—The weather here is very dry. The aster crop is backward, but other stock looks well.

NORFOLK, VA.—*William J. Newton* recently purchased fifteen lots and proposes to erect one of the largest and most modern greenhouses in this section on Twenty-fourth street near Colonial avenue.

ROCHESTER, N. Y.—The *Fairview Nurseries* of *Rochester* have been incorporated to carry on a nursery and flower business. The capital stock is \$20,000 and the incorporators are *Edward B. Oliver* and *Charles G. Schoener* of *Rochester* and *George W. Oliver* of *Irondequoit*, N. Y.

Inquiry in the florist shop. In another suppositious case, *Mr. Browne* telephones and asks whether the *violets* he ordered in the morning have been sent. He is asked the name of the person to whom the flowers were to go and on obtaining this, the florist, by referring to his coupons, is able to tell *Mr. Browne* where and to whom the box was delivered. *Young Mr. Browne* is therefore enabled to call at the home of his fiancée with certain knowledge that he will be received by a charming young lady with a bunch of *violets* in her corsage.

So far as the tag itself is concerned, the vast majority of florists realize the value of some distinctive mark. In many cases it is a reproduction of the

JACQUEMINOT ROSES AND CLEMATIS.

Reproduced from Study by the Late Paul de Longpre.

## Harry A. Bunyard.

Harry A. Bunyard, appointed on the executive board of the Society of American Florists, is well known to the florists of America as a traveling man and manager for Arthur T. Boddington of New York. He was born January 3, 1868, at Ashford, Kent, England, his father, Thomas Bunyard, being one of the sons of the old established house of Thomas Bunyard & Sons. After serving his apprenticeship in his native land and acquiring some repute he emigrated to America, finding employment with Peter Henderson & Co. A year later he entered the employ of Pitcher & Manda, remaining with them until the dissolution of the firm. He then went with Clucas & Boddington and later with Arthur T. Boddington, with whom he has been for six years. He is a well known figure at the S. A. F. conventions, being a life member of the society and is vice-president of the New York Florists' club and secretary of the National Sweet Pea society of which he was one of the organizers.

## Do Roses Run Out?

ED. AMERICAN FLORIST:

I have been told that rose stock runs out and if a person wanted to have good plants he must secure new plants for stock from which to make cuttings every few years. I have always been under the impression that if nice, thrifty plants were selected each year from own stock, from which to make cuttings, they would never run out, if anything, could be improved. Kindly advise through the columns of your paper.

A READER.

Your correspondent asks if this is necessary or advisable. In answer I would say that it is undoubtedly an advantage to do so occasionally; in fact, from my own experience I think it would be an advantage to change the stock every four or five years.

It must be borne in mind that forcing roses for winter flowering is a decided change from the natural law of nature governing plants of this class which in their natural conditions get a long season of rest during winter, while under the forcing treatment given them they have no real rest at all. Under such circumstances it is only reasonable that their constitutions must become impaired in time and as a result the quality and quantity of flowers they produce are reduced in proportion. Grafting good strong wood on manetti stock has been advocated as a help in this direction, careful selection of wood for propagation has also helped in a measure to keep up the standard of vigor. But the main fact remains the same and the law of nature is as much in force in this matter as it is with the farmer who finds it to his advantage to change the seed of wheat, oats, potatoes and other crops he grows for profit.

Soil and its component parts also is a factor not to be overlooked in this matter and is one that needs careful study and when we can get this down to a chemical analysis we shall be in a much better condition to cope with many of the problems we have to fight today, not only in forcing roses but also many other plants we have to force into flowering at unnatural seasons.

JOHN N. MAY.

## NATIONAL SWEET PEA SOCIETY

Annual Meeting and Exhibition, Philadelphia, June 29-30, 1911

## Business Meeting.

The third annual meeting of the National Sweet Pea Society of America was held in Horticultural hall, Philadelphia, Pa., Thursday, June 29, 1911, with a goodly number of the members present. After the call to order by Secretary Rust of the Horticultural Society, Robert Craig welcomed the society, assuring them of the pleasure it gave all lovers of flowers in this community to have them at this time and hoping that it would not be long before they would again honor us with their presence. Harry Turner of the executive committee responded for the society and told how glad they were to come to Philadelphia which was a recognized floral center and always

as it seemed so hard to get the members together.

## The Exhibition.

The exhibition which was held under the auspices of the Pennsylvania Horticultural Society was ready for the public at 3 p. m. on Thursday, June 29, according to schedule. There was no charge for admission. It was the first exhibition ever given in this city of the kind and as such it was surely a great success. The feature of the exhibition was the superb display staged by W. Atlee Burpee & Co., which was an exhibition of itself. This collection occupied the entire north side of the hall and was very complete, over two hundred varieties all correctly labeled were arranged in vases containing from fifty to a hundred blooms of a variety. At intervals of about ten feet apart tall stands or uprights about three feet high were clustered with vases all the way up, each stand containing a separate variety; these relieved the plainness and added much to the beauty of the arrangement. All the varieties of prominence as well as many new ones were to be found here and the obliging attendants were kept busy answering the questions and pointing out the differences in the various strains.

The show was a success in the number of flowers exhibited coming as it did almost unheralded, as quite a number of private gardeners said that had they known of the show last fall they would have made preparations and grown flowers that would have insured an even greater display. As it was there was a very good representation of the most prominent and newer varieties with the elaborate entry of W. Atlee Burpee & Co. as a leader, well supported by the exhibits of Miss M. T. Cockcroft of Longneck, Conn., J. B. Trevor, Yonkers, N. Y., H. L. Pratt, Long Island and S. M. Goldsmith, and among the local exhibitors Mrs. R. B. Ellison, Henry Goldman, W. W. Fraser, Sr., James McCrea, Thos. McKean, C. W. Newbold, Miss Mona Robinson, John W. Pepper and G. W. Young.

There were many beautiful flowers shown prominently amongst which and those that were general favorites were Queen Victoria, Mrs. Sankey, Florence Morse, Captain of the Blues, White Spencer, Flora Morton, Pictotee, Prince Edward of York, Mrs. Routzahn, Dorothy Tennant, Miriam Beaver, Othello, Helen Lewis and many others. Helen Lewis was a great favorite, its large orange colored flowers making it very conspicuous.

In the Burpee entry a seedling, Vermillion Brilliant is surely a winner. Starting at this exhibition with winning the North American silver cup offered by the paper of that name for the best seedling. In color it is a brilliant dark red, full of fire. It attracted the attention of all the visitors. Small flowers such as sweet peas appear much better with the advantage of a background. The Burpee collections were nicely staged, having a background of long wavy grasses. Wm. Robertson, gardener for John W. Pepper, arranged his tables with asparagus, sprengeri and ferns which

Henry A. Bunyard.

Secretary National Sweet Pea Society.

ready with a welcome for anything that had a tendency to foster a love for flowers. The time and place of the next meeting and exhibition of the society was left to the discretion of the executive committee. It was thought that meetings and competitions for prizes should be held in connection with horticultural bodies in the various cities at the times when the flowers were at their best.

After the report by Secretary H. A. Bunyard, a paper prepared by A. C. Beal of Cornell University and another by Edwin Lonsdale were read.

The election of officers resulted as follows:

Wm. Sim, Cliftondale, president.

Mrs. Seth Low, New York, vice-president.

Arthur T. Boddington, treasurer.

John H. Pepper, recording secretary.

J. K. M. L. Farquhar, chairman, A. C. Zvolanek, Harry Turner, executive committee.

Prof. John Craig, chairman, A. C. Beale, G. W. Kerr, Wm. H. Duckham, nomenclature and trials committee.

The evening meeting was not held

ABOUT HALF OF W. ATLEE BURPEE & CO.'S EXHIBIT AT THE PHILADELPHIA SWEET PEA SHOW.

greatly added to the appearance and won him the \$25 silver cup. J. B. Trevor of Yonkers, N. Y., staged a fine lot of long stemmed flowers. The out-of-town exhibitors were able to do a little better than the local growers as they came from a cooler clime and their flowers with few exceptions showed more substance and rather better stems. The entries for the best vase mixed, were surely a harlequin of color, but hopelessly massed. Some one should invent a vase that would show these lovely flowers off to advantage. The Burpee upright vase holder being a bamboo standard about three feet in height set in a foot or block and containing a number of zinc cornucopia holders attached to the sides from bottom to top showed the flowers off to great advantage as each bunch of twenty-five or more stood out individually and gave the flowers a light airy appearance adding much to the decorative effect. The society allowed, in addition to the flowers themselves, which were to be free of the branches or vines, use of foliage of the sweet pea or other green. Twenty-five sprays in one variety in a collection was declared the ideal number and overcrowding so as to interfere with the proper showing of individual flowers was declared to be a fault. The awards were as follows:

Finest collection of sweet peas—Miss M. T. Cockroft, (Adam Paterson, gardener), first; Herbert L. Pratt, (Henry Gaut, gardener), second.

Best vase of one variety of Spencer type introduced in 1911—John W. Pepper (Wm. Robertson, gardener), first.

Best vase of Grandiflora type—S. M. Goldsmith (Wm. R. Seymour, gardener), first; Herbert L. Pratt, second.

Best vase of Spencer variety mixed—Miss M. T. Cockroft, first.

Best vase of Magnificent mixed—Mrs. Geo. H. McFadden, first.

Collection of sweet peas, 25 varieties not less than 25 stems—John W. Pepper, first.

Best vase Ruby Spencer—Herbert L. Pratt, first.

Best vase of Mrs. Routzahn Spencer—Miss M. T. Cockroft, first.

Best vase of white Spencer—Mrs. R. B. Ellison, (Axel Lindroth, gardener), first.

Best vase of vari-colored—Herbert L. Pratt, first; G. W. Young (James Kennedy, gardener), second.

Best vase of 50 pink or rose—Thomas McKean, (Robt. Abernethy, gardener), first; Miss M. T. Cockroft, second.

Best vase of a new variety—Silver cup, won by W. Atlee Burpee & Co.

Best vase white—Miss M. T. Cockroft, first; Mrs. J. B. Trevor, (Howard Nichols, gardener), second; S. M. Goldsmith, (Wm. R. Seymour, gardener), third.

Best vase pink—Herbert L. Pratt, first; Mrs. R. B. Ellison second; Henry Goldman, third.

Best vase deep rose—Herbert L. Pratt, first; Miss M. T. Cockroft, second; S. M. Goldsmith, third.

Best vase lavender—Mrs. R. B. Ellison, first; Miss M. T. Cockroft, second; Herbert L. Pratt, third.

Best vase salmon or orange—Herbert L. Pratt, first; C. B. Newbold, second; G. W. Young, third.

Best vase crimson or scarlet—Henry Goldman, first; Mrs. J. B. Trevor, second; S. M. Goldsmith, third.

Best vase primrose—S. M. Goldsmith, first; Thomas McKean, second; G. W. Young, third.

Best vase picotee edged—Miss M. T. Cockroft, first; Herbert L. Pratt, second.

Best vase bicolor—C. W. Young, first.

Best vase striped or mottled—Henry Goldman, first; C. B. Newbold, second; Miss M. T. Cockroft, third.

Best vase any other color—Mrs. R. B. Ellison, first; Henry Goldman, second; Miss M. T. Cockroft, third.

The North America Cup.

Awarded to W. Atlee Burpee & Co. at the Philadelphia Sweet Pea Show.

Best vase white—Thomas McKean, first; Mrs. Geo. H. McFadden, second.

Best vase lavender or blue—Herbert L. Pratt, first.

Best vase striped or bicolor—Mrs. R. B. Ellison, first; Herbert L. Pratt, second.

Best vase any other color—C. B. Newbold, first.

Bride's Bouquet of sweet peas—Robert Kift, first.

Best three vases of Aurora Spencer, Countess Spencer, and King Edward Spencer—Herbert L. Pratt, first.

Best vase of mixed—Miss Mona Robinson, first; Mrs. R. B. Ellison, second.

Best table of sweet peas—John W. Pepper, first.

Best six vases Spencer or Unwin—S. M. Goldsmith, first.

Finest collection of sweet peas, Spencer, Unwin, and Grandiflora types. S. M. Goldsmith, first.

### Visit to Fordhook Farms.

On Friday afternoon the members accepted the kind invitation of W. Atlee Burpee and journeyed by special train to Fordhook Farms, near Doylestown to see the trial grounds, where they were shown over 900 trials of these beautiful flowers in full bloom. These beautiful grounds are ideally located and scientifically worked to discover "all that is best in seeds" as well as all that's best in flowers and vegetables, so that those who depend on Burpee's seeds soon get to know that they are always sure of getting the best. Every new thing that claims to have merit is given a trial here grown side by side with the standard of its kind, its qualities are tested and it is accepted or thrown aside as it is seen to be better or worse than the old sort. Flowers and vegetables are alike and many sorts claiming superiority fail to make good in the test. Tens of acres are given to these comparisons which are very expensive but worth all they cost. Many tests are made here of seeds of standard varieties of plants necessarily grown elsewhere, these are tried out to see if varieties are true to nature.

The visitors were taken over the ground by the genial superintendent, Howard M. Earl and G. W. Kerr the manager of the trial grounds who gave the visitors valuable points on the work and showed by the books the great care with which these trials were made. Over 900 trials of sweet peas were seen, a space or row of probably 20 feet being given to each sort. The whole work of the farm could not be described in a short article but its extent could be seen in the drive which was taken showing acres given to the cultivation of petunias, phlox, poppies, salvias, antirrhinum and many other flower seeds. Acres were also seen filled with cabbage tests, 368 of them and there were several acres filled with Reid's yellow dent field corn. After refreshments at the "mansion" had been served, the silver cup offered by the North American for the best American Seedling and won by Mr. Burpee's Vermilion Brilliant was presented and accepted by Wm. Earl in behalf of Mr. Burpee, he said the growing of this variety had afforded them much pleasure and that as soon as they could get enough seed to offer it would be sent out. After the signing of the visitor's book the visitors returned to the city with many pleasant memories of Fordhook Farms.

President Burpee who had made arrangements to go abroad to attend the exhibition of the National Sweet Pea Society of England, could not be present at the meeting, but was ably represented by his lieutenants, superintendent and manager, Howard M. Earl and G. W. Kerr who has entire charge of the trial grounds at Fordhook Farms. Mr. Kerr has made a specialty of sweet peas in England, in fact grew up with them and is a veritable encyclopedia of information on this subject.

On Friday a. m. a number of enthusiasts and officers of the Society sent a wireless to President Burpee which read, "Greetings Show great success."

**President Burpee's Letter.**

The following letter from President Burpee was then read by the secretary:

Will you kindly express to our fellow members of the National Sweet Pea Society of America my sincere regrets that instead of being present to deliver "The President's Address," for which I am scheduled on June 29, I am compelled to offer "an apology and explanation." The "apology" will surely be accepted when you offer the explanation that it was only after our March meeting in Boston, when the date of the Philadelphia exhibition was fixed for June 23-24, that I engaged passage for myself, Mrs. Burpee and sons on the "Olympic" June 28, so that we could attend the exhibition of the National Sweet Pea Society of England, which we were compelled to miss last year. Kindly explain also how deeply I regretted the necessity for deciding with you and other fellow members, after conference two weeks ago with members of the Pennsylvania Horticultural Society, that, owing to the lateness of the season, it would be necessary to postpone our exhibition at least a week.

While "on the briny deep" I shall be with you all in spirit and shall look forward eagerly to receiving July 4, upon arrival at Southampton, a cablegram telling of the success of this third annual exhibition. I feel quite sure that under your able management,—and you are well entitled to be called "The father of the National Sweet Pea Society"—assisted by our vice-president and other officers, together with such willing helpers as Messrs. Craig, Pennock, Rust, Watson, Michell, Earl and Kerr, the exhibition will be a decided success. Such work as you and your co-laborers have done so effectively at the two previous exhibitions of our infant society is of lasting value in bringing to the notice of the trade and of growers generally the importance of the sweet pea as deservedly the most popular of all flowers grown from seed. But should I continue in this strain I might tire you with expressions of my love for the sweet pea, even more than if I could have been able to deliver in person "President Burpee's address" for which your schedule has me booked.

Only two words more in closing. At our meetings we have never discussed politics. Your present president, therefore, does not know the political opinions of his fellow members. Whatever their politics may be, however, I think that most of our members will agree that the ex-president of the United States acted wisely in urging as his successor President Taft, who certainly, despite all criticisms, will make good as an honest, intelligent executive.

Now would it be asking too much for me to suggest that upon reading this letter (if you think it worth reading), that some member put in nomination the name of William Sim of Cliftondale, Mass., and that another member should then move that the nominations for president be closed. Mr. Sim needs no introduction: as vice-president he has been most earnest and effective in his work for the advancement of the interests of our society and I feel sure that this suggestion of your retiring president will meet with the hearty approval of all.

Any members who may remain over Friday are cordially invited to visit

**BURPEE'S SWEET PEA VERMILION BRILLIANT.**

Awarded the North America Cup for the Best New Sweet Pea.

Fordhook upon the trains leaving Reading terminal at 1:02 and 2:02 Friday. Will you kindly announce that railway tickets and full information will be gladly furnished by Messrs. Earl or Kerr. With renewed assurance of my deep regret in not being with you all at Philadelphia and Fordhook.

**Secretary Bunyard's Report.**

When I helped to organize the National Sweet Pea Society three years ago, I stated at the first meeting that it would and must be a success. Up to this time it has not fulfilled my highest expectations but we have made substantial progress, have learned something, and have placed the society on a sound foundation. With the experience that is passed, we hope to still further the aims and objects of the society. Up to and including this exhibition, we have held four shows; two in New York, one in Boston in connection with the Second National

Flower Show of the Society of American Florists, and the Philadelphia exhibition. All of these have been an expense to the society, no charge for admission being made. The only source of income is from the active membership, life members and the guarantors, who have generously come to the front when needed. We have today 110 active members and 12 life members.

Personally, I know that good results have accrued from our exhibitions. Perhaps the most material results are from the Boston exhibition. The winter flowering sweet peas shown by Wm. Sim of Cliftondale, Mass., exciting more than general interest and admiration, so much that several florists in the vicinity of New York are building houses especially to grow sweet peas this winter. The great difficulty in holding exhibitions in this country is its vastness. What would be a good date in Philadelphia is too early for New York and a good date for New York is too early for New Eng-

land and that applies also to the west: so that the exhibition really resolves itself into a local show which is a good reason for changing the place of meeting from year to year. Of course, this year has been exceptional owing to weather conditions. It has been suggested by one of our exhibitors that the date should be set at this meeting and should be either the last week in June or the first week in July. This would give growers the opportunity to sow their sweet pea seed to conform with these dates. It is much easier for a grower to hold off for a week than to force his plants into bloom. I trust that the convention will seriously consider this matter. Our society has helped to popularize the Spencer varieties of sweet peas among growers, private and commercial and while some of the grandifloras are still popular, they are fast being displaced by the Spencer and Unwin types.

At Boston there were exhibited by Anton C. Zvolanek an entirely new race of sweet peas. Some equaling, while others exceeding, the beauty and type of the Spencers. Mr. Zvolanek deserves great credit for his work and I hope in the near future this society will be able to accord medals to hybridizers and raisers of new varieties. I understand that the W. Atlee Burpee & Co. at Fordhook are also working along these lines and have some very promising seedlings. Credit is also due to the gentlemen who have helped to finance our society not only from its inception but also at a time when guarantee funds were needed for prizes, etc. I wish at this time to thank the generous donors of prizes and President W. Atlee Burpee, for his time and moral support so generously given.

If I were asked to name the best Spencer, Unwin, grandiflora and winter flowering sweet peas today, I would give the following list apart from the varieties introduced this year:

Spencer varieties—Asta Ohn Spencer, pure lavender with tinted pinkish rose, self colored; Aurora Spencer, orange rose or salmon striped on white; Apple Blossom Spencer, standard bright crimson rose, wings white tinged with pink; Captain of Blues Spencer, bluish purple with distinct margin of lilac; Countess Spencer, the original Spencer, clear bright pink; Flora Morse Spencer, delicate bluish with pink margin; King Edward Spencer, pure bright red or crimson scarlet; Lovely Spencer, standard, light bluish pink with blotch of rose at the base; Othello Spencer, deep velvety maroon; Mrs. Walter Wright Spencer, rosy purple, self color; Primrose Spencer, pure light primrose yellow; White Spencer, pure white; Mrs. Routzahn Spencer, primrose and buff with margin and edge of light salmon.

Unwin varieties—Frank Dolby, lavender and mauve; Gladys Unwin, clear bright pink a little deeper at the edges, almost self color; Helen Lewis, standard, crimson orange, wings orange rose; E. J. Castle, bright rose crimson with veins of deeper rose; John Ingman, rose carmine with rose veins; George Herbert, rose carmine; Mrs. Alfred Watkins, bright pink at base shading to bluish and buff at edges; Nora Unwin, pure white.

Grandiflora varieties—Bolton's Pink, orange or salmon pink, veined with rose; Extra Early Blanche Ferry, standard bright crimson rose, wings white tinged with pink; Burpee's Earliest White, pure white; Dorothy Eckford, pure white; Helen Pierce, marbled blue

on ivory white; Hon. Mrs. E. Kenyon, clear light primrose; Lovely, deep pink, shading to very light pink at edges; Lady Grisel Hamilton, standard light mauve, wings lavender; Lord Nelson, standard indigo and violet, wings indigo; Miss Willmott, orange pink with veins of deeper orange rose; Mrs. George Higginson, Jr., clear azure-blue, the lightest and clearest blue in sweet peas; Prince Olaf, light blue, striped on white; Queen Alexandra, very bright red almost a true scarlet; Edward VII., pure bright red or crimson scarlet.

Winter flowering sweet peas—Snowbird, pure white; Christmas Pink, standard rose, wings white; Mrs. E. Wild, rose, crimson; Christmas White, pure white; Canary, primrose yellow; Mrs. Chas. H. Totty, sky blue; Flamingo, crimson scarlet; Christmas Captain, blue and purple; Florence Denzer, pure white; Greenbrook, white slightly touched with lavender; Mrs. Alene Wallace, lavender; Mrs. Wm. Sim, salmon pink; Mrs. W. W. Smalley, satiny pink; Wallacea, lavender; Watchung, pure white. While experts may differ with me on my selection, people will not go far wrong in planting the above varieties.

Cornell University, where under the care of Prof. Craig and A. C. Beal the trials of our society had been held, have just issued their Bulletin No. 301 entitled "Sweet Pea Studies." These have been mailed to all members through the courtesy of the university, under frank without cost to the society. Thanks are due for the energy and work of the above gentlemen. If any member has not received a copy, I would ask them to kindly notify me at once.

Referring to the above selection of sweet peas, I think we are somewhat blessed in this country by not having the interminable quantity of new varieties placed on the market the same as they have in England every year. Unless it has real merit over existing varieties, it has no place in the American seed catalog or in the garden, neither do we have the same confusion of synonymous varieties under different names. Our growers in California, where 80 per cent of the sweet pea seed of the world is grown, are exceptionally careful not only as to the new varieties they disseminate, but also as to raising their stocks, neither do they send out new varieties to their knowledge unless they are thoroughly set. One of the most distinct breaks of recent years are the varieties Sterling Stent and Earl Spencer. In reality these are Henry Eckford Spencers, and which I believe would be a better name. Many colors we have today cannot be bettered. Those the hybridizers are aiming for are a real buttercup yellow, the scarlet of the geranium and the blue of the Delphinium Belladonna. In the meantime, the hybridizers should concentrate their efforts upon improving the size and substance of the flower, number of flowers on a stem, length of the stem and strength and habit of the plant, an American breed of flowering sweet peas that will stand our hot summers, so, that not only in name but in fact, they will become the poor man's orchid and rivaling that flower.

BOSTON, MASS.—William Penn of the well known firm of Penn the Florist, was married June 25 to Miss Sophia Rosenbush.

### Visitors at Fordhook Farms.

The party who visited Fordhook Farms numbered more than 40 and included the following:

Prof. A. C. Beal, Ithaca, N. Y.  
Harry A. Bunyard, New York.  
Frank Cremer, Huntingdon, Pa.  
J. Davy, Arpaion, France.  
W. A. Duckman, Madison, N. J.  
Martin C. Ebel, Madison, N. J.  
Bertrand H. Farr, Reading, Pa.  
Samuel Armstrong Hamilton, Huntingdon, Pa.  
Arthur M. Kirby, Jersey City, N. J.  
Norval E. Kirby, New York.  
Miss Irma V. Marvel, Germantown, Philadelphia, Pa.  
Hugh A. O'Donnell and wife, Philadelphia, Pa.  
J. H. Pepper, New York.  
A. K. Rohrer, Lancaster, Pa.  
David Rust, Philadelphia, Pa.  
Chas. H. Totty, Madison, N. J.  
Harry Turner, Port Washington, N. Y.  
Geo. C. Watson, Philadelphia, Pa.  
Of the Burpee staff located at Fordhook Farms during the summer:  
Howard M. Earl.  
George W. Kerr.  
Harry Buckman.  
Alfred Vestergaard.  
E. J. Wodack.

### Pennsylvania Horticultural Society.

An exhibition of the Pennsylvania Horticultural Society was held in conjunction with the National Sweet Pea Society of America in Horticultural Hall, Philadelphia, Pa., on June 8. Prizes were offered for Japanese iris, hardy herbaceous perennials, zinnias, out-door flowers, and glloxinias in pots. There were quite a few exhibitors in these sections, many of the entries being very showy, notably those of hardy herbaceous and out-door flowers. E. Robertson, Batchelor and David Aiken, private gardeners who put their best into the arranging of their various vases all of which made a very attractive display. Bernard Farr of Wyomissing Nurseries, Reading, staged seventy vases of Japanese iris which made a very interesting exhibit and won a certificate of merit. Henry A. Dreer came down from Princeton with a beautiful showing of Japanese iris about 25 blooms to a jar, these were much admired. Six large tanks of water lilies from the same firm were also a feature, they were nicely arranged with fern leaves around the edges of the tanks and lots of lily leaves floating in the water with the flowers. A vase of about 25 Calla Eliotiana with its brilliant sulphur covered blooms was exhibited by J. Louis Childs of Queens, L. I. and made an attractive table center. The cut flower artists with the exception of a Brides' bouquet by Robt. Kift ignored the tempting prizes offered for table decorations and baskets to be made of sweet peas. The premiums were very liberal but there were no entries.

The awards were as follows:

Sweet Peas, best vase mixed—Mrs. R. B. Ellison, (Axel Lindroth, gardener), first; Henry Goldman, (Anthony Bauer, gardener), second.

Spencer varieties, best ten vases—W. W. Frazier, Sr. first.

Japanese iris, best collection of not less than twelve varieties—C. B. Newbold, first; Thomas P. Hunter, (Joseph Hurley, gardener), second.

Hardy herbaceous perennials, best display of twelve species—C. B. Newbold, first; Mrs. Geo. H. McFadden, (David Aiken, gardener), second.

Sweet Peas, best twelve vases of fifty sprays each—James McCrear, (James Coleman, gardener), first; W. W. Frazier, Sr., (Walter Scott, gardener), second.

Zinnia elegans, best vase of Water-er's mammoth flowering. Mrs. Geo. H. McFadden, first; C. B. Newbold, second.

Out-door cut flowers, best collection of twelve species—C. B. Newbold, first; Mrs. Geo. H. McFadden, second. Gloxinia, best pair—Mrs. J. J. Henry, (Car Lindroth, gardener), first; Mrs. Geo. H. McFadden, second.

#### Horticultural Society of New York.

A meeting and exhibition of the society were held in the Museum building, New York Botanical Garden, on July 1, the exhibition continuing over Sunday. July is an uncertain month for an exhibition, but the interest manifested in this one by the good showing of exhibits was very gratifying. The next exhibition will be held at the same place on August 26-27, and will be devoted mainly to gladioli. Schedules will be ready early in August, and will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City.

Following is a list of the awards made at the exhibition held on July 1-2:

Collection of outdoor roses, Scott Bros., first.

Twelve vases Japanese iris, 12 varieties, Scott Bros., first; Mrs. F. A. Constable, (James Stuart, gardener), second.

Six vases sweet peas, 6 varieties, 25 flowers of each, H. Darlington, (F. W. Popp, gardener), first; Mrs. A. M. Booth, (E. Fardel, gardener), second.

Best vase of sweet peas, 100 sprays, H. Darlington, first; Mrs. A. M. Booth, second.

Collection of flowers of herbaceous plants, Mrs. F. A. Constable, first; T. A. Havemeyer, (A. Lahodny, gardener), second.

Collection of flowers of shrubs and trees, T. A. Havemeyer, first.

Six vases Japanese iris, 6 varieties, T. A. Havemeyer, first.

Three vases sweet peas, 3 varieties, 25 flowers of each, H. Darlington, first; T. A. Havemeyer, second.

Special prizes as follows: T. A. Havemeyer, for a collection of sweet peas, special prize; Mrs. F. A. Constable, for a vase of *Lilium candidum*, special prize; Wm. Tricker, certificate of merit for *Nymphaea Helen Fowler*; Wm. Tricker, certificate of merit for *Vinca minor aurea*; L. S. Livingston, special mention for *Romneya Coulteri*; Mrs. A. M. Booth, for 3 vases of sweet peas of 3 varieties each, special prize. The judges were David MacFarlane, James Donlan, and Wm. Tricker.

GEORGE V. NASH Sec'y.

#### Philadelphia Notes.

The Sweet Pea show of last week attracted quite a number of the trade as visitors and from the close inspection of the varieties it is likely that the sweet peas of the coming season will run better in quality than before. Wm. Sim of Cliffdale, Mass., says that he follows his sweet peas with crops of tomatoes having the plants well advanced in pots so that when planted they are soon in crop. He finds ready sale for all he grows at good prices.

G. W. Kerr, Burpee's sweet pea expert and specialist says that sweet peas are not fertilized by insects as by the time the flowers are so open that they could get at the stamens it is too late. When it is desired to do this work artificially the buds are opened and the stamens removed while still green. Sweet peas are much given to variations both as to form and color and the newer type Spencer was said to be a sport, although the exact parentage or origin is still in doubt, as its introduction is claimed by several growers.

The next meeting of the Florists' Club will be enlivened by a paper on Railroad Gardening, by Paul Heeseler whose fame in this work is national.

K

#### The Late William Taat.

William Taat, the well known American representative of M. Van Waveren & Sons, Hillegom, Holland, died in a Boston hospital June 13. Mr. Taat fell in front of a subway train as it was entering the station, June 7. He was injured quite seriously, the train running over his foot, and was taken to the city hospital. Three operations were performed upon him.

The Late Wm. Taat.

Born February 9, 1874.

the foot being finally amputated above the ankle, after which he died June 13. Mrs. Taat accompanied him to Boston on this trip, and several friends went on from New York after the accident, remaining with him during his illness.

Mr. Taat was born in Hillegom, the center of the Dutch bulb district, and from his earliest years took a great interest in bulb culture, entering the employ of the Messrs. Van Waveren as a boy of 14 years. Always ambitious and industrious, he soon acquired a knowledge of several languages, and then started out as a traveler in the interest of his firm, first in France and Russia, and later in the United States. He was remarkably successful as a salesman and, in America especially, soon won the respect and confidence of everyone in the trade

with whom he came in contact, due largely to his sterling worth and thoroughly practical knowledge of the business.

Mr. Taat came first to the United States in 1898, and in 1903 married Miss Grace Miller, of Yonkers, N. Y., where he has since resided. Mrs. Taat alone survives.

#### The Late Arthur B. Lewis.

Arthur B. Lewis, the well known florist of Pontiac, Mich., died Friday morning, June 30, at Oakland hospital of peritonitis, aged 53 years. He was noted for his industry, sobriety and close attention to business which combined the culture of both flowers and vegetables, several acres being devoted to the latter crops. He was the originator of a muskmelon of great size, and attained considerable local fame in its successful culture. He was a member of the Detroit Florists' Club, and that organization sent a beautiful floral emblem to the funeral, which was held Monday afternoon, July 3, from All Saints Episcopal church. He is survived by a widow and son, Harold H.

#### Massachusetts Horticultural Society.

The annual rose and strawberry show of the Massachusetts Horticultural Society was held June 24. Mr. H. Walsh, superintendent of the estate of Miss S. B. Fay, Woods Hole, filled four long tables with blooms of hybrid perpetual and hybrid tea roses. Martin Sullivan, gardener for William Whitman, showed a splendid collection of delphiniums, canterbury bells and foxgloves. J. T. Butterworth made a fine display of orchids and T. C. Thurlow & Sons Co. an exhibit of peonies. R. & J. Farquhar & Co. had a magnificent exhibit of herbaceous plants and flowers. The display of strawberries by Wilfrid Wheeler was exceptionally good. Following are the awards:

Special Prizes. Theodore Lyman Fund, Hardy roses. Collection, not less than twenty varieties: Miss S. B. Fay, first. John C. Chaffin Fund. (for amateurs only)—Best three blooms of any white perpetual rose; Robert Seaver, first. Fran Karl Druschki. Best three blooms of any white perpetual rose; Robert Seaver, first; Mrs. John Laing, second for Mrs. R. G. Shuman. Best three blooms of any red hybrid perpetual rose; Robert Seaver, first; Ulrich Brunner, and second for Gen'l Jacobson. Best three blooms of any new hybrid perpetual rose not offered in any American catalogue previous to 1900; Robert Seaver, first. Fran Karl Druschki. Society's prizes. Hybrid perpetual roses. Twelve named varieties, three of each: Miss S. B. Fay, first. Six named varieties, three of each: Miss S. B. Fay, first; W. J. Clemson, second. Six named varieties, one of each: Miss S. B. Fay, first. Six named variety of hybrid tea roses, not less than twelve varieties: Miss S. B. Fay, first. Best three blooms of a variety introduced since 1900; Robert Seaver, first; J. B. Clark, second. Six blooms of Fran Karl Druschki: Miss S. B. Fay, first; W. J. Clemson, second. Six blooms of Mrs. R. G. Shuman Crawford: Miss S. B. Fay, first; W. J. Clemson, second. Six blooms of Margaret Dickson: Miss S. B. Fay, first. Six blooms of Ben Cant: Miss S. B. Fay, first; J. T. Butterworth, second. General Display.—One hundred and thirty-two roses: Miss S. B. Fay, first. Sweet Williams.—Display, eighteen vases, not less than six varieties: Wm. Whitman, first; George Pare, second; Wm. Whitman, third. Herbaceous roses. Collection of twenty or more named varieties, double: T. C. Thurlow & Sons Co., first. Collection of twelve named varieties, double: T. C. Thurlow & Sons Co., first. Specimen bloom, double: Wm. Whitman, first; T. C. Thurlow's Sons Co., second. Collection of twelve named varieties, white: T. C. Thurlow's Sons Co., first. Vase of twenty-five blooms, double, pink or rose: T. C. Thurlow's Sons Co., first. Vase of twenty-five blooms, double, red or crimson: T. C. Thurlow's Sons Co., first. Campanula medium.—Collection, not less than fifteen blooms: Wm. "HOLM LEA" the beautiful garden home of Prof. C. S. Sargent, director of the Arnold Arboretum, is the subject of a well illustrated article in Country Life in America for July 1. An illustrated notice of this famous place, located at Brookline, a suburb of Boston, Mass., will be found in THE AMERICAN FLORIST of September 24, 1904, page 344. The late Dr. Olmsted, the renowned landscape gardener, was for many years Prof. Sargent's close neighbor and friend.

## Personal.

The many readers who know J. F. Sullivan and wife, of Detroit, Mich., will be pleased to learn that Mrs. Sullivan is making good progress toward recovery from the effects of her recent accident.

F. W. Taylor, Denver, Colo., better known to our readers in connection with the St. Louis world's fair, was a visitor this week.

## Regulating Aeroplanes.

The movement made by Pierce Bros., of Waltham, Mass., in instituting proceedings to take out an injunction against the flying over their greenhouses by an aviator at an aviation meet within a short distance of their establishment, opens up a very large question as to who is the possessor of the space above his property. The question was settled by the projectors of the meet filing a bond to cover all damages. An aeroplane dropping upon a large area of glass while traveling at a high rate of speed would do incalculable damage, and it seems as if the owner of such property should be protected in some manner from such a mishap. No doubt as the use of the aeroplane becomes greater necessary laws will have to be passed. A bill to regulate the matter has been presented in some legislatures, but has been pigeon-holed with the common belief that the air is free to all. The time is coming, however, when these machines are to be more common and put to some commercial use. W. Atlee Burpee, on his voyage out of New York harbor on the maiden trip of the mammoth Cunarder Olympic, was to have been the recipient of the first package delivered by an aeroplane, but, unfortunately, the party who dropped the parcel missed his aim and instead of landing safely on the deck of the steamer it dropped into the ocean.

## General Business Encouraging.

We find the following with regard to general business conditions in the summary of R. G. Dun & Co., issued July 1:

"Wholesale activity in general merchandise is of between seasons character. Fewer outside buyers operate in staples, and road and mail orders decreased slightly, but June sales have been greater than in the same month last year in dry goods, boots and shoes, clothing, millinery, cloaks and suits, men's furnishings, hats and caps, furniture, carpets, and food products.

"Current shipments include a fair variety of textiles, outing, and sporting goods, and demands have held steady in jewelry, fancy goods, art wares, and musical lines. Hot weather was widely beneficial, stocks being amply depleted in all directions, and, with the improved consumption, the outlook indicates early replenishment and further liberal selections soon of fall and winter needs for the interior.

"Business prospects derive encouragement from crop conditions. Winter wheat thrashes out better than expected. Additional shrinkage affects oats, but corn maintains excellent progress in the leading states, and late advices show wheat loss in South Dakota is less serious than first reported. Rainfall and temperatures this week were unusually favorable for the growing cereals and pastures."

## Tulips Coming Blind.

ED. AMERICAN FLORIST:

I hear many conflicting reports on the "coming blind" of tulips both forced and grown outdoors. Growers seem inclined to blame the Hollanders while some of the latter say the bulbs are kept dry too long before potting, and are not well treated in subsequent care. What light can you give me on the subject?

VERITAS.

This has always been a vexed question between the producer in Holland and the grower elsewhere, but as the late F. W. Burbidge once said to the writer, "We have to depend wholly on what the Dutchman sends us." If a whole shipment of a certain variety goes blind under conditions that suit and give good results with others, any disinterested party would agree that the fault was with the bulbs. If again a few boxes fail to bloom out of a batch, we must look for the reason at home, and in most cases the roots have become dry at some time during storage, or the soil was never well soaked with water after planting, it is a good rule to place the flats outdoors first when planted, let the rain soak them well, and store in cellar when the outdoor temperature falls lower than that of the storehouse. We have had failures through not observing the above rule, and the putting of dry sand over the flats when stored will sometimes absorb enough moisture out of the soil as to prove injurious.

Quite recently we have discovered that the grower in Holland in the majority of cases does not grow nearly all the stock he sells us, he is noted for some few kinds that he does well and produces in large quantities, trusting to his neighbors in a sort of clearing-house way for other kinds which he has already sold. It is well that he specializes on a few kinds, they can be better grown and kept true to name, but through dealing with a "pool," the actual responsibility to the customer here is less than it should be, because he does not care to tell you that the other fellow's line of Chrysolora or Cottage Maid were a failure this year, he takes a chance on this when selling you, but the loss is placed where it does not belong. The same custom obtains in Belgium with the azalea growers, each one being noted for a few varieties, this is a decided advantage in that better plants are produced, and if poor they cannot sell them for the buyer can see at once if buds are lacking.

There is still the question of diseases which has to be fought in Holland, we hear of it at times quite by accident, and when epidemic, is usually attributed to climatic conditions, and thus transitory. The writer is not competent to discuss this, but it is a fact that forced tulips, and deems it necessary to say so, certain it is, however, that it is surprising how old the regular kinds of forcing tulips are, the writer has been growing most of them for more years than he cares to tell here, and when they are good are very good, and when we consider how carnations, roses, and even narcissus appear, shine for a time and disappear, the method (discussed) Dutchman must be given credit for having done pretty well for a century or more, and that with garden raised varieties—exactly on a par with our race of greenhouse carnations.

The longer a bulb is kept out of the soil the poorer the return of bloom, not perhaps that the bulb loses vitality, its wonderful outer covering is proof against this for a surprising time, but, there is not sufficient time after late planting for the best growth of roots to support the crop. To most readers perhaps it may read like a fiction, but it is true that a florist once used to plant his Roman hyacinths and Dutch bulbs in batches to get a succession of bloom, and then wondered why his late ones were the poorest, he owned and operated the oldest greenhouse in a large New England state and died, I think, before he was really convinced his old-time practice was wrong, for the son did likewise, not so wise perhaps but likewise. E. O. ORPIT.

## Meetings Next Week.

Key 466, care American Florist.

## NEW YORK SALESMEN

We need men who are familiar with the greenhouse trade in and around New York. State age, experience and salary.

Address

**Boilers,** care of American Florist

Here's a Mighty Fine Opportunity for a Good Man Who Knows the Nursery Business, or a Firm Who Wants a Branch House.

I own one of the best greenhouse and nursery plants in the country—50,000 feet of glass is now in carnations and 130 acres in general nursery stock. I am a banker, a mighty busy man, and cannot give this enterprise the attention it deserves. A reliable nursery firm, or a competent man who possesses good business ability, will be sold a half interest at a fair price and on reasonable terms. It is desirable—but not absolutely necessary—that such a man should have a knowledge of greenhouse management and a married man is preferable. This locality is unequalled for growing many kinds of nursery stock, and I believe it is an opportunity for a nursery firm or a capable man to establish a splendid business. If you feel that you are the type of a partner I am looking for and can invest from \$15,000 to \$20,000 write to me at once.

V. Z. McFARLAND PUBLICITY SERVICE,  
Box 5, HARRISBURG, PA.  
Peach budders, who know how, wanted now.

# Summer Roses

**Rhea Reid, Kaiserin,  
My Maryland.**  
These are our Specialty.

**Buy Direct of the Grower and Get Fresh Stock**

**We Grow all the Stock we Sell and Guarantee it to be Strictly Fresh.**

## Chicago.

### THE WEEK OF THE FOURTH.

The first week in July, the week of the glorious fourth, opened up with three of the hottest days that the city has had in years, the thermometer fluctuating around the 100 mark during the afternoon and not getting below the eighties at night. The week is always noted as one of the lightest in the flower business, for much of the spare money is spent for powder and fire-works, and there is but little entertaining and with such excessive heat, those who can spend the time and afford the expense have hurried from the hot city to the cooler woods and green fields. Still the trade with the wholesale houses has been fair and there is a market for the stock that is of good quality, but there is a larger quantity of an inferior grade that does not find an outlet. There are some fine roses to be had. American Beauty is in good condition with some of the growers, some exceptionally good blooms being seen. Killarney and My Maryland are very good, some especially fine colored flowers being received daily. Kaiserin, while not overplentiful are fine, but the bulk of the white is White Killarney and some of these are splendid blooms although with such exceptionally hot weather they open quickly. Richmond is still the red and if used as soon as obtained are very satisfactory, but the blooms open up very soon after being out in the air. Carnations are about through for this season, there being but few good flowers seen, and not many of any kind, and there will not probably be any good ones until the young stock begins to bloom. Lilies are very fine, some extra quality longiflorum and candidum to be found as well as the Japanese varieties speciosum and auratum. Water lilies are also a feature and in a va-

riety of colors and some large fine flowers to be obtained. Lily of the valley can be had of extra fine quality but there is also some very small stock seen. Sweet peas are good, some beautiful sprays being sent to the market daily and all the colors are obtainable which gives a retailer a bright display. Peonies are about through, there being but little cold storage stock left and the week will see it all sold out. Some very fine gladioli are yet to be seen but the greenhouse product is approaching its end. There is a large assortment of outside stock. coreopsis, gaillardia achillea, feverfew and gypsophylla being offered in quantity. Smilax is still short, there being but little on the market but of other greens there is a quantity.

## NOTES.

Wilder Desmond (John's son) is breaking into the business and looks like a sharp young man. Talking over the telephone the other day to an incoming expressman, he inquired about an expected shipment and finally instructed the expressman to "Be sure and put it in a cool place when it comes in." Many a veteran would have overlooked that important item.

Frank Ayers, the popular salesman at C. W. McKellar's is not only noted in the sporting line as a crack bowler, he has been absent from the store this week, being one of the crew of the crack yacht Vencador, which is participating in the races of the Chicago Yacht Club to Milwaukee and return. The demand for peonies has cleaned up the storage stock much earlier than usual, but the season was not so propitious for the storing of these flowers as it has been some years, the exceedingly hot days in June forcing them open faster than they could be handled.

The base ball teams of the Chicago Carnation Co. and the A. F. Amling

## U S Budlong's E Blue Ribbon Valley.

Co., crossed bats on Sunday, July 2, at Joliet, the former winning by the score of 17 to 0. The long hot trip which the Amling team had to take seemed to be their undoing.

The wholesale men, now that irritating hot-weather, light-business conditions prevail, are indulging in the perennial kicks against rents and landlords of every age and nationality are a much despised class at this time.

Freddie (Ed's beloved Freddie) left on his vacation July 1 and as he reached the top step of the stairway in leaving, shouted back: "Good-bye, everybody, and don't forget, the hottest weather has yet to come."

Investigation of the trouble at the west side parks may prove it a mere garden party. Any common carrier knows the difference between garden truck and fire apparatus, even to the hose.

Early closing began July 1. All the wholesale stores trying to get through by 5-30 o'clock and on some of the doors the notice reads that the store will close at 5 o'clock.

John Starrett, florist at the LaSalle hotel, reports June business, which included a number of weddings, quite lively.

It is believed the fish supply will last to July 4, 1912, if the cold storage holds out.

W. N. Rudd and Phil Foley left on a Michigan fishing trip June 29.

 Once tried you will have no other

John Mangel has a very prettily arranged window. All along the East Madison street side and around on Wabash avenue the windows present a wooded scene. Banks of green moss through which a rivulet runs forming cascades and a representation of an old mill with the water turning the wheel ending in a small lake full of beautiful water lilies make a beautiful picture. A flock of ducklings swimming in the water gives the scene a very realistic appearance. The inside of the store was prettily draped with American flags for Independence day.

Bassett & Washburn are getting an immense cut of roses of exceptionally good quality. Mr. Washburn says the warm weather is forcing them out very fast, but the shipping trade of this firm is holding up nicely and the best stock is finding a market.

The Chicago Flower Growers' Association have leased the four floors and basement, 25,000 feet of floor space, at 176 N. Michigan avenue, between Randolph and Lake streets, for five years at an annual rental of \$4,800.

Weitor Bros., are handling some especially fine White Killarney roses these days. The blooms are of very fine substance for the excessive warm weather and are borne on extra good stems with fine foliage.

W. P. Kyle, of Kyle & Foerster, says his firm's peony business was entirely satisfactory this season, both as to volume and prices, the latter running fully as high as those of last year.

J. C. Vaughan attended the unveiling of the mammoth statue of Black Hawk, famous Indian chief, at Eagle Nest Bluff, near Oregon, this state, July 1, one of the hottest days this season.

Chas. Shaffer, the well known violet grower, has three of his new houses at Des Plaines planted with high grade stock.

H. C. Wendland, of Wendland & Keimle, sailed for Europe June 24.

Visitors:—A. E. Crooks, Benton Harbor, Mich.; C. J. Cleve Houck, Minneapolis, Minn.; J. A. Peterson, Cincinnati, O.; C. W. Ward, Detroit, Mich.; Kemble of Kemble & Goodman, Mason City, Ia.; A. C. Reicher, Michigan City, Ind.; B. Juergens, Peoria, en route to Europe.

### Horticultural Society of Chicago.

SPRING AND EARLY FALL SHOWS.

The executive committee of the Horticultural Society of Chicago has voted not to hold the usual fall flower show in the Coliseum building this year, but to hold a big exhibition next March in its stead.

A dahlia and aster show will be held at the Art Institute in September, the exact date to be determined by the conditions of the plants later in the season. A premium schedule for this exhibition is now being printed and will be issued shortly.

A premium schedule for the spring show next March is being prepared by a special committee. It will offer prizes as large as usually given for fall exhibits at Chicago. It is hoped in the spring exhibition to obtain a more varied display, and to arouse renewed public interest in the flower show.

J. H. BURDETT, Sec'y.

### St. Louis.

SUMMER CONDITIONS.

With the continued warm weather the usual summer dullness prevails. There have been some fairly good carnations received during the last week which sold well. A large number of pink roses are coming in but there is a scarcity of white. American Beauties are being received in good quantities

but they lack substance. Store cleaning and vacations occupy the attention of both wholesalers and retailers.

### FLORISTS' CLUB BANQUET.

The banquet given by the Florists' Club on the twenty-fifth anniversary was a very enjoyable affair, there being about 60 present. Interesting addresses were made by George Asmus and H. E. Dörner, president and secretary of the Society of American Florists, who spoke upon the work of the national society and the relationship of the society to florists' clubs. Other speakers were John Connors, president of the club, Luther Anderson, on the early history of the club; C. C. Sanders of the retail association and E. W. Gery.

### NOTES.

George B. Buermann, one of the Grimm & Gorly force, was married June 26 to Miss Viva C. Coleman. The home was decorated in green and white by the concern.

There will be a ball game between the two nines representing the wholesalers and retailers July 20. Both sides are busy hunting up players.

C. A. Kuehn has become a great rooter for the cardinals and hopes to see the world's series played in this city.

Al Gumz will start on his vacation July 10, returning in time to attend to the sports of the florists' picnic.

Herman Niehaus, salesman for H. C. Berning, has returned from a fishing trip to Perryville, Mo.

A number of growers at Kirkwood have lost their violet plants during the long dry spell.

W. F.

PEORIA, ILL.—B. Juergens left June 27 on a European trip, and will return about September 1.

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

Los Angeles, Calif.

Business during the latter part of June kept up remarkably well owing to the many social events, school graduation exercises and later the doctors' convention. Orders for 200 or 300 graduation bouquets for the students at various schools were frequent, weddings, dinners and other festivities helping to keep the ball rolling and use up the stock. Outdoor flowers of late have not been quite so plentiful and certainly not of so good quality and this has led to a far better demand for the indoor product. Growers of roses, especially, have cleaned up well daily and it has often been necessary to wait for the morning cut to fill the early morning orders, hardly giving time for the flowers to cool off. Among the most beautiful of the outdoor offerings is the native Romneya Coulteri, a magnificent plant when seen at its best as here. It makes a splendid show and its graceful white flowers with golden yellow centers are as fine as a mountain peony. Shasta daisies and gladioli have been a glut but there is a better demand for the latter lately and though prices have been extremely low not many have gone to waste. Richmond has been among the best sellers in roses the cool nights, apparently, having little effect upon it. In orchids, Cattleya Mossie and C. gigas are still the best sellers and have been in good demand. A few flowers of C. Trianae,

Headquarters for **ORCHIDS** and all Fancy Stock  
**CHAS. W. McKELLAR,**  
162 N. Wabash Avenue, CHICAGO.

from newly imported plants have also been an offer.

### NOTES.

Richmond roses have been in magnificent shape with Wm. Haerle of the El Reah greenhouses. He was just in the local market with Liliun auratum and L. rubrum, the earliest flowers and plants being ready June 20. Orchids have been in fairly heavy cut, principally Cattleya Mossie and C. gigas with a sprinkling of Trianae blooms from newly imported plants. These plants which arrived in the original cases May 17, produced the first flowers just one month afterward, June 17, showing the fine condition in which they arrived. These were from Carrillo & Baldwin, Mamaroneck, N. Y.

O. C. Saakes of West Fourth street, has had a great run of work for decorations and funerals. At the opening of the new Orpheum theater he had a lot of work including an eight-foot basket which was presented to the resident manager. The base was well executed in gladioli America

**U S Budlong's**  
**E Blue Ribbon Valley.**

and G. Augusta with appropriate foliage and bright red ribbon. It was a striking piece of arch and was much admired as was also a magnificent horseshoe five feet high in which fine red and white sweet peas were used.

Tony Tossano, of Tossano Eros, dealers in greens and sundries, left on June 23 for Italy for a three months' vacation. Tony is popular among the boys and all wish him a pleasant holiday and a safe return.

F. R. Hills has bought glass for a new house for maidenhair ferns which he will shortly erect. H. R. R.

### European Horticulture.

FROM THE FRENCH TRADE PAPERS.

The Eremurus and their Culture.—For a long time the eremurus were considered rare costly plants desirable mainly for great gardens, parks and expositions, but that is all changed; their beauty has brought them popularity and the reasonableness of price makes them accessible to amateurs. Of the 30 to 40 known varieties, not all are decorative; many have their place only in collections, but some varieties are ornamental plants of the first rank. They belong to the lily family and have a peculiar structure; the root is a fleshy head surmounted by the central shoot, around which center are produced from five to 20 fleshy roots radiating like the spokes of a wheel. The handsome foliage forms in spring great tufts 20 to 40 inches high, from the center of which springs a robust stalk, bare at the base and terminating in an immense spike 20 to 60 inches long, according to variety, formed of hundreds of small white or yellow flowers. The best sorts are: E. Bungei, small, blooming in June and July, yellow, fragrant. E. Bungei praecox, 15 days earlier than Bungei. E. himalaicus, vigorous, broad foliage, stalks six to eight feet high, flowers pure white, fragrant, blooms end of May. E. Elnei, similar to himalaicus, flowers bright rose, blooms end of May; a little less hardy than the foregoing. E. robustus, the handsomest, largest and most vigorous; flowers a peach-blossom color, not fragrant. E. robustus albus, hybrid of robustus and himalaicus, has the appearance of robustus, but flowers are pink outside and white within and fragrant. Very vigorous.

Again the Japanese Radish.—Professor de Noter in Le Jardinier describes the method of growing this enormous vegetable: "A sandy soil, enriched by the addition of 20 per cent half rotted cow manure. The early varieties, Tokuri (16 in.), Norima Maru Jiri (12 in.), Ki Nishi (12 in.), Ka Meido (14 in.), Mia Shize (10 to 50 in. and one of the best) should be sown the latter half of July in rows five feet apart; the seeds should be planted in clusters of three, a foot apart in the row, and thinned when a few inches high; the seeds should germinate in three to four days, and in 10 days should be weeded and thinned; this process is repeated but once, for in a month the vigorous plants will have crowded out all weeds. Later varieties must be sown earlier, so as to ripen before frost. These vegetables are turnip-like, but much its superior, excellent for the table, and relished by domestic animals."

The Fifteenth Congress of French Rose Growers, taking place in June in Lyons, discussed the following questions: Synonyms, cryptogamic diseases, best roses introduced in 1908,

special use of magnesia as a rose food, the rose in floral decoration, plants desirable to decorate rose gardens, the best varieties of roses for various soils, the best roses for cut flowers, obtained in the last six years, the best Wichuraiana sorts, the best method to cause rose plants to drop their foliage rapidly, without injury to the plant. This last topic is of great interest to rose shippers, and the author presenting a really practical and harmless solution will receive a gold medal of the value of \$20.

Two Climbing Wichuraiana Roses.—Two roses to be introduced next fall and sure to be popular are the following: Paul Noel (Wichuraiana X Mme. Barthelemy Leviti). Very strong grower with the bud form and coloring of the tea rose; excessively free-blooming and remaining in flower a long time. It will be most popular as a true yellow climber is sure to be in demand. Dr. Henri Neuprez. The second is simply a marvel, according to M. Cochet in the Journal des Roses. It is a shrimp pink, blooming in clusters of two or three, and so brilliant as to be incomparably pretty; it flowers early and remains two months in bloom.

Choice Chrysanthemums.—In a recent session certificates of superior merit were awarded by the National Society of Horticulture of France to the following varieties: (A condition to receiving this certificate is that the plant must have received a certificate of merit the previous year.) Charles Schwarz, J. H. Silsbury, Le Brevenais, Mme. de Mazieres, Mile. Augustine Dorey, Mile. Marie Pouzac, Mary Ann Pickett, Mrs. R. F. Felton, M. Loiseau Rousseau, President Loubet. Many of these varieties have been in commerce since 1903-6 but are the 10 chosen for special distinction this season.

New Rose Rayon d'Or.—This new Perpetiana bids fair to even eclipse the Lyon rose in popularity. It is incontestably the yellowest ever-blooming rose now cultivated. The following is the description of M. Pernet-Ducher, its originator: "Vigorous bush, well branched; brilliant bronzy green foliage; ovoid bud, coppery orange streaked with carmine scarlet; flower large, well formed, globular, double, superb cadmium yellow on opening and a sunny yellow when completely opened." It flowers abundantly and blooms open well in all temperatures. Must be protected in severe winters.

A Note on the Restoration of Old Fruit trees by M. Herissant, director of the practical horticultural school of Trois-Croix, gives a very simple rule for trimming. From old apple trees, prune all branches inferior in size to a man's little finger, shortening the boughs to the point where they attain this size, but not removing the large boughs,

## U S Budlong's E Blue Ribbon Valley.

especially not a main branch. This procedure usually gives excellent results, the new shoots and branches forming a crown for the tree in a few years.

For Chrysanthemum Rust.—A mixture of 13 ounces sulphate of copper, 20 ounces black soap to 25 gallons of water is recommended as a radical cure. It should be applied five or six times, 24 hours apart and should be used as soon as mixed. While this process has the disadvantage of tending to clog the spray, etc., it is said to be most effective in its results. The black soap may be dissolved in hot water by vigorous stirring.

Viola cornuta Excelsior.—The Viola cornuta being so much harder and freer of bloom than the pansy, is tending to replace it for bedding purposes. This Viola cornuta Excelsior is larger than the type and has the deep blue coloring of the violet The Czar. Is recommended as a substitute for violets when scarce in making wreaths or bouquets and for its great freedom of bloom as a bedding plant.

New Rose Garten Direktor Hartrath.—Sure of a future, this new rose recalls the Mme. Caroline Testout; it is vigorously has splendid foliage, blooms freely. Buds are elongated, carried on stiff stems, large, double, a bright satiny rose color, fragrant.

### Canaries and Canary Seed.

The breeding of canaries in Yorkshire, Eng., has become of recent years quite an important minor household industry, according to Consul A. E. Ingram. Indeed it is stated that, outside of Norfolk (in the neighboring county of Norfolk) which is sometimes called the City of Canaries, there is no place where this industry is carried on so extensively as in the Bradford district.

That the rearing of canaries should be a popular and at the same time a profitable hobby in a textile district is not surprising when one learns that the introduction of these cage birds into England dates back to the days when the Flemish weavers migrated to the town of Worsted, in Norfolk, and brought with them these little caged songsters to cheer their homes in which they ran their looms. The silk weavers who fled from France and established themselves near London are also said to have been instrumental in

establishing this home industry of rearing canaries.

This industry is a commendable one for those pursuing a sedentary occupation. Aside from the fact that it furnishes timely employment for spare time, it also enables those who keep a few birds to increase their small wages (one workman is said to have made \$400 in one season by this means), while the large breeders make proportionately more. Though ordinary birds sell for a few shillings, prize winners realize as much as \$50 or \$75, or even higher.

The export trade in canaries is considerable, shipments being made to Australia, South Africa, and other British colonies, and also to the United States. It is stated that one firm alone in Norwich has sent as many as 10,000 birds a year across the Atlantic.

The exhibitions of cage birds that are held frequently throughout the country also do much to stimulate this industry. The Fifty-first Annual Cage-bird Show, held in the spring of this year at the Crystal Palace, had about 3,000 entries, a large proportion being canaries. It is not unusual to see 400 or 500 canaries at Bradford exhibitions, which are held under the auspices and the rules of the Yorkshire union, usually in council schools, on Saturdays, from October to December.

Among the many varieties of canaries bred in this country, each possessing distinct characteristics, might be mentioned the Norwich, the Cinnamon, the London Fancy, the Lizard, the Scotch Fancy, the Border Fancy, the Belgian, the Lancashire, and the Yorkshire. The Yorkshire canary is a long, slim, erect bird, either clear yellow, clear buff, evenly marked, ticked, or variegated, or the green and the cinnamon.

The Yorkshire Union of Cage-bird Societies has its headquarters in Bradford, and 30 societies in Bradford and the near-by towns are affiliated with the union, which has a membership of 1,200.

It is estimated that over 1,000 persons in Bradford are engaged in breeding canaries. It is likewise estimated that \$12,000 is expended annually in

Bradford on white canary seed alone. A considerable sum is also spent on such seeds as rape, hemp, maw, linseed, etc.; while the annual expenditure for cages, nest pots, nest linings, and various other bird breeders' supplies is also considerable.

Canary seed is imported into the United Kingdom from Turkey, Spain, Argentina, and probably elsewhere. This item is not separately stated in the British import statistics, but in 1907, 12,278,484 pounds of canary seed, valued at \$271,118, were exported from Argentina to the United Kingdom. The Turkish seed is well known, while the Spanish is said to be a finer, larger seed. The present retail price ranges from \$3.40 to \$5 per hundredweight of 112 pounds; the price of the Spanish is, however, \$5.85 per hundredweight. It might therefore be of interest to American growers of this white canary seed to consider the question of competing for this trade. A considerable amount of sweet red peppers, which are imported largely from Spain, is used for mixing with the egg and other soft food during the molting season for deepening the color of the plumage; the annual expenditure on this item alone for Bradford amounts to over \$1,000.

#### JULY DULLNESS.

Things have taken a decided tumble since the last writing. We expect dullness in July and it seems to have started in to keep up the reputation, prices on everything have dropped. Carnations are still with us and the quality of some varieties from the best growers is wonderfully good taking into consideration the hot weather. Roses are about the same in quality. J. A. Budlong & Sons Co. is marketing some Radiance. This is a good rose with the perfume of the old La France. It is a rampant grower. We have seen plants of it and like the habit very much. It looks like a rose that would take plenty of water and feed to keep up the growth it makes. Whether it will be a winter rose is a point a few are asking. American Beauty seems to be the prime favorite just now. Vacations are in order and many are preparing for them and the summer resorts and the hill and swamp towns await the city boy with open arms, and tales of losing sleep with roosters and mosquitos are the talks after its all over.

#### NOTES.

We noticed at Welch Bros. some very fine American Beauty roses which they are receiving from Carl H. Jargens, of Newport, R. I., and other sources. Two thousand is the daily cut just now. The lily of the valley from the same grower is certainly fine, in fact the best we have seen in the market. This firm received an order from one party for 15,000 carnations which is certainly a good sale. David Welch has gone home to his native Isle and during his stay he has undoubtedly try to instill scientific farming amongst the farmers of the Emerald Isle.

Wm. R. Nicholson, Framingham, has purchased the greenhouses of his father, Wm. Nicholson, the noted carnation and chrysanthemum grower. He has practically run the place the past five years. This move lifts all the weight from the father's shoulders and he has a right to enjoy peacefully all that he has earned during all the early years of hard work. We wish Mr. Nicholson, Sr., many years of good health and his son good luck in his new enterprise.

Both flower markets close Saturdays at 12 noon. The clerks at the seed stores are having a hard time. There has been so many failures of seed through dry weather and other causes that some buyers have planted their crops three times. Everyone has his or her little tale of woe, and the

smaller the order the bigger the kick. The clerks must have some diplomatic training to fit them for their position.

In conversation with various coal dealers the fact has developed that the outlook is that there will probably be trouble next April (this is no April joke). The contracts of both the hard and soft coal miners expire at that time, and trouble is looked for if an agreement cannot be reached. Green house men had better lay in enough to last them until hot weather and perhaps a part of the fall. We all remember what happened during the last strike.

#### BUSINESS NORMAL.

Exceptionally hot weather has thrown our lot for the past week. Monday July 3, being the warmest since 1901. So the local weatherman says. But as the newspapers report a like condition all over the country it is hardly worth mentioning. Business for the season is about normal, while the usual difficulty is experienced in getting good flowers for the few orders in sight. In roses, Killarney's from the Jos. Heacock Co.'s plant at Rolois are splendid for the season, being of exceptional color and substance. American Beauties are in good demand and some local growers are still sending in very fair stock while the imported or that from the eastern points can be offered without a word of apology.

For the past week some very fair sweet peas have been offered and these have sold well. Carnations are in fair shape and quite a number are shipped to the resorts. Lily of the valley and orchids are in good demand and sell up pretty close. Double white penzias, pyrethrum, white hydrangea and other out-door stock finds a good sale with the stores for design work of which there is always more or less doing.

## Pittsburgh Cut Flower Company

WHOLESALE GROWERS

121 Seventh Street, PITTSBURGH, PA

Cincinnati.  
JULY BUSINESS.

The business locally is following the even tenor of its way. Funeral work and bouquets for recitals cause a ripple in the calm serenity of the stores. It is well that it is so, too, for a not over large amount of real first-class stock is available to the buyers. Carnations are for most practical purposes nearly at an end for the season. The local growers of summer roses are cutting excellent stock in Mrs. Taft and Killarney for pink, White Killarney, Ivory and Bride for white and Perle des Jardin for yellow. American Beauties and Richmond for red, the last being good if used immediately after arrival, but open very quickly. Judging from indications a strong crop of roses is coming on. Lilies seem a trifle scarce just before the Fourth. Still at that the demand for them has been more or less erratic and apparently in an inverse ratio to the supply. When there was the most to be had there were the fewest calls and when few were offered everyone seemed to want them. Some very fine lily of the valley and sweet peas have been on sale in the various wholesale houses. In regard to this last flower one thing is noticeable. Thus far they have not experienced at any time since the season opened the terrific glut they generally have to go through in other years. This year on most occasions the worst was a slight oversupply which if the stock was A1 might be cleaned up at low prices. If, however, the blooms were not of the best it was hard finding buyers. Among other stock may be found gladioli, snapdragons, Shasta daisies, feverfew and coreopsis. The green goods are first class and ample in supply.

### NOTES.

The Bloomhurst Floral Co. at Lockland have now over half of their carnations in the bench, and if the appearance of the young stock is any criterion they bid fair to more than duplicate their success of the past year in this line.

The outing committee mailed tickets this week to the members for the annual outing at Conej on Thursday, July 20. Everyone should get the kinks out of their arms and limbs that they may be in at the finish of the various contests.

Albert McCullough has returned from the American Seed Trade Association convention in Massachusetts. He has been so busy at the office since his return that he has not as yet had time to tell of his experiences on the trip.

Ed. Foster, chairman of the flower show committee, has called a meeting of the committee at Wm. Murphy's on Wednesday, July 5.

H.

### Cleveland.

#### A GRAND CLOSE OF THE SEASON.

Society has scarcely had a breathing spell during the past week, debutante affairs together with a long list of weddings have kept many of the florists very busy, and never before have they had their originality so taxed, as hostesses are continually looking for something odd in the way of decorations and floral effects. But from now on everybody expects to take a much-needed rest, and convention talk and vacations are discussed on all sides. Stock has been equal to the demand up to Saturday, July 1, when carnations cleaned up entirely early in the day. Of roses there were enough to go around, although no long pink roses were to be had. Kaiserin and American Beauties are finding a good market, short pink Killarney and Richmond have a good call. Of lilies there are all kinds, water lilies, Japanese lilies, candidum and Easter lilies. The first of the asters have appeared, but it will be fully two weeks before they arrive in quantity. Chrysanthemums seem to have suffered from the extreme heat early this spring, as many florists are on the market for plants. Lily of the valley has been scarce this week.

### NOTES.

Chas. Bramley has remodeled the stand formerly occupied by the Schneider Floral Co. at 426 Euclid avenue and reports excellent business. He has all his business cards read "C. A. B. The Florist" to avoid the many mistakes he claims occur between himself and his brothers.

Frank Eichoff, son of Henry and Mrs. Eichoff, was married Tuesday, June 27, to Miss Clara Dalhausen. The bride carried an arm bouquet of lilies.

## EVERYTHING SEASONABLE

THE McALLUM CO., Pittsburg, Pa.

After a short vacation Mr. Eichoff will again be at the greenhouses.

The Flower Club picnic will take place the latter part of this month at Puritas Springs. Watch for the date, and don't fail to be there. C. F. B.

**SAN JOSE CALIF.**—The Pacific Coast Association of Nurserymen at the convention held June 24 elected the following officers: F. A. Dix, Utah, president; C. F. Lansing, Oregon; C. H. Smith, Salt Lake City; J. Vallance, San Francisco; Ray Hartley, Idaho; A. W. McDonald, Washington; Charles Trotter, British Columbia; and D. J. Tighe, Montana, vice-presidents; C. F. Tonneson, Washington, secretary and treasurer.

## New York Florists' Club Outing.

The eleventh annual outing of the New York Florists' Club took place on Wednesday, June 28, and with the weather everything that could be desired. The steamer Isabel left the pier at East Twenty-fourth street and East river at 10:15 A. M. and arrived at the Witzel's Point View Grove at 12:20. The committee had provided an excellent orchestra of eight pieces to furnish music for entertainment and dancing during the day. There were 211 adults and 53 children on board the boat and the committee had provided as souvenirs small pennants attached to canes and these were given out during the trip, cigars were also distributed to the gentlemen. Upon its arrival at the grove the boat was met by Ex-President Abraham Lincoln Miller and Mrs. Miller, who had made the trip by automobile. Several joined the party at the grove, among them being Anton Schultheis. The first event was breakfast. President John B. Nugent Jr. addressed the assemblage, urging everyone to have a good time and he was vigorously applauded. The committee had revised the sporting events from other years, making the races shorter and making the events more for women and children. During the afternoon dancing was indulged in in the ball room.

Owing to his attendance to the Federal grand jury. Chairman Joseph Fenrich was compelled to be absent and he was greatly missed. But as everything had been so completely arranged, in advance, by the committee, the affair went like clockwork. A very pleasing feature was the fraternal spirit shown by the Greek society, a delegation of about 25 being present headed by E. J. Polykranas. Chas. Ravotzos and J. J. Felouris were unanimous in declaring the outing one of the finest they had ever attended. Walter F. Sheridan and P. J. Smith joined the party at the grove as they were unable to get away in time by the boat. Patrick O'Mara, who sailed for Europe that morning on the Campania, was greatly missed by all but was remembered by the outing committee, who sent a box of cigars to the steamer with the best wishes of the club. Ex-President Traendly seemed to be sad on the way home to think that he had not won the prize for the largest family present, as he only had seven children. Next year he had eight. He says he never had a year. John Birnie found fault with the committee because no bag pipes had been provided. The tug of war was abandoned because W. A. Manda was not present. The official photographer was conspicuous by his absence. This would have been a grand opportunity to demonstrate the different insecticides on the mosquitoes present. The placing of a keg of beer in the grove was a grand thing—for the crew of the boat.

Chas. H. Totty entertained the "Old Guard" with select stories and quotations from Kipling. Harry A. Bunyard was at the dock to see the party off but could not go any further as he had to go to Philadelphia to attend the Sweet Pea exhibition. If the committee came out without being financially a loser they deserve great credit as they made a radical change in abandoning the souvenir programme, as so many members objected to being solicited for advertisements. Dinner was served at 6 p. m. and was everything that could be desired. President Nugent distributed prizes at this time thus avoiding the confusion of other years. The return sail was delightful, the steamer arriving at the Twenty-fourth street pier at 9:40 p. m. with everyone tired but happy. The committee consisted of Joseph S. Fenrich, chairman; Robert J. Young, secretary; Alfred H. Langjahr, treasurer; Samuel

S. Butterfield, Chas. W. Scott, Robt. M. Schultz, Bert Chadwick, John Donaldson, Wm. Kessler, Philip Kessler.

The prizes were won and awarded as follows:

Coupon prize—Frank H. Traendly, No. 57 ticket, first; R. Wittman, No. 81 ticket, second; R. Karlstrom, No. 65 ticket, third.

Ladies' bowling—Miss A. Bernie, first; Miss Middleton, second; Mrs. Miesem, third; Mrs. L. Schmutz Jr., fourth; Mrs. Donaldson, fifth; Mrs. B. Chadwick, sixth; Mrs. L. Schmutz Sr., seventh; Mrs. E. Wittman, eighth; Miss J. Traendly, ninth.

The baseball game Bachelors vs. Benedicts was won by the Bachelors, with the game unfinished, with a score of 4 to 0. The nines were as follows: Bachelors—Ed. Manda, p. E. Hanft, c.; Bogart, 1st b.; J. Manda, 2d b.; P. Wolter, 3rd b.; A. Weston, ss.; B. Jacobs, rf.; S. Tierney, cf.; B. Krekeler, lf. Benedicts—A. Bokker, p.; W. Bogart, c.; R. Schwartz, 1st b.; J. Foley, 2d b.; H. Hornecker, 3rd b.; E. Schloss, ss.; A. Richards, rf.; W. E. Cook, cf.; L. Klein, lf. Umpire, Robt. Young.

Handsomest baby under 2 years—Jos. Kessler, first; John Clapton Donaldson, second; Andrew Joseph Handel, third; Gladys Manker, fourth.

Handsomest lady—Mrs. Holt Sr., age 75 years.

Children's race under 5 years—Wm. Einsemann, first; Martha Schmutz, second; Evelyn Rickards, third; Augusta Hornecker, fourth; Herbert Klein, fifth; Sidney Chadwick, sixth; Earl Cook, seventh.

Children's race, 5-7 years—Genevieve Einsemann, first; Ethel Bettner, second; Wm. Miller, third; Alfred Schmutz, fourth; Chas. A. Traendly, fifth; Dorothy Bolles, sixth; Anna Karlstrom, seventh.

Girls' race, 7-9 years—Katherine Mirsem, first; Margaret Salkind, second; Gertrude Schimmel, third.

Boys' race, 7-9 years—Charles Miesem, first; Joseph Wolter, second; Ira Friedberg, third.

Girls' race, 10-12 years—Barbara Miesem, first; Louise Landon, second; Eloise Schmutz, third.

Boys' race, 10-12 years—Erwin Einsemann, first; Lawrence Einsemann, second; George Wolter, third.

Young ladies' race, 13-15 years—Anna Miesem, first; Olive Iler, second; Alice Wolter, third; Margaret Weber, fourth; Marie Thorne, fifth.

Boys' shoe race, 13-16 years—Wm. Manda, first; Charles Bogart, second; George Wolter, third; Lawrence Einsemann, fourth.

Boys' race, 16-19 years—Philip Wolter, first; Samuel A. Mills, second; Edward Manda, third; Chas. Bogart, fourth.

Young ladies' race, 16-20 years—Dora Streible, first; Annie Bernie, second; Jean Birnie, third.

Special race, John Miesem vs. C. W. Scott, won by John Miesem.

Men's pipe race, which was changed to a fat man's race—Joseph Manda, first; E. Jacobs, second; Jacob Dereser, third.

Married ladies' race—Mrs. A. P. Cain, first; Mrs. A. G. Handel, second; Mrs. Frances Salkind, third; Mrs. H. Hornecker, fourth.

Married ladies' needle race—Mrs. A. P. Cain, first; Mrs. Wm. Ebert, second; Mrs. Frances Salkind, third.

Three-legged race—Samuel Mills and Paul Rigo, first; Edward Manda and A. G. Handel, second.

Sack race—Edward Manda, first; Walter Schactel, second; Charles Bogart, third.

Peanut race (under 10 years)—Ira Friedberg, first; Chas. Miesem, second; Chas. A. Traendly, third.

## European Horticulture.

FROM THE BRITISH TRADE JOURNALS.

The Effect of Tar on Vegetation.—A considerable amount of correspondence has taken place from time to time as to the use of tar on roads and its effect on vegetation in the immediate vicinity of the same, the general opinion seeming to be that although the operation greatly reduces the quantity of dust, that which comes from such roads is very injurious, so that it is little use attempting to grow any plants with somewhat tender foliage in adjacent gardens. I fear this failure is likely to be very apparent in many suburban gardens and those close on highroads where there will be a heavy motor traffic during the coming season, for tar is already very strongly in evidence alike on roads and side paths, the latter previously treated with asphalt and getting somewhat worn. In the latter case, the tar on the hard surface does not absorb the fine stuff thrown over it so readily, with the result that a high wind sends the dust drifting about in clouds. The result of this is rather disheartening under such conditions; but until local authorities find a substitute for tar that is innocuous to vegetable-life, I suppose owners and gardeners will have to accept the situation. It seems difficult, if not impossible, to suggest a remedy. Disappointments which have arisen in connection with the above have been recalled by an incident in a very pretty suburban garden in which tar has also played a prominent part, and which I thought might be worth noting to avoid mishaps of a similar nature. This came about through coating a long stretch of trellis-work devoted to climbing plants (roses, clematises, honeysuckles and lathyrus) with a preparation specially recommended because of its rapid drying-in qualities. There is a slight odor of tar about it, and special precautions were taken as to it coming in contact with the foliage; but the latter, notwithstanding, was badly affected, *Lonicera Halleana* and the everlasting peas the worst, the leaves being covered with tiny spots.

Present-day Gardening.—There is nothing whatever to be said against the modern rage for gardening, which is the most innocent and healthy of amusements, except that it tends perhaps to be too purely horticultural. It has not, says The London Times, the vices of the old kind of horticulture, for no one now tries to make flowers look as artificial as possible; but it has new weaknesses of its own which do to some extent lessen the beauty of the modern garden. There is a rage for newly discovered and for rare and difficult plants, and many a skilful gardener spends all his skill upon horticultural experiments. The enormous variety of hardy plants tempts the ambitious amateur to make a collection rather than to ornament his garden. There are so many of them which he must grow if he is to win the respect of other amateurs that he is apt to find no room for the old favorites, which anyone can grow and everyone ought to grow. In fact, the act of gardening is to some extent affected by the hurry and competition of modern life, and there are fashions in plants as violent and as transient as fashion in dress. With all our advance in horticulture we have not attained, like the Japanese, to any settled canons of judgment. Our fancy is taken by new and lurid colors in flowers, by rare and odd or by some violent eccentricity in their habits. But these weaknesses are all part of our general defects of taste. They are not caused by the modern passion for gardening; they may sometimes pervert it. We are learning to think more of the plant than of the cut flower, and that is the

## Vaughan's Seed Store, CHICAGO NEW YORK

beginning of all sound taste. The old kind of flower show encouraged both exhibitors and spectators to think only of the flower and to ignore its relation to the plant. The Temple Flower Show does not foster this kind of error. More and more it becomes a show of plants rather than of flowers, and its enormous popularity is a proof of the growth of good taste in gardening.

Annuals in Pots.—In walking around the Temple Show, one could not fail to be struck with the important part taken by annuals in the floral display. Generally speaking, the herbaceous calceolarias and many of the cinerarias come under that head, but they are scarcely looked upon in that light. At the show the different forms of schizanthus made a magnificent display, and scarcely less attractive were the clarkias, of which there are now some richly-colored forms. A very striking kind is *Firefly*, whose blossoms are of a salmon-coral tint. The cinerarias in their various colors are all beautiful, but one of the most charming is *Blue Gem*, whose blossoms, though smaller than in some of the others, are of a delightful shade of blue, and freely borne. The forget-me-nots, too, particularly the neat-growing kinds, whether white, blue, or pink, form pretty pot plants, while the fragrance of the mignonette always gains admirers. In this respect the stocks are little, if at all, behind, and then, in addition, their flowers are remarkably showy. Godetias, too, are very attractive annuals, and are easily grown in pots.

Oldest Tree in the World.—Mexican scientists have just announced their discovery of the oldest living thing on earth. It is the Montezuma cypress at Chepultepec. They did not discover the tree, which is well known for its size—its trunk is 118 ft. in circumference—but they have discovered its age, there or thereabouts, to be 6,150 years, and have published their scientific proofs. Humboldt described an enormous Hoakhad tree in central Africa as the oldest organic monument in the world, but its diameter, 29 ft., is 10 ft. less, and its age, 5,160 years, is a thousand years less than that now assigned to the Mexican cypress. The age of these trees is estimated from their size. One hundred years ago Dr. Candolle established the age of a yew tree in Tustling churchyard in Perth at 2,500 years. The gigantic redwoods of California are quite modern compared with some of the giant trees. The huge Sequoia of the Mariposa, known as the

"grizzly giant" is 4,680 years old. The "father of the forest," which is now prostrate, was held to be much older than that.

Meconopsis Paniculata.—I noted this distinct species in the group arranged at the Temple by the Burton Hardy Plant Company, Christchurch. The term distinct is employed advisedly, since the whole beauty of a plant of this kind, whose flowers are arranged in a close columnar spike—the individuals appearing either sessile or on very short footstalks—is not, I think, revealed. M. Wallichii and M. integrifolia impress one by reason of their unique, imposing characteristics—so unique and imposing, indeed, that other species approximating to them in color, if inferior as garden plants, naturally suffer by comparison. It may be that the species now under notice, and which is yellow-flowered, would appear to greater advantage in the garden than in the exhibition tent.

## The Seed Trade.

### American Seed Trade Association.

Leonard H. Vaughan, Chicago, President;  
Marshall H. Durva, New York, First Vice-  
President; Edgar Gregory, Marblehead  
Mass., Second Vice-President; C. E. Kendel,  
Cleveland O., Secretary and Treasurer.  
Next annual convention, June, 1912.

GREEN FLY is reported as working unusual havoc on the California sweet pea crop.

JOSEPH BANCROFT & SON, Cedar Falls, Ia., report a long season and heavy work all the time.

MILWAUKEE, WIS.—A. Currie & Co. report that they are well satisfied with their first season's business.

COLORADO freesias are now offered in Europe at 50 francs per 100, making the price about \$10 to \$15 per 100 in this country.

DALLAS, TEX.—The new officers of the Texas Seed & Floral Co. are C. W. Robinson, president; E. P. Brown, secretary and treasurer. R. Nicholson, formerly president, being no longer connected with the firm. The new warehouse, a solid concrete, fire-proof building containing 60,000 square feet of floor space, will be completed September 15.

BOSTON, MASS.—The Thomas J. Grey Co. report a very largely increased business over last year, both in mail and counter trade. Doubtless this is in a measure may have been caused by the recent changes (consolidations) in the seed trade here and the connection of Messrs. Gleason and Barney (for so many years managers of the Schlegel & Fottler Co.) with this house.

LOUISVILLE, KY.—Wood, Stubbs & Co. say: "All the spring months have shown increase over that of last season. April was very slightly increased. March was not very much increased and May will probably run 100 per cent better. We are looking for a good season in June, also on cow peas, millet, sorghum and other summer crops as the hay crop is very short all over the country. Corn has not had a very good start. Oats have suffered from hot weather and pastures are burning up in many sections. Our own immediate locality has been seasonable with the exception that it has been very dry and farmers are complaining of the potato and onion crops."

### The Dutch Invasion.

The following firms are advertising Dutch bulbs in The Garden Magazine for July:

Ant. Roozen & Son, Overveen, Nr. Haarlem, Holland.

F. Hekker & Co., Overveen, Bei Haarlem, Holland.

Van Bourgondien Bros., Hillegom, Holland.

Gt. Van Waveren & Kruijff, Sasenheim, Holland.

### First Aeroplane Shipment Made to Burpee.

New York, June 28.—The first piece of merchandise ever delivered at sea by aeroplane just missed the upper deck of the giant White Star liner Olympic today as it steamed through the narrows, outward bound on its maiden eastward passage.

W. Atlee Burpee.

Retiring Pres. National Sweet Pea Society

W. Atlee Burpee, the well known seedsman of Philadelphia, had contracted for delivery of the package, before sailing, with a department store, which in turn engaged Thomas Sopwith, the English aviator who recently took up Henry W. Taft, the president's brother, for a sky ride.

With Richard R. Sinclair, secretary of the Aero Club, holding the package, Sopwith rose from the aviation grounds at Garden City and timed his flight to meet the liner in the narrows. While

Sopwith controlled the aeroplane, Sinclair dropped the package at the given signal. A wireless message reported it fell into the sea.

Mr. Burpee is accompanied on the voyage by E. W. King, of E. W. King & Co., Coggeshall, and E. J. Cullen, of Thomas Cullen & Sons, Witham, returning to England.

### Georgia Notes.

News comes from the collard seed growing section of Georgia that the crop is very short this season on account of the late cold, which, while the plants were in full bloom, cut them down, some patches being completely killed and the ground planted with other crops. The harvest will be from 75 to 80 per cent shorter than last season, and the prices on seed will likely range considerably higher than for several seasons past.

The growing of velvet beans for seed is becoming quite an industry in Florida, and for the past few years they have been grown successfully for seed in southwest Georgia, in Grady and Decatur counties. The acreage in and around Cairo, Ga., this season will run up into the hundreds.

M. B.

NEW YORK.—Loechner & Co., the new importing and exporting firm, report business fair. Burnett Bros. report: "Our business up to the present date we find shows a decided increase both in our general order and transient trade. This is especially gratifying considering crop failures and prevailing high prices. The shortage of certain crops caused considerable alarm during the early part of the season and we were very fortunate in being able to meet the demands of our increased business."

DES MOINES, IA.—The Iowa Seed Co., report as follows: "Taking the season as a whole, we have received a few more mail orders than in 1910 but they average much smaller, so that the total receipts from the mail order trade will be less than last year. On the other hand, the local trade has increased and it is still keeping up very nicely. The plant order trade by mail has been larger on everything except roses. The trade on both the small roses and the two-year-old dormant stock has decreased, being smaller, we believe, than for several years previous."

CLEVELAND, O.—A. C. Kendel's Seed Store reports as follows with regard to trade this season: "As anticipated when cold weather was prolonged so late at the beginning of the season, we have been experiencing the greatest rush of trade for a longer period than we can remember. The plant trade, which is reaching large proportions, has so closely followed the seed trade that some days it seemed to require the united efforts of the whole force working to the limit to take care of the business. We are still very busy and will be for two or three weeks so that the total as compared with other years can not be given as yet, but indications are that it will be equal to the best. The prospects are good for a bumper crop of fruit of all kinds in this section, which means a large sale of spraying materials."

Established 1810.

L. B. CODDINGTON, Murray Hill, N. J.

Richmond, Ind.

A fishing party from Richmond, Ind., consisting of James E. Jones, proprietor of the Advance Co., his son, Raymond, Fred H. Lemon, proprietor of Fred H. Lemon & Co., florists, and two other local friends, motored to Colon, Mich., on June 23. The drive was made on a very warm day and some tire trouble was experienced. Mr. Lemon, standing 6 feet 2 inches, wearing borrowed clothes for a fishing costume, represented a typical Ichabod Crane. Regardless of this, his fine disposition and may comical jokes kept the party in a merry condition at all times. Several fine fish were caught by the party, including a "billfish" or "saarfish" which was 42 inches long. The rushed condition of the two above named firms shortened the stay for the party and the return was made on June 27 without incident.

Fredericton, N. B.

Trade has been very good up to date. On June 22, the date of the coronation, the governor of the province gave a ball for which there was a good decoration. Several weddings have created a demand for flowers and there has been considerable funeral work, which has called for a good many white flowers. Peonies, carnations and lily of the valley sold exceptionally well. At this season of the year it is the funeral work that keeps the florist alive, for it now seems as though the floral piece, both with rich and poor, is as much a necessity as the casket. The crops are all looking well with the prospects of a bountiful harvest. There has been an unusual heavy demand for vegetable plants this year.

J. B.

**ARTHUR T. BODDINGTON, Seedsman,** 342 W. 14th Street  
NEW YORK

### The Panama-California Exposition.

The exposition to be held in San Diego, Calif., in 1915, promises to be exceptionally interesting and valuable. Few persons have any realization of the vast work the government has been doing in recent years in increasing the value of the products of the soil. It has been spending millions,—yes, hundreds of millions of dollars, in irrigating arid lands, in reclaiming lands that had been classed as worthless, in conserving the forests and in showing how the best could be made of the land by farming, stockraising, beekeeping, taking care of the forests and in re-foresting burned over or waste land.

The Panama-California Exposition, to be held in San Diego to celebrate the opening of the Panama canal, will run a full year, as the equable climate makes this possible. The Panama-Pacific Exposition, to be held in San Francisco, also in 1915, will be kept open six months. The two expositions will be supplementary to each other, but the San Diego exposition will have many features never before seen in such a show and it promises to be equally as interesting in its way as the exposition by the Golden Gate. San Diego has about \$2,500,000 to spend on its exposition independent of county aid or the expenditures of foreign countries. The latter will probably include the Latin-American republics, and possibly China and Japan. The style of architecture will be wholly of the mission, or Spanish renaissance type. All buildings will be permanent.

The site of the exposition is Balboa Park, in the center of San Diego, containing 1,400 acres. In it will be the finest exhibit of floriculture and arboriculture ever seen in this part of the world. Millions of plants and trees are now being propagated for this purpose,

### For Fall Planting

Lilium tenuifolium, Hansonii, Davuricum, Henryi, Elegans and Wallacei; Daphne cneorum, Delphinium formosum, Syringa japonica, German and Japan Iris. Fall list issued in August.

## Market Gardeners

Vegetable Growers' Association  
of America.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Boston Mass., Vice President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

### Greenhouse Culture.

Those growers who carry heavy crops of cucumbers and tomatoes in July will find some shade a benefit. While both are heat-loving subjects, a clear greenhouse roof is too much for them in mid-summer. Cucumbers especially are not so fond of high temperatures as some suppose; in fact the best results are obtained in very moderate regions. The writer remembers the finest field of cucumbers he ever saw was situated at the foot of a series of hills running from northwest to southeast, with the result that the noon sun crept behind the hills, saving the enormous afternoon exposure. Air slaked lime sprayed on is most generally employed on large greenhouses as whitening and lead are rather expensive. If lime is used it must be air slaked as any fresh lime will stay there and cause no end of trouble in the fall.

Many crops of cucumbers are cut short by insufficient water, as a heavy growth of vines requires enormous water supply in hot weather. There is only one way for inexperienced parties to find the true condition and that is to dig in here and there and find how deep their waterings have gone.

Black rot of tomatoes is generally caused by lack of water at the roots, hence the name dry rot. While we do not want much water on tomatoes early in their growth, they need plenty when fruit is under way.

MARKETMAN.

### The Melon Aphis.

The most generally injurious insect pest to the cucumber and melon patch in Nebraska and adjoining states is the aphis or plant louse, and the Agricultural Experiment Station of Nebraska has issued a bulletin entitled "How to Combat the Melon Aphis." This insect attacks the plants about the middle of June and collects on the under side of the leaf and by sucking the sap cause the leaves to curl, discolor, shrivel and die. Whole fields are frequently thus destroyed within a week. While the aphis has a large number of natural enemies such as lady bugs and flies, yet artificial control is necessary, which includes spraying and fumigation. Spraying can be done by the commercial tobacco extract "Black Leaf," diluted one part to fifty parts water, or a soap-and-tobacco wash prepared by dissolving one and one-half pounds of soap in one-half gallon of water, adding one-half gallon of strong tobacco decoction, which can be made by steeping tobacco stems in water until the decoction becomes the color of strong coffee. In spraying care must be taken that the under side of the leaf is covered with the liquid.

Fumigation is done by carbon bisulphide or tobacco. The small grower can invert tubs, buckets, pails, tight

boxes, etc., over the young infested plants, and place inside about a teaspoonful of bi-sulphide of carbon to each cubic foot of space inside the vessel, fitting the vessel tightly to the ground. For larger growers it is much more satisfactory to construct light wooden frames of 2x3/4-inch lumber, four feet by six feet and one foot high, strengthened with cross pieces and covered with cheap, closely-woven muslin, which is better soaked in linseed oil after fitting to the frame, the cloth being allowed to lap several inches at the bottom all the way around. These frames are placed over the infested plants and a sheet of Tobak-lime, Nicofume or one of the other fumigating sheets torn in parts and put into a tin can near a corner and lighted with a fuse or taper and allowed to smoulder. The laps and sides are then covered with dirt to prevent the escape of the fumes. Ten or fifteen minutes are required to kill the aphids when the frame can be removed to another section and the operation repeated, one man can handle about ten frames. This work should be done on still days when the vines are damp in the morning.

### Potato Formulas.

The Maine Agricultural Experiment Station advises the use of the following formulas in killing potato bugs and controlling potato blights:

Arsenate of soda, stock solution, 1 quart.

Bordeaux mixture, 50 gallons.

Arsenate of soda stock solution is prepared as follows: Place two pounds of white arsenic and eight pounds of sal soda in two gallons of water. Boil until dissolved and add water to make up to original volume. Store in well stoppered bottles or jugs with a poison label on them. This is a much cheaper poison than Paris green to use with Bordeaux and it remains in suspension better, but it is not safe to use it alone with lime. White arsenic costs less per pound than Paris green and will go twice as far in that two gallons of soda stock solution will do as much execution as four pounds of Paris green. The Bordeaux mixture for

blights is made according to the two following formulas.

|                                            |            |
|--------------------------------------------|------------|
| Copper Sulphate .....                      | 5 pounds   |
| Fresh lime (unslaked) ..                   | 5 pounds   |
| Water .....                                | 50 gallons |
| Or—                                        |            |
| Copper Sulphate .....                      | 5 pounds   |
| Hydrated lime (prepared or ground lime) .. | 6-7 pounds |
| Water .....                                | 50 gallons |

The copper sulphate is dissolved and the lime slaked in separate vessels. A wooden or earthen vessel must be used for the copper sulphate as it corrodes iron. Each solution should then be diluted with half the water and then the cold, dilute sulphate and milk of lime solution quickly united and thoroughly mixed. Never pour concentrated solutions together. If impracticable to pour the two dilute solutions into the sprayer or mixing tank simultaneously, the dilute copper sulphate solution should be first placed in the tank and the dilute milk of lime solution quickly added with constant stirring. In both formulas fifty gallons is the capacity of an ordinary oil barrel.

## The Nursery Trade

### American Association of Nurserymen

J. H. Dayton, Painesville, O., President;  
W. H. Wyman, North Abington, Mass., Vice-  
President; John Hall, Rochester, N. Y., Sec'y.  
Thirty-seventh annual convention to be  
held at Boston, Mass., 1912.

### Conifers in the Arnold Arboretum. VI.

*Thuja occidentalis*, the common arborvitae, has been remarkably prolific in producing a large number of distinct garden forms. The common typical form is by no means a conifer to be neglected. It grows from 60-70 feet tall and generally forms a narrow pyramidal outline, and when grown under conditions where it is happy and robust it is a good garden ornament. A number of years since there appeared in Canada a serious insect pest in the form of a small caterpillar, known as the White Cedar Borer, which lived out its cycle and bored in the young twigs of the arborvitae and eventually caused its death. Much havoc was caused in natural plantations of arborvitae in Canada from this borer. Its presence was detected in Western New York amongst natural plantations a few years since, but lately it seems to have disappeared, probably attacked by some parasite. There is no appearance of this pest in the Arnold Arboretum. There is a large number of the various garden forms assembled together, and they are in excellent health and form. *Vervenaena compacta*, *globosa*, *minima*, *Hoveyi*, *Spathi*, *filicoides*, *aurea*, *pyramidalis*, *Hudsonica* and *Hoopesi* are amongst some of the varieties in the collection. The dwarf forms of the common arborvitae are most excellent garden plants, and in gardens where space is much restricted, and where a few small conifers are much desired, the dwarf arborvitae are just the thing. They must not be planted, however, where dogs are permitted to assemble as most gardeners are aware that dogs soon disfigure arborvitae if their proximity is allowed.

*Chamaecyparis obtusa* and *C. pisifera*, usually known in most gardens and nurseries under the generic name of *retinospora*, are beautiful Japanese evergreens whilst they are young at least. Usually when they approach adult age in this country they look unhappy. They seem to do much better in the Arnold Arboretum than they do in Western New York. There is a very interesting collection of the various forms of the two species in the arboretum. These garden varieties of the Japanese *Chamaecyparis* are interesting studies, because a number of the forms have foliage so positively distinct from the types, that if their origins were not known and proven, a horticulturist not acquainted with them would never suspect their varietal origins. For example, who would suspect seeing it for the first time that *squarrosa* was a variety of *Chamaecyparis pisifera*? Perhaps the two most beautiful varieties for garden decoration are *squarrosa* and *filifera*, both forms of *C. pisifera*.

Lawson's Cypress, *Chamaecyparis Lawsoniana*, one of the most lovely of conifers indigenous to the Pacific coast, does not appear to do well in the arboretum or around Boston. Lawson's cypress is another evergreen that has been remarkably versatile in producing a large number of distinct garden varieties, and these are highly ornamental in the British islands and other parts of Europe. Last September, when walking through the Highland Park pinetum with Walter Hunnewell and other members of his family, of Wellesley, Mass., he was much surprised to see a healthy individual of Lawson's cypress about 14 feet tall. His surprise, however, was much greater when I showed him a specimen of Lawson's

cypress over 50 feet high in the Ellwanger & Barry vineyard in a sheltered place, and planted there between fifty and sixty years ago by the late George Ellwanger. I am strongly inclined to believe, however, that this individual in the Ellwanger & Barry vineyard must be a particularly hardy form because the fierce winter of 1903-1904 did not appear to injure it in the least degree.

*Thuyopsis dolabrata*, a beautiful evergreen from Japan, does well in the arboretum, and it does remarkably well at Wellesley. It is somewhat remarkable that this conifer refuses to be comforted or coaxed into a healthy condition at Rochester, and I have not yet come across a good healthy plant anywhere in Western New York. This is one of the vagaries of plant cultivation that is hard to explain. Because this is not a question of hardiness. There are some climatic or soil conditions in Western New York that do not suit it.

### CALCEOLARIA HYBRIDA

#### Extra Choice Mixed

Our mixture is composed of the choicest selection of the tigered, marbled, spotted and variegated varieties, and we know will give entire satisfaction. Trade pkt. (1,000 seeds), \$0.50, 3 trade pkts. for \$1.40.

### GLOXINIA HYBRIDA

Vaughan's Columbian Mixture is made up by ourselves from the choicest spotted, tigered, edged, marbled and splashed sorts of the upright and horizontal type, and includes such choice new sorts as Empress William and Frederick, Princess Louise, Delancey, etc., and we know that better seed is not to be had at any price. Trade pkt. (1,000 seeds), \$0.50; 3 trade pkts. for \$1.40.

### MIGNONETTE

New York Market. This is an extra choice strain of Mignonette for greenhouse culture. Our seed is greenhouse grown, raised by a most careful grower. The plants grow from two to three feet high, and produce flower spikes up to 20 inches long, according to the quality of the soil, weather and treatment. Trade pkt. (about 1,000 seeds), 50c; per oz., \$7.00; 1/4 oz., \$1.00.

### VAUGHAN'S INTERNATIONAL PRIMULA MIXTURE

This mixture is composed of the most salable colors of Single Flowering Chinese Primulas, the best whites, pinks and reds, with a sprinkling of other colors, enough to give a large variety of colors, the most important shades predominating. We have taken special pains to make this mixture as complete as possible, and unreservedly recommend it to everyone.

Trade pkt. of 350 seeds, 50c; 5 trade pkts., \$2.00; per 1-16 oz., \$3.25.

### ASPARAGUS SPRENGERI

100 seeds, 15c; 250 seeds, 25c; 1,000 seeds, 75c; 5,000 seeds, \$3.25.

Our list of "Seeds for Summer Sowing," now ready; if you have not received a copy, please write for same.

### VAUGHAN'S GIANT PANSIES

#### Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. Trade pkt. 50c, 1/4 oz. \$1.00, 1/4 oz. \$2.00, oz. \$8.00.

#### Vaughan's "Giant Pansy Mixture"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Tricardeal, the splendid Cassier strain. Trade pkt. 25c, 1/4 oz. 60c, oz. \$4.00, 1/4 lb. \$14.00.

### Vaughan's International Pansies

#### The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain most alone and not alone at a color of the 1,000 rate, germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt. 50c, 1/4 oz. \$1.50, 1/2 oz. \$5.00, oz. \$10.00.

### CINERARIA

#### Vaughan's Columbian Mixture

It consists of a mixture made up by ourselves of the choicest English, French and German strains, and cannot be excelled in variety of colors, size, shape and substance of flowers, and perfect habit of plant. Trade pkt. (500 seeds), 50c; 3 trade pkts., \$1.40.

### Vaughan's Giant-Flowered Cyclamen

Pure White (Mont Blanc); Dark Crimson, Rosa von Marienthal. "Duybreck" pink; Dark Rose, White with Crimson Eye. Per 100 seeds, 75c; 1,000 seeds, \$5.00; 250 seeds of a color at the 1,000 rate. Giant-Flowered Cyclamen, extra choice mixed. Per 100 seeds, \$0.50, 250 seeds, \$1.15, 1,000 seeds, \$4.50, 5,000 seeds, \$20.00. This mixture is made up from the above separate colors. New Salmon (Glory of Wandsbeck). Per 100 seeds, \$1.35; 250 seeds, \$2.85; 1,000 seeds, \$10.50.

### Giant Orchid-Flowered Cyclamen

These are exceptionally fine, with large flowers that are fringed and fringed in wonderful fashion. Pure White, Red, Pink, White with Carmine Eye, and Lilac Colored.

Each, per 100 seeds, \$1.00; per 1,000 seeds, \$8.00. Giant Orchid-Flowered Cyclamen, in choicest mixture: 25 seeds, \$0.25; 100 seeds, 85c; 1,000 seeds, \$7.00.

### English Grown Giant Cyclamen

Price, 100 Seeds, \$1.00; 1,000 Seeds, \$8.00.

Princess May, Pale pink.  
\*Princess of Wales, Giganteum variety, Pink.

Excelsior, White, with red base. Extra large flowers.

### SMILAX

Trade Pkt., 10c; oz., 25c; 1/4 lb., 90c; lb., \$3.00.

### Insects in German Vineyards.

The wine growers of Germany are beginning to realize that they themselves are largely responsible for the failure of the wine crops of the past few years, states Walter Schumann, late American Consul at Mainz. Year by year the various insects so harmful to the vines have increased alarmingly, and great wealth has been destroyed by these voracious pests. All efforts to combat this plague have availed nothing, for the wine growers, in their eagerness to turn every square foot of land available into vineyards, and in their fear that even the smallest bush or hedge might deprive their vines of the much-needed sunshine, have for years rooted out every bush, hedge, and tree that was any-

where near a vineyard, and thus in their war against the insects have driven away their greatest helpmates, the insectivorous birds, by depriving them of opportunities to nest.

The shortsightedness of the wine growers has been brought home to them by the endeavors of Baron von Berlepsch to combat the insect plague on his large domains by giving every variety of insectivorous birds the opportunity to nest. His success has been so marked and the results obtained so satisfactory that the wine growers have now awakened to the fact that their only recourse is in attracting insectivorous birds to their vineyards. Under the auspices of the local authorities they have set about methodically to provide nesting oppor-

tunities by planting bushes and hedges and hanging up nesting boxes in every available place. At the invitation of the authorities, Baron von Berlepsch recently made an inspection of the wine-growing districts of Germany. He approved the steps taken and gives further valuable hints as to the best methods of attracting the variety of birds needed.

Although the work of providing nesting opportunities has only been commenced this year, and it will require a number of years before the balance of nature has been restored and the harmful insects have been checked, nevertheless beneficial results have already been recorded, and it is hoped that within a few years the vineyards will be comparatively free from insect pests.

## THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, \$1.25

440 So. Dearborn St.  
CHICAGO.

### Tacoma Rose Show.

The first rose show of the Tacoma Rose Society was held June 25 and was a great success. This was made possible by the efforts of the local florists whose displays added the necessary touches to make it one of the finest rose shows ever held on the Pacific coast. Tourists who have seen all the rose shows and festivals held on the coast within a year have given public expression to the remark, "Tacoma beats them all."

The large floor space in the armory was filled with tables of flowers and the estimate placed on the number of cut flowers displayed was 50,000, nearly all being roses. Probably over 200 varieties were shown and practically every flower was a good one. The Rose Society has selected "Lyon" rose as Tacoma's official flower. There were nearly 400 vases of Mad. Caroline Testout exhibited and to award the prizes for the six and 12 best the wisdom of several Solomons must have been needed.

The display by the city parks system was very creditable. The following local florists made exhibits and were awarded honorable mention: The decorated dinner tables shown by Mrs. Watson and Mrs. Hayden were especially fine, Mrs. Watson's display being a decoration in pink, and that of Mrs. Hayden was in lavender. Honorable mention was awarded Smith Floral Co., H. H. Hinze, H. W. Manike, Northwestern Floral Co., Puget Sound Fern & Evergreen Co., H. Ben-thins, B. Britten, L. Tschuncko Co., The California Florists and city parks. E. J. Bernerche of Olympia made a beautiful display of roses, including several newer varieties and also many beautiful peonies. Special mention was given to his display. It was estimated that there were 5,000 paid admissions, so the society has a good surplus for use another season.

A display made from the grounds of the Northern Pacific Hospital was very much admired for the quality of flowers and the great variety. Nowhere in the United States can finer roses be grown so easily as about

## BOBBINK & ATKINS

World's Choicest Florist and Nursery Products.

We are growing in our greenhouses and in our 250 acre nursery a large variety of material constantly in demand by florists. Our illustrated General catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

Hydrated pulverized and bagged, will keep, is the best you can buy and a paying investment at \$4.50 per one-half ton.

ALBERT M. HERR, Lancaster, Pa.

### "And Our Tears, Illinois!"

"How is the good roads movement progressing in your state?" inquired the traveler.

"Why—er," hesitatingly answered the native of the Sucker state, "it hasn't quite reached the stage of a movement yet, I believe; it's what you might almost call a promising—ah—impulse."

## Gold Letters

Gummed Gold, Silver and Purple Letters for inscriptions on Floral Designs. Best and Cheapest on the Market. Send for Samples and Prices.

J. Lichtenberger, 1564 Ave. A. NEW YORK Telephone Lenox 5644.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPAID CO., Youngstown, Ohio

## IT IS NOT...

what you pay for the advertisement but what the advertisement pays you. It pays to advertise in the American Florist.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

## What the Users say

## Kroeschell Boiler Durable.

In 1894 we bought one of your No. 12 boilers to take the place of four smaller boilers of another make. Your boiler has done the entire work to the highest satisfaction, saving labor and about one-third of the fuel we used to burn before. We had that boiler up to 1896, that is 12 years, having no repairs on it whatever, except one set of flues we put in 1900. Last fall we installed one of your No. 14 boilers, having enlarged our plant. It takes care of 35,000 sq. ft. of glass very easy. When firing we keep the ash door open only about one inch. We think your No. 14 boiler could carry 40,000 sq. ft. of glass.

**Dracena indivisa,** 2½-in., \$2.50 per 100. Henry Daut, Decatur, Ill.

## FERNS.

**Nephrolepis Glatrasii,** 2½-in., \$8 per 100; \$75 per 1,000; 4-in., \$25 per 100. Geo. Glatras, 463 Summit Ave., West Hoboken, N. J.

**CLADODIUM SCHIEDEL,** 7-in., \$2.50 each, fine plant. GEO. WITTOLD CO., Edgebrook, Chicago, Ill.

**FERNS FOR DISHES,** 2-in., nice plants, \$3 per 100; \$25 per 1,000. GEO. WITTOLD CO., Edgebrook, Chicago, Ill.

**Ferns,** mixed for dishes, 3-in., 85c per doz.; \$6 per 100. Vaughan's Seed Store, Chicago and New York.

**Ferns,** Boston, 3-in., \$5 per 100. Reeser Plant Co., Springfield, O.

**Ferns,** Whitman, 4-in., 25c each; 5-in., 35c; Boston, 5-in., 25c. Geo. M. Emmans, Newton, N. J.

**Ferns for dishes,** 2½-in., \$3.50 per 100; \$30 per 1,000; 3-in., \$2 per 100. Frank Oechslin, 4911 Quincy St., Chicago.

**Ferns,** John Scott, Rutland Rd. and E. 45th St., Brooklyn, N. Y.

**Ferns,** Boston, 2½-in., \$3.50 per 100. The Good & Reese Co., Springfield, O.

**Ferns,** Bobbink & Atkins, Rutherford, N. J.

**Ferns,** Boston, 3-in., \$1 each. F. R. Pierson Co., Tarrytown-on-Hudson, N. Y.

**Adiantum Farleyense,** 2½-in., \$15 per 100. J. A. Peterson, Westwood, Cincinnati, O.

## GERANIUMS.

**Nice young stock** from 2½-in. pots, Nutt. Grant (double). Pottiering, Buchner, \$2 per 100; \$17 per 1,000. Cash. The W. T. Buckley Co., Springfield, Ill.

**Geraniums,** Nutt, Perkins, Grant, La Favorite, R. C. \$1.25; 2-in., \$2; 3-in., \$4 per 100. Viand, Castellana, Pottiering, Jaulin, Ricard, Buchner, R. C. \$1.50; 2-in., \$2.50; 3-in., \$5. Geo. M. Emmans, Newton, N. J.

**Geraniums,** standard sorts, 3-in., \$3 per 100; \$18.50 per 1,000. Novelties, one each of 50 sorts, \$5. Ivy geraniums, scented and variegated geraniums. R. Vincent, Jr., & Sons Co., White Marsh, Md.

**Geraniums,** R. C. Nutt, Ricard, Pottiering, \$10 per 1,000. A. M. Herr, Lancaster, Pa.

## GREENS.

**Greens,** dagger and fancy ferns, \$1 per 1,000. Galax, 90c per 1,000. Boxwood, 50-lb. case, \$7.50. Laurel Wreaths, 10-in., \$1.75 per doz.; 12-in., \$2.25; 14-in., \$3; 16-in., \$4.50. Laurel trimming, 4c and 5c per yard. J. Jansky, 19 Province St., Boston.

**Greens,** southern wild smilax, log mosses, natural and perpetuated. E. A. Beaven, Evergreen, Ala.

**Greens,** evergreen, fancy and dagger ferns, bronze and green galax. Geo. Cotsonas & Co., 60 W. 23th St., New York.

**Greens,** wild smilax and decorative greens. George M. Carter, Evergreen, Ala.

**Loretta,** \$1.50 per case. Henry M. Robinson & Co., McWilliams, Ala.

## HARDY PLANTS.

**Herbaceous plants.** Bobbink & Atkins, Rutherford, N. J.

## HELIOTROPES.

**Heliotrope,** 2-in., \$2 per 100. Geo. M. Emmans, Newton, N. J.

**Heliotrope,** 2-in., \$2 per 100; 3-in., \$3. R. Vincent, Jr., & Sons Co., White Marsh, Md.

## HYDRANGEAS.

**Hydrangea Souvenir de Claire,** the new hydrangea of Lorraine begonia shade. Strong plants from 3-in. pots, for growing on, price \$5 per 100; \$50 per 1,000. Jackson & Perkins Co., Newark, N. Y.

**Hydrangea Avalsanche,** 2½-in., pots, 60c each; \$3.50 per doz.; \$25 per 100. W. & T. Smith Co., Geneva, N. Y.

**Hydrangeas.** For varieties and prices see advertisement on front cover page. F. R. Pierson Co., Tarrytown-on-Hudson, N. Y.

## JUMPING BEANS.

**Mexican Jumping Beans.** Live beans that continue to jump for weeks; the greatest wonder show window and counter trade, 50c per 100, \$4 per 1,000, postpaid. J. A. McDowell, Ap. 107, Mexico City.

## LILACS.

**Lilacs.** Jacs Smits, Ltd., Naarden, Holland.

## LILY OF THE VALLEY.

To Import.

**Lily of the valley.** Jacs Smits, Ltd., Naarden, Holland.

**Lily of the valley.** Otto Mann, Leipzig, Saxony, Germany.

## From Storage.

**Lily of the valley,** cold storage pips, case of 1,000, \$13; case of 3,000, \$36. J. M. Thornburn & Co., 33 Barclay St., New York.

**Lily of the valley.** H. N. Bruns, 3038-42 W. Madison St., Chicago.

## LOBELIAS.

**Lobelias,** Crystal Palace and White, very strong, 2-in., \$1.50 per 100. C. Humfeld, Clay Center, Kans.

## MOSS.

**Sheet bog moss,** \$1.25 per 2 bus. sack. Ohas. H. Cranmer, Uniontown, Pa.

## MUSHROOM SPAWN.

**Write for samples and attractive figures** on Niagara Pure Culture Spawn, direct and transfer. Niagara Mushroom and Spawm Co., Lockport, N. Y.

**Mushroom Spawn.** Lambert's Pure Culture. American Spawm Co., St. Paul, Minn.

## NURSERY STOCK.

**Nursery stock,** evergreens, Conifers and pines, flowering shrubs, fruit trees, vines and climbers. Bobbink & Atkins, Rutherford, N. J.

**Nursery stock,** large trees, oaks, maples, pines and hemlocks. Andorra Nurseries, Chestnut Hill, Philadelphia.

**Nursery stock,** apple and peach trees. Mitchell's Nursery, Beverly, Ohio.

## ORCHIDS.

**Orchids of all kinds.** Lager & Hurrell, Summit, N. J.

## PANDANUS.

**Pandanus Vettchili,** \$1 to \$2 each. J. A. Peterson, Westwood, Cincinnati, O.

## PALMS.

**PALMS,** Kentia Belmoreana and Forsteriana, 2½-in., \$1.50 per doz.; 3-in., \$2 per doz.; 4-in., \$3.60 per doz.; 5-in., \$5 per doz.; Latania Borbonica, 4-in., 8c each; \$20 per 100. Phoenix Recinata, 3-in., 25c each; \$3 per doz. Phoenix Belmoreana, 6-in., \$2.50 each. GEO. WITTOLD CO., Edgebrook, Chicago, Ill.

**Palms.** For varieties and prices see advertisement elsewhere in this issue. G. Aschmann, 1012 W. Ontario St., Philadelphia.

**Palms.** For varieties and prices see advertisement elsewhere in this issue. Joseph Heacock Co., Wyncote, Pa.

## PEONIES.

**Peonies,** all vars. Jacs Smits, Naarden, Holland.

**Peonies,** all standard varieties. The Good & Reese Co., Springfield, O.

## PEPPERS.

**CHRISTMAS PEPPERS,** 3-in., \$3 per 100; 4-in., \$12 per 100. GEO. WITTOLD CO., Edgebrook, Chicago, Ill.

## POINSETTIAS.

**Poinsettias,** 2½-in., \$5.50 per 100; \$50 per 1,000. A. Henderson & Co., 162 N. Wabash Ave., Chicago, Ill.

**Poinsettias,** 2½-in., \$6 per 100; \$50 per 1,000. Skidelsky & Irwin Co., 1215 Betz Bldg., Philadelphia.

**Poinsettias,** 2½-in., \$5 per 100; \$45 per 1,000. Scranton Florist Supply Co., Scranton, Pa.

**Poinsettias,** 2½-in., \$5 per 100; \$45 per 1,000. Stuppy Floral Co., St. Joseph, Mo.

## PRIMULAS.

**Primulas** from 2-in. pots, frame grown, no better strains in existence. Queen's Choice, the giant fringed, 12 separate colors, or mixed, 2c. Obconica grandiflora, Ronsdorfer and Lettmann, unrivaled hybrids, 14 colors, or mixed, 2½c. Obconica gigantes, 5 colors or mixed, 3c. Ready June 20. J. L. Schiller, Toledo, O.

**Primula obconica grandiflora** rosa and mixed, 2½-in., 60c per doz.; \$4 per 100. Vaughan's Seed Store, Chicago and New York.

**Primroses.** Jos. H. Cunningham, Delaware, O.

## ROSES.

ROSES.

**3,000 American Beauty roses,** 2-in., nice stock, \$50 per 1,000.

**Mrs. Jardine,** 2½-in., \$100 per 1,000.

**Pink Killarney,** 2½-in., \$5.00 per 100.

**Kaiserin,** 2½-in., \$3.00 per 100.

**WIETOR BROTHERS,**

162 North Wabash Ave. Chicago.

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

## The Kleinschmidt SOIL GRINDER

Here is a machine for all Greenhousemen that

**WILL GRIND AND MIX TO ANY DESIRED FINENESS  
More Soil Than Any Other.**

It is substantially and heavily made, all working parts being of crucible cast steel or steel forgings.

B. S. Myers, foreman for W. J. Palmer & Son, Lancaster, N. Y., states that the No. 4 Mill now in use will grind 50 to 55 yards of soil a day, and had he conveyors to take the soil away, would double the amount.

FOR PARTICULARS AND PRICES ADDRESS

**F. KLEINSCHMIDT & CO.,** Builders' Exchange <sup>21</sup> BUFFALO, N. Y.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repair

Ask your Dealer about our Extension Hose, Extension Rods The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

# The Truth About Boilers

Being Number Two of Four Frank Talks.

The arrows in this sketch show how boilers constructed with flue openings at back of boiler draw the flames away from the front sections, impairing their efficiency.

With the Burnham there is a flue between each section on both sides of the fire chamber. The flames come equally in contact with each section, making every section equally efficient.

—you can well see that if the flue opening for the passage of the gases and smoke be at the rear of the fire box, that the draft will draw them diagonally from the front to the back of the boiler, as shown in cut No. 1. It is obvious that the rear sections must then be kept hotter than the middle or front ones. In short, each section is not equally efficient, which seriously affects a boiler's economy.

The Burnham, however, has flue openings between each section on each side, which allows an equal amount of hot gases to reach each section equally. As a result, each section in the Burnham is equally efficient.

**Lord and Burnham Co.**

Factories:  
Irvington, N. Y. and  
Des Plaines, Ill.

This cut away view shows you the internal construction and workings of The Burnham Boiler.

## The Burnham

It's plain to be seen that the more heat a boiler harnesses up, the less coal you will have to buy—and, as we understand it, you want to spend as little as possible for coal. This being so, and you being about "ready to talk boiler," why not write us and give yourself the opportunity of knowing thoroughly every one of the Burnham's strong points?

We will not bound the life out of you; but you will get some straight, strong boiler economy facts, and it is facts you are after.

### Steam Heating.

ED. AMERICAN FLORIST:

We desire to install a small upright steam boiler to heat 420 feet of 1½ inch pipe along the wall of a greenhouse to be used in spring and fall only. Can give the pipe a rise of 10 feet. What would be the best arrangement to insure perfect circulation? Will a steam trap or pump be required? We shall use gas for fuel. Could it be arranged so that the boiler would care for itself from six to eight hours?

Ohio. M. R.  
The question is not very clear as to whether the pipes are to extend along the wall for a length of 420 feet, or whether that amount of piping is to be used in a coil for a shorter length. In either case there would be no occa-

**IMMEDIATE OR SUMMER DELIVERIES.**

radiation are to be supplied no estimation for using either a steam trap or pump if the lowest part of the returns is four or five feet above the boiler. Using ¼ inch pipe for the coil it would merely be necessary to connect the coil to the boiler and give the coil the proper slope towards the boiler. Without knowing how many feet of

mate can be given of the size for the connecting pipes.

Using gas as the fuel there should be no trouble about allowing the boiler to go for six or eight hours without attention, provided the boiler is large enough to supply water, or arrangements are made for keeping up the supply.

## A Dollar Stands So Big in Some Growers' Eyes

that they can't see the superior points of our superior construction. They can't seem to see that a few more dollars spent will often make an almost good thing—really good. Such men are always comparing costs and not values.

If their grocer, for example, should give them 14 ounces for a pound of butter at a price way below the market price for the best butter, they would put up an awful howl. But if a greenhouse concern skimps his construction or "throws it together" so he can sell it way below the "best butter" mark—what is the difference? More than a difference of opinion, that's sure. It is simply worth what it cost. No more!

Cost is what you pay for a thing; value is what you get for what you pay. Get that thought about values under your hat and keep it there.

Hitchings is not a bargain counter concern; but you do get a greenhouse that is 16 ounces to the pound throughout. And you pay accordingly, and no more! We are looking for a few more growers who want a 16-ounce house. If you are one of that sort, write us.

## Curved Eave Greenhouse at Stockbridge, Mass.

YOU will recall that last year about this time we made a little noise about our special curved eave construction; its goodness — its thorough practicalness — its exceeding attractiveness.

That was a year ago. This morning in looking back to that ad. we started wondering how the construction actually had proved up for the year. So we got down the order books and found that over 85 per cent of the houses we erected

The workroom is one of unusual attractiveness and finely equipped.

on private places last year were the curved eave construction.

When you come to think that we turn out an average of over two houses a day at our factories, and that our kind of curved eave house is up against the strongest kind of competition with other kinds, it speaks well, mightily well, for our particular way of building the curved eave.

If you are ready to build, send for us. If you are just thinking of building, send for our catalog.

### Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements should be carefully pre-  
served, as they mean much to the retail florists  
in dealing with their customers, illustrating as  
they do the various kinds of work that the  
everyday florist is called upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## SUGGESTIONS FOR PLANT GROWERS.

### Genistas.

Keep the genistas trimmed into the  
shape it is desired to have them grow,  
by continually pinching off all long,  
strong shoots that grow away from the  
desired form. The plants can be grown  
in almost any shape, either globular or  
pyramidal, by constant pruning. They  
can also be trained to fancy forms  
such as fans or pillars or even to the  
shape of baskets with handles, which  
make very effective pot plants for the  
Easter trade. These plants, although  
expensive, always attract attention at  
that season of the year. A wire frame  
the form of the handle basket is fast-  
ened over the pot and as the plant  
grows it is tied down to the frame in  
such a manner that when the side  
shoots break they will entirely cover  
the frame. Two strong leaders are se-  
lected and tied over the handles. When  
the shoots reach the edge of the frame  
they are stopped and the side shoots  
immediately break all along the length  
of the growth. These side shoots are  
kept pinched back to hold the form un-  
til mid-winter, when the flower shoots  
form, and if any of these are too long  
and stray away from the desired shape,  
they can be tied in closely so that the  
form is retained. Keep the plants  
either plunged in a frame outside or  
in a cool, airy house and syringe fre-  
quently to prevent them from becom-  
ing infested with red spider. Keep the  
plants in a cool temperature through-  
out the winter, about 45° at night un-  
til March, when they can be given a  
little more heat.

### Primulas.

In growing primulas one should al-  
ways keep in mind that they are cool  
growing plants and do not require any  
forcing with heat, but revel in good  
cool ventilation. The early sown seed  
should now be fine plants in 3-inch  
pots and making good growth if given  
right culture. A shaded frame is the  
best location for them, but if this is  
not to be had, the cool, airy end of the  
greenhouse lightly shaded will grow  
them very well. Water the plants  
carefully, if they are growing nicely  
they will require frequent watering,  
and if they were potted rightly will be

benefited by a light spraying, but this  
must be done with caution or the  
plants will be knocked over and be-  
come broken if the force of water is  
too strong. Keep the plants potted up  
as fast as they need it, so as to get all  
the growth possible before the buds set  
when cooler weather comes on. Any  
flowering shoots that show themselves  
should be immediately pinched out.

### Violets.

The violet plants in the field will  
need constant cultivation not only for  
the purpose of keeping the weeds down  
but also to keep the ground in a fine  
growing condition and to conserve all  
the moisture in the lower soil that is  
possible. The plants will now be send-  
ing forth numberless runners and these  
should be removed, continually keeping  
the plants to the crowns. The plants  
often will make three or four crown  
growths. These should be left upon  
the plants and only the long runners  
removed. These runners can be taken  
off with a knife but should be cut clear  
back to the point where they branch  
from the plant. If any joints are left  
on the running shoots a crop of small  
weak runners will immediately sprout,  
taking the strength of the plant. A  
careful grower can much more quickly  
and better remove the runners by pull-  
ing them out, but care must be taken  
not to disturb the roots of the plant.  
The best way to do this is to grasp the  
base of the plant with one hand, hold-  
ing it firmly in its position as grow-  
ing; take hold of the runner close to  
the plant with the other hand, and  
with a sharp pull remove the runner.  
The pot grown plants of the double  
varieties can be now planted in the  
beds inside, provided the house can be  
given plenty of ventilation both on the  
sides and at the top, but if this is not  
possible it is preferable to keep the  
plants outside until the very hot  
weather has passed. Use plenty of old  
leaf mould or half rotted leaves in the  
soil, which should be well spaded in.  
It is far too early yet to plant any of  
the single violets inside, in fact it is  
better to wait until frosty weather be-  
fore removing these to their winter  
quarters. If planted too early they  
make large quantities of foliage and

will not produce either as many or as large flowers as plants that are not so heavily furnished with foliage.

#### Decorative Stock.

This is the season of the year for those that have a demand during the winter for decorative stock to carefully look over the sales for the past season and the stock on hand and make preparations for the coming year. Stock can now be purchased at lower prices than in the fall and much more safely packed and shipped than after the cool weather has begun. There is also still time to root and get up a stock of small plants that will be of great use in basket work or in fern dishes. The dracaenas all root very quickly at this season and a few lengths of cane cut up and inserted in the propagating beds will produce fine small stock for the centre of fern dishes. Many of the fancy leaved begonias such as *metallica*, *argenteo-guttata*, *maculata* and others of the fibrous rooted section of this species, root easily at this season and make fine small plants with which to fill up arrangements and give a good assortment for this work. Any of the older decorative plants that have not received attention should be looked over at once. The plants that are used for rental can surely be given an overhauling and there is yet two good months to obtain a good growth and to get them into condition for another season. We have never been in favor of an outdoor treatment for this class of stock, but believe advantage should be taken of the summer months to get all the growth possible and the plants in suitable shape for the winter rentals. After the growth has been made and the cooler nights have come, they can be gradually cooled down and hardened off so that they will be in condition for the fall and winter decorations.

#### Stevia.

The stevia plants will grow very rapidly at this season and will have to be kept well cut back all the time, the plants gone over every few days and the ends of the shoots cut off. A method adopted by a good grower the past season is worthy of trial by all. When the plants are topped back in July the cuttings are placed in the propagating bench, where if kept well watered they will root easily. As soon as rooted they are potted in flats about four inches apart in moderately rich soil. These as soon as established are placed outside and given the necessary attention and the same care which the older plants receive. When about eight inches high the tops are pinched off. These young plants will grow finely with straight sprays, and are in all respects much superior to the sprays cut from the large plants. This is a very economical and easy method of growing this very useful crop for cut flowers and is one which can be well adopted.

FRANKLIN, MASS.—Michael F. Toomey, proprietor of the Oak Hill Nurseries, has been petitioned into bankruptcy. The liabilities are \$42,535 and the assets \$7,469.

TEWKSBURY, MASS.—Irving French has purchased eleven acres of land on Castle street and will build a residence and greenhouses, moving his business from Whipple street where he has been located.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

#### A Neat Advertisement.

A very pretty blotter was issued by the J. M. Gasser Co. of Cleveland, O., for July distribution, having a colored illustration of a wreath of magnolia leaves and pink roses and bearing this inscription: "This world—then the next, and then comes fireworks. Order your funeral flowers from the J. M. Gasser Company. Specials this week—Easter lilies, Candidum lilies, Pink water lilies, Pink Japan lilies."

#### Casket Covers.

SEE SUPPLEMENT WITH THIS ISSUE.

A floral design that has become a very important feature with the florists is the casket cover and is, on many occasions, the most elaborate piece of floral work which the designer has to

Paul Huebner.

arrange for the funeral. Casket covers are made either upon wire frames or by fastening the flowers on a piece of mosquito netting or other cloth of gauzy texture, cut to the proper shape and size, making a floral blanket. The wire frames are made in two parts so that they can be fitted to any casket and are filled with moss and arranged as any other floral design. A casket cover arranged in this manner is, of course, much heavier and contains more flowers than one arranged upon cloth, but is not as easily damaged in the delivery as is the design without the rigid wire which keeps the form in shape. The wire frame covers the top of the casket, and from the sides and ends are arranged trailing greens, either asparagus or ferns, and long sprays of flowers so that when the design is placed on the casket it is completely covered. In making this design with the cloth, a fine silk gauze is preferable, but mosquito netting will do, and should be green in color. Upon this is fastened a covering of green, either ferns or asparagus, by passing wires through the netting over the stems and twisting the ends of the wire together. The flowers are then fastened on either singly, or made up into

small sprays and the sprays wired on, in the same manner as the greens. This design is always expensive, as its arrangement requires a great amount of labor, and must of necessity be made of a high grade of flowers, in fact, most of these covers are made of the exotics and most expensive flowers to be had at the season. Roses, violets, lily of the valley and orchids are the flowers most often used in the making of the beautiful pieces of work. They are sometimes made of carnations, but these flowers do not make as effective work, being too compact and heavy, and especially when made on the cloth lying too flat, not making the design have a light appearance. Sweet peas make up beautifully but the design made of these must be handled very carefully for the flowers are easily damaged and broken off. The more elaborate casket covers are made of lily of the valley or orchids or a combination of these two most beautiful flowers. The design which we illustrate is of lily of the valley with an arrangement of cattleyas across the cover in the center, made upon a wire frame, the flowers standing up very high and light, each spray and blossom standing out prominently. The form was completely covered first with Asparagus Sprengeri and adiantum and sprays of the latter intermingled with the flowers.

#### Railroad Gardening a Paying Investment.

Paper read by Paul Huebner, Landscape Gardener for the Reading Railroad System, before the Florists' Club of Philadelphia, July 11, 1911.

It is a good many years now since I last had the honor of addressing you on the subject of railroad gardening. At that time—some eight or ten years ago—there were not so many of the railroad systems of the country that had adopted this policy in which my company was one of the pioneers. A good many more have taken it up since then, and you will no doubt be glad to learn that the Reading has taken no backward step but has kept steadily along on the same broad and enlightened policy as it first mapped out. You understand, of course, that the hard-headed gentlemen who manage railroads, do so from a dollars and cents standpoint—and look on the embellishment of station grounds and approaches from the dollars and cents standpoint only—and not from an aesthetic point of view. They realize that it attracts travel and settlement and by so doing not only helps current revenue but improves the value of their real estate. Nevertheless, these managers are to be commended for their breadth of view and for their far seeing good policy—even from those of you who work for the advancement of horticulture in a spirit of altruism for the public good. The community which the Reading serves are given constant pleasure by this policy and are inspired thereby to efforts of their own along horticultural lines. The character of the architecture of the stations has been greatly improved of late years and the surroundings have to conform. Improved grounds and improved stations are two of the best advertisements a road could have and worth far more than their cost in that connection. Safety and convenience come first of course; but elegance is equally desirable if the cost be not too heavy.

I am often asked which is best for work of this kind; shrubbery or bed-

RAILROAD GARDENING.

Flower Beds on the Reading Railroad at Reading, Pa.

ding plants. In reply to that I always answer that there is plenty of room for both and I use both freely. When and where depends of course on the size of the spaces to be planted—also on the surroundings. Shrubbery is generally most effective when used as a background. When in flower it is very attractive. But for glowing effects and striking pictures that will make the passengers sit up and take notice—and carry with them strong impressions—strong enough to make them talk about when they go home—be their home near or far—there is nothing like the brilliant cannas and geraniums and other tender plants which make these, erstwhile dull and unsightly locations, a glory all summer long and carry the fame of the Reading to the ends of the earth. I received letters from all over the country from passengers who write the company asking as to what canna that was or what geranium that was and so forth, showing very clearly the strong impression made (even from a flying train at 60 miles an hour) and the good advertisement the company gets out of it.

While there is no great change in the policy of the road as to my department nor in my management and methods during the ten years that have elapsed since I last addressed your club, there is some change in the varieties of plants we use. For instance: in geraniums, we used then, Madam Thibaut, for pink; La Pilot, for scarlet; and La Favorite, for white. Now these "best ones" of their day have been superseded by La Glorieuse, as pink; John Doyle, as scarlet, and Madame Buchner, as white. We also use Abbe Schaeffer as a scarlet, and Jean Viaud as a pink. These varieties are not only better flowers than the old ones,

but they are also more constant bloomers. Mme. Sallerei is still our standby as an edging. In cannas we are now using Fuerst Bismarck, King Humbert, Madame Berat, Madame de Poitvine, Philadelphia, Admiral Avellan, Columbia, Robusta and Italia. We still use Florence Vaughan a little; but for a good yellow Richard Wallace is the best of them all.

We have made recently some very effective beds with a combination of ricinus, caladium and abutilon; and of course we still use the coleus very largely. A big coleus bed laid out in a design is certainly a very gorgeous sight. The big bed at Trenton Junction, for instance, is a good example of what can be done with the coleus. A bed like this will take three thousand plants; but they are easy to grow and are inexpensive. The shrubbery in the background helps this situation very much, and of course the lively green of the surrounding lawn is indispensable. Imagine what a dreary, uninteresting place this would be without this blaze of color frame in green and harmoniously toned by its background of shrubbery. Take again the little triangle at the terminal station in Philadelphia. This is but a little patch, but it is the glimpse of the unexpected which catches the eye and pleases the traveler. This bed is made of coleus, caladiums, achryanthes and aloecasia. The clover-leaf bed in the same patch is of geraniums, edged with ageratum, with a yucca in the center. The work at Langhorne station is distinctive, as it has a fine perspective, and has an excellent background of privet hedging. Geranium John Doyle is used very freely here in conjunction with coleus beds.

I am still a strong believer in the privet for hedging. We use the Cal-

ifornia variety and find very little trouble with it winter killing, about which some complain. It has proven very satisfactory to us, being a quick grower, a beautiful glossy green, and absolutely free from all insect pests. We use this largely for wind-breaks to prevent snow drifting in winter as well as for ornamental purposes. Even when it does freeze, it comes up again from the roots. I do not use the barberry except in mixed shrubberies. I use the whole shrub family; but the various spireas and deutzias are our favorites. We also use the hardy hydrangea very profusely. Philadelphia, weigelia, hibiscus and Pyrus Japonica are also freely used. In lilacs we like Marie Le Graye best for white, and for a dark one Souvenir de Antoine Spaeth. Madame Lemoine, a double white one, is also very fine. I generally mingle evergreens in with the shrubbery, which latter are cut out gradually—leaving the evergreens. Trees are not largely used, chiefly because they would obstruct signals—a very important matter; but where they are permissible the Norway maple is the one preferred. It is the most uniform and is not so apt to break if kept reasonably trimmed. We trim our hedges twice a season, only for outside points; but elsewhere where they have to be always neat and uniform three or four times at least.

And now, gentlemen, coming back to the title of my story, "Railroad Gardening as a Paying Investment." I think the fact that my company has kept the system up enthusiastically during all the twenty-one years I have been in their employ and are as keen for it as ever is striking evidence that they have found it a paying investment. The territory over which I have direct charge runs from Philadelphia to Wil-

liamspport; from Reading to Harrisburg; from Reading to Allentown; from Philadelphia to Chestnut Hill; from Philadelphia to Bound Brook; from Philadelphia to Bethlehem; from Camden to Atlantic City and Cape May and several other branches. If any of you feel like getting away from the smoke, dust and din of the city, and settling down among healthful and pleasant surroundings—and have the price—first take a run along any of those lines any fine day in summer, and if you do

## THE DAHLIA.

### Cultural Notes.

Now is the critical time with dahlias. No matter for what purpose you are growing them, there is one fixed rule that must be followed to secure success. That rule is thorough and judicious cultivation. Many growers believe the cultivator should be run twice each week; each time going a little deeper.

the plant from making too rapid and soft a growth. You notice I make no mention of weeds, for with thorough cultivation there are none. Work your soil after each rain and you will not be troubled with them. It is never too dry to cultivate. No matter how light or heavy the soil, if you did not cultivate in time, do the best you can anyway and then, after the next rain, do it better.

How deep shall we cultivate? Until the buds show, we cultivate pretty deeply as we want the plants to grow dwarf and sturdy, as short-jointed as possible to give us the best results from our low branching system. In very rich soil, deep cultivation in the early stages will save a great deal of trouble and disappointment. After they come into bud and flower, however, we use broad sweeps and aim to run them two inches deep. This loosens up the soil and gives two and a half to three inches of loose earth mulch.

There is much more than cultivation in dahlia growing. You cannot achieve success without it, yet with the best cultivation you cannot get satisfactory results with unsuitable varieties or methods of handling the plants. Even for garden culture, some varieties must be disbudded, while for commercial cut flowers disbudding is an absolute necessity. You see, dahlias are generally grown outside subject to all weather conditions and vicissitudes, and you therefore have many points to consider at the same time. It would take a pretty big book to tell every detail. This is why you read and hear of so many failures. Each year scores of growers will come out with some great discovery that will make success certain for all; but, unfortunately, the next year brings forth different conditions and consequent failure. The writer had his share of troubles until 20 years ago, when a great truth was borne home most forcibly—nature never makes a mistake. The past 20 years we have always had a crop of dahlia blooms, regardless of conditions, when the season for dahlias came around.

A few words for the wise. Don't fertilize too heavily; in dry weather it

RAILROAD GARDENING.

Flower Beds on the Reading Railroad at Trenton Junction, N. J.

not find something that will suit both your desires and your dollars I will be very much mistaken.

"Greetings and Welcome you'll find there before you, And the oftener you come the more we'll adore you."

The greetings of the blooming flowers and the welcome of healthy surroundings—with safe and perfect service thrown in for a very small consideration.

### Orontium Aquaticum.

Few aquatic plants have such a charming and distinctive appearance as the orontium aquaticum, or golden club. Yet it is comparatively rare in gardens, says a writer in the Gardeners' Magazine, although of very easy culture, requiring a square yard or so in an open tank or pond. The plant belongs to the arum lily family (Aroidae), but is often devoid of the spathe, or large bract, which is characteristic of that family. The spathe, if present at all, is small, and placed some distance below the spadix. The inflorescences are produced freely on quite small plants in late May and June, and present a remarkable appearance in the distinct combination of the pure white peduncle surmounted by the golden-yellow spadix. The foliage is handsome, and a welcome change to that of nymphæas and other popular water-lyng plants. In common with the bulk of aquatics, the plant delights in a rich, greasy loam, to which is added about one-third of its bulk of cow manure, and it thrives best if planted with its crown from nine inches to a foot below the water level, as in this way the stalks of the flowers are sufficiently short and stout to hold the spadix well above the water. It is a native of North America, where it is found in ponds from Massachusetts to Pennsylvania, and is quite hardy.

Others think the complete destruction of grass and weeds is the only object of cultivation. These are the two extremes, and between lies safety and success. Three inches of straw, meadow hay, or other material will give a good mulch, keep down the weeds, conserve the moisture, and give success without cultivation. This, however, is expensive, and we substitute two or three inches of earth mulch.

Judicious cultivation consists practically of accomplishing two objects, viz.—conservation of moisture in hot and dry weather and destroying the surface roots in wet weather, thus preventing

RAILROAD GARDENING.

Flower Beds and Shrubbery on the Reading Railroad at Reading, Pa.

## RAILROAD GARDENING.

Flower Beds on the Reading Railroad at Langhorne, Pa.

does no good, and in wet the blooms are soft and will not keep. Do not try to make a plant produce more flowers than it can properly nourish. Do not develop size at the expense of keeping qualities. Do everything in reason. Modify what you think with what you know.

LAURENCE K. PEACOCK.

## Fertilizers.

Paper Read Before the Chicago Florists' Club by W. S. McGee, July 6, 1911.

It seems to me that every florist should have some knowledge of chemistry. I am convinced, too, that he can easily acquire an amount sufficient to be of practical value. The more he knows of the science of chemistry, the more he will be able to learn from the published reports of investigations carried on at our experiment stations and by other growers. Theoretical knowledge, added to the grower's practical knowledge, will give him a degree of independence of thought and action impossible to the grower who merely follows custom without understanding why.

Let us take the case of a florist who wishes to buy a ton of bone meal. He has before him catalogues from two equally reputable supply houses. Catalogue A shows a bone meal containing, let us say, nitrogen 2.50 to 3.30 per cent and phosphoric acid 23 to 26 per cent, while catalogue B shows a bone meal containing, we will assume, 3 to 3.8 per cent nitrogen and 22 to

25 per cent of phosphoric acid. One brand runs higher in nitrogen, while the other runs higher in phosphoric acid, and there would be a natural tendency to choose the one with the higher total content.

To make a fair comparison, however, we should compute the value of the different ingredients of each fertilizer. For this purpose we will use the values assigned by the authorities at the Indiana State Agricultural Experiment Station. These are taken from their bulletin for 1910 and give the following values: Nitrogen, 17½ cents per pound; total phosphoric acid in bone and tankage, 3½ cents per pound; in mixed fertilizers containing nitrogen, insoluble phosphoric acid, two cents per pound; in fertilizers not containing nitrogen, no value is placed on insoluble phosphoric acid; soluble potash (K<sub>2</sub>O), six cents.

Using the above prices in our comparison of the two brands of bone meal, we obtain the following results: Brand A, with 2½ per cent nitrogen, has 50 pounds of nitrogen to the ton and this is worth \$8.75; the phosphoric acid, 23 per cent, runs 460 pounds per ton and this is worth, at 3½ cents, \$16.10, making a total for this brand of \$24.85. For the B brand we find the three per cent of nitrogen worth \$10.50, and the 22 per cent of phosphoric acid worth \$35.40, giving a total for brand B of \$25.90, a difference of \$1.05 per ton in favor of the brand with the lower total content.

Other points, however, must be considered before final choice is made. The one per cent of difference in amount of phosphoric acid seems larger than the ½ of one per cent of difference in amount of nitrogen, but such is not the case. The one per cent is only 1-22 of the phosphoric acid content, while the ½ of one per cent is 1-5 of the nitrogen content. A knowledge of what the soil already contains and what the crop naturally requires would be of value here and should influence the grower's decision.

I find, upon looking over various catalogues, that all do not follow the same plan in giving the analysis of fertilizers. Some analyses give the amount of ammonia, but do not mention nitrogen; some give the amount of nitrogen, but do not mention ammonia, and some give the percentage of both of these ingredients. In order to compare any two fertilizers of the same general character, we must first reduce the analyses to similar terms.

If ammonia is given, we can find the percentage of nitrogen by multiplying by 14-17, or 82.3 per cent. To change from nitrogen to ammonia, multiply by 17-14, or 121.4 per cent. Ammonia is a chemical compound containing nitrogen; hence nitrogen is always present in any fertilizer containing ammonia or ammonia compounds. Ammonia is made up, by weight, of fourteen parts of nitrogen and three parts of hydrogen; hence the above rules

for reducing from the one to the other.

In one catalogue I find four different expressions, all referring to phosphoric acid and all on the same page. In one case a fertilizer seems to contain bone phosphate and phosphate acid; in a second case phosphate acid alone is named; a third has bone phosphate alone and the fourth phosphoric acid. This lack of uniformity makes some brands of fertilizers appear at a disadvantage when nothing of the kind was intended. Phosphorus, like nitrogen, is a chemical element incapable of reduction to any simpler form. Some authorities insist that in all published analyses the percentage of the element should be given, rather than that of some chemical compound containing the element.

In order to show what might happen to an analysis when we apply to it just a little chemistry and just a little arithmetic, let us take the case of a blood and bone fertilizer advertised by a perfectly reliable house and with presumably honest intentions. The analysis shows this article to contain: Ammonia,  $6\frac{1}{2}$  to seven per cent; bone phosphate, 20 to 30 per cent. The ammonia,  $6\frac{1}{2}$  to seven per cent, reduces to nitrogen 5.1-3 to 5% per cent, and the bone phosphate, 20 to 30 per cent, reduces to phosphoric acid 9 to 13% per cent, the phosphoric acid constituting usually about 45 per cent of bone phosphate. Bone phosphate and phosphoric acid may truthfully be said to have the same effect as fertilizers, but it does not follow that 20 per cent of one is equivalent to 20 per cent of the other. The average grower might simply glance at the percentage column and not notice that the figures were in one case for phosphate and in another for phosphoric acid. In a case of this kind we must not overlook the possible influence of the overambitious salesman representing the house with the bone phosphate.

Thus far we have considered fertilizers merely as a source of plant food to be added to the soil. Every experienced grower knows that fertilizers have various other important uses. A fertilizer may be of value in at least six different ways: First, it may contain additional plant food; second, it may act upon the plant food already in the soil to render it more readily available; third, it may operate to make compact soils more porous or open, so that air and water and plant roots may more easily penetrate; fourth, it may add humus to a sandy soil, thus greatly increasing its power to retain water; fifth, it may act as a mulch to prevent the too rapid evaporation of water from the surface, and sixth, it may act as does lime, to counteract the acidity of a soil. Some fertilizers are of value in perhaps one way only, while others are helpful in several ways.

Commercial fertilizers, such as bone meal, blood and bone, wood ashes, sodium nitrate, etc., are used merely to supply plant food. In selecting from this list it should be remembered that each of the three essential constituents, nitrogen, phosphoric acid and potash, has its own peculiar effect on the growing plant. An abundance of one of these three elements can not make up for a lack of another, any more than a strong link in a chain can make up for a weak link somewhere else. It would evidently be a

great saving to the grower if he could know what his soil already contains and what each kind of crop requires.

Natural manures seem to serve several purposes. Besides supplying additional plant food, they may improve the so-called physical condition of the soil. As outlined above, they may serve as a mulch; they may render a compact clay soil more open; they may add humus to a sandy soil to enable it to retain water. The humus has another beneficial effect; the presence of humus seems necessary to the growth of certain forms of bacteria which have the peculiar power of rendering many insoluble compounds soluble.

As pointed out by Prof. Dorner in the trade papers, lime is a fertilizer which influences the soil in several different ways. Heavy soils are made more open by it; sandy soils are bound together by it; it neutralizes the acids formed by the decay of organic manure—that is, it keeps the soil sweet; it renders other plant foods available; it supplies needed plant food; it favors bacterial growth and has an effect on insects and fungous growths.

So varied is the composition of soils and of fertilizers, and so diverse are the effects of the great array of fertilizers now in use, that only patient, persistent study can enable the florist so to adapt his soil, his crops and his fertilizers as to secure a proper return for his outlay of hard toil and hard earned money.

## THE GLADIOLUS.

### American Gladiolus Society.

The second exhibition of the American Gladiolus Society will be held in connection with the annual convention of the Society of American Florists in the Fifth Regiment Armory, Baltimore, Md., August 15-18, 1911. The following rules have been adopted to govern the exhibition:

#### RULES.

All entries must be made to the recording secretary not later than three days before the first day of the exhibition, on blanks provided by the secretary for the purpose.

Exhibits in competition for prizes must be of the exhibitor's raising.

Exhibits must be in place 12 noon each day on which exhibits are to be judged.

Exhibitors are required to keep their flowers in fresh condition during the time the exhibition remains open.

Exhibitors will be awarded but one premium in each class in which they compete and then only where the exhibits on their merit warrant the judges in making awards.

While the society will take reasonable care of the property of exhibitors yet it will not in any way be responsible for the loss or damage of anything exhibited.

Exhibits after being staged cannot be removed until the exhibition is closed, without the consent of the exhibition committee.

RAILROAD GARDENING.

Flower Beds on the Reading Railroad at the Terminal, Philadelphia, Pa.

SAN JOSE, CALIF.—The annual convention of the Pacific Coast Association of Nurserymen was held in this city June 21-23. A reception, banquet and an automobile trip to points of interest were the entertainment features.

BOUND BROOK, N. J.—The dead body of Ernest Marland was discovered by fellow workmen in the greenhouses of Thomas Young, Jr., June 30. He had committed suicide by shooting. Marland was 30 years of age and leaves a widow and three children.

The society requests exhibitors to attach labels to exhibits. Correct naming of varieties is very important.

Exhibitors will be required to provide tables and everything else necessary for table decorations.

In entering every exhibitor agrees to be governed by the rules.

#### NOTICE.

As all space has to be reserved in advance it is very important that entries be made promptly.

The society will provide space and vases for amateurs and private gardeners.

Professional growers and dealers will be required to provide their own space and vases.

When it is desired that exhibits be staged by the society notice should be sent as early as possible to the corresponding secretary.

Exhibits by express should be addressed to American Gladiolus Society, Fifth Regiment Armory, Baltimore, Md. Express charges prepaid. Schedule of prizes.

The following premiums are offered:

#### OPEN CLASS.

Class 1. Henry F. Mitchell Co's. prize. Silver cup for the best 25 spikes of new gladiolus Kunderd's "Glory" exhibited in one vase.

Class 2. Vaughan's Seed Store prize. Silver cup for the best and largest collection of blue shades in lots of six separate colors, not less than 25 spikes.

Class 3. M. Crawford's prize. 50 bulbs of Gladiolus "White Lady" for the best six spikes of any white variety.

Class 4. Peter Henderson & Co's. prize. \$10 for the best 10 varieties not now on the market. Three spikes each.

Class 5. W. Atlee Burpee's prize. \$10 for the best collection of 10 varieties; six spikes each.

Class 6. E. E. Stewart's prize. \$5 for the best vase of 12 spikes Gladiolus "Golden Queen."

Class 7. E. E. Stewart's prize. \$5 for the best vase of 12 spikes Gladiolus "President Taft."

Class 8. B. F. White's prize. \$5 for the best vase of new seedlings not less than 25 varieties, never before exhibited.

Class 9. E. H. Cushman's prize. \$5 for the best vase of 25 spikes of one white variety.

Class 10. A. T. Boddington's prize. \$5 for the best vase of any named yellow variety.

Class 11. John Lewis Childs' prize. \$10 for the best collection of Childs' varieties; three spikes each.

Class 12. The Gardeners' Chronicle prize. Challenge cup for the exhibit containing the largest number of standard named varieties, correctly labeled.

Class 13. Stumpp & Walter Co's. prize. \$10 for the best collection of 15 varieties; three spikes each.

Class 14. B. Hammond Tracy's prize. Silver and glass vase for the best table decorated with gladioli, the table to be laid for six covers.

Class 15. N. L. Crawford's prize. \$5 for the best center-piece for dining-table.

Class 16. Frank Banning's prize. \$10 for the best vase of Gladiolus "Niagara," three or more spikes.

Class 17. H. H. Groff's prize. \$10 for the best exhibit of Gladioli in white and light; dark, blue, and yellow hybrids, not more than three spikes of each variety and not less than one vase of each color section.

Class 18. Rowehl & Granz's prize. \$12 for best 100 spikes Gladiolus "Augusta"; 2nd, \$8.00; 3rd, \$5.00.

Class 19. A. E. Kunderd's prize. \$10 and 100 bulbs Gladiolus Kunderd's "Glory" for the best display of above variety.

Class 20. A. E. Kunderd's prize. 100 bulbs of Kunderd's "Glory" for the

RAILROAD GARDENING.

Flower Bed on the Reading Railroad at Huntingdon Street, Philadelphia, Pa.

best vase of 20 spikes of above variety; 50 bulbs for 2nd best vase.

Class 21. Kelway & Son's prize. Silver medal. Best collection named varieties, Kelway's large-flowered strain.

#### AMATEUR CLASS.

Class 1. W. E. Kirchoff Co's. prize. Gold medal for the best display of Gladiolus "Princepine."

Class 2. Montague Chamberlain's prize. Silver cup for the best six named varieties, one spike each.

Class 3. John Lewis Childs' prize. For the best vase of Gladiolus "America," not less than 12 spikes.

Class 4. A. T. Boddington's prize. \$5 for the best collection of yellow named varieties exhibited by an amateur.

Class 5. J. M. Thorburn & Co's. prize. Silver cup for the best collection of Primulinus type and hybrids.

Class 6. L. Merton Gage's prize. \$5 for the best six varieties of blue gladiolus exhibited in one vase.

Class 7. A. E. Kunderd's prize. 100 bulbs Gladiolus Kunderd's "Glory" for the best vase of six spikes of above variety; 50 bulbs of Kunderd's "Glory" for 2nd best vase.

Class 8. Arthur Cowee's prize. \$5 for the best exhibit of 10 spikes each of a yellow variety and a blue variety.

Class 9. Arthur Cowee's prize. \$5 for the best exhibit of 10 spikes each of a red variety, white variety and a pink variety.

L. MERTON GAGE, Secy.

#### Gladiolus Tristis.

Three large clumps of this gladiolus have been so beautiful for the past month that I feel impelled to write a few lines concerning them. This species shows great variation. In Nicholson's "Dictionary of Gardening" the three upper segments of the flowers are said to be spotted with minute reddish-brown dots, and the height is given as one foot. This form is unknown to me. W. Watson, writing on the plant, says: "G. tristis is very variable. It is said to vary in the color of the flowers from pure white to almost wholly purple." The form I grow, however, is a clear, pale, sulphur-yellow, and unspotted. This is sometimes known as G. tristis concolor or sulphureus. I have recommended many friends to procure it, but the corms sent have invariably produced flowers with a band of purplish-black stretching up the center of the three upper petals, so it appears that nurserymen do not possess the clear sulphur form, which is far superior to the banded variety. Though a

native of Natal, it is perfectly hardy in the southwest, even when planted only three inches beneath the surface, and entirely unprotected by mulching. This charming gladiolus is seldom met with except in Devon and Cornwall, but it merits extended culture, says a correspondent of *Gardening Illustrated*. The leaves are rush-like, and, when cut horizontally, show a section like a cross in form. They are about three feet in length, and have withered by the middle of July. After twilight has set in the blossoms become delightfully fragrant, and a large clump will exhale quite a magnolia-like perfume after dark on still nights. With me the flower-spikes attain a height of three feet or upwards, but in the late Mr. Archer-Hind's garden, where the soil is heavier, and in another near Truro, they are four feet high or more, while from four to five flowers, all of which are expanded simultaneously, and which each measure three and one-half inches in diameter, are borne on strong scapes. It increases very rapidly by bulblets and also by seed, and where the seedpods are not removed, numbers of seedlings may be seen rising from the ground around the parent clumps. It is a most valuable species, since it is by far the earliest of its family to flower, often being in full bloom in the southwest by the middle of April, long before the so-called early gladioli of The Bride type are in flower.

#### Sweet Pea Evolution and Pollination.

Paper read by A. C. Beal before the National Sweet Pea Society at Philadelphia, Pa., June 29, 1911.

During the first one hundred years of the history of the sweet pea only three varieties or colors were known, viz., purple with blue wings, pale red with white wings (Painted Lady), and white. The black and scarlet appeared in the last years of the eighteenth century. It is quite probable that the scarlet was very far from what we conceive a scarlet sweet pea should be today. In Martyn's edition of Miller's *Gardener's Dictionary*, 1807, we find the white, the Old Painted Lady, the New Painted Lady, the latter with a rose-colored standard and pale rose wings; Old Purple, and a variety having a violet keel and wings and purple standard. Sayers describes the scarlet sweet pea as *Lathyrus flos rosea*, while the Painted Lady is described as "Fleshed" color. From this we may conclude that the New Painted Lady, a rose-colored variety, was sometimes called scarlet.

The first of the striped varieties was offered in 1837 and since that date this group has been augmented until the classification now includes striped and flaked (red and rose, purple and blue). This classification, however, does not express the real range of color in this group, for we have crimson stripes, e. g., America; red and rose stripes on white—Aurora; red and rose stripes on primrose—Jessie Cutlibertson; mauve stripes—Gaiety; blue stripes—Prince Olaf, and Hester; maroon-flaked like Senator. The American growers have introduced the majority of the best varieties of this group among which are America, Aurora, Columbia, Daybreak, Gray Friar, Juanita, Pink Friar, Ramona, and Wawona. Many of these are now procurable in the waved form.

The variety Blue Edged, the probable forerunner of the picotee forms, appeared in 1860. This is a white variety with a well-defined blue edge, a

probable hybrid between *L. Magellanicus* and a white variety of *L. odoratus*. The variety, at all events, was the first to exhibit a distinct blue color among sweet peas. Later it was known as Blue Hybrid, under which name it won an award from the Royal Horticultural Society. Sutton & Son sent out Butterfly in 1878, which somewhat resembled Blue Edged. The so-called "blues" that followed were Invincible Blue, Madame Carnot or Imperial Blue, and Captain of the Blues, all of which had considerable red in the standard. It was not until 1899 that a good blue, in Navy Blue (Lord Nelson), appeared. The first of the soft pink varieties was Crown Princess of Prussia, 1868-9. Isa Eckford, Peach Blossom, and Lovely are the improved varieties of this color.

The efforts of the breeders of sweet peas have not all been directly toward the development of new shades of color.

W. W. Tailby, Jr., Wellesley, Mass.

The form of the flower has also received attention. The earliest representations of sweet pea flowers show a loose, irregular bloom, with the edges of the standard turned back, i. e., reflexed. Often, if not always, the standard had the notch in the apex and frequently in the margin. The standard, which is the principal part of the flower, has been improved in substance and the notches have been eliminated. The old type had a narrow base, and with the improvement noted has come a "filling out" of the lower edges of the standard so that the outline approaches a circle. In their efforts to secure varieties of the best expanded or open form many beautiful hooded varieties were originated. While this form was condemned as inartistic by many sweet pea specialists, it nevertheless secured a permanent place. Prima Donna, Lovely and Countess of Radnor are of this form.

When many had reached the conclusion that no further advances in either size of form were to be expected and that the efforts of future breeders would be directed toward securing new colors and more flowers per stem, Nature demonstrated that she had other surprises in store. In 1901 the Countess Spencer variety was exhibited and caused quite a sensation. The National Sweet Pea Society awarded it the highest honors. This variety was

distinct from all preceding introductions because the standard and wings waved. The flowers were very large, and borne in fours on stout stems. It was introduced in 1904. The parentage of this variety has been given as (Lovely x Triumph 1898) x Prima Donna 1899. However, there appeared in 1905 a variety named Gladys Unwin which was the same color, but smaller and less waved than Countess Spencer, which was a selection from Prima Donna without known crossing being effected. These varieties, however, were forerunners of the new type which revolutionized sweet pea culture in England and has revived and quickened the interest in America.

#### POLLINATION.

We have previously noted that the pistil and stamens are enclosed in the keel formed by the partial coalescing of the two lower petals. A very slight pressure upon the base of the keel will cause the pistil to suddenly appear in the tip of the keel. The stigmatic surface is usually covered with pollen, and at the same time the stamens appear to view. If the pressure is released these organs disappear as suddenly from view. Those who are looking for flower adaptations for the promotion of cross-fertilization would say at once that here we have a mechanism which is operated by the weight of a bee alighting on the keel, and the pistil and stamens rise up striking it upon the body, receiving and giving pollen. Thus as the insect visits flower after flower, natural cross-fertilization is carried on. This, however, is not the case. In the first place if we examine flowers in the bud stage, we find the pollen ripe. The position and condition of the stigma changes, for before the maturation of the pollen, the stigma is below the anthers. A day or two later the stigma has risen to a position among the anthers and is viscid enough to hold the pollen grains. In another day or two it has grown beyond the anthers. Self-fertilization has taken place and the development of the legume begun. This process has taken place before the flower is fully open. Sometime later the pistil is pushed out of the protecting keel by the developing pod.

Such is the normal fertilization of sweet peas, as observed upon examination of the flowers. Attention has been called to the fact that the sweet pea stood practically for one hundred and fifty years, and the question asked how it can be reconciled with natural cross-fertilization. During the writer's experience in the field last season for three months studying varieties and recording observations, not a single instance occurred of a bee alighting upon the keel of the flower, nor were any observed crawling between the wings. All the bees observed visiting the flowers, alighted on the outside of the wings, and in practically every case, thrust the proboscis down between the right wing and the standard. In this connection it may be mentioned that the bees did not show a preference for any particular color, but flew from row to row and color-section to color-section. T. H. Dippal has observed that bees attack sweet pea flowers. The bee (a yellow and white banded species) alighted on the calyx, crawled around to a certain position, and cut a hole through the calyx so that it could thrust its proboscis through and suck the nectar at the base of the pod. The

OPENING OF COMMODORE WESTCOTT'S ROD AND GUN CLUB HOUSE, WARETON, N. J., JUNE 23, 1911.

reason is not clear why the insect prefers one side of the flower since the structure is similar on each side. It is to be remembered in this discussion that sweet peas grown under glass in winter are not visited by bees, but every flower in sunny weather will set seed if the blooms are not kept cut.

Since the introduction of the waved type there has been much discussion about the difficulty in fixing varieties and the reasons for it. Some growers, having secured what was to all indications a fixed stock, discovered after sending it out, that it was not fixed. Some growers thought it only occurred when the novelty was sent to California to work up a large stock of seed, or after it had passed into the hands of the California growers. One of the theories advanced to explain this was that some insect in California was responsible for some cross-pollination of flowers. In our own trials this past season no differences were observed between English or American grown stock since we had seeds of novelties direct from the originators and our varieties were from the introducers. Others say that bees visit the flowers and they believe that crossing takes place in the waved type which it is maintained does not produce normal flowers in that the pistil sometimes projects beyond the keel. It appears that if this view is correct that the poor seeding of the waved type would not occur or at least that the worse the fault of the flowers the greater the crop of seed. Thus the varieties which seeded freely

would become cheap and drive out the others. The writer thinks that the results obtained by the seed growers contradict the theory. It appears that the poor setting of seed may be due to the fact that the pistil may grow out beyond the anthers before the latter are mature and thus fertilization be prevented by irregular development of the parts. Otherwise the pollen may be impotent in some varieties, but this does not occur so far as the writer has studied the reports of the sweet pea breeders. The writer did not observe any pistils showing the defect mentioned, but as our season was very dry our plants did not make an exceptional growth which would be likely to express itself in abnormal flowers. However, it was observed that some varieties seeded more freely than others. We have planted most of the varieties this year from seeds saved in 1910, and knowing those which were fixed last year as well as those with rogues of certain colors we think that some light may come upon this matter of cross-fertilization, if any, in the sweet pea.

NORTHPORT, N. Y.—Arthur Cockcroft is building one of the largest green-houses on Long Island. It is 60x400 feet, of iron construction.

SCRANTON, PA.—T. B. McClintock of Jefferson avenue is building three houses 20x120 feet which will greatly enlarge the capacity of his green-houses.

#### Lice on Aster Roots.

ED. AMERICAN FLORIST:

Can you inform me what is the cause of root lice on asters? What is the remedy? O.

Root lice, or corn aphid, known scientifically as *Aphis maidi-radici*, are frequently found at the roots of asters. These aphids are wingless and are transported by the little brown ant who cares for the eggs in their burrows during the winter, transferring the young as soon as hatched in the spring to the roots of young weeds, especially foxtail grass, smartweed and even ragweed, and as soon as corn or other crops, from the roots of which they suck the sap are growing, again transport them to these crops.

Keeping the weeds down in early spring, continued cultivation and late fall plowing will keep the homes of the ants continually broken up and have proved to be preventative measures. Where crop rotation is practised this pest does but little injury, and asters should not be planted on ground which is known to be infested with these insects. We would recommend that "O" try bisulphide of carbon as a remedy, in the following manner. Make a small hole in the soil near the root of the plant but not deep, pour into it a teaspoonful of bisulphide of carbon and immediately close the hole by throwing a little dirt over it and pressing it down with the foot. This remedy is very efficacious in ridding the soil of ants, but with an ant hill must be used in larger doses. W.

THE MONON RAILROAD.—As many of our readers are aware, the Monon Railroad has taken quite a conspicuous part in the affairs of the Society of American Florists. In 1885 this was the road selected by the trade for the trip from Chicago and points west to the first convention at Cincinnati. It was at this convention, they say, that the Monon Railroad furnished, without charge, a special train to convey the visitors from Cincinnati to Dayton, to visit the Soldiers' Home, where a bountiful dinner was served by the railroad management of that day. The Monon Railroad carried the Chicago delegation to Cincinnati again on the occasion of the twenty-fifth anniversary convention in 1909 and now the Chicago contingent is planning to start for the Baltimore convention on the same road, the President's Special leaving Sunday, August 13, at 10:30 p. m. Details of the trip will be found elsewhere in this issue.

## Burbank on Reciprocity.

In response to a letter forwarded to Luther Burbank requesting his opinion in regard to reciprocity with Canada by the public press he writes as follows: "I can see no reason why it should not be consummated as it must be of benefit to every individual living in the United States, with perhaps the exception of a few who are fattening on special privileges."

## Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

## American Rose Society.

Following the Boston flower show, the secretary of the American Rose Society suggested the desirability of preparing an accurate list of roses of American origin for permanent record. One of the roses exhibited at Boston and which has been filed with us is the Madison, originated during the year 1906, the parentage being a cross between the Perle des Jardin, Bride and Meteor.

One new life member has been added to the society, which increases the amount of the permanent fund \$50.

There will be a general meeting of the American Rose Society at Baltimore at the Society of American Florists' convention in August. There are some matters that should be settled in regard to the prize awards at Boston, that cannot be until that meeting.

The certificates of merit have been forwarded to A. N. Pierson Co., Cromwell, Conn.; F. R. Pierson Co., Tarrytown, N. Y., and Robert Scott & Son, Sharon Hill, Pa.

BENJAMIN HAMMOND, Sec'y.

## Chicago to Baltimore.

The Chicago Florists' Club, at its regular meeting July 6, decided in favor of the Monon Railroad for the Baltimore convention trip and arrangements are being completed by which the President's Special will leave Chicago Sunday, August 13, at 10:30 p. m., arriving at Cincinnati at 7:50 Monday morning. There will be a stop-over at Cincinnati for a couple of hours to get together the various delegations from Louisville, St. Louis, Peoria, Indianapolis, Dayton, Toledo, Detroit and other nearby points. From Cincinnati the President's Special will proceed direct to Baltimore, arriving Monday at 7:30 p. m. The fare for the round trip, Chicago to Norfolk, via Baltimore, good for 30 days, is \$27.00. Lower berths, one way, are \$4.50, upper berths \$3.60. Many side trips can be arranged by rail or water to Washington, Philadelphia, New York, Boston, etc., at small additional cost. Reservations will be made at Chicago by Herbert Wiley, General Agent Passenger Department, Monon Railroad, 104 South Clark street. Telephone, Harrison 3309.

## Trade Exhibition at Baltimore.

Space for trade exhibits at the Baltimore convention of the Society of American Florists, August 15-18, was taken as follows July 7:

The Advance Co., 100 square feet.  
American Auxiliary Heating Co., 200 sq. ft.  
Aphne Mfg. Co.  
Chas. D. Ball, 100 square feet.  
H. Bayersdorfer & Co., 900 square feet.  
Wm. J. Bos & Co., 100 square feet.  
Bobbins & Arlins, 300 square feet.  
Arthur T. Roddington, 300 square feet.  
J. Boigiano & Son, 400 square feet.  
John Lewis Childs, 300 square feet.  
The Conrad & Jones Co., 50 square feet.  
Arthur Cowes, 900 square feet.  
Robert Craig, 600 square feet.  
Henry A. Drees, 600 square feet.  
Henry A. Drees, 300 square ft.  
Edwards Folding Box Co., 100 square feet.  
H. Eichholz, 50 square feet.  
Florists' Exchange.  
Geo. M. Garland Co., 320 square feet.  
Gem City Boiler Co., 200 square feet.  
Griffith Turner Co., 300 square feet.  
Harrison Bros., 200 square feet.  
A. H. Hews & Co., 100 square feet.  
Hiltbings & Co., 320 square feet.  
Hubert Bulb Co., 150 square feet.  
J. B. Hutchinson, 50 square feet.  
Jackson & Perkins Co., 50 square feet.  
Johnson Heating Co., 320 square feet.  
Jones & the Holly Wreath Man, 200 sq. ft.  
King Construction Co., 300 square feet.  
Kneeschell Bros. Co., 320 square feet.  
Lager & Burrell, 150 square feet.  
Fred Leno, 50 square feet.  
Lord & Burnham Co., 320 square feet.  
McFarland Pulpity Service, 100 square feet.  
W. A. Mandy, 200 square feet.  
Means & Thacher, 100 square feet.  
Henry F. Michell Co., 600 square feet.  
Morehead Mfg. Co., 40 square feet.  
J. H. Moss, 200 square feet.  
Jos. G. Neidinger, 400 square feet.  
S. S. Pennock-Meehan Co., 200 square feet.  
F. R. Pierson Co., 300 square feet.  
Reed & Keller, 400 square feet.  
Revere Rubber Co., 200 square feet.  
Julius Roberts Co., 300 square feet.  
Roseville Potteries, 320 square feet.  
Schloss Bros., 200 square feet.  
Shaw Fern Co., 150 square feet.  
The Storrs & Kellogg Co., 100 square feet.  
Stump & Walter Co., 300 square feet.  
Thomson Chemical Co., 100 square feet.  
B. Hammond Tracer, 100 square feet.  
U. S. Radiator Corporation, 320 square feet.  
Wertheimer Bros., 200 square feet.  
Wilma Cope & Bros., 100 square feet.  
Wilson Pl. Oil & Ftyr. Co., 100 square feet.  
Wilson Pl. Oil & Mlzr. Co., 100 square feet.  
O. F. Zurn Co.

## Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list, and correct any dates that may have been altered since the last advices.)

Chicago, September, 1911.—Exhibition of annuals, perennials and vegetables. Horticultural Society of Chicago, Art Institute, J. H. Burdett, secretary, 1620 West 104th Place, Chicago.

Cincinnati, O., November 13-18, 1911.—Fall exhibition. Cincinnati Florists' Society, Horticultural Hall-Milwaukee Society, secretary, 131 East Third street, Cincinnati.

Lenox, Mass., August 10, 1911.—Annual and perennial exhibition. Lenox Horticultural Society, Town Hall, Geo. H. Instone, secretary, Lenox.

Lenox, Mass., October 25-26, 1911.—Grand fall exhibition. Lenox Horticultural Society, Town Hall, Geo. H. Instone, secretary, Lenox.

New Bedford, Mass., September 14-16, 1911.—Ninth annual fall exhibition. New Bedford Horticultural Society, Old Fellows Hall, Jeremiah M. Taber, secretary, 117 Scream street, New Bedford.

New York, September 19-21, 1911.—Dahlia, fruit and vegetable show. American Institute of the City of New York, West Forty-fourth street, Wm. A. Ezgleston, secretary.

New York, November 3-7, 1911.—Fall exhibition. Horticultural Society of New York, American Museum of Natural History, Central Park West and Seventy-seventh street, Geo. V. Nash, secretary, New York Botanical Garden, Bronx Park, New York.

Milwaukee, Wis., November 13-19, 1911.—Fall Flower Show. Milwaukee Florists' Club, Auditorium, Gustav C. Mueller, secretary, 926 Ninth street, Milwaukee.

St. Louis, Mo., November 7-11, 1911.—Fifth fall floral exhibition and sale. St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues, Otto G. Koelke, secretary, 6175 Florissant, St. Louis.

St. Louis, Mo., November 7-11, 1911.—Annual exhibition. Cynanthemum Society of America, in connection with the St. Louis Horticultural Society.

Stamford, Conn., November 3-4, 1911.—First annual exhibition. Stamford Horticultural Society, Casino, J. W. McCardie, secretary, Merritt building, Greenwich.

## BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

### Chicago.

#### CONTINUED HOT WEATHER.

The city has this week experienced the longest continued hot weather in the history of the weather bureau, the thermometer registering nearly to the 100° mark during the day and standing very close to 90° during the night. With such prolonged intense heat business, like the human beings, has shown no great amount of activity. During such weather it is hard to produce a good grade of flowers and there has been no great quantity of first class flowers on the market of any kind. The roses are, however, in good supply and of surprising good quality when the difficulty of producing good flowers during such a heated spell is taken into consideration. American Beauties are of very good substance, fair color, and the stem and foliage of splendid quality. Killarneys are also good and some stock of excellent color and foliage is to be found on the tables every morning. White Killarney is holding up as well as the pink and good stock is obtainable. My Maryland is also in fine condition and Kaiserin is the best of the whites. Richmond is the principal red to be found but this rose opens quickly and has to be cut very tight. Carnations are still to be had in small quantities, but show the effects of the long hot spell of weather, lacking substance and quickly going by. Outdoor gladioli are being received in good quantities and though many are rather short in the stem, yet some of the stock is fine and has a much fresher look than the greenhouse product. Lilies of good quality are plentiful enough to meet the demands and the Japanese lilies are in good supply. Liliun candidum is not so plentiful as it has been for the last two or three weeks. Lily of the valley is of excellent quality and in good quantities. Sweet peas are very plentiful and some very fine stock is offered.

Water lilies are still one of the finest flowers to be seen in the retail windows and some of the red and blue flowers are very beautiful and attractive. Some very fine sweet sultanas are also seen in the retail stores. A few orchids are to be had but the stock of these is limited. The hot, dry weather has decreased the quantity of outside flowers and they are not the drug on the market which is the general case at this time of the year. With the exception of smilax greens are plentiful and of good quality.

#### NOTES.

A. T. Pyfer of the Chicago Carnation Co. and H. E. Philpott of Winnipeg, Can., left Sunday, July 9, on a pleasure trip to Cincinnati and Dayton, O., Richmond and Indianapolis, Ind., and St. Louis, Mo. From St. Louis they will go up the Mississippi river by steamer as far as Dubuque, Ia., and from there return home. It was their intention before leaving to attend the meeting of the Cincinnati Florists' Society on July 10 when the election of officers was to be held.

Henry Wise of the J. A. Budlong force is spending his vacation at Tomahawk Lake, Wis. Miss Nelda Wolff, who has been bookkeeper for the firm for the past 10 years, has resigned her position and will leave soon for the west. Miss Marguerite Russell is now filling the position having entered upon her duties July 8.

A L. Vaughan of Vaughan & Sperry says that business so far this month has been very good, double that of the same period last year. Fred. Sperry, the junior member of the concern, is enjoying his vacation. Miss Pearson, the pleasing and efficient stenographer, is spending her vacation in Michigan.

P. L. McKee, of the John C. Moninger Co., went to Milwaukee July 11 to present his firm's claims for a new classification of greenhouse construc-

## U S Budlong's E Blue Ribbon Valley.

tion material which, if adopted, will lower the freight rates and thereby benefit both builders and growers.

The Geo. Wittbold Co. is making extensive changes and improvements on their store at Buckingham place, a new floor is being laid, new fixtures added and the interior artistically decorated.

August Lange, accompanied by Mrs. Lange and Master Lange, left for Colorado Springs, Colo., July 10, and will be gone about three weeks, visiting Omaha, Neb., enroute.

John Zech and Mathias Mann, members of the well known firm of Zech & Mann, are planning on attending the convention of the Society of American Florists at Baltimore.

Mrs. M. K. Nanz, of the Nanz Floral Co., Owensboro, Ky., and daughter, Miss Katherine Mary, are spending a week with her son at Hinsdale.

John P. Degman, of Winterson's Seed Store, has joined the Jolly Fishermen's Club and is casting for finnies at Round Lake this week.

H. W. Rogers of the Weiland & Risch force, returned Monday, July 10, from a two weeks' visit at Spring Lake, Wis.

Miss Mary E. Whalen is performing the bookkeepers' duties at the Wm. E. Schofield store on North State street.

E. E. Pieser of Kennicott Bros. Co., feeling much improved in health, was seen at the store on Saturday, July 8.

## POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES

We make these a specialty.  
Can supply them all the Year  
Once tried you will have no other

Otto W. Frese resigned his position with the Poehlmann Bros. Co. on July 8 to accept a position as manager of the Chicago Flower Growers' Association's store, which will open August 1. Mr. Frese is a man of large experience, having started his career in the florist business with J. C. Vaughan in the early eighties. He went into business later for himself, which he discontinued when he accepted a position with the Reinberg Bros. When this firm dissolved partnership he managed the George Reinberg store until eight years ago, when he accepted a position with Poehlmann Bros. Co. He has had 30 years' experience on this market and will prove equal to the task of disposing of the output of the 60 growers who comprise the company and have 2,000,000 feet of glass. His many friends wish him much success in his new undertaking.

The Wietor-Sinner party returned this week from their outing in the woods in Northern Wisconsin, brown as berries, and enthusiastic over the good time and fishing. Nick Wietor was so pleased with the district that he has opened negotiations toward purchasing a piece of property on Clear Lake for a summer home. The fishing was reported fine and the catch good, but although the fish sent to this city were fine specimens of bass and pike when shipped, they had changed during the hot journey to "smelt."

John Canger journeyed to Cedar Rapids, Ia., where he acted as best man at the wedding of John E. Lapes, well known here as the enterprising florist of the Iowa city, to Miss Georgeally Acrey, who had recently arrived in this country from Greece, on Thursday, July 6. The happy couple are spending their honeymoon in Colorado, and the many friends of the bridegroom wish him all the happiness

in the world in his matrimonial venture.

A. C. Kohlbrand, of the E. C. Ambling Co., will leave July 15 for Lone Tree Point, Mich. He will spend his time fishing and is so confident of catching some that he says he will have trout for breakfast on Monday morning. Miss Ruth Wattman, with this concern, is spending her vacation at Ford Lake, Mich. John Michelsen, the hustling manager, made a business trip to McKenna this week.

The Illinois state fair will be held at Springfield, September 29 to October 7. Liberal premiums are offered in floriculture, of which department Robert O'Dwyer, 714 W. Madison street, Chicago, is superintendent. Copies of the premium list may be had by addressing J. K. Dickirson, Secretary State Board of Agriculture, Springfield.

Peter Reinberg is cutting a choice grade of American Beauty roses from their young stock that are of exceptionally fine quality. Tim Matchen says that his firm are so crowded for room at the greenhouses that they are obliged to dispose of their surplus stock of rose plants at sacrifice prices.

Miss M. C. Guntenberg, the popular young wholesale florist, left July 11 for a few days visit at Fenville, Mich. It is understood that the young lady is going to enjoy a longer vacation in the near future, but we have been sworn to secrecy and cannot state the date.

Joseph Ziska, of the Chicago Rose Co., returned Saturday, July 8, from a month's visit with relatives at Oxford Junction, Ia. He is back at work feeling much better in health, ready for whatever work the summer season may bring.

Dwight L. Harris, vice-president and general manager of the Pulverized Manure Co., 32 Union Stock Yards,

says "that the demand for their goods this year is exceedingly heavy and that sales have already increased 25 per cent."

Poehlmann Bros. Co. is receiving a good cut of American Beauty, Richmond and Killarney roses. A few good orchids are among the daily arrivals, also a good supply of carnations, which are moving readily at good prices.

Frank Ayres, of Chas. W. McKellar's, expects to be aboard the Vencedor when she sails in the Lipton race on July 19. Frank says she is a sure winner when it comes to a 15-mile triangular course.

Charles Neiglick, father of Charles T. Neiglick, the North State street florist, died suddenly on July 6, being prostrated by the heat on the day previous.

Wm. Ellison and wife, of St. Louis, Mo., passed through the city this week enroute to Macatawa, Mich., where their summer cottage is located.

C. M. Dickenson, of E. H. Hunt's, has got the fishing fever and will leave in the very near future for northern lakes.

Basset & Washburn are cutting a good supply of short and medium Mrs. Aaron Ward, the favorite eastern rose. The many friends of Fred Strail will be pleased to hear that he is having a fine rest at Twin Lake, Mich.

Frank Oechsli had the misfortune of breaking his right arm last Saturday while starting his auto.

Hoerber Bros. are cutting a fancy grade of Bride roses that are selling like hot cakes.

The wholesale stores in the Atlas block are receiving a new coat of calcimine.

Reserve Sunday, July 23, for the Florists' Club picnic at Ehrhardt's grove.

Henry Van Gelder is confined to the house with an abscess of the ear.

**ROSES, our selection, - \$3.00 per 100**

**WIETOR BROS., 162 N. Wabash Ave., Chicago**

A meeting of the directors of the Chicago Flower Growers' Association will be held next Tuesday, July 18. The association expects to open their new store on Michigan avenue August 1, with Otto W. Frese in charge. The first floor and basement will be used by the association and the three upper floors rented. The store is centrally located, well lighted, equipped with an electric elevator and heated by steam.

George Perdikis is doing a nice business in the sale of cooling drinks and ice cream at his store on Dearborn street. On July 5 he sold 2,200 glasses of lemonade and the profit of this and the other days will help considerably in defraying the expenses during the summer months. The proprietor who is generous to an extreme cordially invites the entire trade to visit him and have a drink or an ice-cream at his expense.

There will be an exhibition of annuals, perennials and vegetables under the auspices of the Horticultural Society at the Art Institute in September, specific date to be announced later. The premium list has already been issued, copies of which may be had on application to Secretary J. H. Burdett, 1620 West 104th place, Chicago.

A. I. Simmons, of 242 West Sixty-third street, holds a captain's commission in the Seventh Infantry I. G. N. and has been detailed as commissary by the general order issued for the mobilization of the state troops that are to participate in the joint maneuvers with the regular army at Grant Park, July 23-30.

The ice man has taken advantage of the warm weather and boosted up his prices.

Visitors: W. W. Coles, wife and daughter, enroute to their summer home at Oden, Mich.; J. D. Carmody, Evansville, Ind.; W. A. Bitler, Kokomo, Ind.

CEDAR RAPIDS, IA.—John E. Lapes was married on Thursday, July 6, to Miss Geogealy Aceve, the bride having recently come to America. The happy couple are enjoying their hon-

## Chicago Florists' Club.

The regular meeting of the Chicago Florists' Club was held at the Union Restaurant, July 6, with a good attendance, President Philpot in the chair. Four new members were elected as follows: Frank F. Gabler, 3708 Langley avenue; L. Hoekner, 3810 Grand avenue; Geo. H. Mohn, 31 West Randolph street; W. Langhout, 31 West Randolph street.

Allie Zech, chairman of the sports and pastimes committee, announced the arrangements for the annual picnic which will be held at Ehrhardt's grove, Park Ridge, July 23. Trains will leave on the Northwestern Railroad at 11 a. m. and 12:45 p. m. Tickets, including transportation both ways and admission to the grove, are 50 cents each and are now on sale at the wholesale commission houses. A liberal appropriation was made for prizes in the various picnic events.

Phil Foley, of the transportation committee, reported in favor of the Monon Railroad for the Baltimore convention trip and arrangements are being completed by which the President's Special will leave Chicago Sunday, August 13, at 10:30 p. m., arriving at Cincinnati at 7:50 Monday morning. There will be a stop-over at Cincinnati for a couple of hours to get together the various delegations from Louisville, St. Louis, Peoria, Indianapolis, Dayton, Toledo, Detroit and other nearby points. From Cincinnati the President's Special will proceed direct to Baltimore, arriving Monday at 7:30 p. m. The fare for the round trip, Chicago to Norfolk, via Baltimore, good for 30 days, is \$27.00. Lower berths, one way, are \$4.50, upper berths \$3.60. Many side trips can be arranged by rail or water to Washington, Philadelphia, New York, Boston, etc., at small additional cost. Reservations will be made at Chicago by Herbert Wiley, General Agent Passenger Department, Monon Railroad, 104 South Clark street. Telephone, Harrison 3309.

A letter was read from the John C. Moninger Co. requesting the Club's endorsement of this firm's action in petitioning the authorities for a new

Long Distance Phone, Central 3155.

classification of greenhouse construction material, giving reduced rates for a greater variety of material in car lots. This matter was referred to the Society of American Florists on the ground that the national organization has greater influence in such matters.

A committee consisting of J. C. Vaughan, Geo. C. Klehm and M. Barker, was appointed to co-operate with the local members of the American Association of Railroad Gardeners in entertainment of the visitors during the convention of that organization in this city next month.

A paper on fertilizers was read by Walter S. McGee, identified with the Wizard brand of pulverized manures, and will be found elsewhere in this issue.

## Spring Arithmetic.

It was the busy hour of 4.  
When from a city hardware store  
Emerged a gentleman who bore  
1 hoe,  
1 spade,  
1 wheelbarrow.

From thence our hero promptly went  
Into a seed establishment  
And for these things his money spent:  
1 peck of bulbs,  
1 job lot of shrubs,  
1 quart of assorted seeds.

He has a garden under way  
And if he's fairly lucky, say,  
He'll have about the last of May  
1 squash vine,  
1 egg plant,  
1 radish.

### Baltimore.

#### STOCK VERY SCARCE.

The city is still suffering from the extreme hot spell, with no relief in sight, and the drought is ruining the outside stock. Business is at a standstill with the exception of funeral work. Stock is extremely scarce, and indoor flowers are almost at a premium, whatever reaches the market is quickly sold, the recent hail storm causing a great shortage. Roses, sweet peas, lilies and outside flowers comprise the stock in the market.

#### CLUB MEETING.

The regular meeting of the Gardeners' and Florists' Club was held July 10. Two members, Joshua Naylor and Charles Bolgiano, were elected, and two propositions received. The reports of the treasurer and financial secretary were read and approved. The entertainment committee reported in favor of the trip on Chesapeake bay. The ladies' committee were granted a special fund for the trolley ride through the suburbs and a lunch at the Baltimore Country Club. The executive committee have been offered the support of the Greater Baltimore Committee by Edwin Quarles who was present at their last meeting.

#### NOTES.

The hall in which the meetings of the S. A. F. will be held is the greatest convention hall in the country, both for seating capacity and acoustic prop-

### Philadelphia. BUSINESS VERY GOOD.

The hot weather that is both good and bad for business is with us once again, last Monday being one of the scorchers of this season, very trying for those who have to work in green-houses and fairly cooking roses and other crops under glass. Business has been fairly good for the season there being quite a demand for high class stock. In the rose section American Beauties have cleaned up every day, and at times, there were not enough to go around. An out of town customer started a shopping tour among the stores for about one hundred blooms last Friday and kept the wires of the commission houses hot for a while as one store after another tried to secure the order. In white roses for which there has been a good demand White Killarney has been selling well, notwithstanding its off color and single appearance when in bloom, it makes up into a very presentable bunch. Kaiserin when well grown is better at this season, but so many have planted White Killarney on account of its all the year efficiency, that there are but few good flowers coming to the market. There are some fairly good Brides and Golden Gates also offered and the market has been cleaned of them all, at times recently. The exceptional warm spell of the past two weeks was fatal to many weak and old people, and the demand for funeral work was correspondingly large. Out of town, as well as local demands, made the market strong on all white flowers, there being many good shipping orders received. Sweet Peas which have been abundant have shortened up all at once and the stock now coming in is very poor. Fortunately there is lily of the valley and orchids, the latter of which hold up well in prices, 50 cents each or \$5 per dozen being the price. Easter lilies are plentiful and there are good gladioli, all of which add to the summer assortment. Asters have appeared and are coming from several growers in small lots.

### CLUB MEETING.

The regular meeting of the Florists' Club was held July 11, having been postponed from July 4, on account of the intense heat but was not very well attended. The paper read by Paul Huebner entitled "Railroad Gardening as a Paying Investment," was very interesting and instructive and the author easily proved that the railroad management were delighted with the results obtained. Report of the various committees that had been appointed to attend and plan for the comfort of the delegates from this city to the Baltimore convention were made. Chairman Wescott of the

transportation committee was much pleased with the suggestion made by George C. Watson that the Philadelphia party go to Baltimore by boat, and this is likely to be the route selected. D. T. Connor, for the bowlers, was confident that the team that would represent this city would give a good account of itself and bring home some prizes. Xavier Schmitt, of Fairmount Park, is to prepare a paper on "Trees and Plants for Up-to-date Planting" for the August meeting.

### Detroit.

#### STOCK POOR AND SCARCE.

Summer trade with its usual conditions is now fairly well settled upon us, though a different story could be told if the supply of good stock could be obtained to equal the extraordinary good demand for the summer season. The first few days of the month showed no diminution from the closing active days of June and this favorable trend would continue but for the great scarcity of attractive stock. Locally grown roses are very poor and scarce and when Chicago market is reached for aid the quality shows little improvement over our own. Carnations are becoming smaller daily and are soft and unattractive and the continued drouth and excessive heat have prevented outdoor grown flowers from being things of beauty.

### NOTES.

L. Bomb Floral Co. is about to commence the erection of a fine store on their Bates street lot—32½ by 100 feet. This will be a store built upon the most modern lines and many innovations will be incorporated. The rear 40 feet will be four stories high and a conservatory will be above the store proper. The firm is now moving to temporary quarters at 50 Cadillac square.

Chas. H. Plumb has returned from a week's outing at Algonac, Mich., where he was successful fishing, and he sent home some of his catch. A. Doxey, foreman for Mr. Plumb, is now on the ocean headed for his old home in England, where he will spend his summer vacation.

B. Schroeter will soon begin the erection of his new store on Broadway. This, too, promises to be commodious, with large show windows and equipped throughout with conveniences that will enable him to care for his increasing patronage better than ever.

John Breitmeyer's Sons' new store, 44 by 100 feet, on Broadway, is progressing rapidly and completion is looked for early in October, and when open to the public will disclose the nearest approach to the ideal "Flower Shop."

## U S Budlong's E Blue Ribbon Valley.

R. O. Koehler, who conducted a store for several years at 623 Gratiot avenue, has, after many tribulations, given up the struggle. He is succeeded in the same place by A. C. Schmidt, who recently worked for M. Bloy.

Louis Rush's housekeeper died suddenly last week from the effects of the excessive heat. His water supply was endangered by the alleged violation of the city ordinance forbidding the use of a hose in daytime.

Albert Sylvester has forsaken the packing department at the Michigan Cut Flower Exchange for a well-earned vacation for a week. Eddie Moos of the working force had a few days off at Cedar Point, O.

Wm. Hielscher, our popular wire manufacturer, was married on July 6. The happy couple are enjoying their honeymoon in Northern Michigan. Theo. Mitchell and wife are accompanying them.

Robt. Rahaley, of the Michigan Cut Flower Exchange, spent a few days at Cedar Point last week. His wife is enjoying the breezes of Mackinac Island in company with friends.

Walter Taepke and wife are preparing for an extended trip to Montreal and down the Saint Lawrence river. They will be gone for about three weeks.

Announcement is made of the approaching nuptials, October 10 next, of Harry, son of Ex-Mayor Breitmeyer, and Miss Maude Bamlet.

A. J. Stahelin, Redford, has about completed his new range of four large houses. He now comes to the city in a new Ford runabout.

Chas. Hufford, the hustling florist at 51 Gratiot avenue, has added a line of fruits to his stock for the summer season only.

E. A. Fetter's and wife are on a fishing cruise at Waterford, Mich. They report bass very plentiful and many catches.

Congratulations are extended to A. Pochelon because a new baby adorns his handsome home on the boulevard.

Murray Patterson and his young wife are spending their honeymoon in England.

Visitors—Elmer D. Smith, Adrian, Mich.; J. A. Brown, Howell, Mich.

Greenhouses DES PLAINES, ILL.

Store, 162 N. Wabash Avenue CHICAGO

Cleveland.

SCARCITY OF ICE AND WATER.

With some of the warmest weather we have had at this time of the year since 1907, florists and growers are suffering about as much as the flowers, several of the growers not being able to get enough water to water half their stock, retailers again cannot get any ice whatsoever, and many dollars worth of stock is spoiling that under ordinary conditions would be salable. Business has been fairly good for the first week in July and stock has been equal to the demand, with the exception of carnations. Sweet peas and Easter lilies are plentiful and meet with a good demand. Water lilies too are finding an excellent market, both in colored and white. Smilax is a little more plentiful than it has been and Asparagus Sprenger and A. plumosus find a good market. Candidum lilies are about done for. Gladioli is still very scarce. Asters are coming along very slowly, but not until we have some rain will there be enough to mention.

NOTES.

Westman & Getz had a very appropriate window display this week. A giant fire cracker made of red immortelles, in imitations of the "Fire cracker tanks," and a toy automobile decorated with American flags and having a life size doll in it and bearing a card reading, "Help the Babies." Red carnations and feverfew completed the decorations.

C. F. B.

St. Louis.

TRADE QUIET.

Very warm weather has prevailed all week and summer dullness prevails. There are a few weddings, some funeral work and an occasional bouquet to the summer garden which form the only outlet for flowers. All stock coming in is poor, a few good asters and gladioli is about all we see that can be called good. Roses are wide open and soft and hard to sell. Long American Beauty roses come in but have poor sale, medium and short stems selling the best.

NOTES.

The Retail Association met Monday evening. Robert J. Windler, the secretary, mailed post cards to the retailers to return their opinions as to closing of all stores on Sundays at 1 p. m. throughout the year and 7 p. m. every evening in summer and 8 p. m. in winter. Thirty-six replied in favor and five against. The house of delegates has not yet taken action on the crepe pulling matter.

Pierre Schneider, foreman of the Oakland Floral Co.'s greenhouses, is cutting some fair O. P. Bassett carnations, but he says the thermometer since May has been over 100° in the greenhouse so it is hard to grow choice flowers. This firm raises a fine crop of sweet peas as a specialty. They

have 23,000 feet of glass devoted to carnations and sweet peas.

We regret to announce the death, on July 3, of Harold F. Bruening, only son of Otto and Clara Bruening, aged eight months, from heat prostration. The little infant was buried July 4. We extend our sympathy to the bereaved father and mother.

H. G. Berning is getting some fine stock of gladioli. Some fancy America brought as high as 10 cents and general stock averaged six cents.

Alex Johnson, of Wellston, is still cutting some fairly good carnations. He expects to build two rose houses this season. His store at Suburban Junction is doing a nice business.

Vincent Gorly has returned from Detroit, where he made a business trip and called, of course, on Philip Breitmeyer. Vincent says, in the words of our slogan, "He has the goods."

George Lapp, foreman of the Bentzen Floral Co.'s greenhouses, has 4,000 chrysanthemums which are looking well. The hot weather, he claims, killed the aster crop.

Oakland Floral Co. is cutting some very good carnations for this season.

Al Gunz is busy these days getting up the games for the picnic on July 20.

Boston.

A DULL WEEK.

The market? Well, the wholesalers are here, the markets are here, and the salesmen in a mechanical way last week tried to do business. There is no use groaning and grumbling and using unnecessary printer's ink to say we have had a dull week with a little ripple Saturday. The hot spell? We are thankful to have lived through it. It's funny the west gets blamed for sending us hot spells and cold spells, and yet the western brethren seem always to be a happy lot of boys. The latest heat has warmed up Boston so that for many years if we survive we will have something to hand down to posterity about the hot July. The hospitals were taxed to their limits, doctors and nurses were worn out, hundreds dead and dying every day in greater Boston, 500 horses dead and 15,000 sick is the toll of poor dobbin in one week—105° in the shade, and some places higher, was the record. In the greenhouses 125° in the shade was about the ordinary. We have heard of only two prostrations in the craft, and those recovered in a day or so. We noticed Ampelopsis Veitchii growing on a stone wall where the heat had been so great as to scorch the leaves and left them as if they had been through a fire. Thursday night we had a light rain which helped the burned crops somewhat. Asters outside are reported to be almost a failure. It was hot enough for asbestos pants.

### NOTES.

Since his installation Governor Foss has shown himself to possess good business acumen. While some of us don't agree with him in politics, still we must give him great credit for doing his best to give the state a business administration. He has sent a special message to the legislature for a more liberal appropriation, for the advancement of the agricultural interests of the state and to reduce somewhat the cost of extending the park system. The message refers to the appropriation for the State Board of Agriculture. There is an appropriation of \$167,000. Forty thousand dollars goes directly for the encouragement of agriculture. This board is of much help to the farmers, and it is for the prosperity of the state and help to the farmers that he seeks to have the amount enlarged. The state is spending \$1,000,000 a year in interest, maintenance and extensions on parks, and reservations, which have cost

over \$20,000,000 thus far. The Board of Agriculture if properly supported could make the production of milk more profitable and be more valuable for the farmers. At present the cows in this state decrease at the rate of 3,500 a year. The fact that Massachusetts farmers are producing three times as much in value per acre as California or Kansas produces shows the wisdom of generous help to agriculture by the state. The Governor approves of spending \$1,000 for a Massachusetts agricultural exhibit at the American Land and Irrigation Exposition in New York City next November. Let's all raise our hats to

GOOD STOCK NOT PLENTIFUL.

Business is holding up fairly well for this, the off-season for the trade. In the retail stores naturally funeral work forms the bulk of the business. The wholesalers are kept moving all day between the local rush in the morning and getting out shipping orders for noon and evening trains. It is quite a problem for the buyer to get hold of real first class stock. In this last category may be included only lilies, a few varieties of roses and gladioli. At times the supply of the first mentioned is short of the demand, while at others it just meets it. The gladioli enjoyed an unusually heavy call on last Saturday. Roses as a whole are sufficient to meet the request for them. The supply of pink has increased somewhat while the size of the shipments of white has decreased. Some consignments of very short-stemmed, evidently the first cut of the new crop, have arrived. American Beauties are holding their own. A few asters came in at the close of last week, but they are not as yet in any sufficient quantity at all to be a factor in the market. The supply of green goods is adequate. As a whole the market is, at the time of this writing, not in the best of shape for extraordinary orders as compared with past years. Last year on the date corresponding with the first business day of this week flowers were as a whole cheaper. Gladioli sold at just one-half their present price. Still, judging from reports from various local growers, much heavier cuts will soon be in evidence.

### CLUB MEETING.

The Florists' Society held its annual meeting at the club rooms in the Flower Market. The meeting was well attended. The local men had as their guests two officers of the Chicago Florists' Club, Pres. Philpott and Secy. Pyfer. They proved to be two princes of good fellows that the local men were proud to have as their guests. The officers elected for the ensuing year are as follows:

Gus Adrian, president.  
Wm. Murphy, vice-president.  
Alex Ostendaup, secretary.  
Ed Forter, treasurer.  
Herbert GreenSmith, director.

The meeting was a very spirited one. There was considerable discussion upon a technical point that was led by R. Witterstaetter, one of the old staunch men of the club, on one hand and by Chas. H. Hoffmeister, one of the younger recruits, on the other. It served to awaken an interest in the meeting that made it worth while to attend. Both promise to keep their eyes open for future meetings so you can expect every one that attends to be wide awake. The talks by the visitors were right to the point and

appreciated. After the newly elected officers were duly installed the meeting adjourned for an informal social session at the Savoy.

### OUTING.

The annual outing of the florists will be held at Coney Island Thursday, July 20. The committee has arranged the following program of contests. For boys' ball game in the morning and after luncheon 100-yard dash and sack race. For the ladies and misses, tug of war, 50-yard dash and bowling contest. For the men and youths, 100-yard dash, senior race (open only to the older scouts in the local trade), mile run, tug of war and bowling. The committee wants every local florist, their families and friends to be on hand and feel that if each one lends their aid the affair will be one grand success and everyone will have a royal good time. The official program, with the list of prizes, will be mailed before the end of this week.

### NOTES.

Other vacationists who leave the city are: Alex Ostendaup, for Washington and Virginia, along the Potomac; A. C. Heckman, wife and daughter, for Chicago; Ed Fries and wife, for Denver, Colo., Kansas and surrounding states.

Among the European voyagers this year are four florists from this city. J. A. and Mrs. Peterson, to Norway, Sweden, Denmark, Germany and perhaps continental points; Max Rudolph and Henry Schwartz, to Germany and France.

We regret to report that the "grim reaper" has been getting in more than his share of work. Tom Hardesty lost his father and Henry Gockel of Ft. Thomas a daughter.

P. O. Berlin, N. J. Williamstown Junc., N. J

FISHKILL-ON-HUDSON, N. Y.—Benjamin Hammond is planning an extensive addition to the present paint and slug shot works to meet the rapidly increasing demand for his specialties.

BEAVER, PA.—In the hailstorm which passed over this place on the evening of June 11 the greenhouses of W. S. Kidd and T. M. Fitzgerald were badly damaged, the former losing 1,642 lights of 16x24 glass. Mr. Kidd was fortunately insured in the Florists' Hall Association and received a check from them as soon as he filed a claim for his loss.

## National Association of Gardeners.

A meeting of the executive committee of the National Association of Gardeners was held in Madison, N. J., July 10, the object of the meeting being to secure a charter for the association. President Logan called the meeting to order in the James Building, and in the absence of Secretary Noyes, William E. Maynard was nominated to act for him. The charter, which had already been drawn up by a local attorney, was adopted and the following members of the association were elected to serve as trustees under the charter for the first year: Thomas W. Logan, Jenkintown, Pa.; William Kleinheinz, Ogontz, Pa.; Martin C. Ebel, John Tyson and William E. Tricker, all of Madison, N. J.

The chairman then appointed a committee on by-laws, which will meet in Philadelphia next Monday to revise the present constitution of the organization so that it will be in accordance with the conditions of the new charter. The committee was instructed to report at the next annual meeting, which will be held in November.

In the absence of President Dowling, of the Morris County Florists' and Gardeners' Club, Mr. Ebel, on behalf of that gentleman, invited the National Association of Gardeners to participate with the local club at its next annual fall show, which will occur October 26 and 27. The executive committee decided to accept the invitation. Mr. Ebel also suggested that the association hold its next convention at Madison at the time of the fall flower show, he pointing out that as there are many visiting gardeners from far and near attending this show annually, it would both be a convenient and opportune time to have the gardeners meet in convention. It was decided that the convention should be held in Madison on Friday, October 27.

Following the adjournment of the meeting the visitors inspected the laboratories of the Aphine Manufacturing Co. which at the present time is a busy place in the manufacturing of its products, Aphine and Fungine. After this, Manager Ebel of the company entertained the delegates at lunch at the Madison House.

The afternoon's programme included a drive to the establishment of Charles Totty, and the splendid James and Twombly estates, both of which are located in Madison. In the absence of Mr. Totty, who is enjoying a short vacation, Superintendent Tricker showed the visitors through the plant, where the famous Totty chrysanthemums and the new carnations and rose stock were favorably commented on.

Superintendent Tyson, of the Twombly Estate, was on hand to greet the visitors and escorted them over the grounds, the suken gardens and large greenhouses of this place proving especially interesting.

A cordial welcome awaited the party on their arrival at the James Estate, where Superintendent William H. Duckham presides over its affairs. After a tour of the greenhouses and the grounds, there being practically no grander display of floriculture and horticulture on any estate of similar size in this country, Mr. Duckham invited his guests to his home where a pleasant half hour was spent, Mrs. Duckham here superseded her husband as the hostess.

Among the out-of-town members of the association who attended the meetings were President Thomas W. Logan, of Jenkintown, Pa.; ex-President William Kleinheinz, of Ogontz, Pa.; Xavier Schmitt, of Philadelphia, Pa.; John Dodds, of Jenkintown, Pa.; William J. Stewart, Boston, Mass.; E. Thathaway, Tarrytown, N. Y., and William E. Maynard and Harry A. Bunyard, of New York.

The many friends of John B. Nugent, Jr., president of the New York Florists' Club, will be surprised to learn of his marriage to Miss Salney D'Orsell, a soprano with the Aborn Opera company. While it was known that Mr. Nugent was devoted to the singer yet their friends did not expect them to leave the state to marry. But the wedding took place at Baltimore on June 7. Miss D'Orsell has been identified with the Aborn Opera companies for several years and in musical circles it was said that Mrs. Nugent was not expected to relinquish her operatic career for the present.

## Buffalo.

TRADE QUIET.

There is one place in every city and town that the Supreme Ruler does not cast his extreme heat on. That is the flower shops. For what reason we cannot tell, unless it is because we dispense so much pleasure to the many in sending his prettiest things to them. Nevertheless flower shops have been the coolest places in any city the past two weeks and those who expect a vacation later are the ones to be envious. Roses and carnations should be mentioned, nothing more, the sun has done the rest. Harrisii and Japanese lilies, are good, the former will be through this week. Sweet peas have been good and the supply abundant. Watering by sweet pea growers enables them to send in good flowers. Trade has been quiet with the exception of funeral work, which has been spasmodic, but some busy days and large orders kept the florists from getting too languid. Quiet times have enabled the window artists to think up different schemes for their windows and they have been successful. Anderson has had a miniature fountain in his window with gold fish swimming in the basin, green moss covers the window, white lilies, sweet peas, poppies and corn flowers give it the appearance of a beautiful private lawn. Palmer & Son have sought to call attention to the old home. They have an old mill with a bridge which reminds one of what pleasures there are in the country and at the old mill. Both windows have been very attractive.

## NOTES.

W. J. Palmer has purchased what is conceded to be one of the most desirable pieces of residence property in Buffalo. It is on the corner of North Lincoln parkway and Chatham avenue, a part of the Pan-American property but fronting on the prettiest part of the park. Mr. Palmer will start building at once.

There are more rumors of another wedding of a Main street florist in the near future. There are only three unmarried on Main street, and Ed. Altman and Ed. Stroh are not the ones. (It has the savor of "vinegar" but only in name.) "Guess who."

**MILWAUKEE, WIS.**

# HYDRANGEAS

## For Summer Flowering

We have an unusually fine lot of Hydrangeas, which have been held dormant all winter. These plants are now in bud and bloom, and will flower in fine shape during July and August. We have a fine lot of **Blue Hydrangeas**, as well as pink. Plants are in splendid shape for immediate use, and will flower during July and August—at a time in the year when they are in the greatest demand. We can furnish these plants in ordinary butter tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs, painted green, with handles, as follows: Well budded plants in 14-in. tubs, \$3.00 each; 16-in. tubs, \$4.00 and \$5.00 each.

# FERNS

We have an exceptionally fine lot of **Boston Ferns** of the **Harrisii** type; also a splendid lot of **Pierson Ferns**. Good bushy, well-grown plants in 8-in. pots that will please the most critical buyer, **\$1.00 each**.

## Lilium Harrisii, The Bermuda Easter Lily.

We offer a selected and carefully grown stock of the original pure **Harrisii**. There are only one or two lots of bulbs on the island as good as the stock that we offer. We take pleasure in offering this stock, because it will be found to be very superior to the average stock that is generally offered. This is one of the healthiest and cleanest lots, and will give much better satisfaction than the stock usually obtainable. Our customers who had **Harrisii** from us last year stated it was the best they had received in years. We have only a limited stock, which we are offering, and when stock is exhausted, we shall have no more to offer this season.

Fine selected bulbs, 6-7 inch, 350 to the case, **\$16.00** per case, or full 1000 lots at **\$45.00** per 1000; 7-9 inch, 200 to the case, **\$17.00** per case, or full 1000 lots at **\$80.00** per 1000; 9-11 inch, 100 to the case, **\$18.00** per case, or full 1000 lots at **\$175.00** per 1000.

## The Seed Trade.

### American Seed Trade Association.

Leonard H. Vaughan, Chicago President;  
Marshall H. Durfee, New York, First Vice-  
President; Edgar Gregory, Marblehead,  
Mass., Second Vice President; C. E. Ken-  
del, Cleveland O., Secretary and Treasurer.  
Next annual convention, June, 1912.

LATE peas in Canada are said to be suffering seriously from drought.

A. H. GOODWIN, Chicago, is quite optimistic with regard to the pea situation.

THE winter onion set crop will be ready a little earlier than usual this season in the west as the stock has ripened rapidly under the heat.

WASHINGTON, D. C.—F. W. Bolgiano is home again after attending the convention at Marblehead, Mass. He is well pleased with the work of the convention.

VISITED CHICAGO.—A. J. Brown, Grand Rapids, Mich., passing through on his annual crop inspection tour.—A. H. Goodwin, up from his Vawter Park, Ind., summer home for a few days.

ONION SET pulling has begun actively in the Chicago growing district. The middle of next week will see most of them in the crates as the extreme heat has ripened the crop very fast in the past 10 days.

HOLLISTER, CALIF., July 8.—Crops looking well. The cool weather has improved the radish crop, which may turn out 75 per cent of the average yield. Onions looking very well. Sweet peas one-half crop. Carrot very light. Salsify short.—W.

DALLAS, TEXAS.—Robert Nicholson, president of the Texas Seed & Floral Co. for twenty-five years and founder and manager of the company, has severed his connection with that firm and established himself in the wholesale seed business at 401-403 Commerce street.

SHENANDOAH, IA.—The Henry Field Seed Co. at its annual meeting July 1 declared a dividend of nine per cent. The past season has been quite prosperous and as there was a good cash balance the directors decided to make the dividend nine instead of the usual eight per cent. The old directors were all reelected with the addition of A. M. Eldridge to fill the vacancy which has existed on the board the past year.

As a result of the insecticide law, both wholesale and retail prices of insecticides have advanced.

GOLF grounds and grass plots in the parks show very brown after the burning heat of the last two weeks.

ARTHUR B. CLARK, of the Everett E. Clark Seed Co., Milford, Conn., is at Green Bay, Wis., looking over his firm's seed crops in that section.

DICK ENGLEMAN, one time seedsmen of Omaha, Neb., and now in the steel and iron business, residing near Chicago, is 84, but looks only 40, and is still interested in sets.

ARTHUR L. DEAL, representing W. W. Johnson & Son, Boston, Eng., will sail for New York July 22 to call on the American trade. His address upon arrival will be Hotel Imperial, New York.

THIS is the time of year when the seedsmen, are watching to see how their neighbors pay their bills. The fact that it has not been easy sailing everywhere is shown by some slowness in the seed trade collections generally.

THE PEA CROP.—There is no doubt that garden peas have been badly hit by the hot weather. Some of the early sown peas will make a fair crop, but the later plantings will yield very little. The wet weather in spring hurt the stand on low land in many places and caused late planting. The results are quite spotted and it will be hard to tell until very late what actual deliveries will be like.

LOS ANGELES, CALIF.—At John Bodger & Sons' seed farm near Dominguez, splendid stands of Spencer sweet peas may be seen, also German stocks with 75 per cent double flowers. Petunia Giants of California is magnificent, the flowers beautifully fringed and veined and first class in every way.—Chas. Winsel is now well established in his new location at 211 Main street and reports an excellent business. He has improved and rearranged his nursery on Washington and Figueroa streets in preparation for the fall trade and is expecting heavy importations of box and bay trees, araucarias and other European stock. Fifty thousand manettis are also expected for working varieties of roses that do not do well on their own roots.—H. R. R.

### Iowa Crops.

Muscadine, July 7.—The best news we have now is the splendid rain of July 5 which broke the drought and saved our melon and tomato crops here. Our Earliana tomatoes were beginning

to scald on the vines, but they are all right now unless we get another drought. We had hard work in getting a stand of peppers in our fields for seed purposes as the hot weather cooked them just at the level of ground and many of the plants fell over dead, some fields being replanted four times. They have grown very slowly the last two weeks, it has been so dry and hot, but now they are making a fine start. We picked our first ripe Earliana tomatoes June 24, the earliest date here. Our Osage and Rockford muskmelon fields are full of melons and in the morning fairly yellow with bloom. We have Kleckley Sweets watermelons about a foot long, which is a record here. Green peas and wax beans were almost a failure. Cabbage is being cut now but so far the heads are small on account of drought. Sweet potatoes are poor so far, a very poor stand, the weather being too dry for them to grow as rapidly as they should at this time. Egg plant started off slowly but is doing well now and beginning to bloom. Early sweet corn was poor as the cobs were not well filled and there was a good crop of worms to be fed this year. Our fields of asparagus roots for the trade this fall and next spring are a handsome sight. They started well and we have kept them well weeded and clean. H.

### Pittsburg.

#### THE FIRST ASTERS.

Weather and business conditions are about the same as reported last week. Considering the extreme heat flowers arriving in this market are pretty good. Asparagus Sprengeri and plumosus are a drug just now, quantities going by way of the ashman. Asters have made their appearance in this market, but owing to dry weather are very short and poor.

#### NOTES.

The first of a series of games for the base ball championship of the florists of the city was played last week. The Zeiger Co. defeating the A. W. Smith Co. by the score of 19 to 2. The nine were composed as follows: Zeiger—Allridge, s. s.; Ackerman, 2nd b.; Kilgallon, 1st b.; Gerbe, c.; Jackson, 3rd b.; Graves, r. f.; Treager, 1. f.; Beet, c. f.; Daschbach, p. Smith—McCauley, c.; O'Connell, 1st b.; Hall, 2nd b.; Marshall, s. s.; Gross, 3rd b.; Weiss, c. f.; Arnold, p.; Hager, p.; Wilby, 1. f.; King, r. f.

Chester Greenhouses of Chester, W. Va., have leased The Lake Newell Floral Co. greenhouses, Newell, W. Va., and will be known as the Colton Greenhouse Co.

G. & J. W. Ludwig, North Side, lost a quantity of ferns and palms, valued at \$400, through an explosion next door to their storerooms.

The McCallum Co. had a very unique order from one of their customers this week in the way of a five passenger touring car.

E. M. Neigle, foreman of the McCallum Co. wire works, is spending a couple of weeks at Parkers Landing.

F. H. Westhoff, Westhoffman, is cutting some nice summer roses.

Lorch & Hoffmeister are well satisfied with their new business. J

**ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th Street, NEW YORK**

## New Bedford, Mass.

The rose exhibition of the New Bedford Horticultural Society was held in the Free Public Library building June 27. There was a large and varied display consisting of more than 1,200 roses and besides water lilies, gardenias, geraniums, delphiniums, iris and other flowers. The largest displays were from the Rogers estate, Fairhaven (James Garthley, superintendent), and from the rose gardens of Miss S. B. Fay (M. H. Walsh, superintendent), Woods Hole. More than 425 vases of roses were exhibited from the former estate alone, beside a magnificent specimen of a geranium bearing 70 blooms, and rhododendrons, sweet peas, Japanese iris and delphiniums. Fully as beautiful and almost as large was the display from the estate of Miss Fay of Woods Hole. An interesting exhibit was made by Mrs. Frederick Grinnell (John F. Rooney, gardener). H. A. Jahn made a fine display of roses which included some extra fine specimens. To the new climbing rose Silver Moon exhibited by A. J. Fish, the judges recommended an award of a silver medal. The prizes were awarded as follows:

Best vase double pink roses, any variety—John A. Ruggles, first; Mrs. F. W. Tervilligen, second.

Best vase double crimson, any variety—Mrs. F. W. Tervilligen, second.

Best three blooms double white, any variety—Mrs. Charles I. Gibbs, first and second.

Best three blooms double pink—Mrs. Chas. I. Gibbs, first; John A. Ruggles, second.

Best three blooms any variety not offered in any American catalogue previous to 1908—Mrs. Helen Burns, first; Charles R. Rice, second.

## For Fall Planting

Lilium tenuifolium, Hansonii, Davuricum, Henryi, Elegans and Wallacei; Daphne Cneorum, Delphinium Formosum, Syringa Japonica, German and Japan Iris. Fall list issued in August.

E. S. MILLER, Wading River, N. Y.

## Field-Grown Carnation Plants of

## Bright Spot

ready after August 1.

Nic. Zweifel, North Milwaukee, Wisconsin.

## CARNATIONS

F. DORNER & SONS CO.

La Fayette, Indiana.

Best vase single, any color—Jethro Hathaway, first.

Best bloom double white—Louis W. Macy, first.

Best bloom double pink—Jethro Hathaway, first.

## Market Gardeners

Vegetable Growers' Association  
of America.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

SAN FRANCISCO, CALIF.—The Imperial valley is reported as producing more cantaloupes than can be marketed at remunerative prices and that growers are restricting their pack to five cases per acre.

### Quality Counts.

There is scarcely a business which presents such extremes as market gardening. This is especially noticeable this year. We are selling Telephone peas at \$3.50 wholesale per bushel, when a year ago during the same week we received only 35 cents; the same is true of other crops. Cabbage is now selling at 90 cents per dozen when a year ago it sold slowly at 90 cents per barrel. Such conditions are profitable to the one who has either been lucky or plucky enough to have a good crop to move. We are now selling the finest leaf lettuce it has ever been our pleasure to cut, produced by a special process. It resembles the finest mid-winter greenhouse product, and if anything it is more tender and palatable. There is a general opinion that the demand for lettuce drops out after Memorial day by which we mean to say that the demand is killed by putting bitter and tough stock on the market. Following this theory we prepared a set of cheesecloth frames to shade our lettuce patches and this is our first experience with this scheme—we are selling outdoor lettuce at greenhouse prices, 10 cents per pound wholesale in mid-summer. This demonstrates that of all things a gardener can do, the worst is to send poor goods to market, as it very quickly destroys any demand and strikes back at the producer. We could give many examples, but the above and a few more are sufficient to illustrate the point.

Several years ago the turnip crops in this section were caught by an unusual severe cold wave late in October when most of the turnips were half frozen in the ground. Most crops were heavy and these were afterwards harvested, pitted and marketed with the result that the sale of turnips came to a dead standstill and hundreds of bushels were left unsold in the spring. Last year the opposite conditions prevailed—the quality was so fine that the market price advanced to one dollar per bushel and the entire available supply was used up by the new year. The musk melon or cantaloupe crop is another case. If on account of favorable weather the crop comes in well ripened and sweet the demand is ahead of supply, but when blight overtakes the crop and smooth tasteless melons are sold the result is a total demoralization to such an extent that the buying public will not even investigate the quality offered, but cut out melons altogether. The fact is a producer has no more right to offer for sale blighted melons or tomatoes than diseased chickens or hogs. All such goods should be withheld from the markets.

MARKETMAN.

### Salem, Mass.

Leonard G. Ward, son of George E. Ward of Beverly, died at his home, No. 6 Pleasant street, July 4 from heat prostration. For several years he was in partnership with his brother, Harry E. Ward, at the North street greenhouses. For the last few years he has been employed by Southworth Bros. of Beverly. He was a most capable young man and very popular. He was 32 years of age and leaves a wife and two small children.

William McCue, gardener of Greenlawn Cemetery, in spite of the dry season has the grounds in splendid condition. They never before were more beautiful.

J. E. Hamilton is building a new house 20x75 feet for bedding stock. A new boiler house will also be erected this season.

The King Street Greenhouses are adding a new office to their attractive looking place.

J. R. H.

### Los Angeles, Calif.

In the Boston notes on page 1153, issue of June 24, "Mac" speaks of Araucaria Bidwillii, having seen it as a pot plant. He would probably be still more struck with this fine species could he see it out here in Southern California where it grows into large trees. It is a most distinct and striking plant, coming midway between the well known Norfolk Island pine (A. excelsa) and the monkey puzzle, A. imbricata and there are few finer trees for a large lawn where there is ample room for its full development. It has none of the straggling appearance of A. imbricata while owing to the growth being more undulating or wavy the whorls of branches are not so distinct and set looking as those of A. excelsa. Its beautiful deep green coloring makes a fine specimen in perfect health, a truly magnificent sight.

J. B. Menaseo, of the Eagle Rock Rose Co., has purchased five acres of land near Covina and intends moving there as soon as possible. The Eagle Rock property is becoming too valuable for horticultural purposes. He will grow roses and chrysanthemums exclusively. Menaseo surely deserves credit for the fine stock of Ulrich Brunner, Mrs. J. Laing and other roses he grows, also the superb chrysanthemums sent to the market here for four or five months in fall and winter. Everybody will wish him the

### VEGETABLE PLANTS.

Cabbage, Wakefield. All Head. Succession and other varieties \$1.00 per 1000; 10,000 and over 85c per 1000.

Lettuce, Grand Rapids, Big Boston, Boston Market and Tennis Ball. \$1.00 per 1000; 10,000 and over 85c per 1000.

Beet, Crosby, Egyptian and Eclipse. \$1.25 per 1000. Cash with order.

R. VINCENT, JR., & SONS CO., White Marsh, Md.

Mention the American Florist when writing

best of luck and success in the new place.

A sight to be long remembered was the long queue of sweet girl graduates stretching nearly a city block waiting their turn to get into the store of The Florist at 328 West Fifth street for their bouquets recently. Hundreds were passed out and the bells on the cash registers kept up a merry peal, Herbert Wolfskill and Frank Lichtenberg keeping on the jump right along.

F. H. Wilhelm, late of 1439 Ashland avenue, Chicago, and previously foreman at the Wellworth greenhouses at Downer's Grove, Ill., is located here at the New Broadway hotel. Frank is a delighted with the climate here and if he can strike something suitable will, he says, locate here permanently.

J. Dietrich is equipping the whole of his lath houses, several acres in extent, with the Skinner watering system. This system is becoming increasingly popular in this section.

Sam Lundy spends a good deal of time in the city drumming up business for the A. L. Randall Co., of Chicago.

### American Association of Nurserymen

J. H. Dayton, Painesville, O. President;  
W. H. Wyman, No. 14 Abington, Mass. Vice-  
President; John Hall K. Chester, N. Y. Sec'y.  
Thirty-seventh annual convention to be  
held at Boston, Mass. 1912.

### Lilacs at the Arnold Arboretum.

The bulletin issued by the Arnold Arboretum June 14 says of the later lilacs and philadelphus:

The flowers of *Syringa villosa* are just falling. This inhabitant of northern China is in cultivation here a large and shapely shrub with good foliage and pale pink or nearly white flowers in large, compact, erect clusters which are produced in great profusion. The odor of the flowers is disagreeable. The Hungarian Lilac, *Syringa Josikaea*, is still in flower. This is a tall shrub with loose, unattractive habit, small leaves, and long, slender, open clusters of small purple flowers. This is perhaps the least attractive of all the lilacs. The crossing, however, of these two species has given rise to a race of lilacs which prolongs the season of flowering of the true lilacs for nearly two weeks. This new race is called *Syringa Henryi* in honor of L. Henry, at one time gardener at the Jardin des Plantes in Paris, who made these hybrids. The best known of them is *Lutece*, so-called because it originated in Paris. This is a compact, fast-growing, large shrub with foliage resembling that of *Syringa villosa* and large clusters of rose-purple flowers, and is one of the handsome and desirable shrubs of recent introduction.

There is a group of lilacs which bloom even later than this hybrid. They are not true lilacs, however, belonging to the section *Ligustrina* of the genus which differs from the true lilacs in

the short tube of the corolla from which the stamens protrude. There are three species of this group, all natives of northeastern Asia. They are shrubs or sometimes trees, and they all produce white, bad-smelling flowers in large clusters. They are just coming into bloom in the lilac group on the left-hand side of the Bussey Hill road. The first to flower, *Syringa amurensis*, is a native of eastern Siberia, as its name indicates. It is a small tree, with flat, spreading or slightly drooping clusters of white flowers. The second species to flower, *Syringa Pekinensis*, a native of northern China, is a shrub rather than a tree, although it sometimes reaches the height of thirty feet, with numerous stout stems more or less pendant at the ends and covered with bark peeling off in thin layers like that of some birch tree. The long, narrow leaves hang gracefully and the half-drooping flower-clusters, which are flat and unsymmetrical, are smaller than those of the other species but are produced in great quantities. *Syringa Japonica*, a native of the forests of northern Japan, is the last of the three lilacs to flower and is really a tree often thirty or forty feet high, with a tall, stout trunk covered with lustrous bark like that of a cherry tree, and a round-topped head. The leaves are large, thick and dark green, and the flowers are produced in large, erect, symmetrical clusters. Like the other species of this group, *Syringa Japonica* loses its leaves early in the autumn without change of color. *Syringa amurensis* and *Syringa Pekinensis* have not become common in gardens, but *Syringa Japonica* has been quite generally planted in those of the eastern states. It is of interest that this remarkable tree was first sent to America and thence to Europe by a citizen of Massachusetts, the late William S. Clark, the first President of the Massachusetts Agricultural College and later the first

President of the Agricultural College at Sapporo in Japan. In December, 1876, a small collection of seeds gathered in the neighborhood of Sapporo were received at the Arboretum from Colonel Clark and among them were seeds of this lilac. The seedlings

## And Other Flower Seeds For Summer Sowing.:::

**10 Per Cent Special Cash Discount**

On orders over \$2.00 for Flower Seeds, if the cash is enclosed **10 per cent.** The discount does not apply to Asparagus Seed. Cash discount on this is 2 per cent.

**CALCEOLARIA HYBRIDA**  
**Extra Choice Mixed**

Our mixture is composed of the choicest selection of the tigered, marbled, spotted and variegated varieties, and we know will give entire satisfaction. Trade pkt. (1,000 seeds), \$0.50; 3 trade pkts. for \$1.40.

### GLOXINIA HYBRIDA

Vaughan's Columbian Mixture is made up by ourselves from the choicest spotted, tigered, edged, marbled and splashed sorts of the upright and horizontal type, and includes such choice new sorts as Emperor William and Frederick, Princess Louise, Dedanoe, etc., and we know that better seed is not to be had at any price. Trade pkt. (1,000 seeds), \$0.50; 3 trade pkts. for \$1.40.

### MIGNONETTE

New York Market. This is an extra choice strain of Mignonette for greenhouse culture. Our seed is greenhouse grown, raised by a most careful grower. The plants grow from two to three feet high, and produce flower spikes up to 20 inches long, according to the quality of the soil, weather and treatment. Trade pkt. (about 1,000 seeds), 50c; per oz., \$7.00; ¼ oz., \$1.00.

### VAUGHAN'S INTERNATIONAL PRIMULA MIXTURE

This mixture is composed of the most salable colors of Single Flowering Chinese Primulas, the best whites, pinks and reds, with a sprinkling of other colors, enough to give a large variety of colors, the most important shades predominating. We have taken special pains to make this mixture as complete as possible, and unreservedly recommend it to everyone.

Trade pkt. of 350 seeds, 50c; 5 trade pkts., \$2.00; per 1-lb. oz., \$3.25.

### ASPARAGUS SPRENGERI

100 seeds, 15c; 250 seeds, 25c; 1,000 seeds, 75c; 5,000 seeds, \$3.25.

Our list of "Seeds for Summer Sowing," now ready; if you have

### VAUGHAN'S GIANT PANSIES

#### Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. Trade pkt. 50c, ¼ oz. \$1.00, ½ oz. \$2.00, oz. \$8.00.

#### Vaughan's "Giant Pansy Mixture"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and tronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimarcean, the splendid Cassier strain. Trade pkt. 25c, ¼ oz. 50c, oz. \$4.00, ½ lb. \$14.00.

#### Vaughan's International Pansies

##### The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt. 50c, ¼ oz. \$1.50, ½ oz. \$5.00, oz. \$10.00.

### CINERARIA

#### Vaughan's Columbian Mixture

It consists of a mixture made up by ourselves of the choicest English, French and German strains, and cannot be excelled in variety of colors, size, shape and substance of flowers, and perfect habit of plant. Trade pkt. (500 seeds), 50c; 3 trade pkts., \$1.40.

### Vaughan's Giant-Flowered Cyclamen

Pure White (Mont Blanc); Dark Crimson, Rosa von Marienthal, "Daybreak"; pink; Dark Rose, White with Crimson Eye. Per 100 seeds, 75c; 1,000 seeds, \$5.00; 250 seeds of a color at the 1,000 rate. Giant-Flowered Cyclamen, extra choice mixed. Per 100 seeds, \$0.50, 250 seeds, \$1.15, 1,000 seeds, \$4.00, 5,000 seeds, \$20.00. This mixture is made up from the above separate colors.  
New Salmon (Glorio of Wandbek). Per 100 seeds, \$1.35; 250 seeds, \$2.85; 1,000 seeds, \$10.50.

#### Giant Orchid-Flowered Cyclamen

These are exceptionally fine, with large flowers that are frilled and fringed in wonderful fashion.

Pure White, Red, Pink, White with Carmine Eye, and Lilac Color.

Each, per 100 seeds, \$1.00; per 1,000 seeds, \$8.00.  
Giant Orchid-Flowered Cyclamen, in choicest mixture: 25 seeds, \$0.25; 100 seeds, 85c; 1,000 seeds, \$7.00.

#### English Grown Giant Cyclamen

Price, 100 Seeds, \$1.00; 1,000 Seeds, \$8.00.

Princess May, Pale pink.

\*Princess of Wales. Giganteum variety. Pink.

Mauve Queen. Giganteum variety. Mauve.

\*Duke of Connaught. Giganteum variety. Purplish crimson.

\*Duke of Eito. Giganteum variety. Dark rose.

Salmon Queen. New extra choice color.

Rosy Morn. Giganteum variety. Delicate rose color, Claret base.

Picturatum. Light rose tinted, with claret base.

\*Grandiose alba. The largest giant white strain.

Excelior. White, with red base. Extra large flowers.

#### SMILAX

**VAUGHAN'S SEED STORE**

25 Barclay St.,  
NEW YORK

Greenhouses, Trial Grounds and Nurseries: Western Springs, Illinois.

raised from this seed and their descendants are the native plants now cultivated in the United States and Europe. One of the original seedlings can be seen in the apple group on the right-hand side of the Forest Hills road, the site of the first Arboretum Nursery in which this Lilac was planted. The United States and Europe owe to Colonel Clark the introduction of some other good plants.

The Mock Oranges (Philadelphus) are fast coming into bloom, and several of them will be in flower during the present week. They can be found in the shrub collection and in the large supplementary collection on the right-hand side of Bussey Hill road opposite the lilacs. Those which deserve particular attention now are

Philadelphus inodorus, a native of the southern Appalachian region, with large solitary pure white flowers, and, although still little known one of the most distinct and beautiful of the genus; Philadelphus Falconeri of unknown origin, but probably a native of China and Japan, as it was sent to the Arboretum many years ago from the Parsons Nursery on Long Island where many eastern Asiatic plants were first cultivated in this country; Philadelphus maximus, a hybrid between two American species and the largest of all the mock oranges. In old gardens near Boston this plant has sometimes grown to the height of thirty feet. Philadelphus Lemoinei is also in flower. This is the result of a cross between the common mock

orange of gardens, the European Philadelphus coronarius, and the small-flowered and small-leaved Philadelphus microphyllus of the Rocky Mountains of Colorado. This cross was made by Lemoinei of Nancy, the most successful of hybridizers, who had received the Colorado plant from the Arboretum, and it was the beginning of a race of dwarf garden shrubs produced by Lemoinei which have few equals in beauty. Philadelphus microphyllus itself will not expand its fragrant flowers for several days, but many of its progeny are now beginning to flower. Some of the most interesting of these are the varieties known as Avalanche, Boule d'Argent, Bouquet Blanc, Candlabre, Conquete, Fantasia, Gerbe de Neige, Manteau d'Hermine, Mont Blanc, Nuee Blanche, Pavillon Blanc, and several others.

## THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

#### HOT WEATHER AND DULL BUSINESS.

The retail florists are going through the form of doing business, that is, they open their stores in the mornings, arrange their windows, water the plants, and do their best to look pleasant; this last being sometimes the hardest task of all. Funeral work is all that is in sight, and when that is divided up there is no great amount for any single store. The weather of the last week was an aggravating imitation of that of the previous one, the only difference being that it was a little worse. The regularity with which the thermometer runs from 95 to 104° in the daytime is getting monotonous. On July 6 the temperature was 90 at 8 p. m. The forenoon of July 7 was intensely hot but a promised cool wave materialized in the afternoon. A part of the city received a heavy shower, in other sections there was not enough rain to wet down the pavement. The drought is causing the growers anxiety. All outdoor stock is practically at a standstill—some of it still in death. A little phlox and gaillardia is about all worthy of mention that is fit to sell. There are a few sweet peas but they are burning up fast. This with an indifferent stock of roses and a few old carnations comprises the stock in trade. Fortunately good orchids can be procured when they are needed.

#### CLUB MEETING.

The Florists' Club held its monthly meeting, on the night of July 6, about fifty being present, at the Gude Bros. store. E. S. Schmidt, a member of the club, gave a crab feast, possibly crab-fest is a better word. Mr. Schmidt keeps a store where, excepting elephants, lions, whales and the sea serpent, most anything that flies, walks, creeps or swims can be bought. He is very humane with all his charges but by careful study has discovered that crabs positively enjoy being cooked and eaten, hence the feast. J. S. Warmbuth, who went north with Peary on one of his trips, spoke on the flora of the far north. Richard Vincent, Jr., I. N. Moss, Robert L. Graham and

JOS. H. CUNNINGHAM, Delaware, O.

Edwin A. Seidewitz of the Baltimore Club were present and as a matter of course they are all enthusiastic boomers for a great convention in Baltimore in August. Among the other speakers were W. R. Smith and W. F. Gude, the latter acting as toastmaster. The club outing occurs July 12 at Huntsville, Md., and an enjoyable day is expected.

#### NOTES.

The Misses Ponnet of Alexandria, Va., well and favorably known in connection with the retail trade of this city, have exchanged the florist business for the blissful estate of matrimony. Miss Virginia Ponnet was married on July 12 to E. J. Schroth, a business man of this city, where they will make their home. Miss Lucy Ponnet will be married July 26 to J. L. Power, a business man of Alexandria. Both these young ladies are daughters of Constant Ponnet, an old and well known grower of Alexandria. For the past few years they have successfully managed their father's retail business in Washington and made many friends by their genial deportment and attention to business. In this new and important venture many good wishes will follow them.

News has reached this city of the marriage in Baltimore July 7, of John B. Nugent, Jr. of New York, to Miss Gabney D'Orsell, a leading singer in the Aborn Opera Company. Mr. Nugent is well known in the trade, having two retail stores in New York. He is now president of the New York Florists' Club. He has always been a

## Araucaria Excelsa, Robusta and Compacta

You will never be sorry. It will pay you well. Do it now, and lay in a stock of Araucarias. Every day is valuable to you, because they grow into money for you.

### Araucaria Excelsa Our Specialty.

**Warning—Don't be deceived.** Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and Palms, etc. Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the Araucaria, more in favor than ever, from Atlantic and Pacific Ocean to every part of our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants. Spring 1910 importation, lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere this plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old, 5, 6 and 7 tiers, 25, 28, 30, 35, 40 in. in height, \$1.00 \$1.25 \$1.50 \$2.00 to \$2.50 each

## Greenhouse Heating

is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,  
 1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department "N"

Detroit, Mich.

## What the Users say

## Kroeschell Boiler---Half the Coal and Half the Work

Your No. 13 Boiler is carrying 25,000 sq. ft. of glass, and I can keep it at 60° in the coldest weather without any trouble. I have three other types of boilers also, heating a range of 25,000 sq. ft. of glass, but the No. 13 Kroeschell Boiler only takes half the coal and half the work to get the same results.

J. G. FRISZ, Vincennes, Ind.

P. S.—Mr. J. G. Frisz, of Vincennes, Ind., has the largest range of glass in Indiana devoted to vegetable forcing.

Send for Catalogue.

Smilax, 300 strong 2½-in., 2c; or \$5.50 for the lot. Thomas Fletcher, Warren, O.

Smilax, 300 strong 2½-in., 2c or \$5.50 for the lot. Thos. Fletcher, Wood St., Warren, O.

Smilax, 2½-in., \$3 per 100; \$25 per 1,000. The Good & Reese Co., Springfield, O.

Smilax, pot plants, \$10 per 1,000. A. M. Herr, Lancaster, Pa.

Smilax, Wood Bros., Fishkill, N. Y.

## SNAPDRAGONS.

Snappdragons, white and pure pink, best seller of all snappdragons, 2½-in., \$2 per 100; \$18 per 1,000; 500 at 1,000 rate. Cash. Clement S. Levis, Adrian, Del. Co., Pa.

## STEVIA.

Stevia, 2½-in., \$2.50 per 100. Poehlmann Bros. Co., Morton Grove, Ill.

## SPIREAS.

Spiraea, J. Smits, Ltd., Naarden, Holland.

## SWAINSONA,

Swainsona alba, strong, 2½-in., \$3; in bud and bloom, strong, 3-in., \$6. W. J. Olds, Union City, Pa.

## VEGETABLE PLANTS.

Vegetable plants: Cabbage, Wakefield. All best, Succession, etc., \$1 per 1,000; 10,000 and over, 85c per 1,000. Lettuce, Grand Rapids, Big Boston, Boston Market and Tennis Ball, \$1 per 1,000; 10,000 and over, 85c per 1,000. Beets, Crouby, Egyptian and Eclipse, \$1.25 per 1,000. R. Vincent, Jr., & Sons Co., White Marsh, Md.

Vegetables: Tomato, Earliana, Stone, \$1 per 1,000. Pepper, Chinese Giant, \$1.50 per 1,000. Lettuce, Big Boston and Grand Rapids, \$1 per 1,000. Cabbage, Standard sorts, \$1 per 1,000. Celery, White Plume and Dwarf Golden Heart, \$1 per 1,000. Elmer Rawlings, Wholesale grower, Olean, N. Y.

Cabbage plants; lettuce, all kinds, \$1 per 1,000; \$7.50 per 10,000. Tomato and Sweet Potatoes, \$1.50 per 1,000. Cauliflower, Early Snowball, peppers, \$2 per 1,000. J. C. Schmidt, Bristol, Pa.

15,000 extra fine Yellow Jersey and Red Bermuda Sweet Potatoes, \$1.50 per 1,000. Mrs. Edward Hayden, Greenview, Ill.

## VERBENAS.

Verbenas, J. L. Dillon, Bloomsburg, Pa.

## VINCAS.

Vinea Minor (myrtle), good for shady places, strong rooted runners, \$1 per 100; strong field roots, \$1 per doz.; prepared by express, \$3 per 100. Chas. Frost, Kenilworth, N. J.

## VIOLETS.

Joseph M. Louise, Jr., F. A. Haenschman, Boulder, Colo.

## BOILERS.

Boilers, The Moninger-Furman, 200 sizes and styles. John C. Moninger Co., 902 Blackhawk St., Chicago.

Boilers, The Superior Standard. The Superior Machine & Boiler Works, 850 Superior St., Chicago.

Boilers, Metropolitan Material Co., 1394 Metropolitan Ave., Brooklyn, N. Y.

Boilers, Chicago House Wrecking Co., 35th & Iron Sts., Chicago.

Wilks' self-feeding hot water boilers, S. Wilks Mfg. Co., 3503 Shields Ave., Chicago.

Boilers, all sizes, Kroosschell Bros. Co., 452 W. Erie St., Chicago.

Boilers for greenhouses. Giblin & Co., Utica, N. Y.

Boilers, Lord & Burnham Co., Irvington, N. Y.

Boiler thug, 4-in. and other sizes. H. Munson, 506 N. State St., Chicago.

## INSECTICIDES

Fresh Tobacco stems in bales, 200 lbs., \$1.50; 500 lbs., \$3.50; 1,000 lbs., \$6.50; ton, \$12. Scharf Bros., Van Wert, Ohio.

Insecticides, Carmen's Antipest Insecticide and fungicide, \$1.50 per gal. Perfection Chem. Co., Flushing, N. Y.

Insecticides, Aphine, \$1 per quart; \$2.50 per gal. Fungicide, 75c per quart; \$2 per gal. Aphine Mfg. Co., Madison, N. J.

The Fumigating Kind Tobacco Powder, \$3 per bag 100 lbs. The H. A. Stothoff Co., Mount Vernon, N. Y.

Nikoteen, pint bottle, \$1.50. Nikoteen Aphs Pank, \$6.50 per case of 12 paraffined boxes.

## GLAZING POINTS.

Glazing points: See the point? Hold glass firmly. Peerless glazing points are the best. No rights or lefts. Box 1,000 points, 75c. Postpaid. Henry A. Dreer, 714 Chestnut St., Philadelphia.

Siebert's zinc glazing points, 40c per lb.; 5 lbs., \$1.85; 20 lbs., \$7. Vaughan's Seed Store, Chicago and New York.

Siebert's zinc never-rust glazing points, 2 sizes, ¾ and ¼, 40c per lb.; 16c extra by mail; 7 lbs., \$2.50; 15 lbs., \$5 by express. Randolph & McClements, Baum and Beatty Sts., Pittsburg, Pa.

## GREENHOUSE CONSTRUCTION.

Greenhouse construction, cypress roof material and all greenhouse fittings. Plans and sketches submitted on request. John C. Moninger Co., 902 Blackhawk St., Chicago.

Greenhouse construction, builders of every type of greenhouse, the most modern designs. Hitchings & Co., 1170 Broadway, New York.

Greenhouse construction of all kinds, and conservatories. Estimates and catalogues on request. The Foley Mfg. Co., 2541 So. Artesian Ave., Chicago.

Greenhouse construction, semi-iron greenhouses, new truss houses, iron frame houses. Lord & Burnham Co., 1133 Broadway, N. Y.

Greenhouse construction and equipment. King Construction Co., N. Tawasville, N. Y.

## GUTTERS.

Gutters, Jennings' improved iron gutters. Diller, Caskey & Keen, 6th and Berk Sts., Philadelphia.

Gutters, Garland's. A gutter with a reputation. Geo. M. Garland Co., Des Plaines, Ill.

## MISCELLANEOUS.

Mats, cheapest and most practical on the market. Send for circular. J. P. Watts, Kermoor, Pa.

Chiffons. For prices see advertisement elsewhere in this issue. Geo. H. Angermueller, 1324 Pine St., St. Louis, Mo.

Model extension carnation support; galvanized rose stakes, Igce Bros., 206 N. 9th St., Brooklyn, N. Y.

Daylight glass cleaners, for prices see advertisement elsewhere in this issue. Anderson Specialty Co., 4648 Calumet Ave., Chicago.

Pillsbury's carnation Staples, 50c per 1,000, postpaid. I. L. Pillsbury, Galesburg, Ill.

# The Truth About Boilers

## Being Number Three of Four Frank Talks

**T**O PUT it briefly, Talks Numbers One and Two were pointed statements of the points necessary for a boiler to be truly economical. Not the marvelous kind of economy that every boiler man from Florida to Alaska claims for his boiler—but the kind you can see it is logical a boiler should have, and that the Burnham does have. That kind of economy. And now for the conveniences of a boiler—those little things that mean such big things to the one who “tends” it.

Take the smoke box damper, for instance. Who wants to be fumbling around on the back of a boiler to open or shut it? Still that's the way boilers are made. The Burnham damper, however, is operated from the front of the boiler, as is every other part.

The clean-out doors should every one be on the front where they will be handy to clean. They will get cleaned then! And the cleaner the flues the more you get out of your coal. Burnham's clean-out doors are all on the front. A coal door that is a skimpy little affair scarce big enough to “take a scoop” is a profanity provoker. The Burnham has a good, big, generous sized affair that helps to take the cuss out of boiler caring.

The grates, if easy to shake, are liable to be shaken when needed, instead of allowing a bed of dead ashes to clog up the fire pot and

destroy the draft. The Burnham grates are easy shakers. If the grates dump all ashes to the front, it's less work to take them out. The Burnham is less work.

These are the conveniences you will agree that every convenient boiler should have.

If you are looking for a convenient boiler that is economical **as well as** convenient—then look at the Burnham.

It is made for steam or hot water, either square or round sectional. Send for catalog and further facts.

This is the Number 18, the smallest sized Burnham Steam Boiler. Made also for hot water.

The distance from the water line to top of the section is the steam dome space, which is larger on the Burnham than any other boiler we know of.

This rear section view shows you the interchangeable smoke box, which can be swung around to any position for attaching smoke pipe at top, or other side.

**Lord and Burnham Co.**

# WIZARD BRAND

TRADE MARK

## PULVERIZED SHEEP—PULVERIZED CATTLE SHREDDED CATTLE MANURE

Mr. Grower:--

32 Union Stock Yards,  
Chicago, Ill.

Are you using Wizard Brand Manures in your bench soil? If not, why not? There is nothing better. They do for the soil and plant all that fresh manure can do and are much more easily handled.

Pulverized Sheep Manure for Carnations and Chrysanthemums. Cattle Manure, Pulverized or Shredded for Roses.

The Florist trade has had six years to prove the value of Wizard Brand and the progressive, successful grower is using more and more of it every year. Our sales records show this plain as day. Get your orders in promptly and be sure of quick shipment and the high grade products we are packing at this time.

THE PULVERIZED MANURE CO.

**MASTICA**  
FOR Greenhouse Glazing  
**USE IT NOW.**  
F.O. PIERCE CO.  
12 W. BROADWAY  
NEW YORK

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass, as occurs with putty. Lasts longer than putty. Easy to apply. Mention the American Florist when writing.

Lock the door before the horse is stolen,  
and insure your glass before it is broken.

## How Do You Like This One?

YOU say, you would prefer one that is even span—all right then, perhaps for your particular location and needs it may be better. But what ever you do, do; have it a Lord & Burnham Curved Eave Construction. We might say it is the best curved eave construction on earth and all that kind of thing, but we believe it is a bigger—more convincing thing to say that it is the best house we know how to build.

Incidentally we might add that we have had the reputation for **knowing how** for considerably over half a century.

You know we now have two factories: One at Irvington, N. Y., and another at Des Plaines, Ill. We will ship your house from the nearest one, and in this way save you all possible on freights.

If thinking of building, send us your name and address and employer's, and we will see that you both get one of our 100 page catalogs—the one with some of the greenhouses printed in five colors.

## SUGGESTIONS FOR PLANT GROWERS.

### Poinsettias.

The time for propagating poinsettias is approaching the end, but cuttings struck at this time will make the best plants for the low pans, and all the cuttings possible should be placed in the propagating bench or frame at once. Stock rooted after September 1 will not prove satisfactory at the holiday season. As soon as rooted they should be potted in 2½-inch pots in a compost composed of three-fourths soil and one-fourth rotted manure. As soon as the night temperature drops below 60° the plants should be removed to the houses and given a light position. As they grow space them out so that they will not become crowded and drawn, a short jointed growth being desirable. While poinsettias can be grown in a cooler temperature, at about 50°, the bracts will not be as large and they will not be in bloom at Christmas. The cause of more failures with these plants is a variable temperature—60° at night gives the best results, and do not allow the temperature to fluctuate, or a loss of leaves will result.

### Pelargoniums.

The great improvement in the varieties of the zonal geraniums during the last fifteen years has gradually pushed the show pelargoniums into the background, but there is no handsomer conservatory or house plant for late spring and early summer than these old time favorites, and the plant grower should always have a few of these every season. If there is no stock until September and buy from those who have, and purchase the large flowering varieties and a good assortment of colors. Those who have some good stock plants that are nearly through blooming can begin to dry them off, but do not go to extremes, do not dry them enough to turn the foliage yellow. About the middle of August the plant may be cut down and pruned back very severely, leaving only two or three eyes on each shoot. The wood that is cut off should be made into cuttings and every piece will root, if cut into two or three eyes. Insert the cuttings in the propagating bed and keep them well shaded, and not too wet but keep the

sand moist. They will root in about three weeks and then should be potted and as soon as they require it a shift made into 4-inch pots. Encourage them to make all the growth possible until November, when they should be placed in a cool house, with a temperature of 40° to 45° and preferably on a shelf near the glass. At the end of February or early in March they should be potted in 6-inch pots, when they will make rapid growth and flower the following May and June.

### Callas.

The bulbs of callas will be arriving shortly and everything should be in readiness to start them if it is desired to have blooms in the fall. They can be grown either in benches or in pots, many prefer pot culture, claiming that the bulbs produce more flowers when grown in this manner than when in benches, but the larger flowers are grown in the latter. But whichever way they are to be grown through the winter, the culture at the outset will be the same. The soil should be one-third rotted cow manure and two-thirds good soil and if the soil is of a clayey texture the mixture will stand a liberal addition of sharp sand to keep it open. Pot the bulb in a pot just large enough to hold it and be sure and have good drainage. While the calla is a moisture loving plant and absorbs lots of water it will quickly take on a sickly look if the drainage becomes blocked and the soil becomes soaked with stagnant water. After potting, the plants should be plunged outside, preferably in a cold frame, and if standing in the direct rays of the sun a mulch of short grass, such as lawn mowings or old straw, will prevent the pots from drying out too rapidly and consequently less frequent watering will be required until the roots begin to grow in the soil. As soon as the growths appear the mulch should be removed. The plants can be left out in frames until the middle of September, when they should be removed to the houses and potted into larger sizes or planted in the benches. The old bulbs that bloomed last year can be shaken out and treated in a similar manner. Be sure before potting these to remove all

the small bulbets from the old bulbs. If it is desired to increase the stock these can be planted in a flat and they will grow into flowering roots for the succeeding year.

#### Pruning Shrubs.

The spring blooming shrubs are now nearly all done and the safest rule for pruning is to cut back into shape after the flowers have passed, when the shrubs begin their growth for the next season's crop of flowers. All the small weak growths should be cut out and the plants trimmed into proper shape. Unless this is attended to shrubs rapidly become a tangle of weak growths, bearing but few flowers, and grow into ungainly specimens. Too often this important work is left until too late and the blooming growth for next season is cut off with the result that there are no flowers the succeeding year. Privet hedges should be constantly pruned into shape so as to have a nice appearance and they will stand any amount of cutting as they grow very rapidly. August is the best time to trim berberis and they will need no further cutting back for the balance of the year.

TORONTO, ONT.—The July exhibition of the Toronto Horticultural Society was held at St. George's hall June 7 and was the most successful exhibit ever held. Prizes were awarded for roses and other cut flowers, fruits and vegetables. The features of the show were the fine displays of roses by W. G. MacKendrick and an exhibit of orchids and ferns by Thomas Manton.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphla, Pa.

#### An Attractive Window Display.

The window display made by W. J. Palmer & Son, Buffalo, N. Y., which we illustrate, attracted a great deal of attention through the heated spell of weather, the people standing two and three deep in front of the window viewing the cool and delightful scene, and their places were rapidly filled in as they looked their fill and departed. In the back was a fine representation of an old mill, built in log cabin style, with the water wheel, over which poured a stream of water that coursed down to a pond of good size, which was filled with water lilies, both in bloom and bud, and around the edges of the pond were cork bark logs and stones. A bridge in front of the door of the mill crossed the pond and on this was the figure of a "brownie" fishing. Here and there in the water were to be seen the sportive gold fish swimming to and fro and three sleek turtles were having the time of their life lolling in the pool. Vases of sweet peas, marguerites and lilies were arranged in the scene, which was backed by a group of palms and boughs of foliage. On Independence day the rustic mill was covered with flags in honor of the nation's birthday. The whole scene was so cooling and restful that a lady correspondent of the public press writes of the display, "Now isn't it a public benefit to come down a crowded,

dusty street of pavement and tile, and brick, and wires, and cars and discontented people, and be transported without a bit of trouble into a dream-land of cool rustic beauty. I hope the firm will appreciate the good they are doing by their cooling of the multitude."

#### A Large Table Decoration.

The table decoration which we illustrate was arranged by The L. Bemb Floral Company of Detroit, Mich., in the convention hall of the largest hotel in that city. The table was set in an oval, the inside space of which was 24x68 feet, containing 1,632 square feet, and was set for 112 plates. To decorate such a large space was a question which was ably solved by Albert Pochelon, the manager, by the laying out of a miniature park, the sides sloping from the inside table edge (which was two feet eight inches high) down to the level of the floor. In the center was an oval pond six by ten feet and eight inches high. In this was an electric fountain with 109 sprays of water. The pond was filled with white and colored water lilies and plants. Around the pond was a saucer-shaped automobile race track, on which were running six small automobiles at two different speeds. These were so arranged that at intervals of every eight minutes the six cars would pair off and run around in three pairs, and then would draw away from each other. The fountain was illuminated with six bulls-eye electric lamps, thoroughly insulated to pre-

AN ATTRACTIVE WINDOW DISPLAY.

TABLE DECORATION BY THE L. BEMB FLORAL CO., DETROIT, MICH.

vent short circuiting or the blowing out of fuses.

The park was laid out in such a manner that all the roadways led either to the entrances, archways at the ends of the table, or to the race track in the center. Along the roadways were regular street lamps, each with its electric light. The walks and drives were made of sand, gravel and shells and the rocks were of cork bark. The lawn was of prepared green sheet moss, and the flower beds were represented by round, oval, diamond and square wire frames filled with moss and arranged with flowers and the beds of shrubbery were made in irregular shapes. Enclosing the park was a miniature boxwood hedge, and at the entrances were arches and small boxwood trees. The rest of the hall was also appropriately decorated. The construction of the park was a skeleton of wood work made of 1x2-inch strips covered with cardboard and heavy wrapping paper. All the mechanical as well as the electrical work was operated from one switch-board near the speaker's chair and was turned on or off at his will.

CROMWELL, CONN.—A. N. Pierson, Inc., reports that business for June was 50 per cent higher than that of last year and that trade is still holding good in July. There is a good demand for all lines of stock that can be shipped now.

#### With the Chicago Retailers.

With the beginning of July comes a little rest from the rush and drive and the long hours of the nine preceding months, and the time of inventories, cleaning up and redecorating in preparation of the coming year is at hand. No great amount of business is looked forward to until the fall trade opens, yet there is in all the larger stores always something doing, and while the calls for decorations for entertainments are not many, yet there is always demand for flowers for those more solemn occasions, the funerals. The stores have, however, to be made attractive and much ingenuity is shown by some in having in the windows a display, either of seasonal plants and flowers, or some interesting feature that will draw the attention of the customer or passer-by. The year just passed has on the whole been very satisfactory although no doubt the extremely warm weather of June and the unprecedented hot spell of early July has cut down the total receipts, beside affecting the flowers so at times it was almost impossible to obtain satisfactory stock; first one variety of flower would be poor or scarce and as soon as that one recovered some other would be in poor condition, and it has been almost impossible during the last six weeks to know what could be obtained in good supply

or first class condition a few days ahead. Nymphaeas have been extensively used during the last month in the window displays, and also as a cut flower, some beautiful specimens being seen at all the stores. The excessive warm weather has caused a large number of deaths in the city and the demand for funeral work the last few weeks has been considerable.

H. R. Hughes on the West side has a very beautiful scene in his large windows representing a Rocky Mountain view. The tall peaks are represented in the distance, surrounded with the blue haze and half way down the mountain the chasms are crossed by bridges upon which a train comes up, and over the rugged hills. The scene is beautifully painted and nicely gotten up, and is a pleasing picture especially during the evening under electric light. Trade in this section has been about on a par with other seasons, although the warm weather was felt in the business during June and early July. The trade on the south side is reported as having been good all the season, the stores all having a good increase in the total business throughout the year. At Muir's the June business is reported as fine. June graduations, weddings and large funeral orders called for an unusual large amount of flowers. The bedding plant business was also very large. The houses are well fitted with a fine lot of plants for the fall and holi-

day trade which are in fine condition. A line of nice fancy leaved caladiums make a beautiful showing just now. At W. J. Smyth's the business has exceeded any previous season. June having a large number of weddings and numerous graduation orders, the wedding orders lasting over into July, the decorations being furnished for two weddings of considerable size at the Standard Club and the Metropole hotel during the first week of this month. The proprietor, W. J. Smyth, will shortly start on a trip to California, where he will join Mrs. Smyth, who has preceded him by a few weeks in a visit to the Pacific Coast, and they will remain during the balance of the summer. C. A. Samuelson reports a splendid year's business with considerable work during June and a steady call for all the best flowers of the season. A fine display of decorative stock adorns the store and the collection of white enamel ware is a great feature at this season. A table arranged with small ferns in the form of an Italian garden was very attractive.

In the downtown stores John Mangel states that business has been very good; weddings, hotel decorations and funeral work have been constantly ordered and the business very satisfactory. The windows in this store are always attractive and just now the scene with the moss-covered stones and the rivulet running from window to window with cascades falling over the rocks, and a representation of an old mill with the water turning the large wheel and ending in a goodly sized pond filled with water lilies, and swimming around through it all is a flock of young ducklings. Water lilies that are very beautiful and varied in color have also been an attraction here. A very satisfactory business all the season is the report of the Fleischman Floral Co. with an increasing call for flowers for weddings and social functions as well as a large steady demand for all seasonable flowers. This store presents its usual fine appearance with a nice line of decorative stock for its summer adornment. At A. Lange's the trade has been of large proportions all the year, and the large force is still busy executing the many orders. Notwithstanding the extremely warm weather which was felt by all the stores, the trade has kept up well, and the calls for flowers for weddings, entertainments and funerals has been very large. A beautiful assortment of seasonable flowers is always displayed at this store and the present is no exception, everything the market affords being on hand. Canger & Gornley have had a splendid season, the trade being good throughout the warm days up to the opening of July, a number of large wedding decorations and social functions being arranged. The display of water lilies in the window of this store for the last two weeks has been greatly enjoyed by the many passers-by on the crowded thoroughfare.

**BAR HARBOR, ME.**—The flower show held by the Bar Harbor Horticultural Society July 6 was the best exhibition ever given by the society. By special request the display was kept open July 7 and a large attendance admired the beautiful exhibit. Prizes were awarded for flowers, fruits and vegetables.

### Minneapolis Civic Celebration.

#### FLOWER AND PLANT DECORATIONS.

Flowers as a substitute for flags and bunting for street decorative purposes was recently tried at Minneapolis on an elaborate scale. The occasion was the Minneapolis 1911 Civic Celebration, a week of festivities, parades and pageants. Ten squares of Nicollet avenue were converted into a court of honor. White columns, 25 feet high, six to the square, lined the street giving the colonnade effect. Each was surmounted by electric globes and they were connected by festoons of electric lights. There were also electrical arches crossing the street. Both festoons and arches were entwined with arborvitae. On the ledges of nearly all windows above the first story in the buildings were boxes of blooming flowers from which German ivy was also allowed to trail. The standards of street lights, eight to the square, also held boxes of flowers and vines. Shrubs, boxed trees and urns of flowers were also used to ornament entrances to buildings and store fronts.

The general effect was strikingly beautiful. The green of foliage plants set off the bright colors of flowers to great advantage. Visitors to Minneapolis were greatly impressed by this lavish display of flowers in a downtown district. There were other surprises in the residence locality. Flowers and vegetables have been cultivated on nearly all vacant lots within a radius of two miles from the city

A course of lectures was given and in one way and another 50,000 people were interested in horticulture, men, women and children. Out of this movement has grown a permanent organization and an interest has been created which promises to make Minneapolis in time noted as a city of flowers as well as flour.

Minneapolis paid quite royally, to be sure, for its huge bouquet. The flower boxes for windows in the downtown district were made of galvanized iron and painted green. The Twin City Floral Association furnished the boxes, filled them with flowers and watered them twice daily during civic celebration week at the uniform rate of \$1.10 per foot, the average length of boxes being about five feet. Eighteen thousand feet of these flower boxes were ordered in advance so the cost of decoration approximated \$20,000 for the court of honor, or about \$2,000 per square.

### Hibiscus Show at Honolulu.

The first flower show ever held in the Hawaiian Islands was held in the promotion committee rooms of the Young hotel building June 28 and was an exhibit made by the hibiscus enthusiasts of Honolulu. Over two hundred and sixty flowers or groups were on exhibition, the majority of which were single blooms of the different shades of red, pink, yellow and white, making a brilliant show, which was

WINDOW BOXES AT MINNEAPOLIS CIVIC CELEBRATION, JULY, 1911.

hall. This was accomplished by the co-operation of the civic celebration committee with the garden clubs and improvement associations of different wards. The services of a superintendent were provided with assistance from the State Agricultural School. Flower and vegetable seeds were distributed. The real estate board gave the use of vacant lots, and these were plowed free for all who agreed to plant flowers or vegetables. There were flower and vegetable gardens also on the grounds of eighteen public schools.

nicely arranged. An exhibit of double hibiscus by W. M. Giffard including light pinks and yellows formed an attractive feature of the show. The prime movers of the show were Gerrit P. Wilder and wife, who issued the call, and the enthusiastic response far exceeded their anticipations and there was neither table room nor containers for all the flowers that were sent. About two thousand people visited and enjoyed the display while it was open from eleven o'clock in the morning until four in the afternoon.

## THE CARNATION.

### Diseased Carnations.

#### ED. AMERICAN FLORIST:

We have forwarded you diseased leaves from our carnation plants. Can you inform us what is the cause and what to do to remedy the trouble? Is there any danger of it being communicated to the other benches?

#### SUBSCRIBER.

The specimen leaves enclosed were badly infested with rust. This disease is caused by an over-abundance of moisture in the atmosphere, wet foliage and a lack of pure air. A few years ago it was very prevalent in nearly every carnation establishment, but a close study of the conditions under which it seemed to thrive, and extra careful watch on the cultural conditions to guard against damp foliage during cloudy weather and late in the day, together with plenty of fresh air on every favorable occasion, care as to watering, and a selection of the cuttings, has reduced the trouble to a minimum. If conditions are favorable for its growth it will spread over the whole house. A light dusting of air-slaked lime over the affected plants will check its spread, then aim to keep an even temperature with a moderately dry atmosphere in the houses, and select only clean healthy cuttings for next season's stock. By carefully following out these rules, together with an ordinary degree of cleanliness about the place, the trouble will soon disappear. C. W. JOHNSON.

### Indoor Culture.

It is now time to figure on getting into the benches the plants intended for indoor culture all summer. The first consideration is the cleaning up of the houses and repairing any of the benches that need it, these preparations should be carried out in a thorough manner so that there is no rubbish left around to harbor thrips or red spider; it is a very difficult matter to fight these pests under the very best and cleanest conditions without having old rubbish and dirt to serve as nests for them. Our next item is the compost, the most important feature of all, they need a good live fresh soil that is capable of producing a steady plant growth but not so overcharged with manure as to cause a long-jointed soft growth. The quantity of manure to soil should be governed somewhat according to the texture of the manure, if it is very well rotted one part to four of soil is all right, but if the manure is inclined to be on the fresh and green side it should be used in proportion of one part of manure to five parts of soil.

We place a very thin layer of well-rotten manure at the bottom of the benches and fill in with soil to the depth of five inches after it has been firmed down. A sprinkling of fine bone is put in the surface of the soil and thoroughly mixed in. The soil is then well firmed down and the surface evened up. We are then ready for the plants. If these have been grown on the bench, they should be thoroughly watered long enough before the time of planting to allow the water to drain through the soil, so that it will not be muddy for lifting, also, if the plants are in pots they should be watered and

allowed to drain before planting. Ten inches apart each way is ample space to set the plants. Plant firmly, leaving a slight depression around each plant so that watering can be done at the plant only, without wetting the remainder of the soil.

After the planting is finished, syringe the plants two or three times a day

### Dwarf Sweet Pea.

Paper read by A. C. Beal before the National Sweet Pea Society at Philadelphia, Pa., June 29, 1911.

The dwarf or Cupid sweet peas are varieties that grow only five to eight inches high with a spread of twelve to fifteen inches in diameter. The procumbent stems are stout, vigorous,

DECORATIONS AT MINNEAPOLIS CIVIC CELEBRATION, JULY, 1911.

during the hot weather and give all the ventilation possible. After a few days the weeds will commence to appear, these should be removed as soon as large enough to handle, not allowing them to remain long enough to weaken the carnation plants. A very important consideration with these indoor-grown plants during the very hot weather is that of watering at the roots. The plants need a thorough watering in at time of planting, after this water should be given only as the plants are in need of it and then thoroughly. Do not keep the soil in a saturated condition, which is a cause of soft, spindly plant growth. The work of pinching back the growths will have to be followed up closely to make the plants break evenly. Another matter is to look out for the aphids, spraying regularly twice a week to keep them in check. C. W. JOHNSON.

short jointed and freely branching. The foliage is a deep green. The leaflets are small and the tendrils short. The flowers which are the size of those of the tall varieties are borne two or three in number, on short stems, three or four inches in length. The dwarfing has been accomplished by an extreme reduction of the internodes, for an examination of the plants reveals the fact that they have as many or more internodes as the tall type.

The Cupid sweet peas originated in 1893 at Santa Cruz, Calif., upon the grounds of C. C. Morse & Co., the largest growers of sweet pea seed. The plant was found growing among plants of the tall growing variety, Emily Henderson. Naturally this remarkable "sport" was preserved and its dwarf character proved to be so fixed that it is recorded that when Messrs. Morse in 1895 grew seven acres of this nov-

ely, none of the plants reverted to the normal climbing type. W. Atlee Burpee purchased it in 1894 and had the variety grown in England by James Douglas, where in June, 1895, it was exhibited before the Royal Horticultural Society, and was given, by unanimous vote of the committees, an award of merit. The same year it was given an award of merit by the National Hor-

tions during germination. Pink Cupid was discovered among plants of Blanche Ferry in 1895 and was introduced by Burpee in 1898. He had purchased the stock of 1,068 seeds for which he reported paying the sum of fifteen hundred dollars, which is probably the largest sum ever paid for a new variety of sweet peas. This variety was similar to Blanche Ferry in

and at the bi-centenary celebration in 1900 it was reported that they had dwarf counterparts of Purple, Dark Blue Striped, Captain Clarke, Rose, Light Blue Striped, Invincible Blue, Invincible Carmine, Invincible Red, Invincible Black, Sultan, Rising Sun, Boreatton, Princess Beatrice, Princess May, Princess of Wales, Etna, Vesuvius, Indigo King, Pale Madame Camot, Waverly, Primrose, Carmine Striped, and Countess of Radnor. It will be noticed that many of these were representatives of tall varieties that were obsolete or were passing out, and of course were not equal to such varieties of Cupid as Beauty, Alice Eckford, and Firefly which had been introduced by that time.

#### VARIETIES OF CUPID SWEET PEAS.

White or "Cupid," 1896.  
Pink, 1898.  
Alice Eckford, 1899.  
Beauty, 1899. (Similar to Eliza Eckford).

Salopian, 1904.  
Emily Eckford.  
Lovely.  
Navy Blue.  
Waverly.  
Ovid.  
Ramona.  
The Cupid sweet peas have been very popular for several reasons. Many persons apparently expected this dwarf type to furnish long stemmed blooms

PLANT DECORATIONS AT MINNEAPOLIS CIVIC CELEBRATION, JULY, 1911.

ticultural Society of France. In Burpee's circular to the trade, July, 1895, this white flowered variety was described. It is a singular fact that, but for this trade announcement, a similar dwarf form would have been offered by Ernest Benary of Erfurt, Germany, in 1896 or 1897, probably under the name of Tom Thumb White. It was such a complete description of his variety that the similarity was recognized and Mr. Benary published in his catalogue the name of his novelty as a synonym of Cupid, thus preventing confusion. In 1895 a similar dwarf appeared on the grounds of Henry Eckford at Wem, England. There is also some evidence that a similar form was found in 1895 among plants of the old white grown in Southern France. This remarkable instance of synchronistic variation appeared in three or four widely separated localities within a period of two years. (Singularly enough, so far as known, all these dwarfs had white flowers, and white seeds and developed among white varieties. A notable and somewhat similar case was the appearance of the dwarf lima bean, but here we find the origin extending over a period of twenty years and the varieties are simultaneous only in the date of introduction. Moreover, we have very distinct varieties originating from very distinct climbing varieties of lima beans of two species.)

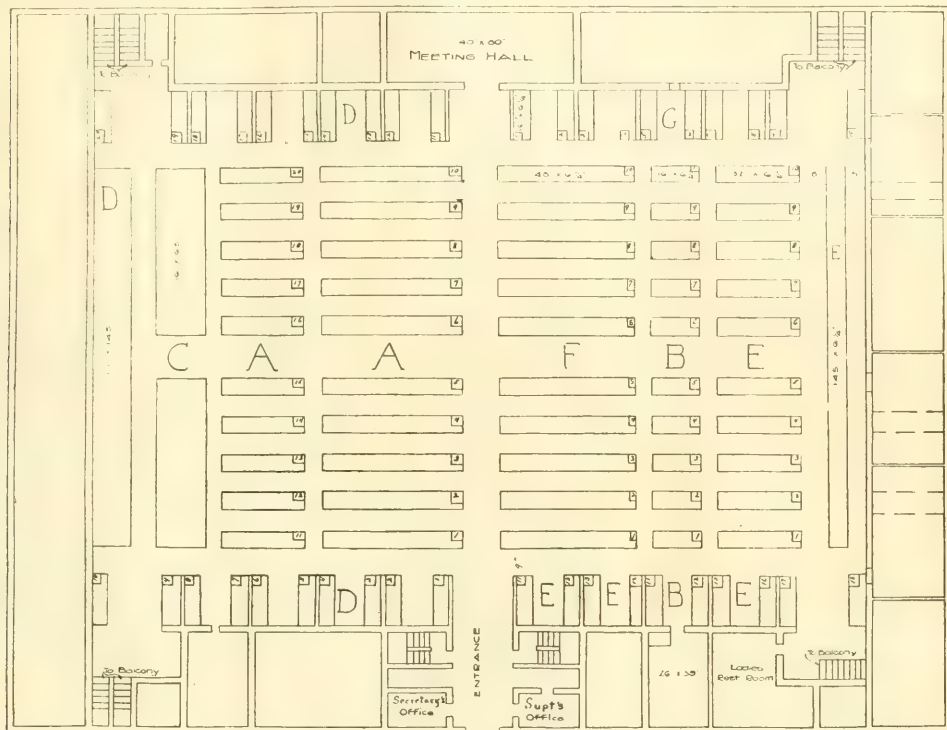

This novelty attracted great attention, especially among sweet pea lovers, everywhere, and was offered to the public in 1896. Unfortunately Cupid, afterward known as White Cupid, the forerunner of the race, was white seeded like the parent and germinated very poorly, especially the year of its introduction. It appears that even among white seeded peas it is probably the most sensitive to unfavorable condi-

all characteristics except its dwarf habit. A yellow sport found among White Cupid was introduced by Burpee in 1899 as Primrose Cupid.

During the seven years following the introduction of the original Cupid sweet pea a great number of varieties appeared reproducing all the known colors and types of the tall growing varieties. "Several of our best Cupids," says Morse, "were found originally in the tall varieties, but the majority were developed by crossing." Laxton Bros. of Bedford, England, began crossing upon Cupid soon after its introduction.

WINDOW BOXES AT MINNEAPOLIS CIVIC CELEBRATION, JULY, 1911.

PLAN OF EXHIBITION HALL OF THE S. A. F. CONVENTION AT BALTIMORE, MD., AUGUST 15-18.

for cutting, thus relieving them of the necessity of providing supports for the plants. The short stems of this type were therefore a disappointment to such persons and they unhesitatingly condemned it for any purpose. In answer to the claims made that the plant was adapted for use as an edging or for bedding, it was urged that the blooming period was too short, not allowing for the fact that the dwarf type behaves similarly to the tall type and ceases to bloom if the pods are not removed. For no other reason this sweet pea has been ignored by many seedsmen, while some inferior trailing plants are still offered in their catalogues. The dwarf sweet pea has the advantage of many border plants in its great variety of colors.

In part the unpopularity of the plant has been due to the fact that the White Cupid did not germinate very successfully, especially the first year of its introduction, thus affecting the popularity of this whole race. The black seeded varieties give a high percentage of germination so that poor germination is not an inherent fault of the race.

The dense foliage and growth of the plants make a thick carpet over the surface of the ground and in a wet season the result is usually failure. The flower buds drop off and the plants do not thrive even if they do not become subject to disease. The foregoing reasons explain why this type has not been very successful in English gardens.

Mack Richmond.

Superintendent of S. A. F. Trade Exhibition at Baltimore, August 15-18, 1911.

In California where the summers are long and dry, the Cupid sweet peas thrive. During hot, dry summers in our eastern states when the tall varieties are subjected to very trying conditions, the Cupid sweet peas grow

and bloom abundantly. Last season we grew ten, twenty foot rows of the different varieties of the dwarf type. When the tall kinds were having a struggle with the drought under a temperature of ninety degrees or more, the Cupids, in the highest and driest position, grew and blossomed profusely. They were admired by all who saw them, and many questions were asked as to what they were, whether they were of recent introduction (new) and where they could be obtained.

The conditions necessary for the successful culture of the dwarf sweet peas, appear to be a rather dry, moderately rich soil, a dry, hot season, good cultivation, prompt removal of the withered flowers and pods. The seed may be sown in single rows, twin rows or scattered in a broad drill, ten or twelve inches in width. For the purposes mentioned the distinct colors are preferred. Among the best varieties are White, Pink (Blanche Ferry Cupid), Countess of Radnor and Prima Donna.

#### Chicagoans at Cincinnati.

President H. E. Philpott and Secretary A. T. Pyfer of the Chicago Florists' Club left Chicago July 9, making a trip to Cincinnati and Dayton, O., and Louisville, Ky., being present at the meeting of Cincinnati Florists' Society July 10 and enjoyed the hospitality of the craft in the cities which they visited. The following account is given by Secretary Pyfer of the enjoyable journey:

Upon arriving at Cincinnati they were met by the president of the Cincinnati Florists' Society, C. E. Critchell, vice-president William Murphy, treasurer E. A. Forter, J. A. Peterson and R. Witterstaetter, who cordially welcomed them to Cincinnati and entertained them until after the society's meeting. It was election night with the society and there was a good attendance and the meeting was full of interest. On Tuesday an invitation was accepted to visit and dine with J. A. Peterson, the well-known grower of Begonia Gloire de Lorraine and other plants and in extending the invitation he was proud to say that he was the first in that vicinity to have tomatoes and corn from his own garden, and that they were good all can be assured, and especially fine was the spring chicken which was greatly enjoyed. Mr. Peterson and his wife left on the following Friday for a voyage to Europe. Trade was found to be very quiet in general, and with very little stock in the market.

The trip was then taken to Louisville, where they were met by George Schulz, son of Jacob Schulz, one of the leading florists of the city, and from the moment of their arrival until departure experienced a taste of real Kentucky hospitality. Nothing was left undone. The afternoon was spent in an automobile trip seeing the parks and other points of interest, and on the return with the family of Mr. Schulz and others supper was enjoyed in Shawnee Park. As an advertising novelty Mr. Schulz has something attractive in a huge electric sign across the street from his store, which catches everybody's attention. The sign is in the form of a rose; first the stem and leaves appear in green, then a pink bud, which later bursts into an American Beauty rose in full bloom. They found Louisville wide awake and ready to make a strong bid for the convention of the Society of American Florists in 1912. It is most certainly a beautiful city and with the number of new hotels, there would be no trouble for all the visitors to find accommodations.

Thence to Dayton, where a visit to Matthews the Florist found him busy as usual at his greenhouses. He is one of the popular and leading florists of the city, but dropped his business to give them a cordial welcome and take them around the city in an automobile for most of Friday afternoon. On the trip a call was made on George Bartholomew of the Miami Floral Co.,

who was preparing for a journey to Europe the following Monday. Returning to Mr. Matthews' establishment it was noted that he believes in advertising thoroughly and well. There were on hand caps of all sizes and quantity for the workmen, as well as palm leaf fans and drinking cups, in fact, any thing on which he could have his name which could be put into constant use. These are distributed freely, not only to his patrons but to anyone who has use for the handy article.

The trip was thoroughly enjoyed from the time of the arrival at Cincinnati until the departure from Dayton. The sentiment in favor of holding the convention at Louisville is very strong and there will be a large delegation attend the convention at Baltimore. Louisville will send enough to fill a special car and Cincinnati and surrounding territory will make up another car. These will be attached to the President's Special which leaves Chicago August 13, making one of the greatest trains to the convention at Baltimore.

ELKHART, IND.—W. H. Troyer was badly damaged by hail July 11.

Nick Wietor, Chicago, in Camp.

#### Sweet Peas at Floradale, Lompoc, Calif.

An exhibit of sweet peas grown at the W. Atlee Burpee & Co.'s seed farms, Floradale, Lompoc, Calif., was, by invitation, made at the Board of Trade rooms, Pasadena, Calif., on June 29, the same day as the meeting of the National Sweet Pea Society of America at Philadelphia, Pa. It was a little too early to make a large display as the crops are much later this year than they were a year ago. The quality of the blooms is shown in the illustration as they were arranged in the little greenhouse before being sent to Pasadena.

The interest which was taken in the exhibit is thus expressed by P. D. Barnhart, editor of the Pacific Garden, in a note to Edwin Lonsdale, manager of the seed farm. "The sweet peas arrived in perfect condition. I had a bevy of pretty girls unpack them and arrange them on the tables in a way that only girls can. Lonsdale, they were great, and no mistake. The crowds of people who visited that show, I think, took down every name, and absorbed the copies of the 'Thirty-fifth Anniversary Supplement' in no time. Not half enough of these were sent."

E. L.

#### Society of American Florists.

Preliminary programme, twenty-seventh annual meeting and exhibition, Baltimore, Maryland, August 15, 16, 17, 18, 1911.

TUESDAY, AUGUST 15.

Opening Session.

First Day, 2:00 p. m.

Address of Welcome.....

His Honor, the Governor of Maryland.

Address of Welcome.....

His Honor, the Mayor of Baltimore.

Response.....Robert Craig

President Asmus's address.

Report of Officers, Committees, etc.

Report of Committee on President's address.

Discussion.

Miscellaneous Business.

Judging of Trade Exhibits.

Evening Session.

First Day, 7:30 p. m.

President's Reception.

President Asmus wishes it distinctly understood that the reception will be informal and that the most comfortable costume will be the most appropriate.

WEDNESDAY, AUGUST 16.

Morning Session.

Second Day, 9:30 a. m.

 Discussion.

## SPECIAL RATES TO BALTIMORE.

Applications for special rates were made of all traffic associations. The Trunk Line Association has granted a rate of one and three-fifths on the certificate plan. Tickets may be secured not earlier than August 11 and not later than August 16, except from stations where it is possible to reach Baltimore by noon of August 17 when tickets may be secured on that date. Tickets will be good returning up to and including August 22.

In securing your tickets purchase a regular full one-way first-class fare and be sure to request a certificate. Inquire at your home station and ascertain

from 9 a. m. to 6 p. m. to validate certificates. No certificate will be signed before or after that date.

When returning, present your certificate at the railway ticket office and a ticket at three-fifths of the regular rate will be furnished you. These certificates are only good provided one hundred or more are presented.

For those living outside of the Trunk Line Association inquiry should be made of your local agent for rates to eastern points. There are many rates in force during August and it is possible to travel at a much reduced fare.

Where members are desirous of joining parties from the larger cities information concerning the trip may be secured by writing to the secretaries of the local florist organizations as follows:

Chicago, Ill.—A. T. Pyfer, 388 Dundan street, Joliet, Ill.

New York, N. Y.—John Young, 101 W. 34th street.

St. Louis, Mo.—J. J. Beneke, 1216 Olive street.

Cincinnati, O.—George Bartlett.

Boston, Mass.—Geo. Cartwright.

## HOTELS.

The local hotel committee furnishes the following list of the leading hotels of Baltimore with their location and rates:

Hotel Belvedere, headquarters, European plan, Charles and Chase streets—Rooms without bath, \$2.00 to \$4.00 per day; rooms with bath, \$3.00 to \$9.00 per day.

Hotel Rennert, European plan, Liberty and Saratoga streets—Rooms without bath, \$1.50 to \$4.00 per day; rooms with bath, \$2.50 to \$6.00 per day.

Hotel Stafford, European plan, Mt. Vernon place—Rooms without bath, \$2.00 to \$4.00 per day; rooms with bath, \$3.00 to \$7.00 per day.

Hotel Altamont (three squares from the convention hall), European plan, Eutaw place and Lanvale street—Rooms without bath, \$1.00 per day; rooms with bath, \$1.50 per day up.

New Howard, European plan, Howard near Baltimore street—Rooms without bath, \$1.50 to \$2.50 per day; rooms with bath, \$2.50 to \$3.50 per day.

Hotel Caswell, European plan, Baltimore and Hanover streets—Rooms without bath, \$1.50 to \$2.50 per day; rooms with bath, \$2.50 to \$3.50 per day.

SWEET PEAS AT FLORADALE, LOMPOC, CALIF.

 THURSDAY, AUGUST 17.

Morning Session.  
 Third Day, 9:00 a. m.  
 Sectional Meetings.  
 Florists' Telegraph Delivery.  
 American Gladiolus Society.  
 American Carnation Society.  
 American Rose Society.  
 National Sweet Pea Society.  
 Florists' Hall Association.

Third Day, 11:00 a. m.  
 Election of Officers.  
 Amendments to Constitution and By-Laws to be acted upon.

To amend Article IV, Section 2 to read as follows:

Section 2. Fees and Assessments.—Any eligible person may become a member of the Society on the payment of \$5.00, and such payment shall cover the annual dues for the balance of the calendar year.

The annual dues shall be \$3.00 per year, payable in advance on the first day of January. Any person may become a life member on payment of \$50.00 and be exempt from all further assessments.

Afternoon—No Session.

Third Day.  
 Bowling Contests and Other Sports.  
 Evening Session.

Third Day, 8:00 p. m.  
 In hands of Ladies' Society of American Florists.

FRIDAY, AUGUST 18.

In hands of the Baltimore Gardeners' and Florists' Club.

whether certificates and through tickets can be obtained to the place of meeting. If not, purchase your ticket to the nearest point where they may be secured and there purchase a through ticket and certificate. No reduction in fare will be made unless a certificate be secured at the time of the purchase of the ticket.

Immediately upon arrival at convention hall, present your ticket and twenty-five cents to the secretary. A fee of twenty-five cents is charged for each ticket validated. An agent of the association will be present at the office of the secretary on August 16-17.

WIETOR-SINNER FISHING PARTY AT WHITE SAND LAKE, WIS.

The New Carrollton, European plan. St. Paul near Baltimore street—Rooms without bath, \$2.00 up; rooms with bath, \$2.50 up.

Hotel Junker (strictly stag), European plan. 20-22 E. Fayette street—Rooms without bath, \$1.00 to \$1.50 per day (each person); rooms with bath, \$1.50 to \$2.50 per day (each person).

Hotel Raleigh, European plan, Holliday near Fayette street—Rooms without bath, \$1.00 to \$4.00 per day; rooms with bath, \$2.50 to \$4.00 per day.

Hotel Kernan, European plan, Franklin and Howard streets—Rooms without bath \$1.50 up; rooms with bath \$2.00 up.

It will be well to make application for rooms in advance and so avoid the disappointment on your arrival of finding all the best rooms taken. All information will be furnished by address-

office to pay their assessment. This will also be a great convenience to the secretary, who has many other duties to perform. Dues cannot be paid while meetings are in progress. A badge and membership receipt are absolutely necessary before any individual can sign the roll and receive invitation cards for any of the entertainments. This rule will be strictly enforced. Badges will also be necessary in order to get into the exhibition hall. All not having badges will be required to pay the admission fee.

On receipt of \$3.00 from those who have paid their 1910 dues or \$5.00 from all others, the secretary will promptly mail to the sender a certificate and badge. Bring your certificate to the convention with you.

Send your dues now to the secretary.  
H. B. DORNER, Sec'y.

#### HAIL HAVOC AT BALTIMORE.

Geo. M. Cook's Greenhouses at Wilmington After Storm.

ing William Feast, No. 331 North Charles street, Baltimore, Md.

#### THE TRADE EXHIBITION.

The trade exhibition will be held in the Armory which is, without exception, the best and largest hall ever offered for the use of the society. From reports coming from the superintendent the prospects are that the hall will be filled to overflowing. The most gratifying thing about the hall is that all the exhibits will be upon the same floor.

The meetings of the society will also be held in the Armory but in a separate room and free from the usual noise.

"Exhibitors are reminded that the duties of the judges are limited to the consideration of and the making of awards to novelties and imported devices only. Exhibitors are required to make previous entry of all such exhibits with the superintendent in writing." Full rules and regulations, together with rates, may be obtained by addressing "Mack" Richmond, Superintendent, 1813 Pulaski street, Baltimore, Md.

The trade exhibition will be open from the morning of Tuesday, August 15, to 10.00 p. m. of Friday, August 18. During this time no exhibitor will be allowed to pack up or remove any exhibit or part of exhibit until 10.00 p. m., August 18.

Notice is also given that the public will be admitted every evening from 7.00 to 10.00 p. m. and on Monday and Friday afternoons from 2.00 p. m. until closing time. Members should keep this in mind in the transaction of their business.

#### DUES.

All members should send in their dues in advance and secure their certificates and badges and so avoid the necessity of waiting at the secretary's

#### Two Good New Roses.

The modern rose enthusiast must possess a good stock of patience, for he may see a grand novelty exhibited, but he will of necessity have to wait perhaps one or two years before he can possess it. Last autumn S. McGredy and Son exhibited a rose which I venture to predict will be in every garden within a year or two after it is distributed. This variety was Mrs. Muir Mackean. In my opinion there is nothing like it among all our numerous hybrid teas. There is a combination, as it were, of the exquisite shades of Farbenkonigin and George C. Waud; and

even though we may know these two roses, this can give no adequate idea of the marvelous coloring of Mrs. Muir Mackean. I am certain it will take a high position among our show roses. It is one of those roses that arrest attention, even though surrounded by ever so many beauties, the more so as it carries its blooms on good stout stems, and as they are borne mostly singly, no disbudbing

#### Chicago Flower Growers' Association.

The Chicago Flower Growers' Association will open the doors of its new store at 176 North Michigan avenue to the inspection of the trade August 1, and be ready to make a bid for a share of the cut flower business which is supplied by the many wholesale houses of this city. The association has splendid quarters quite handy to all the other dealers with space ample enough to handle all the output of the many growers who compose the association. The association has been in process of formation for several months and consists of about 60 growers, representing more than 2,000,000 square feet of glass. The association is capitalized for \$10,000 and the following well known growers were on June 5 elected as officers:

J. F. Kidwell, president.

Edward Meuret, vice-president.

Anton Then, treasurer.

George C. Wieland, secretary.

Aug. Jurgens, Joseph Schoos, Charles McCauley and J. C. Meier, directors.

The management of the store will be in the able hands of Otto W. Frese, who is well known to the trade of this city and the other cities supplied from this market having been connected with the wholesale flower business here for more than twenty-five years, the last eight years with Poehlmann Bros. Co. The store which has been rented is very commodious and two floors and the basement will be utilized in conducting the business. The first floor will be used for the cut flower branch and the second floor as a plant market. It is the intention of the association when once fully established to also handle a full stock of supplies.

SAN FRANCISCO, CALIF.—W. H. Cornwell of Sievers & Cornwell caused the arrest of Leonard Strauss whom he accuses of the larceny of checks and money to the value of \$79.

H. C. ROWE'S STORE, CHICAGO.

George C. Wieland, Secretary.

J. F. Kidwell, President.

Anton Then, Treasurer.

Chas. McCauley, Director.

Edw. Meuret, Vice-President.

Aug. Jurgens, Director.

J. C. Meier, Director.

Otto W. Frese, Manager.

Joseph Schoos, Director.

CHICAGO FLOWER GROWERS' ASSOCIATION OFFICERS AND DIRECTORS.

SHAND'S MODEL is a new trailing lovia, said to be very effective for baskets, vases, etc.

IMMOERTELE prices will be much higher. Such are the indications by latest French cables.

QUARANTINE restrictions on account of the cholera scare may delay French bulbs at the seaports.

THIS weather favors the tramps who represent themselves as the friends or employees of well known men in the trade in seeking loans or in passing worthless checks. Look out for them.

## San Francisco 1915.

The National Educational Association is now holding its convention in San Francisco some 15,000 (fifteen thousand) strong. Why not the S. A. F. in 1915? EDWIN LONSDALE.

## Society of American Florists.

### DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the rose "Wilhelmina" by Hoerber Bros., Chicago, Ill., becomes complete.

H. B. DORNER, Sec'y.

## Every Dealer Should Have a Directory.

### THE AMERICAN FLORIST Co.:

Your directory with my insertion in it received and I am pleased with the whole work. I believe every dealer ought to have a copy of this directory, for the information he can obtain from it is worth many times the money paid for it. Sincerely yours,

JOSEPH KOPCSAY.

South Bend, Ind.

## Boston to Baltimore.

The delegation to the S. A. F. convention at Baltimore will leave Boston by the Fall River Line at 6 p. m. Sunday, August 13, joining with the New York delegation at New York City, which leaves at 12 noon, August 14. The fare will be \$8.65 on the certificate plan, with a three-fifths rate returning by the same route. Anyone desiring to join the Boston party should notify W. A. Hastings, care of Boston Flower Exchange, C. Park street, Boston, Mass., state vice-president S. A. F., before August 11, that stateroom and passage may be secured.

## Cutting Down Production Costs.

Money is saved by growing roses and carnations more than one season in the same soil and benches. Carnations have been grown successfully two years this way and roses have been carried practically five years in the same soil and benches—the soil supplemented by an annual top-dressing—producing good crops each year. In this practice there is a saving of stock, soil and labor which compels attention in these days of high costs. There would appear to be increased danger of fungous and other diseases, but these, like the insect pests, are with us always.

## National Flower Guild.

The National Plant and Flower Guild was organized in 1903, and has extended to all parts of the country, its branches now numbering 300, located in north, south, east and as far west as California. The headquarters are in New York with Mrs. John Wood Stewart president, the national vice-presidents being Mrs. David Fairchild, Mrs. Alexander Van Rensselaer, Mrs. Ernest Iselin, Mrs. Margaret Deland and Mrs. Louise Klein Miller. The objects of the guild are to bring the city dwellers in touch with nature and to cheer the poor in tenements and hospitals with fruits, flowers, plants and delicacies. It also strives to awaken interest in the cultivation of fruits and flowers. These women are doing a noble work and are carrying cheer and refinement to many an unfortunate, assisting to lift the heavy burden which is weighing them down. It is a grand opportunity for the florists when there is a surplus of stock, to assist the local society and help these women to inculcate a love for flowers and give to the afflicted a few moments of pleasure.

## The President's Special to Baltimore.

The Chicago Florists' Club, at its regular meeting July 6, decided in favor of the Monon Railroad for the Baltimore convention trip and arrangements are being completed by which the President's Special will leave Chicago Sunday, August 13, at 11:30 p. m., arriving at Cincinnati at 7:50 Monday morning. There will be a stop-over at Cincinnati for a couple of hours to get together the various delegations from Louisville, St. Louis, Peoria, Indianapolis, Dayton, Toledo, Detroit and other nearby points. From Cincinnati the President's Special will proceed direct to Baltimore, arriving Monday at 11:00 p. m. The fare for the round trip, Chicago to Norfolk, via Baltimore, good for 30 days, is \$27.00. Lower berths, one way, are \$4.50, upper berths \$3.60. Many side trips can be arranged by rail or water to Washington, Philadelphia, New York, Boston, etc., at small additional cost. Reservations will be made at Chicago by Herbert Wiley, General Agent Passenger Department, Monon Railroad, 104 South Clark street. Telephone, Harrison 3306.

## Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Chicago, September, 1911.—Exhibition of annuals, perennials and vegetables. Horticultural Society of Indiana, Inc., J. D. Burdett, secretary, 1620 West 104th Place, Chicago.

 KENNICOTT BROS., 163 N. Wabash Ave., Chicago.

## NOTICE

—OF—

## STOCKHOLDERS MEETING

CHICAGO, July 13, 1911.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the stockholders of the American Florist Company will be held in the Hotel Belvidere, Charles and Chase Streets, Baltimore, Md., Wednesday, August 16, 1911, at 3 o'clock p.m., for the purpose of electing directors and officers for the ensuing term and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.  
 M. BARKER, Sec'y.

## The Best Color Chart

For Florists, Seedsmen and Nurserymen.

ERFURT, GERMANY, May 9, 1911.

AMERICAN FLORIST Co., Chicago, U. S. A.

Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged if you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.

Yours truly,

ERNST BENARY.

## IMPORTANT BUSINESS CHANGE.

It was with considerable regret that the local trade here heard of the passing into other hands of the long established firm of Wolfskill Bros. For many years the name Wolfskill has been connected with all that was best in the business and many prominent men in the trade here and in other parts, are graduates from this firm. There is, however, one pleasing feature in the change and that is that our worthy friend Morris Goldenson succeeds to the business. Morris is one of the pillars of the trade here and will doubtless handle the increased business that will come to him from Wolfskill Bros.' customers to the best advantage. Mr. Goldenson has purchased the book debts of the firm and all the store fittings and utensils except the permanent fixtures, also the good will of the firm and will add these to his flourishing business on Third street. For some time the Wolfskill greenhouses have been leased by S. Watson and these are not included in the sale. Mr. Watson continuing to run them. The store on Fourth street has been leased to a talking machine agency and thus passes one of the brightest and best florists' windows in the city. All will wish Mr. Goldenson success in his new venture and it looked as though things were coming his way recently when 142 graduates of the Los Angeles high school invaded his store and each took a bouquet of Ulrich Brunner roses. "Johnny" Gordon, Goldenson's capable and hustling manager, is a busy man these days and it looks as though he will be still busier.

## NOTES.

During the few years that the Bauer Pottery Co. has been in business the proprietors have bought out the old Los Angeles pottery and several smaller concerns and now do a very large and constantly increasing business in the excellent pots they make. This firm is showing the local growers of the old school that good plants can be grown just as well in pots as in old tomato and kerosene cans. The clay used is good and the pots well burnt and porous and the firm deserves great credit for them.

At the Homer Laughlin place at East Hollywood, James Taylor the new superintendent is carrying out several important changes and these include a new lath house 112x160 feet, equipped with the Skinner watering system to be used for palm culture. Mr. Taylor is a Scotchman by birth and has learned his business thoroughly in his native land also in England, Ireland and in Cape Colony before coming to California.

## Albany, N. Y.

At the July meeting of the Albany Florists' Club Louis Schaefer, chairman of the entertainment committee, reported that arrangements for the annual clambake were well under way and the tickets printed and ready for distribution. The bake will be held on September 3 at Shaffer's grove on the western turnpike. A programme of sports and amusements will be a feature. Fred Goldring was host for the club at the meeting and the occasion was the fourth visit to his fine place at Font Grove. The next meeting will be on the evening of August 3 at F. A. Danker's, Central avenue. The Florists' Club has received an invitation to attend a euchre party at the home of Fred and Mrs. Henkes, Newtonville, on the afternoon of July 29. The proceeds are for the benefit of St. Colman's Home for Orphans, Watervliet.

# ANNOUNCEMENT!

---

---

We wish to announce to the trade that we will be open and ready to do business at our new store

**176 N. Michigan Avenue**

on **August 1**, at which time we will have a complete and full line of **CUT FLOWERS**. The local florists are cordially invited to call on us, inspect our stock and purchase whatever they may desire. Everything will be in readiness to receive telegraph and mail orders for shipments commencing that day. Our doors will open with stock from the **60 Growers** who comprise the Association.

We are mailing under special cover a letter in full detail which we trust will be carefully read by all. We hope that we may be favored with your esteemed patronage in the future.

**The Chicago Flower  
Growers' Association**

OTTO W. FRESE, General Manager

**176 N. Michigan Ave., CHICAGO**

## BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

### Chicago.

#### GOOD STOCK VERY SCARCE.

A general shortage is the tale at all the wholesale stores, and with the exception of one or two the counters and refrigerators have an almost empty look. The retailer with much funeral work on hand has considerable difficulty in securing good stock to fill his orders. Roses and gladioli are the only flowers that are being received in any quantity and the roses are all sold out at an early hour. American Beauties are very scarce and selling at good prices. Other roses are coming in in small quantities and of varying quality. Lilies are being received in much shorter supply but both longiflorum and speciosum are on the market. The prices have, however, advanced, owing to the decreased cut. Water lilies are in fairly good supply and are extensively used. Asters are arriving in all kinds of condition, good, bad and worse, but not in any great quantities. The better grade are quickly picked up and sales are reported at \$4.00 to \$5.00 per hundred. Carnations are very few, on Saturday after 1 o'clock there was not a carnation to be obtained on the market. Gladioli are being received in good quantities and some magnificent blooms of Mrs. Francis King, America, Augusta and other select varieties are to be had. Sweet peas have been ruined by the continued hot weather and there are but few seen that are even of fair quality. Many of the wholesale houses have taken them off their list. Trade is not over active, and with the small amount of stock being received vacations, sports and the florists' picnic are the topics of interest discussed.

#### NOTES.

Otto Goerisch, with the A. L. Randall Co., is back from a Wisconsin and Michigan business trip. Eric Johnson

is again attending to his duties at the store after having had a most enjoyable visit in Wisconsin. Frank McCabe is now enjoying his vacation, having left Monday, July 17.

John Kruchten says that the gardenias at the Deerfield Nurseries are looking fine and that he expects to receive some large shipments of these flowers next month. Mr. Kruchten and wife returned from a brief visit in Milwaukee on July 17.

Fred Stollery is planning on attending the convention at Baltimore and visiting a brother in New Jersey. At present he is busy making repairs on his greenhouses. Joe Loebick, one of his valued employees, is visiting friends in Indiana.

Walter Scott, manager of the La Grange Seed & Floral Co., is shipping Poehman Bros. Co. some Mrs. Francis King gladioli with stems four feet long. The flowers are exceptionally fine and are of unsurpassed quality.

Miss K. N. Cooper, who so successfully managed the Aurburndale Goldfish Co.'s business, received a very complimentary write-up in a recent issue of the Illinois Statesman, a weekly magazine.

Miss Mary Misiewicz, daughter of the Milwaukee avenue florist, who recently underwent an operation for appendicitis at St. Elizabeth's hospital, is improving and will soon be able to be about.

Robert Northam, George Reinberg's store man, is enjoying a well-earned vacation at White Lake, Mich. Wait until Bob returns and we will hear some more fish stories.

The Athenian Floral Co., which recently opened a store on Van Buren street, is figuring on making further improvements and will commence operations soon.

Bassett & Washburn had a very busy day on July 15 when they filled twelve

pages of orders. E. O. Anderson, one of the employees, is away on his vacation.

The Black Gem Coal & Coke Co. under the management of M. A. Rolfe are doing an extensive and successful greenhouse coal business this year.

Curtis Kinder of the Radelin Basket Co. is planning to visit the firm's factories in Ebersdorf, Germany, and will leave some time in November.

President Asmus of the Society of American Florists says that this city will be represented by a large delegation at the Baltimore convention.

It is rumored that Stollery & Moore, the Evanston avenue florists, have dissolved partnership.

Joseph Foerster says that some of Kyle & Foerster's asters are bringing as high as four and five dollars a hundred.

Mrs. Kreiger has returned from her vacation in northern Wisconsin and is again on duty at the Canger & Gormley store.

M. Wolniewicz, 3301 North Claremont avenue, is spending his vacation in Wisconsin and Michigan.

Anthony Einweck of E. H. Hunt's has returned from a two weeks' visit in Worthington, Ia.

Thos. Fogarty and Ed. Enders are away on their vacation. No, they didn't go together.

Ernest Farley of the J. B. Deamud Co. is renewing old acquaintances in Indianapolis, Ind.

Ed. Armstrong is doing A. Lange's buying while his employer is away on his vacation.

Charles Drissler, one of Wietor Bros.' valued employees, is summing at Clear Lake, Wis.

Joseph Ziska Jr. left July 15 for a week's visit at Oxford Junction, Ia.

Miss Martha Gunterberg returned July 17 from Fenville, Mich.

 Once tried you will have no other

E. E. Peiser has practically turned over the management of Kennicott Bros. Co.'s business to Michael Fink and N. P. Miller and will follow the advice of his physician and have as little to do with business affairs as possible. Messrs. Fink and Miller will prove equal to the task as both have had many years of experience on this market and are well known to the trade. Mr. Fink says that C. H. Ketcham's stock at South Haven, Mich., was in the best of condition when he was over there last week and also that Fisher Bros.' new store, which is under construction at Kalamazoo, will be a beauty. They are now receiving some very fine gladioli, a pure white which was labeled Reine d'Anjou, being exceptionally beautiful.

The H. A. Fisher Co. of Kalamazoo, Mich., owing to increased business, has found it necessary to incorporate. The new corporation is capitalized at \$10,000, the incorporators being Harry A. Fisher, George Fisher and Hermann Fisher. H. A. Fisher started the business in 1905, moving from Chicago, and the trade has increased rapidly. The store in the New Burdick hotel will be finished in white enamel and Italian marble and will be one of the finest in the state. Mr. Fisher has three brothers associated with him, George, who looks after the buying in Chicago, Hermann and Norris.

The Superior Machine and Boiler Works have secured orders for boilers from four local vegetable growers this week, namely, Joseph Zimmer, North California avenue; Joseph Jaeger and Mrs. Wm. Jaeger, Ridge avenue, and Nick Bach, Western avenue. Peter Weiler of this enterprising concern says that the fish that N. J. Wieter shipped him while he was away on his vacation were fine, "the best he never ate." Vaughan & Sperry's chief offerings this week are a splendid grade of America and Augusta gladioli. The

senior member of this concern says he was fortunate in receiving consignments of these flowers from a grower who had prepared himself with the Skinner system of watering.

H. Van Gelder of Percy Jones, who has been seriously ill for the past week, is feeling much better and an early recovery is hoped for. He is anxiously awaiting the time when he will again be able to be at the store where his presence is so much needed.

Chas. W. McKellar was absent from the store more or less this week while he was superintending the addition to his residence on East Ontario street. Henry Cohn is enjoying his vacation by making frequent trips across the lake.

Richard Rolston, formerly connected with J. F. Kidwell & Bro., will take charge of O. J. Friedman's new store, which will open August 1, 1911, at 63 West Congress street and to be known as the Western Floral Company.

The A. Dietrich Co., 2442 Sheffield avenue, are busily engaged filling many local orders, one of which is the new greenhouse for John Schoepfle at 933 Belmont avenue. The contract calls for a house 24x60 feet.

The Chicago Pump Co., 1053-55 Fulton street, has found it necessary to install a second telephone to take care of their rapidly increasing business. The number of the new phone is Haymarket 3911.

The stork paid a visit recently to the home of G. W. and Mrs. French at Morton Grove and left a bouncing baby boy. Mr. French is foreman of the carnation section of the Poehlmann Bros. Co.

R. E. Schiller is off on a vacation to Sioux Falls, Neb., while Herman is preparing for a two weeks' trip to Sister Lakes, Mich., whence he expects to leave for the convention next month.

Louis Winterson will leave on his vacation as soon as some of the E. F.

"The Busiest House in Chicago."

## J.B. DEAMUDCO.

160 N. Wabash Ave., CHICAGO.

Long Distance Phone, Central 3155.

Winterson Co.'s employes return. A. E. Benesh of the supply department left July 17 to enjoy a well-earned rest.

Mrs. Fred Struvy, who intends to try her hand at fruit growing in southern California, will dispose of her property at 1515 Clybourn avenue at the first opportunity.

A local retail concern is advertising in the programme of a popular resort \$1 boxes containing two and one-half dozen fresh roses "good enough for anybody."

Fred Krell had a very busy season at Larrabee and North avenue, and says the fishing at Lake Elcock, Wis., is good enough for him at present.

Geo. Goebel, the popular representative for the Adams Express Co., expects to leave this week for an outing at Big Sand Lake, Wis.

The Railway Gardening Association committee of arrangements will meet with the local committee at Vaughan's Seed Store July 24.

R. C. Whitsett, president of the R. C. Whitsett Coal & Mining Co., reports a 50 per cent gain in business over that of last year.

Poehlmann Bros. Co. are receiving a good supply of roses and with the exception of American Beauties are filling all orders.

Frank Ayers has received word that his mother is seriously ill and will leave soon for her home at Paris, Texas.

O. P. Bassett and wife have returned to their home in Pasadena, Calif.

**WIETOR BROS., 162 N. Wabash Ave., Chicago**

The annual picnic of the Florists' Club will be held at Ehrhardt's grove, Park Ridge, July 23. Trains will leave on the Northwestern Railroad at 11 a. m. and 12:45 p. m. Tickets, including transportation both ways and admission to the grove, are 50 cents each and are now on sale at the wholesale commission houses. A liberal appropriation has been made for prizes in the various picnic events. "Bring your own bread and butter," etc.

Philip L. McKee and N. J. Rupp, of the John C. Moninger Co., are in Milwaukee again this week presenting their firm's claims for a new classification of greenhouse construction material, which if adopted, will lower the freights and benefit builders and growers alike. A private hearing was set for Thursday, July 20, the outcome of which will appear later.

John Schoepfle, who had a very prosperous year, is now tearing down his greenhouse on the east side of the street to make room for the new Lake View postoffice. He has placed a contract with A. Dietrich & Co. for another greenhouse 24x60 feet.

Emile Danz reports a very prosperous season and is now busy renovating his place. He has contracted for a new store front and a large electric sign. After these alterations are made he will leave for Mt. Clemens, Mich., on his vacation.

Louis Gresenz is kept busy with funeral work of late, and reports a very profitable season. He is now figuring on putting in a large up-to-date ice box which his rapidly increasing trade demands.

D. A. Robertson, with the Ernst Wienhoeber Co., and wife, left for Detroit July 13, where they will spend a few days with friends and proceed to Toronto on a brief vacation.

The Belmont Floral Co. under the management of Mrs. Gillam, has had a very good year. She is now preparing for a two weeks' sojourn at Lake Macatawa, Mich.

Fred Fischer is spending these hot days on week-end auto trips to Crystal Lake, Ill., but expects to wind up with a tour through Indiana.

Mrs. Malcher, who has had a strenuous season, is now seeking rest and

## Indianapolis.

TRADE GOOD. STOCK SCARCE.

During the past week the demand for flowers has been good, but the supply has been inadequate. Carnations are of very poor quality and are very scarce and asters are not as plentiful as they should be. The wholesale market has been deprived of good asters in several instances by the neglect of the growers in taking care of their young plants earlier in the season. Gladioli are plentiful but of poor quality and consequently do not bring the prices that they usually do. If it were not for the good roses that are obtainable locally, the retailer would have very little to offer. All this scarcity of good cut flowers may be directly held to the hot dry weather that prevailed here for several weeks in the past. At present writing the temperature has dropped ten or fifteen degrees and has thereby relieved much suffering to humanity, but has not helped plant life much. The damage seems to be beyond repair to the out-of-door flowers.

NOTES.

Bertermann Bros. Co. will have its new Premier delivery automobile in commission next week. This machine was especially built for them and no doubt will surpass anything in the city.

A new greenhouse has been erected at the Indianapolis water works in place of the old one which has been in use for the past thirty years or more.

The firm of A. Wiegand & Sons is replacing some of its old conservatories with up-to-date ones. They are negotiating for a new pleasure car.

A new retail store has been opened on Virginia avenue near Fountain square, taking its name from the locality.

The annual florists' picnic is to be held on July 20 at Fairview park. Elaborate arrangements have been made by the committee.

Herman Junge has been appointed assistant superintendent of the floral exhibit at the coming state fair.

Adolph Bauer has taken his brother-in-law, A. F. Steinkamp, into partnership.

Karl Sonnenschmidt has just bought a fierce imported bulldog.

John Heidenreich and family are touring Germany.

A. W. B.

## Grand Island, Neb.

E. Williams is remodeling his greenhouse plant this summer, tearing down the smaller houses and rebuilding two larger ones, 16x85 feet and 24x116 feet. Trade is reported as good, the best season he ever had, and with all the dry weather stock is in pretty fair shape.

C. H. Green and wife of Fremont were recent visitors. He is rebuilding and installing a larger boiler.

The Nebraska florists are planning for a good display at the State Fair this fall. The Nebraska Horticultural Society will hold a meeting at the same time as most of the members are attending the fair.

E. W.

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

### St. Louis.

#### TRADE SLOW.

The weather has been slightly cooler, but trade is slow, funeral work being the only outlet. Good stock of all kinds is very scarce, carnations being very poor. Sweet peas are poor and about over. Some good lilies and good colored American Beauties are seen. Gladioli are selling fairly well and tuberoses are just beginning to come in. Many of the funeral bunches are made of a variety of flowers.

#### NOTES.

The St. Louis Florists' Club held its monthly meeting July 13 with 35 members present. President Cannon in the chair. The following were nominated for the respective offices: For president, A. J. Windler; for vice-president, C. E. De Weaver, Frank Venemann; for secretary, J. J. Beneke; for treasurer, W. C. Smith; for trustee, three-year term, J. F. Ammann, F. H. Weber, one-year term, C. C. Sanders, W. C. Young. A communication was read from the Retail Association, inviting the club to endeavor to obtain legislation in regard to crepe pullers. It being rumored that the St. Louis Horticultural Society would also take up this matter.

F. H. Weber, vice-president of the S. A. F. for Missouri, 350 North Boyle avenue, has charge of all transportation arrangements to the convention.

Al Gumz, with Geo. Angermueller, has been taking his vacation this week, but will be on hand at the picnic to take charge of the games.

Bassett & Washburn of Chicago are shipping fine lilies and American Beauties of good color to this market.

Bert Helie, with the Routledge Seed & Floral Co. of Portland, Ore., was a visitor.

Frank Gorly, of the firm of Grimm & Gorly, will attend the S. A. F. convention after August 1.

Alex Siegel has been indisposed all week. W. F.

### Cincinnati.

#### A FAMINE OF FLOWERS.

There is a positive famine of flowers in this market. Every day the wholesalers must turn down large orders both from local people and from outside of the city. The reason for this appears to be in the fact that asters and gladioli seem to be slower in coming in than in past summers. Those that do come in realize top prices and sell readily. Their quality is as a whole very satisfactory. The only fault to find is the lack of quantity. Easter lilies, in fair supply, have helped splendidly to relieve the scarcity in the market. They have advanced slightly in price. The rose supply is short of the call for this line. The growers are all drying down

the old stock or replanting, while the summer roses are somewhat off crop. Some hardy phlox arriving help somewhat. This above list about completes the flowers offered in any quantity at all. The green goods line is adequate for all requirements. Fancy ferns are excellent, while greens from the south are generally arriving in good shape. The market wants flowers and lots of them.

#### NOTES.

J. M. McCullough's Sons Co. had on exhibition in their seed department a choice and large assortment of hardy phlox that made a very pretty appearance.

Mrs. P. J. Olinger and family are spending the summer with relatives at Evanston, Ill.

E. G. Gillett is summering, while in town, at a cottage above Coney Island. H.

WALLINGFORD, CONN.—The Rowden & Mitchell Co. are making extensive alterations to their greenhouses. The older houses have been taken down and rebuilt and new houses with concrete foundations erected.

MONTREAL, QUE.—The annual exhibition of the Montreal Horticultural Society and the Fruit Growers' Association will be held in Victoria Rides' armory Sept. 6-7. The schedule of prizes is being distributed by Secretary A. J. Boyle.

### Baltimore.

#### TRADE QUIET AND STOCK POOR.

Trade is very quiet, the business for last week being extremely slow. The torrid weather still hangs on, and everything is drying up. The supply of stock coming in is not up to the usual standard and is poor in quality. Sweet peas are the leaders, there are a few roses and carnations, they are small, both in size and supply. Lilies are still on the market, and a few asters are coming in, but are rather scarce, and the flowers small, but they find ready sale. Coreopsis is in good supply and greens are more plentiful and have a good call. Considering the warm weather and drought, outside stock is fairly good, carnations are holding up extremely well, but so many plants were damaged in the storm that there is a good demand for stock which is scarce. Chrysanthemum stock is also very short and growers are finding it difficult to obtain plants for the benches. There is still a demand for bedding stock owing to so much replanting. Ferns are having a good call.

#### CLUB MEETING.

The Gardeners' and Florists' Club held a meeting July 10, which was largely attended notwithstanding the intense hot weather. President Graham occupied the chair and after the routine business was transacted the discussion was upon the arrangements for the coming convention. The arrangements are nearly completed and it was the general opinion that this would be one of the greatest conventions in the history of the S. A. F.

#### NOTES.

Mack Richmond desires that all exhibitors should send their orders to him for signs, as all these are to be uniform and no others will be allowed. He reports the exhibition space as selling fast but a limited quantity remaining unsold.

The hot weather has interfered with the reglazing the houses damaged by the hail storm, it becoming so hot that work had to be stopped, but the growers are making good headway and by fall will have everything in readiness.

Two large banners 10x20 feet announcing the convention have been hung over the principal street. Visitors will meet with a genuine southern welcome, and all latch strings will be out.

Vacations are in order at the stores, many are now out of town. They got away so as to be back and take part in the coming convention. J. L. T.

### Buffalo.

#### STOCK GETTING POORER.

The summer stock has been getting poorer, suffering for want of what we got last night, a grand rain that has gone down about three feet into the ground. Trade has been as good as could be expected for July, funeral work comprising about all there was. Liliun rubrum are coming in fine and are our best flower. Sweet peas have dwindled down to almost no stem and inferior flowers. Asters have made their appearance and of fair quality. Gladioli in red are coming in now.

#### NOTES.

A pleasing event the past week was the reunion of the Forbach family, of which Conrad Forbach of Pine Ridge is one. Two sisters and one brother beside Conrad and another brother in Germany, who paid a visit to the sisters and brothers in Buffalo. They were left orphans when very young and given over to different families to bring up. Each learned a trade or profession and have all been successful. It is very gratifying to have one like "Coonie," as we call him, with us and making the success that he is at Pine Ridge.

Another wedding among the florists. John L. Kramer, who is associated with his father on Chippewa Market, was married last Wednesday to Miss Emma Darmstadter of Emslie street. After an extended wedding trip they will be at home to their many friends at 317 Landon street. Congratulations from the craft to the newlyweds.

W. F. Kasting has returned from Milwaukee where he headed the Orpheus Singing Society as their president. We were all sorry to hear of Wallace Eliss' withdrawal from the W. F. Kasting Co. to engage in other business. John Jerome of this firm is in Port Huron on his vacation.

Robert C. Avery of West Seneca, or Limestone Hill as it is better known, reports a larger business than ever and also that he has erected a new store and office at his place. It is constructed of concrete blocks; a large glass front gives it a very pretty appearance.

There was no meeting of the Florists' Club last week owing to the extreme heat. BISON.

### Stamford Horticulturists.

The regular meeting of the Westchester and Fairfield Horticultural Society was held July 14 at Royal Arcanum hall, Stamford, Conn., President Stuart occupying the chair with all the

officers and 75 members present. Two life, three honorary and nine active members were elected to membership and 10 propositions received. There are now 150 members. The executive committee reported that arrangements were completed for the first annual outing and games at Bonnie Brae Inn, New Rochelle, N. Y., July 26. The contests and games start at 10:30 a. m. and dinner will be served on the lawn at 2 p. m. The committees have arranged for everything possible to make the affair most enjoyable for all. There will be contests and games (prizes for all events), music and colored quartette and Bonnie Brae famous dinner. Tickets \$2.00. Be sure and come and bring your friends, other friends of yours will be there.

The exhibits at the meeting were of very fine quality. The awards of the judges were as follows:

Honorable mention to Jas. Stuart for *Achimenes coelestinum*; Geo. Woundy for *Dendrobium nobile*; A. Peterson for display of sweet peas; P. W. Popp for *Lilium auratum* and sweet peas; Chas. Adcock for *Tomato Ponderosa*. Highly commended: Alex. Geddes for mushroom *Heisteria* King; A. Patterson for collection of sweet peas in varieties. Vote of thanks to A. S. Pederson for *Hydrangea arborescens alba grandiflora*. The exhibitors gave short talks and answered questions regarding the culture of their exhibits. This is one of the interesting features of our largely attended meetings.

It is hoped that all the members and their friends will be at the first annual outing and help make the occasion one long to be remembered.

J. B. MCARDLE, Sec'y.

ROSSVILLE, N. Y.—Carl Dicte is erecting a Queen Anne cottage at a cost of \$2,000.

NORTH ADAMS, MASS.—A. J. Boothman at North Summer street is improving his greenhouse property.

BAYONNE, N. J.—G. F. Ripp has taken a few days from business cares and is at Johnstown, Pa., where his wife and daughter are staying for the summer.

WATERTOWN, N. Y.—A grass fire in the Arsenal street cemetery, on July 5, is believed to have been started by the sun heating a piece of tinfoil until it ignited the dry grass.

MUNCIE, IND.—Articles of incorporation have been filed by the Muncie Floral Co. with a capital stock of \$2,000. The directors are Louis and Zora M. King and W. H. Fisher.

New Orleans.

Business just now is at a standstill. The exodus of our summer tourists is now about complete and there is hardly anything for the florist to do except a few wedding and funeral orders. The prospects for a brisk fall and winter trade are very bright and the florists are now busy making preparations, to increase their stock in trade. The chrysanthemum crop has suffered very much for the last two months and if it keeps up the crop will fall far short of last year.

### HORTICULTURAL SOCIETY OUTING.

On Wednesday, July 12, the New Orleans Horticultural Society held its annual outing at Mandeville this year and spent a most delightful day, at Mugnier's hotel, where a most delightful dinner was served, and about 40 members and guests participated. President R. Eichling decorated the tables with roses, tuberose and asters and a quantity of Asparagus plumosus and Sprengerii. Secretary Panter acted as toastmaster and called on Superintendent Baker of the New Orleans Parking Commission, who told about the labors of the florists in general and concluded with the reading of the annexed original poem:

He was followed by President R. Eichling, who for the society said that the organization has always been a premier factor in the advancement of New Orleans, especially in making the metropolis of the south the beauty spot of the far end of this great republic. C. R. Panter voiced his hearty welcome to the guests and said that the programme of speeches had to be curtailed, because of an impromptu arrangement to take a run to Covington on the electric car line. At the conclusion of the dinner the members boarded the train for Covington and returned in time for the departure for the city on the steamer Louis Dolive, whose commander, Captain Ed. Bordeaux, was very attentive to the wants of his passengers.

### Work and Rest.

The gardener's life is a busy one,  
If you want to prove it watch him;  
He's on the go from morn to night,  
You will find it hard to "catch" him.

He starts in the morning before the sun,  
For it's always his busy day;  
At noon he belts his lunch on the run,  
For that's the gardener's way.

He spades and weeds and hoes and digs  
As much as any two men;  
Yet he's not content when the day is spent,  
If he can't show the work of three men.

And thus with all his labor and toil,  
He ought to be crowned with success;  
But you know, when it comes to growing plants,  
The outcome one never can guess.

These dear little things have a way of their own,  
You can study them through and through,  
And just as you think they're come to their  
prime,  
They bid you a kindly adieu;

For each takes its turn to give us concern,  
As every gardener knows;  
When his crop is just right, in one night comes  
a blight,  
And it turns up its sweet little toes.

The roses get spot, the lily bulbs rot,  
Carnations don't do as they "oughter,"  
Chrysanthemums go in a way that's not slow,  
Because they've had too much water.

Then the flies and the bugs, with some fungus  
and slugs,  
Do their share in the general flurry  
To keep him awake, till he hollers, "Great  
snake!"  
There's no end to a gardener's worry!"

But you can't keep him down, for the sun's  
burnt him brown,  
So, he makes a fresh start without fear;  
And who shall say nay, if he lightens the way  
With an occasional glass of beer?

Now, take all the clan; each one is a man  
Whose hand I clasp as no other,  
For way down through, his heart is true  
As that of a great big brother.

A VARIABLE MARKET.

Now you see it and now you don't—that seems to be the way of the flower business. The law of supply and demand in every business regulates prices. A week ago trade was off. Saturday seems to be the best day in Boston. Last Saturday was a record good day for July. Carnations are in the last ditch. They have put up a grand struggle, but prostration assisted by red spiders have brought them almost to their finish. Some were sold Saturday that would have been thrown away at other times. In fact, the growers would have been ashamed to have owned them, but they sold and sold without protest. Sweet peas are very poor. What are coming in are short stemmed and lack the vitality of former days. All indications point to a scarcity of flowers for August. Roses are in short crop and some Brides were sold in the market cut from young plants that were just like little buttons. The longest stemmed rose now is the Radiance, which seems to revel in hot weather. Killarneys from both young and old plants have that tired looking feeling, but they are flowers and are picked up. How long these conditions will last depends a good deal on the weather, which has been very hard on them. Candytuft from outside is being sold with roots attached; probably the grower wishes to give as much value as possible. The wholesalers are happy and unhappy; they have plenty of orders, but in most cases they have not the quality of goods that the customers require. Uneasy lies the head that wears a crown, but the same ought to apply to the wholesaler who is placed in the above position. They talk about divinity hedging a king, but there is no such thing as a hedge among the wholesalers. With a customer on the other end of the line who does not understand the market conditions, there is no divinity, but a choice collection of cuss words moulded in up-to-date form. Be easy, gentlemen; remember excitement is bad in hot weather and excitement in any weather is not good. The extreme heat has left us and the weather is now quite bearable. Where is the professor who in January prophesied that we were in the wet cycle for ten years? Now we are told the hot dry weather is being caused by comets. Will some philosopher arise and tell us the unvarnished truth? The hot weather has made a good many candidates for the Ananias Club and the end is not yet. During the hot spell coal went up 25 cents a ton; some of the Wall street

operators probably wanted new autos or vacation money. The steel trade is a sure factor to gauge the state of business. The United States Steel Co. for the month of June showed an increased unfilled tonnage of nearly a quarter of a million tons. This is certainly an indication of business activity. Copper is getting scarce, the reduction for June was 8½ million pounds. Copper is going up. With the above and an estimated increased yield of wheat and corn, the florist business ought to get its share of good times, for the people are flush, and the millenium is surely at hand, the express companies have announced a voluntary reduction in rates.

STOCK VERY SHORT.

Stock of all kinds is shortening up considerably, the extreme heat and the dry weather holding everything back, and it must be some years since anyone has seen such conditions as prevail at the present time. While there is perhaps a fair amount of stock for July, business has been good and the stock received seems small in comparison. Killarney, White Killarney and My Maryland arrive in fair shape notwithstanding the warm weather and sell readily but are mostly short stems. American Beauties are perhaps the most sought after flower on account of the keeping qualities and stock is exceptionally fine for July, both in long and short stems. Water lilies are a "life saver" just now, perhaps more being sold this year than for some years past. Gladioli are still conspicuous by their absence, very few coming into the local market. The crop of sweet peas is shortening up. Easter lilies are good stock just now, Japanese lilies, both pink and white, and long and short stems, are plentiful. Carnations continue scarce, asters, too, are very few in numbers. Gypsophila is a good filler and sells well. Greens of all kinds are plentiful. Until outdoor stock arrives, there will be little relief from the present shortage in flowers.

C. F. B.

## New York.

The results of the bowling Friday, July 14, by the members of the Astoria and New York Florists' Club, both of which will be represented at Baltimore, was as follows:

|          |     |     |     |
|----------|-----|-----|-----|
| Chadwick | 189 | 190 | 201 |
| Dalton   | 173 | 191 | 179 |
| Kakuda   | 156 | 153 | 153 |
| Meisem   | 181 | 194 | 186 |
| Scott    | 146 | 130 | 144 |
| Cook     | 134 | 129 | 143 |
| Manda    | 167 | 177 | 175 |

## Washington.

## BETTER WEATHER CONDITIONS.

Though there has been no soaking rain there were several heavy showers within the past week which brought relief to the parched land and cooled the air, making life more endurable. It may here be noted for the benefit of those who have, in past years, pointed to Washington as a particularly hot place in summer, that during this torrid week, fierce as it has been, there has been less suffering here than in any other city in the country within the heat zone. Though there were a number of heat prostrations there were but few deaths among adults that were caused directly by heat. The infant mortality here, as elsewhere, has been higher. Our benevolent Secretary of Agriculture has under him a bureau for the enlightenment of the people on the care of animals. It would appear that a bureau for the protection of children would be a wise and humane proposition as they appear to suffer more from ignorance and carelessness or both than the horses and dogs. In the matter of stock about the same conditions prevail as were noted a week ago. There is an abundance of short roses that can be used in funeral work but very few that could be given any rating. The old carnations have held out remarkably well but their finish is at hand. Though now very small they continue to sell for \$1.50 per 100 but the old plants must go to make room for the young stock. Some very good lilies, for the season, have been received from outside points during the past week and the orchids and lily of the valley have been used to good advantage in funeral work.

## CLUB OUTING.

The annual outing of the club was held at Hunt's park, Huntsville, Md., on the afternoon of July 12. The weather was favorable, a shower in the morning having cooled the air. About 200 attended and everybody seemed to enjoy themselves. For the small sum of fifty cents, the committee furnished transportation by electric cars to the park and return and this included an abundance of ice cream, cake and light drinks. There was a baseball game, quoits, bowling and a variety of other races for women and children. The ball game was between wholesalers and retail teams. Milton Thomas and a band of husky followers from the market represented the wholesalers. The retail team was made up from employees of different stores. Wholesale team—Redman, Reynolds, Riley, Smith, Johnson, Richard, Sutton, Price and Donnelly. Retail team—Thompson, Smith, Seaton, McCabe, M. Smith, Dalglish, McCabe, Schores and Eicker. The game was decided in favor of the wholesalers, 4 to 3. Some of the retailers thought that they were playing against a combination of wholesalers with the umpire but no violence was attempted. In quoits, Jos. Hardy was first, Geo. C. Shaffer second and Geo. H. Cooke third. Mr. Cooke is somewhat handicapped in games by his lame hand. In pitching the ball in the basket, Mrs. Geo. C. Shaffer won first prize, Mrs. Holts second. In a similar event for young ladies, Florence Guttman was first, Mary Kirmael second. Secretary

Oehmler, W. W. Kimmel and others of the committee managed a number of games for the little boys and girls and the tots enjoyed themselves immensely. President Mayberry, W. H. Ernest and Geo. Walker looked after the refreshment booth, Capt. Ernest being particularly interested in seeing that everybody received a plentiful share with no "swiping." The members of the bowling team generously turned over the alleys to the amateurs, who, if they made no high scores, got practice and amusement out of it. The venerable W. R. Smith was present and when he talked was always the center of an interested group. Among his good sayings was, "I am proud of my profession and if I had it to do over again I would do the same thing." For all that makes for the elevation of the business you can count on this grand old man's support. There was considerable disappointment over the absence of W. F. Gude.\* Plying machines are getting to be everyday sights around this city and it happened that Aviator Atwood selected that day to alight on the White House grounds and visit the President. As they always need a florist at any notable event, Mr. Gude was selected to escort Mrs. Atwood, mother of the aviator, to the White House and present her to the President. A. F. F.

\*The Washington Post of July 13 relates how W. F. Gude was found by a fellow aviator a mile from Huntville with the batteries of his electric runabout exhausted. The runabout was abandoned and he was motored to the outing.

## Massachusetts Horticultural Society.

The annual sweet pea exhibition was held in the society's hall July 15-16, but was not as large as in previous years, owing to the great heat and unprecedented drought of the last few weeks. W. J. Clemson (J. O. Christiansen, gardener) of Taunton had a fine display of sweet peas. R. & J. Farquhar & Co. exhibited a remarkably beautiful assortment of lilies, among which were rare specimens discovered in northern China by E. H. Wilson. Two tables filled with vases of Lillium miriophyllum with a background of hardy, herbaceous plants, including hemerocallis Japanese iris and other plants made a most beautiful display. A fine exhibit of Iris Kaempferi was made by Dr. Harris Kennedy of Milton. Following are the awards:

Sweet Peas—Display of thirty distinct named varieties filling thirty vases, twelve sprays in each vase, cut with their own foliage: W. J. Clemson, first. Best twelve varieties, named, six sprays of each: Frederick Mason, first. Fifty sprays any named white variety: Frederick Mason, first; W. J. Clemson, second. Fifty sprays, light pink or blush: W. J. Clemson, first. Fifty sprays Rose: W. J. Clemson, first. Fifty sprays lavender: W. J. Clemson, first; Frederick Mason, second. Fifty sprays blue or purple: W. J. Clemson, first. Fifty sprays of crissums: R. J. Clemson, first. Fifty sprays orange or salmon: W. J. Clemson, first; W. J. Clemson, second. Frederick Mason, third. Fifty sprays any other color: W. J. Clemson, first. Gratiolus—Frederick Mason, collection of sweet peas: Mrs. E. M. Gill, display of cut flowers. Silver Medal—R. & J. Farquhar & Co., display

# HYDRANGEAS

## For Summer Flowering

We have an unusually fine lot of Hydrangeas, which have been held dormant all winter. These plants are now in bud and bloom, and will flower in fine shape during July and August. We have a fine lot of **Blue H. drangeas**, as well as pink. Plants are in splendid shape for immediate use, and will flower during July and August—at a time in the year when they are in the greatest demand. We can furnish these plants in ordinary butter tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs, painted green, with handles, as follows: Well budded plants in 14-in. tubs, \$3.00 each; 16-in. tubs, \$4.00 and \$5.00 each.

# FERNS

We have an exceptionally fine lot of **Boston Ferns** of the *Harrisii* type; also a splendid lot of **Pierson Ferns**. Good bushy, well-grown plants in 8-in. pots that will please the most critical buyer, **\$1.00 each**.

## Lilium Harrisii, The Bermuda Easter Lily.

We offer a selected and carefully grown stock of the original pure *Harrisii*. There are only one or two lots of bulbs on the island as good as the stock that we offer. We take pleasure in offering this stock, because it will be found to be very superior to the average stock that is generally offered. This is one of the healthiest and cleanest lots, and will give much better satisfaction than the stock usually obtainable. Our customers who had *Harrisii* from us last year stated it was the best they had received in years. We have only a limited stock, which we are offering, and when stock is exhausted, we shall have no more to offer this season.

Fine selected bulbs, 6-7 inch, 350 to the case, **\$16.00** per case, or full 1000 lots at **\$45.00** per 1000; 7-9 inch, 200 to the case; **\$17.00** per case, or full 1000 lots at **\$80.00** per 1000; 9-11 inch, 100 to the case, **\$18.00** per case, or full 1000 lots at **\$175.00** per 1000.

# Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established

Order Now for Fall Delivery

We grow all our Kentias, above 6-in. sizes, in cedar tubs made especially for us, avoiding breakage of pots in shipments and giving better satisfaction to our customers; and while they cost us a great deal more than pots, we sell the plants for the same money. We order these tubs by the carload. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see our stock before placing your order.

20 minutes ride by rail; 100 trains every weekday; Railway Station Jenkintown.

## Joseph Heacock Company's Price List

### Areca Lutescens

| Pot   | Plants in pot | In. high      | Each   |
|-------|---------------|---------------|--------|

## The Seed Trade.

### American Seed Trade Association.

Leonard H. Vaughan, Chicago, President;  
Marshall H. Duryea, New York, First Vice-  
President; Edgar Gregory, Marblehead,  
Mass., Second Vice President; C. E. Kend-  
el, Cleveland, O., Secretary and Treasurer.  
Next annual convention, June, 1912.

FRENCH cables, July 17, report free-  
zias a short crop and under grade.

ALPENA, MICH.—Rogers Bros. report  
that peas are being cut very short by  
the drought.

IMMORTELE prices will be much  
higher. Such are the indications by  
latest French cables.

QUARANTINE restrictions on account  
of the cholera scare may delay French  
bulbs at the seaports.

PRESIDENT LEONARD H. VAUGHAN is  
at Cleveland this week consulting with  
Secretary Kendel on American Seed  
Trade Association matters.

THIS weather favors the tramps who  
represent themselves as the friends or  
employees of well known men in the  
trade in seeking loans or in passing  
worthless checks. Look out for them.

VISITED CHICAGO: Arthur B. Clark,  
of the Everett B. Clark Seed Co., Mil-  
ford, Conn., enroute to Sister Bay,  
Wis.; A. Sluis, representing Sluis Bros.,  
Enkhuizen, Holland, on his maiden  
trip, calling on the seed trade.

GOING standpat congressmen one bet-  
ter, not satisfied with trying to put  
the seed business under a prison pen-  
alty law, Mr. Reeves, a representative  
in the Georgia legislature, introduced  
Bill No. 97 June 30 to prevent the sale  
of cotton seed from August 15 to De-  
cember 1. Will Mr. Reeves kindly ex-  
plain why the proposed bill gives the  
cotton seed dealers three and one-half  
months vacation?

### The New York State Seed Bill.

A seedsman in position to know says  
"Assemblyman Gregg's pure seed bill,  
as it stands, looks to us to be uncon-  
stitutional, as, on page 2 line 12 it  
reads: "No wholesale or retail dealer,"  
which in our opinion would make the  
bill class legislation, in that it permits  
the farmer or producer to dispose of his  
seed to any person without making him  
liable to the law, whereas the dealer is  
held strictly accountable for every  
pound of seed he may sell.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale  
Trade Only.

SAN JOSE, CALIF.

### California Seed Crops.

The Braslan Seed Growers Co. re-  
ports conditions of California seed crops  
July 11 as follows:

Onion prospects good, but risks of  
blight are still in front of the crop.

Carrot, one-third crop; Long Orange  
a failure.

Radish—we expect to make a good  
delivery.

Celery, endive, lettuce and mustard,  
good.

Parsley and parsnip, very short.

Salsify, delivery will be low.

Sweet peas, far below average.

### French Bulbs.

The French growers of bulbs are try-  
ing to strengthen the wavering position  
of those members who have not yet  
sold their crops and to prove that the  
demand will finally equal their supply.  
Whether all will finally be sold or  
called for evidently neither the growers  
nor dealers there, much less importers  
here, can at this writing predict. We  
translate from a French trade publica-  
tion an account of one of these grow-  
ers' meetings, held Sunday, July 2, in  
the Cafe Ghilla, at O—S railway station.

Toulon, France.—A reunion of the  
growers of Narcissus Paper White  
Grandiflora was held July 2, compris-  
ing those of the syndicate and those  
outside of the syndicate. M. Lazare  
was secretary. Chairman Bevilacqua  
explained the conditions under which  
the Syndicate of Defense of Agricul-  
tural Interests of the Coast fixed the  
rate at 20 francs per 1,000 with, as  
they believed, full knowledge of good  
reasons therefor. M. Pichaud of the  
Syndicate of Growers of Flowering  
Bulbs of Ollioules declared that there  
will be a deficit of 60 per cent of the  
normal crop. M. Simon Emeric pro-  
duced figures to show that those grow-  
ers who have sold at 18 francs under  
erroneous estimate of crop yield will  
with difficulty be able to deliver 50 per  
cent on the basis of sales of preceding  
years. M. Albert Oudinot pointed out  
the advantages obtained by the syn-  
dicate which holds at the service of any  
embarrassed grower the capital supplied  
from the rural Toulonnaise fund of  
mutual agricultural credit. At the  
close of the meeting a resolution was  
adopted urging those growers of Nar-  
cissus Paper White Grandiflora who  
had not sold to 20 francs per 1,000  
formerly fixed. The members were also  
pledged not to sell bulbs of the size of  
12 centimeters and under, these not be-  
ing of merchantable measure and their  
sale prejudicial to the best interests  
of the growers of this crop. At this  
meeting many growers joined the syn-  
dicate.—P.

### Clark Company's New Buildings.

The Green Bay, Wis., newspaper an-  
nounces that The Everett B. Clark  
Seed Co., of Milford, Conn., has recent-  
ly purchased a building site adjoining  
its present property at Green Bay, Wis-  
consin, and now owns a block of land  
178x410 feet, bounded on one side by  
the tracks of the Chicago and North-  
western railway, on another by the  
tracks of the Green Bay and Western  
railway and on the third side by the  
water.

On the site recently acquired, the  
company now has in process of erection  
an addition to its seed warehouse 60x  
100 feet, three stories and a basement.  
The construction is of brick. Additional  
equipment is being provided in the way  
of equipment for 95 additional pickers,  
an additional Otis elevator, an addi-  
tional clipper cleaner and so on. Con-  
tract specifies that the addition shall be  
ready for occupancy by October 1, 1911.  
The company's other warehouses used  
for the handling of seed, peas and  
beans are located at Sister Bay, Wis.,  
and East Jordan, Mich.

This same company is also erecting  
a seed warehouse of brick construction  
at Milford, Conn., adjacent to the  
freight depot. The building at Milford  
is to be 38x62 feet, three stories and a  
basement and will be completed in time  
for use this coming fall.

### Locust Trees From Seed.

The seeds of locust are very hard and dry, and if planted in this condition many will fail to germinate, and all of them will be very slow. They should be first treated with hot water, states the news letter of the Colorado Agricultural College, in the following manner: Place about one-half pound of seed in any can or jar that will hold about one gallon, and which will not be broken by hot water. Pour two or three quarts of boiling water upon the seeds, cover and allow to stand over night. When the water is poured off, it will be found that many of the seeds have doubled in size and become softened. These can be selected and planted immediately, while those that remain should be again treated until all of them have swollen. Plant in garden soil about one inch deep and after the plants break through the ground they should be cultivated. It is best to dig the trees at the end of the first season, tie in bundles, and bury in a well drained location, covering with six inches of earth. The next spring they can be planted in their permanent quarters.

LEXINGTON, KY.—Miss Fannie D. White, who purchased the greenhouses of W. S. Bell on West Main street, is building and re-modeling the place, and has begun to plant five houses with carnations. The place on Georgetown street will be devoted to decorative and bedding plants. A fine lot of poinsettias for Christmas are in splendid condition.

### Asparagus Palmetto.

ED. AMERICAN FLORIST:

Not having had much experience, will you kindly advise me in regard to the culture of Asparagus Palmetto? During the growing season should all the growths not fit for the table be cut or pulled away and nothing left but the strong crowns? When should cutting be stopped and everything allowed to grow?

ANXIOUS BEGINNER.

The culture of Asparagus Palmetto will not differ from the other varieties. There are certain rules that apply to all asparagus. The most important rule is to feed liberally, so much so that it may almost be said asparagus cannot be overfed. This means manure and fertilizers both. Any fertilizer should abound in potash in some form. A young asparagus bed should not be cut at all the first season, nor the second; the third year if strong cut everything clean for a short period, which is thirty days. The fourth year the normal cutting can be practiced, which means about 60 days, cutting everything as fast as of proper size. When cutting ceases the field should be carefully cleaned of weeds and well cultivated and fertilized, and from then on nothing should be cut away until hard freezing weather, when the tops can be mowed off and burned to destroy their own seed, which is as much a nuisance as any weed seed. It must be borne in mind that any spring growth for cutting is really built up the previous season, hence we must get a strong growth soon for next year's cut. Any summer neglect cannot be remedied in the spring.

Summary: Well drained land, plenty of room, ample feeding, clean culture, several years' start before cutting, are the essential points to asparagus growing.

MARKETMAN.

### Does it Pay to Spray Potatoes?

For the last four years the weather has been dry and unfavorable to potato blights and rots, and potato growers have been asking this question for many years. "Does it pay to spray potatoes?" The New York Agricultural Experiment Station has been carrying on a ten year experiment, starting in 1902 with the idea of solving the question. Beside these experiments for eight years the station has co-operated with farmers in different parts of the state in so-called business experiments and 207 volunteer experiments were carried on during seven years. The results at the station were to date an average increased yield of 98 bushels per acre where the vines were sprayed every two weeks and 72 bushels per acre where sprayed three times. In the business experiments the average increase in yield per acre was 38.4 bushels with a net profit of \$15.25 per acre, and the average gain for seven years in the volunteer experiments was 53.4 bushels per acre.

### Irrigation.

This season has been an excellent one to bring out the weak and strong points of irrigation. After a cold and wet April we jumped into a hot May, so to speak spring was cut out altogether; it was a change from winter to summer. At this date it is more than five weeks since the last rain coupled with extremely high temperature and dry winds.

We have part of our ground covered with overhead sprinkling pipes. During the month of May we were very short of water owing to the slow completion of a contract for a well. Since the first of June we have had ample water, but the capacity of our machinery is insufficient to cope with the large acreage and the fierce drouth. These conditions have brought out some remarkable results, well worth noting. As before said we were short of water in May—hence had to use it sparingly. We decided to use the scant supply to spray our crops during the latter part of the day, rather than soak any one piece. The result was very satisfactory, because there was enough sub-soil moisture to feed the plants.

A good many people have an idea that water shall not be thrown on plants in full sunlight. No greater mistake could be conceived. The damage to a crop occurs during the noon hours, and if we could spray our fields between nine and three o'clock, say once an hour, we could overcome severe drouths very well. In our case there was never enough water used to wet the earth so as to form a crust; we used the wheel hoe freely to keep the soil much in shape and only enough water to prevent flagging in the hot sun. The results obtained were beyond expectations. Plants made excellent progress and the cost of this treatment would be no greater than the constant weeding and hoeing needed in a wet season; added is the high market prices for all goods of fine quality.

Since the first of June conditions have changed as the subsoil moisture is slowly playing out and we must resort to heavy watering if rains do not come soon. We find we can maintain proper moisture easy enough in quiet weather, but in driving winds the spray

is evaporated as fast as supplied. During such spells the night must be used to put water into the ground as evaporation is less. MARKETMAN.

THE Northern Indiana florists had their picnic at Winona Lake July 19.

MAPLEWOOD, MASS.—BURGESS & COONEY are erecting an addition to their greenhouse plant on Lebanon street.

BROOKLYN, N. Y.—The steamships Minias Geras and Zulia which arrived July 6 and 9 respectively both had large shipments of orchids in their cargoes.

### The Catalpas at Arnold Arboretum.

In the "Bulletin of Popular Information" issued by the Arnold Arboretum June 20, attention is called to the catalpas, philadelphus, ligustrums, potentillas and rhamnus (buckthorns). Of the catalpas the following is published:

The Western, or, as it is sometimes called, the Hardy Catalpa, *Catalpa speciosa*, is in flower this week. The true characters of this tree were overlooked by botanists until about thirty years ago when the remarkable durability of its wood first called much attention to it. It is a native of the valley of the Mississippi where on the rich, moist and often inundated bottomlands of streams it sometimes attains the height of one hundred feet. It differs from the other American species, *Catalpa bignonioides*, which will not be in flower for two or three weeks, by the longer points of the leaves, by the larger flowers only slightly spotted on the inner side of the corolla and borne in short open few-flowered clusters, and by the stouter pods. It is a much harder tree than the more southern species and has a more erect habit, and it grows more rapidly; indeed it often grows too rapidly and then sometimes suffers in cold winters from splits in the trunk. At one time much was expected of this tree and the agricultural and horticultural journals were filled with descriptions of its many virtues. All the catalpas have only a thin layer of sapwood, and the whole trunk is therefore almost entirely composed of heartwood; this resists decay for a long time, and there are well authenticated records of catalpa fence-posts having remained in the ground for half a century without deterioration. For the production of fence-posts, telegraph and other poles, no other tree gives a better yield if it is planted in rich soil. Catalpa wood is very soft, and the claims that this tree would supply the railroads with the best possible ties have not been fulfilled for the wood is too soft to resist the cutting of the rails. If as a timber tree the Western Catalpa is less valuable than was at one time supposed, it is the handsomest of all the catalpas which have flowered in the United States and a fast-growing, desirable, ornamental tree.

*Catalpa ovata* (sometimes called *Catalpa Kaempferi*), a native of central and western China, although first brought to this country from Japan where it has been cultivated for more than two centuries, is not yet in flower. This is a small tree which in July produces in great profusion its small light yellow flowers which are succeeded by slender pods. It is harder than either of the American species but very inferior to them as an ornamental tree. A hybrid of this tree and one of the American species, *Catalpa Tzeilii*, is a valuable ornamental tree. It appeared several years in the nursery of J. C.

Teas in Indiana, and is a perfectly hardy and fast-growing tree with larger leaves than either of its parents and enormous flower-clusters containing from two hundred to three hundred flowers. The corolla is slightly tinged with yellow and is marked by broad purple stripes. This hybrid will not be in flower until next month.

*Catalpa Bungei* is established in the arboretum where it appears perfectly hardy. This small tree is a native of northern China where it is often planted in temple gardens and was introduced by the Arboretum into the United States and Europe a few years ago. It has very dark green leaves and small yellow flowers in small clusters and, although it has not yet flowered here or in Europe, it will probably be of slight value as an ornamental tree. There is another plant usually called *Catalpa Bungei*. This is a dwarf, round-headed bush which is often planted in formal gardens where it is frequently seen grafted on the tall naked stems of one of the tree species. This dwarf, which never flowers, is really a form of *Catalpa bignonioides* and how it got the name of *Catalpa Bungei* is a mystery which will probably never be cleared up. The right name is *Catalpa bignonioides*, var. *nana*, but nurserymen will probably continue to sell it as *Catalpa Bungei*. Two Chinese catalpas raised from seeds collected by Mr. Wilson in the eastern part of the empire have passed successfully through the winter but it is too soon to speak of their value. The catalpas are planted in a large group on the eastern slope of Bussey Hill between the ashes and the elms, and above the bank occupied by the lilac collection.

### The Chestnut Bark Disease.

In the report of the botanist of the Connecticut Agricultural Experiment Station for 1909-10 we find the following with reference to the chestnut bark disease, which has caused such extensive ravages in many places during the past five or six years: "In 1908 we gave an account of this trouble. At that time it had been reported in every one of the twenty-three towns of Fairfield County, and in eight towns in New Haven County, making thirty-one towns altogether. At the time of writing this article (March 20, 1911), its known distribution is as follows: Fairfield County, twenty-three towns; New Haven County, twenty-one towns; Litchfield County, fourteen towns; Hartford County, seven towns; Middlesex County, two towns; Tolland County, three towns; Windham County, one town; New London County, one town. This makes a total of seventy-two towns, of which only seven are east of the Connecticut River. We have no doubt that a more thorough survey of that region would reveal its presence, in an inconspicuous way, in quite a few more towns.

"This increased distribution in the last three years may indicate that the disease has spread to those new localities, or it may mean that a more thorough search has revealed its presence, and that it has also become more prominent because of the four years of drought that have occurred, beginning with 1907. There are those who believe, however, that unfavorable weather conditions have nothing to do with the prominence of this disease,

which they suspect to be a recent importation into this country from Japan. If this theory is true, then we are just beginning to feel the effects of its devastation in this state. Personally, we have not yet found convincing proofs to cause us to change our views expressed in the above-mentioned Report. These views, briefly given, are (1) that the fungus is a native, weak parasite, usually very inconspicuous in its damage, and therefore rarely noticed; and (2) that the unusual winter of 1904, by severely injuring chestnut trees, gave it a chance to spring into unusual and sudden prominence, which it has since maintained and even increased by reason of four successive years of drought, that have injured not only chestnuts, but many other trees.

"We do not, and never have, questioned its seriousness. Trees that have been marked in two localities by the botanical and forestry departments have uniformly showed injury greatly in excess of that indicated when first examined. If our theory is correct, we do believe, however, with the return of several normally wet years the trouble will gradually grow less rather than more conspicuous as it should if weakened vitality of the trees has nothing to do with its development."

NEW BEDFORD, MASS.—An exhibition of rambler and other roses was held in the library building July 7 by the New Bedford Horticultural Society. In the evening the members listened to a paper by A. J. Fish on rose culture. Many of the prize winners at the show held June 27 have donated their premiums to the Society to be awarded again next year.

### CALCEOLARIA HYBRIDA Extra Choice Mixed

Our mixture is composed of the choicest selection of the tigered, marbled, spotted and variegated varieties, and we know will give entire satisfaction. Trade pkt. (1,000 seeds), \$0.50. 3 trade pkts. for \$1.40.

### GLOXINIA HYBRIDA

Vaughan's Columbian Mixture is made up by ourselves from the choicest spotted tigered, edged, marbled and splashed sorts of the upright and horizontal type, and includes such choice new sorts as Emperor William and Frederick, Princess Louise, DeLancey, etc., and we know that better seed is not to be had at any price. Trade pkt. (1,000 seeds), \$0.50; 3 trade pkts. for \$1.40.

### MIGNONETTE

New York Market. This is an extra choice strain of Mignonette for greenhouse culture. Our seed is greenhouse grown, raised by a most careful grower. The plants grow from two to three feet high, and produce flower spikes up to 20 inches long, according to the quality of the soil, weather and treatment. Trade pkt. (about 1,000 seeds), 50c; per oz., \$7.00; ¼ oz., \$1.00.

### VAUGHAN'S INTERNATIONAL PRIMULA MIXTURE

This mixture is composed of the most salable colors of Single Flowering Chinese Primulas, the best whites, pinks and reds, with a sprinkling of other colors, enough to give a large variety of colors, the most important shades predominating. We have taken special pains to make this mixture as complete as possible, and unreservedly recommend it to everyone.

Trade pkt. of 350 seeds, 50c; 5 trade pkts., \$2.00; per 1-16 oz., \$3.25.

### ASPARAGUS SPRENGERI

100 seeds, 15c; 250 seeds, 25c; 1,000 seeds, 75c; 5,000 seeds, \$3.25.

Our list of "Seeds for Summer Sowing," now ready; if you have

### VAUGHAN'S GIANT PANSIES Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are easily grown as really, require little care and bring better returns. Trade pkt. 50c, ¼ oz. \$1.00, ½ oz. \$2.00, oz. \$8.00.

### Vaughan's "Giant Pansy Mixture"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. Trade pkt. 25c, ¼ oz. 60c, oz. \$4.00, ¼ lb. \$14.00.

### Vaughan's International Pansies

#### The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt. 50c, ¼ oz. \$1.50, ½ oz. \$5.00, oz. \$10.00.

### CINERARIA

#### Vaughan's Columbian Mixture

It consists of a mixture made up by ourselves of the choicest English, French and German strains, and cannot be excelled in variety of colors, size, shape and substance of flowers, and perfect habit of plant. Trade pkt. (500 seeds), 50c; 3 trade pkts., \$1.40.

### Vaughan's Giant-Flowered Cyclamen

Pure White (Mont Blanc); Dark Crimson, Rosa von Marienthal, "Daybreak" pink; Dark Rose, White with Crimson Eye. Per 100 seeds, \$5.00; 1,000 seeds, \$5.00; 250 seeds of a color at the 1,000 rate. ## VAUGHAN'S SEED STORE

25 Barclay St.,  
NEW YORK

Greenhouses, Trial Grounds and Nurseries: Western Springs, Illinois.

### Nassau County Horticultural Society.

The regular monthly meeting of the society was held in Pembroke hall July 12, President Trepass occupying the chair. Messrs. Everett, McKenzie and Carter were appointed judges of the exhibits and their decisions were as follows: Society's prize, 25 white sweet peas, J. McDonald, first; 25 pink sweet peas, J. McDonald, first; 25 any other color, J. McDonald, first. J. Ingram special prize, 12 varieties sweet peas, 25 sprays of each. Geo. Barton, first. Honorable mention was awarded H. Grant for sweet peas; F. Petrocchia for cucumbers; and the thanks of the society to F. Petrocchia for Zepplin beans. The secretary read a list of those who had offered special prizes for the fall show and it was moved and seconded that a very hearty vote of thanks be accorded to all donors.

It was decided that the dahlia show be held in Pembroke hall September 29 and the executive committee were requested to draw up a schedule for the dahlia show and report at the next meeting. It was decided to have the annual outing on August 10 and it was left with the executive committee to make all arrangements and issue the tickets for sale.

F. Adams of Quogue, L. I., gave a very able talk on "Hum Leaf Mold," which is being produced by Francis & Camerden, Quogue, L. I. Mr. Adams was accorded a hearty vote of thanks. Eugene Moquin of Roslyn was elected to active membership.

The society's prize in August will be for 12 asters mixed, six Japanese lilies and 12 gladioli. Mr. Ingram's prize for four vases of asters, one each, white, pink, blue and rose.

E. WESTLAKE, Sec'y.

BROOKLYN, N. Y.—The plans for a \$40,000 laboratory and greenhouse addition to the Brooklyn Institute Museum on Eastern parkway were registered through the architects, McKim, Mead & White.

MINNEAPOLIS, MINN.—The premiums for the first nasturtiums grown by each boy or girl in the 13 wards have been awarded. The seed was distributed to the school children and the first flowers were picked 39 days after the children were given the seed.

WATERBURY, CONN.—The certificate of incorporation of Alexander Dallas, Inc., was filed with the secretary of state July 7. The capital stock is \$40,000 and the incorporators are Alexander Dallas, Catherine Dallas and Walter Dallas.

## THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

CHICAGO.

### Greenhouses for Bedding Stock.

ED. AMERICAN FLORIST:

Can you inform me what size houses would be the best for growing bedding stock for park purposes?

Answering the inquiry of "H. H. T." one should know within reasonable limits what quantity of stock should be grown in order to answer the question intelligently. To my notion the ideal plant house is 18 feet wide and 100 feet long. The 18-foot width gives three five-foot benches and two 18-inch walks. If it is desired to have the walk a trifle wider the benches may be made 4 feet, 10 inches and then there will be two 21-inch walks.

If more than one house is to be built, they can be on the ridge and furrow plan with some of the iron gutters which are now so popular and without partition walls. Of course the understanding is that the houses will run north and south and be even span. It will be advisable to build them seven feet in the clear at the gutters and give the roof a good strong pitch. In this way head room will be gained so that one can walk from one house to another under the gutters. It will probably not be profitable to operate an establishment of less than one 18x100 ft. house so built as to allow future additions—that is with a gutter along one side which may be utilized when the next house will be built. Of course it will be possible to build two 50-foot houses side by side and subsequently lengthen them. But this is an expensive proposition, as in lengthening them, it is not only necessary to take out the ends of the houses but also to change the heating pipes, while with a house built 100 feet long, no change in the old house is necessary at all. In building the addition the old gutter is utilized and a new one set up on the other side so that houses may be added indefinitely.

The writer does not believe that houses over 100 feet long are advisable for growing stock, as the travel in carrying in and carrying out the plants is so great in long houses. W. N. RUDN.

## BOBBINK & ATKINS

World's Choicest Florist and Nursery Products.

We are growing in our greenhouses and in our 250 acre nursery a large variety of material constantly in demand by florists. Our Illustrated General catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

### Perennials for Next Season.

ED. AMERICAN FLORIST:

Will you kindly furnish me with the names of a few perennials that can be grown in frames that will make blooming plants for bedding out next season? What is the best manner for treating such plants? S. G. N. Kansas.

It is not too late to sow most of the seeds of hardy plants and get good strong roots to plant out next season, but they must have frame protection at the time of sowing and afterwards through winter until spring. A good seed bed may be made by using as many sash as are needed, make the soil fine, sow in drills, and protect with either lath screens or cotton cloth after sowing to keep the frame cool and moist. When large enough the seedlings may be transplanted, shaded for a week or two until established and then let them grow until winter when protection must be given first with a sash and later straw or hay on top to keep the young plants from freezing and thawing. The covering may be taken off early in spring and plenty of air given to keep them dormant as long as possible until it is time to bed them outdoors.

Should any seeds fail to grow this year, they may come in spring after a freezing. This is often the case with some perennial seeds such as columbines, trolius, asphodels or crenurus. Seeds that ripen later on may be sown in the greenhouse after January and be strong plants to set out in spring fol-

## Primroses

lowing. Most of these will bloom the same year. The dianthus, sweet williams, delphiniums, coreopsis, agrostema, campanula, hollyhock, Lobelia cardinalis, gaillardias, Papaver orientale and the dwarf perennial kinds, all these will make growth enough to winter well if sown at once.

E. O. ORPET.

### Nierembergias.

ED. AMERICAN FLORIST:

Can you inform us when the seeds of Nierembergia should be sown in order to have good specimens for May?

S. G. N.

To have nice plants of Nierembergia for May the seed should be sown the first of February and potted up as required. If large plants are wanted cuttings can be made in August and grown on in the cool greenhouse on a light, airy shelf and potted in 5-inch pots in March in which they will flower and can be transplanted to beds or vases when the weather will permit in the spring.

W.

## Araucaria Excelsa, Robusta and Compacta

You will never be sorry. It will pay you well. Do it now,  
and lay in a stock of Araucarias. Every day is valuable to  
you, because they grow into money for you.

### Araucaria Excelsa Our Specialty.

**Warning**—Don't be deceived. Now, as well as  
for the last twenty-five years, we hold the ground  
as leaders in importing, growing and shipping of  
our specialty, the Araucarias.

**Araucaria Excelsa, Robusta compacta, Glauca,**  
and Palms, etc. Florists, you all know we are  
leaders for the last 25 years in importing, growing  
and shipping of this so well known evergreen  
decorative plant, the **Araucaria**, more in favor  
than ever, from Atlantic and Pacific Ocean to  
every flat of the Araucarias is interesting, there-  
fore no argument is needed for our goods. We  
know what our customers need, therefore we have  
provided and set aside special specimen plants.  
Spring 1910 importation, lawns, porches, veran-  
das, bungalows, private summer residences, the  
hotels and boarding houses on the seashore and  
elsewhere this plant is one of the most desirable  
evergreen decorative plants adopted for this above  
mentioned purposes.

**Araucaria Excelsa**, raised from top cut-  
tings, 6-7 inch pots. 4 to 5 years old 5.  
6 and 7 tiers 25, 28, 30, 35, 40 in. in  
height. \$1.00 \$1.25, \$1.50, \$2.00 to \$2.50 each

**Araucaria Excelsa Glauca and Robusta**  
compacta, 6-7 in. pots, fine bushy  
plants. \$1.25, \$1.50, \$2.00 each

**Araucaria Excelsa**, new importation,  
out of 5, 5½, and 6 in. pots, 2 to 3 years  
old, 3, 4 and 5 tiers, 10, 12, 14, 16, 18,  
and 20 inches high. 40c, 50c, 75c and \$1.00 each

**Robusta Compacta Excelsa Glauca**, 5½  
and 6 in. pots. \$1.00 to \$1.25 each

**Kentia Belmoreana**, 4 year old, 30 to 35 inches  
high, \$1.50

**Kentia Forsteriana**, 4 year old, 30 to 35 inches  
high, \$1.50

# Greenhouse Heating

### *Is a Perplexing Question to all Florists*

*Except Those Using*

## Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

**MOREHEAD MFG. CO.**      Department "N"      **Detroit, Mich.**

**Send for  
Catalogue.**

**Use Kroeschell Boilers and Kroeschell Generators  
and Piping System; Satisfaction Guaranteed.**

"The Kroeschel generator purchased from you some time since is giving excellent satisfaction. It adds to the capacity of the boiler on account of the increased circulation of hot water and consequently less piping is required, and it also seems to maintain a steadier and more even temperature all over the houses where it is in use. For instance, the new house I have just completed 43 feet wide by 255 feet long, and piped according to your instructions, is not varying more than two degrees all over the house at any one time, and I consider that remarkable for so large a house. Another advantage is that where roses are grown, sulphur applied to the pipes for checking mildew is much more effective."

STE HEN MORTENSEN, Southam, on, Pa

# The Truth About Boilers

## This Being Number Four of Four Frank Talks

THE first three frank talks were about the Square Sectional Boilers; this one is about the round boilers for both steam and water.

The old cylinder stove was the first type of coal stove used for house heating; so it was only natural that the first steam and water boilers should be similar in shape.

The problem with round boilers has always been to get sufficient depth to the fire pot and enough direct and indirect heating surfaces without making a boiler abnormally high—which in turn meant a serious increase in their cost to you. Many round boilers, although comparatively low, are great coal heaters, because the burning gases go practically direct from the fire pot to the chimney flue, which of course means a good half of your money is going up chimney instead of into your coils.

## The Burnham

Round Sectional Boiler is made on the same general economical principles as the Burnham Square Sectional, with its deep fire pot, large direct heat-absorbing surfaces—and the back and forth fire travel that grabs the heat from the gases before they reach the chimney.

A round boiler that will grab the largest amount of heat is the boiler for you. For your further Burnham conviction, write us, telling just what your heating proposition is, and we will answer you fully, stating the size boiler best suited to your needs and its cost. A catalog that tells things straight from the shoulder will be enclosed in our letter.

The Burnham Round Sectional Water Boiler. Made also for steam.

The grates are the triangular revolving type, that quickly and easily cut out the ashes and leave the live coals.

The base is equipped with clinker prongs around the sides, which prevent the wedging of clinkers and breaking of grates.

**Lord and Burnham Co.**      **Factories:**      **Irvington, N. Y. and Des Plaines, Ill.**      **New York**      **Boston**      **Philadelphia**      **Chicago**

Mention the American Florist when writing

**Which are you?** One of the old timey growers, with old methods and heavy shade casting houses—or one of the up-to-date hustling men who turn on the electric light and see things exactly as they are and spend their good dollars for the lightest, most enduring house money can buy? Which? It is a noticeable fact that owners of our Iron Frame Houses are money makers. They have got hold of the new century idea, that you have to spend money to make money. In other words they look upon one of our houses as an investment and not an expense. Stop looking at your business with a candle—get out of the shadow by turning on the full light of Hichings up-to-date ideas. Send for us at once and we will help you turn them on.

**Hichings & Company** Write to Our  
Main Office and Factory  
Elizabeth, N. J.  
Or call at our New York Office, 1170 Broadway.

# CYPRESS

Is a wood that has come into very general use in
